The budget documents have several purposes:

- As a **policy document**, they outline the financial policies that guide the development of the budget as well as articulate financial priorities and issues;
- As a **financial plan**, they provide, in dollar terms, the plans for the next several years;
- As a **operating guide**, the budget documents help City departments manage their day-to-day operations by providing important financial and policy information and by identifying the financial and staffing resources available to carry out their activities; and
- As a **communications device**, the documents give all readers a comprehensive look at the services provided by the City and the costs related to those services.

Volume 2 provides summary and detailed budget information on 2018 operations and 2019 and 2020 projections; and summary information on capital projects including financing for the capital program, set out in the following sections:

Page references on the Financial Summary direct the reader to more detailed information by service in the next section.
- ❖ The **Detailed Service Based Budget** section, categorized by responsible Standing Policy Committee, gives additional information about each service, including description, key goals, service level statistics, multi-year operating budgets and actuals by major account categories, revenue, expense and full-time equivalent position variance explanations, sub-services, as well as hi-level summary information of reserves and capital budget investments relevant to the service.

Basis of Budgeting

The 2018 to 2020 Tax Supported Operating Budget is balanced in 2018 with the 2019 and 2020 projections not yet complete, requiring further work in those years to balance revenues and expenditures. The 2018 Adopted Operating Budget and 2019 to 2020 projections were approved by Council in December 2017.

The City prepares a six-year capital investment plan, including related funding sources. The first year is adopted by Council and the five-year forecast is adopted in principle. The six-year capital view is required by legislation (The City of Winnipeg Charter). The capital budget for 2018 and five-year forecast was approved by Council in December 2017.

The City budgets for several funds – the capital fund; the general revenue or tax-supported fund; utility operations (Transit, Waterworks, Sewage Disposal, Solid Waste Disposal, Land Drainage, Municipal Accommodations); and Special Operating Agencies (Animal Services, Golf Services, Parking Authority and Fleet Management). Transfers to or from the General Revenue Fund and between funds are included in the budget. In addition, revenues and expenses for capital and special purpose reserves are included in the budget (see Appendix 3).

The basis of budgeting for the City is described in more detail in the following sections:

Expense and Revenue Recognition

The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis. The modified accrual basis of accounting records revenue when it is earned, measurable and available. Expenditures are recognized when the liability is incurred, except for certain expenses, for example, those associated with retirement allowances, accrued vacation, worker's compensation, compensated absences, and landfill liabilities which are budgeted on a cash basis. Debt servicing payments are budgeted for when due (depreciation of assets is not budgeted). Revenue from land sales is recorded in accordance with accounting principles used within the real estate industry.

The City uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based on receipt of goods and/or the legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Capital Assets

Capital assets are generally defined as those with a cost exceeding \$100,000 (non-recurring capital projects and recurring/ongoing capital programs) with a minimum 10-year life. These assets are budgeted for in the capital budget and the financing costs are expensed in the operating budgets. Major equipment or automated systems development projects are also included in the capital budget although their useful life may be less than 10 years. Land acquisition and local improvements are considered capital works regardless of expected cost. Smaller asset purchases are expensed in the operating budgets.

A multi-criteria approach to prioritize capital investment based on a triple bottom line approach, which includes assessing projects based on social, economic and environmental factors, has been developed as part of the City's asset management initiative. This prioritization methodology is utilized by departments for all capital projects, in order to prioritize/determine capital budget submissions/proposals for consideration in the capital budget process.

Service-Based Budget

The City reports budget information on a service-based basis (how much the service will cost and how the service is to be funded), regardless of which area or department delivers the service. The service-based budget is intended to provide more transparent reporting and a more direct link between budgets provided and the services delivered. As part of the budget document a more traditional, by department view is also provided (see Appendix 1, volume 2).

Capital Leases

Leases are classified as capital or operating leases. Leases which transfer substantially all of the benefits and risks incidental to ownership of property are accounted for as capital leases. All other leases are accounted for as operating leases and the related lease payments are charged to expense as incurred.

Debt and Debt Payments

The City may only incur debt for the purposes of capital expenditures. With the approval of the Provincial Minister of Finance, a borrowing by-law is passed by Council which authorizes borrowing for the capital budget.

Annual payments of principal and interest are budgeted in the City's operating budget as debt and finance charges.

Consolidation

The annual operating budget adopted by Council provides the spending authorization for each fund, and therefore the current year budget is adopted on a non-consolidated basis. That is, inter-fund transactions have not been eliminated in order to ensure full spending authority is provided. However, each year in the budget document, a consolidated budget is prepared for the previous year which eliminates inter-fund transactions. This historical consolidated budget is then available each year-end to allow comparison and variance reporting to the annual financial statements, also prepared on a consolidated basis.

Balanced Operating Budgets

The City of Winnipeg Charter requires that the City adopt a balanced operating budget for the current year (estimated expenditures for a fiscal year do not exceed the estimated revenues for the year). Council policy provides that year-end surplus be transferred to the Financial Stabilization Reserve. Any operating deficits arising in-year must be addressed in the next year's budget.

