Appendix 1	Service Based View	3-1
Appendix 2	Cost Estimate Classification.....	3-13
Appendix 3	Public Private Partnership Payments as a Percentage of Cash to Capital/Gas Tax.....	3-15
Appendix 4	Transfers from Other Capital Accounts/Surplus Capital	3-17
Appendix 5	5a Transfer to Capital Reconciliation	3-19
	5b Cash to Capital Surplus 2019 Capital Review	3-20
Appendix 6	Active Transportation Projects	3-25
Appendix 7	Capital Projects Funded by Federal Gas Tax	3-27
Appendix 8	Major Capital Projects	3-29
Appendix 9	Authorized Net Debt as at December 31, 2019	3-31

Reader's Guide

This **Reader's Guide** is intended to provide the reader with a basic understanding of the Capital Project Detail Volume 3, developed from the capital budgeting process, as well as briefly describe the document's content and layout.

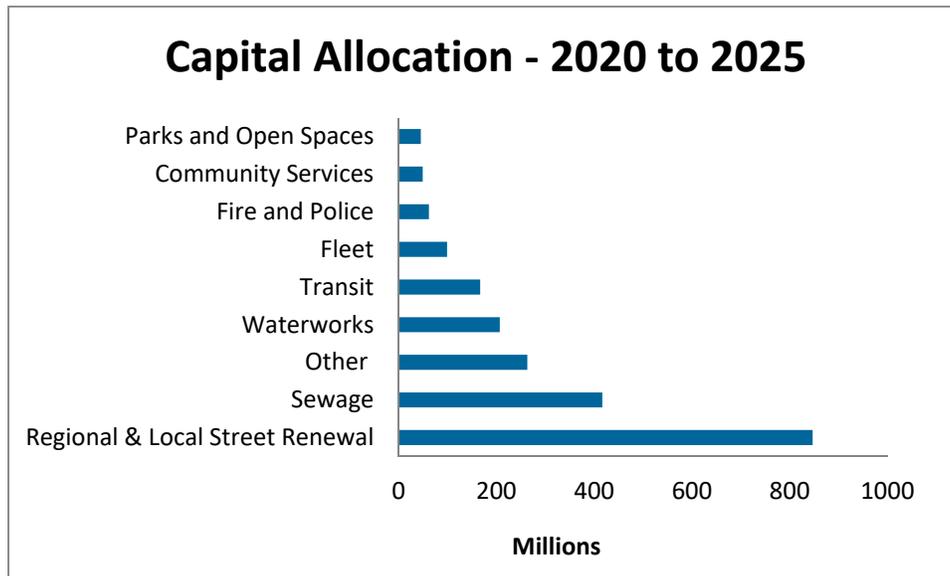

The **2020 Adopted Capital Budget and the 2021 to 2025 Five-Year Forecast** provides summary and detailed information on capital projects and financing for the capital program, set out in the following sections:

- ❖ The **Capital Project Summary** provides a listing of capital projects for 2020 through to 2025, highlighting related financing sources.
- ❖ The **Capital Project Detail** section gives additional information about each project in the budget, including project descriptions, current year's budget and five-year forecast, cash flow projections, net impact on the operating budget, and previous budget authorizations, if applicable. The capital estimate and service area are identified, as well as the link to OurWinnipeg to ensure all capital projects align with city objectives.
- ❖ The **Appendices** provide additional context information in support of the rest of the budget document.