Reserves

Reserves are established by Council, as required for future financial commitments and are operated under the regulations and policies prescribed by provincial legislation or City by-laws as applicable. Budgets are prepared for reserve expenditures and revenues, and transfers to and from reserves are included in the tax-supported, utility, and capital budgets.

Fees and Charges

A Fees and Charges Schedule is published annually in accordance with the Fees and Charges By-Law (196/2008) to identify the current fees and charges administered by the City of Winnipeg and the authority under which they are administered. The Chief Financial Officer is authorized to increase annually any fee imposed by the City by an amount equal to or less than the rate of inflation. New fees or fee increases greater than inflation must be approved by Council unless specifically otherwise delegated. Normally new fees or fee increases greater than inflation would be included as part of the annual budget process.

Long-Term Capital Forecasting

Asset Management Policy F1-001 (adopted by Council on January 28, 2015), states that the Public Service will implement a comprehensive approach to managing the City's assets, to meet established levels of service at the lowest overall cost of ownership, at an acceptable level of risk. Winnipeg's City Asset Management Plan (CAMP) and the State of the Infrastructure Report (SOIR) is planned to be released in March 2018. The CAMP summarizes the inventory, overall replacement value, age and condition of the City's major asset groups. It also outlines the funding deficit and strategies associated with meeting assumed levels of service for existing and new infrastructure. In addition, this report serves as an action plan for continual improvement initiatives across the entire organization. Winnipeg's CAMP and the annual capital budget process are the tools to implement the city's long-term capital planning process.

 - Partnerships with other levels of government to fund priority projects (PTIF program)
 - Reduced cash to capital in 2018 to \$23.3 million (\$55.6 million in 2017) to assist with the operating budget deficit

- The City's tax supported budget has a structural deficit: sustainable revenue streams do not cover required expenditures
- Operating and Capital Budgets
 - New long-term growth revenue sources will be required in the future to address the growing structural deficit
 - Based on the 2009 study, Winnipeg's infrastructure deficit was expected to grow over 10 years to approximately \$7 billion
- Monitoring Liquidity
 - Actively monitored and projected to maintain financial sustainability and the City's credit rating

 - b. Amend Recommendation 1. M. by adding the words “reduced fares for low-income riders” after the words “limited to”.
 - c. Delete Recommendation 1. R. i in its entirety and replace with the following:
 - “1.R. i. That the Chief Administrative Officer or designate be delegated the authority to manage vacancies within City departments and administrative units within the scope of the 2018 operating budget without affecting the general level of public services as identified in the operating budget or overall civic staff establishment.”

 - “1.S.iv. That Council approve an additional increase in parking meter rates by \$.50 per hour (for a total increase of \$1.50) for all on-street parking meters in the City, and that \$1,000,000 of this incremental revenue in the Winnipeg Parking Authority be transferred to the General Revenue Fund to offset the transit route service rationalization.”
- ii. That the 2019 and 2020 projections be received and submitted to Council as information on the preliminary financial plans for those years.
- B. That the City’s mill rate be decreased from 13.063 to 12.987 in 2018, to reflect the general assessment, adjusted for new assessable properties, and for the purpose of raising revenue as required for the annual operating budget.
 - Note: This mill rate of 12.987 in 2018 includes a 1% property tax increase dedicated to the renewal of local streets, lanes and sidewalks; a 1% property tax increase dedicated to the renewal of regional streets and sidewalks, and; a .33% property tax increase dedicated for payments for the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass project, for a total property tax increase of 2.33%.

Should the unallocated equity balance be such that the full \$2,535,000 transfer cannot be made, any shortfall will be addressed during 2018.

- G. That Council remove any restrictions regarding the use of the net proceeds from the sale of the Winnipeg Square Parkade (as set aside in the November 25, 2009 Council report and any subsequent related reports) in the Winnipeg Parking Authority Special Operating Agency (WPA) and that the following be implemented:
 - i. Transfer \$595,000 from the WPA to the General Revenue Fund; and

* Variation in the number is due in part to a refinement of the inventory calculation. The Regional Streets Network increased in 2014 due to the opening of the Kenaston Extension. Truck Routes Lane Kilometres increased in 2014, however the net increase was reduced by the opening of CentrePort Canada Way. Lane Kilometres of Truck Routes increased in 2015 due to the opening of the St. Matthews Avenue extension. In 2016, the Regional Streets Network increased due to the twinning of Dr. Jose Rizal Way. Truck Routes Lane Kilometres increased with re-designation of streets in the Omand's Creek Industrial area, west of Route 90.

City Planning

Includes:

- Area Development & Renewal Planning
- City-wide Long Range Planning

Description

To manage a wide range of planning initiatives, such as the OurWinnipeg Development Plan and Complete Communities Direction Strategy, which guide growth and change in Winnipeg. The service reviews ongoing development proposals in a fair and objective manner to ensure the creation of sustainable and complete communities that are responsive to community values, while advising Council on planning processes and development applications. The service enables development and growth that follows the City's development plan through local area planning initiatives, policies, regulations, guidelines and tools while working collaboratively with stakeholders.

Key Goals

1. Support the implementation of OurWinnipeg through a range of effective tools and guidelines.
2. Ensure the City has an adequate supply of land to accommodate projected growth in a sustainable manner.
3. Enhance existing infrastructure and assets in ways that make most amenities for daily living universally accessible.
4. Integrate land use and infrastructure planning in support of the creation of complete communities.

* Geomatics has indicated that this year's reversal in contract to In-house surveys is due to position vacancies that have not been filled, resulting in higher overall costs to the City to undertake associated work. In addition, over the last few years they have seen a significant increase in the number of large scale jobs. Some, such as Phase 2 of Rapid Transit required the services of one staff member for approximately one year. Although this project took significant staff time, it is (like other projects) indicated with a numeric value of 1.

** This number represents a significant increase over last year's numbers. Restored survey monuments results from survey monuments established in new developments; these monuments are initially established by the developer so have not been counted in the past.

*** Greenfield refers to units built in areas designated as 'Emerging Communities' and 'New Communities'. 'Emerging Communities' are a subset of 'Areas of Stability - Recent Communities' that have been recently planned and are still under development.

**** Infill refers to units built in 'Areas of Stability', excluding 'Emerging Communities'.

* The number of library holdings has decreased due to a collection management program that focuses on removing outdated, worn and duplicate material across the library system.

** The increase in electronic visits to the library website is a representative of a trend seen over the past few years (and reflected nationally). The number has increased significantly each year. This is also due to the Library's increased use of social media and the resulting activity among citizens connecting through Facebook, Twitter, and other social media.

* The civic election in 2014 affected inbound calls, emails and online interactions.

** Call times and subsequently wait times increased due to a variety of factors including implementation of the new transit PEGGO system and a new Leisure Guide Registration system. Calls are also increasing in complexity with callers requesting more detailed information, especially as it relates to spring cleaning, snow clearing, assessment, taxation, and Transit.

*** Mobile app and in-person counter services launched September 2013.

Listing of Grants/Payments**

Grants included in this appendix are broken into three categories, as follows:

Annual Grant Agreements:

- Are grants / payments to organizations which provide demonstrable cultural, social or economic benefit to the community and where the City does not receive any goods or services directly in return for the funds (with the exception of community partnerships) nor do they expect repayment or any other financial return. Eligibility and entitlement requirements are reviewed annually.

Multi-Year Arrangements:

- Are grants / payments to entities where the City of Winnipeg has long-term contractual arrangements in place or the nature of the arrangement is long-term.

Other Programs:

- Are primarily grant programs where recipients are determined throughout the course of the year. With the exception of the per capita grants, the Director of the department responsible for each such grant program is delegated the authority to determine grant recipients.

The listing of Grants / Payments is not inclusive of all City of Winnipeg grants (e.g. grants from reserves authorized through separate reports, various value-in-kind grants, etc.).

The 2017 Budget has been restated to reflect reclassifications to conform to 2018.

Glossary

Accommodation Tax - A 5% levy on the purchase price of short term continuous accommodation of 30 days or less consumed and paid for after May 31, 2008. Amounts are collected in the Destination Marketing Reserve.

Assessed Value - Value determined by estimating the market value of a property for a specific reference year. Taxes are levied on the basis of the assessed value of a property.

Assessment Roll - A document that records assessments that are made in respect to properties described in the document and includes a real property assessment roll, a personal property assessment roll, and a business assessment roll.

Balanced Budget - The City of Winnipeg Charter enacted by the Manitoba Legislature defines an operating budget to be balanced when the estimated expenditures for a fiscal year do not exceed the estimated revenues for the year.

Basis of Accounting - The City of Winnipeg uses the full accrual basis of accounting. Revenue is recorded as it is earned and measurable. Expenses are recognized as they are incurred and measurable based upon receipt of goods or services and/or the creation of a legal obligation to pay. The City's financial statements are developed in accordance with generally accepted accounting principles for local governments, as recommended by Public Sector Accounting Board (PSAB).

Basis of Budgeting - The City of Winnipeg develops its operating budget for tax supported and utility operations on a modified accrual basis (see Modified Accrual Basis). Difference between the basis of budgeting and accounting include, for example, retirement allowances, vacation, workers compensation, compensated absences, contaminated sites, landfill liability and other accrued employee benefits which are budgeted on a cash basis.

Benchmark - A standard or reference point against which something is measured. The term is used in two different ways: in conjunction with setting long-term goals or targets for a broad range of societal and economic policies; and as a measure of effectiveness in comparing key aspects of an organization's performance with that of similar organizations.

Brady Landfill Site Rehabilitation Reserve - On December 17, 1993, City Council authorized the establishment of a Brady Landfill Site Rehabilitation Reserve Fund for the purpose of providing funding for the future development of the Brady Landfill Site. The Reserve is financed through a monthly transfer from the Solid Waste Disposal Fund based on tonnages processed at the landfill.

The Director of Water and Waste is the Fund Manager.

Business Tax - This is a tax on businesses that occupy space within the City of Winnipeg.