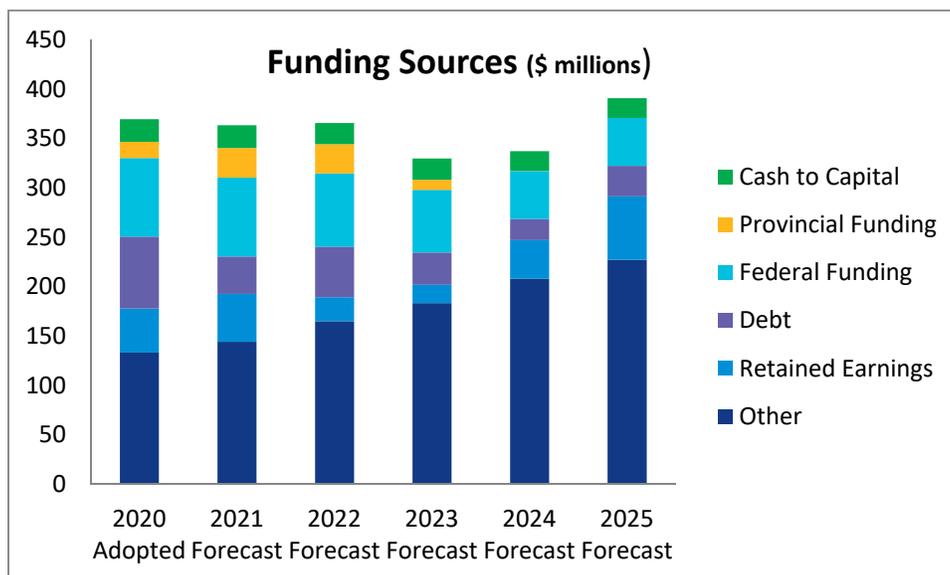

Executive Summary

The 2020 Adopted Capital Budget and 2021 – 2025 Five-Year Forecast supports infrastructure and investments such as purchasing or constructing buildings, roads, park and recreation areas, equipment, vehicles and land. The 2020 capital budget and five-year forecast balances infrastructure investment required to keep existing City assets in good repair while supporting ongoing growth needs. Capital investment decisions consider the collective benefit for residents, the risks associated with project deferral, and service affordability.

The 2020 Capital Budget is comprised of \$2.1 billion in total capital investment over the next six years. The following chart summarizes the budget by specific areas:

This capital budget has kept debt levels relatively flat and cash to capital funding at approximately \$20.0 million per year. These are significant funding decisions which have impacted the operating budget.

Executive Summary

Provincial funding comprises 4% of the six-year capital budget. Federal funding makes up 18.3%.

Despite the significant investments made in this budget the City is challenged by funding contributions from other levels of government. The City continues to have ongoing discussions with the Province and the federal government on this issue.

This budget continues to advance Council's strategic goals, as set out in *OurWinnipeg*:

- Complete Communities
- Sustainable Transportation
- Sustainable Water and Waste
- A sustainable Winnipeg

This budget contains continued investments in regional and local street renewals, with over \$846 million allocated to this area over the six years. Transit includes over \$130 million in funding for transit buses, heated bus shelters, low income bus pass program and accessibility improvements.

The 2020 budget increases support for the combined sewer overflow and basement flood management strategy. The City also continues to focus on other key projects with investments in the urban forest and water meter renewals.

With the population of Winnipeg continuing to expand, planning for growth is critical to ensure complete communities. Dedicated funding has been included for a new Waverley West Fire Paramedic Station and consolidation of existing fire stations to enhance service.

As noted in the recent 2020 Infrastructure Plan Report, total capital investment needs are greater than the available budget. The recent infrastructure plan report highlighted the future infrastructure requirements over the next 10 years. Strategic, long-term governmental partnerships and predictable long term funding arrangements are required for the City to address its ongoing infrastructure requirements.

Executive Summary

Implementation of the capital projects can impact future operating expenditures. For example, improvements to buildings may lower maintenance costs and new arenas or recreational amenities may increase ongoing maintenance. Operating costs are considered in deciding when projects are authorized. Incremental increases in operating costs, when identifiable, are reflected under operating costs in the Net Operating Impact table for each project (see capital detail sheets in section 2). The following is a summary of these costs plus related transfer to capital and debt and finance charges for the six-year capital budget period:

Project Name	Incremental Operating Costs					
	2020	2021	2022	2023	2024	2025
	(in \$000s)

Capital Project Detail

2020 Adopted Capital Budget and 2021 to 2025 Five-Year Forecast

Notes:

1. Capital Budget amounts are estimates only and are subject to materials management policy (e.g. tenders, bids, and contract awards including Public Private Partnership Proposals).
2. The Public Service uses a cost estimate classification determined using AACE International Recommended Practices for capital budget estimates see Appendix 2.
3. Included in the capital project authorizations are corporate and departmental overhead amounts (FTE related costs, administrative costs, etc.). Consistent with asset management principles, specific recoveries are included in the capital project business case/basis of estimate. Actual expenses may vary from budget depending on in-year circumstances.
4. Included in the capital budget authorizations, for Public Works only, are amounts for Strategic Municipal Infrastructure Research (SMIR), not to exceed 0.5% of tax-supported infrastructure preservation capital budgets, as approved by Council on April 30, 2003. Infrastructure is defined as permanent physical systems of a community, including roadways, utilities, water, sewage, buildings and parks. SMIR funding is essential to undertake research that will optimize life cycle costs and innovate to provide the best value for construction and preservation of Public Works infrastructure.

Class Estimate: Not applicable, as this is a scalable program

Projects in 2020 will not proceed to construction until a class 3 estimate is obtained.

Any surplus funds will automatically be transferred to the following years Pedestrian and Cycling Program Budget.

The Director of Public Works may be required to reallocate funds within the Pedestrian and Cycling Program based on financing requirements.

On July 15, 2015, Council approved the Winnipeg Pedestrian and Cycling Strategies (PCS) with the following motion: All costs included in the Pedestrian and Cycling Strategies are estimates, no budget allocation is included with the approval of the Pedestrian and Cycling Strategies document, and all projects and project costs relating to the Pedestrian and Cycling Strategies document will be considered by City Council through the annual budget process. Pedestrian and Cycling Action Plans will be presented to the Standing Policy Committee for information on a yearly basis to provide status updates on previous and current projects.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

On July 13, 2016, Council approved the recommendation of the Standing Policy Committee on Infrastructure Renewal and Public Works: That all projects related to the Pedestrian and Cycling Strategies document be submitted to the Standing Policy Committee on Infrastructure Renewal and Public Works for recommendation to Council.

Funding includes budgeted amounts from previously authorized capital projects - see Appendix 4.

The Pedestrian and Cycling Program supports the delivery of the City's long-term vision to maximize transportation options by ensuring the accessibility, comfort, and safety of walking and cycling in Winnipeg.

Budget is used for the construction of new pedestrian and cycling facilities, facilities enhancements, studies and support for public education, awareness and promotions of walking and cycling. Funding is also used to support public engagement and design studies in advance of planned road renewals.

On September 27, 2017, Council approved a first charge against the 2018 Capital Budget of up to \$2.250 million for the Protected Bike Lanes McDermot Avenue/Bannatyne Avenue (Phase 2) project, and approved an additional \$3.850 million in 2017 financed by Interim Financing from General Capital Fund for Chief Peguis Trail - Kildonan Settlers Bridge Pedestrian and Cycling Improvements. Interim financing repayments will be completed by 2022.

On April 25, 2019, Council adopted that the estimated \$40 million in additional dollars in Federal Gas Tax funding, included in the 2019 Federal Budget, be allocated as follows:

- \$19.25 million for 2019 Residential road renewals,
- \$0.75 million for three active transportation functional design projects,
- \$2.5 million to support road side safety measures in 2019, and
- up to \$20 million for road renewals and active transportation projects in 2020.

On July 9, 2019, the City received notification from the Province of Manitoba of a one-time top-up transfer of \$44.09 million in Federal Gas Tax funds. \$22.5 million will be allocated to 2019 projects, as approved by Council April 25, 2019. \$20 million will be allocated to Local Street Renewals in 2020 (see page 2-15 for an update to this funding allocation) and \$1.59 million will be allocated to the Pedestrian and Cycling Program in 2020.

* N/A - No amounts have been included in the "Previous Budgets" due to this projects on-going nature.

The Pedestrian and Cycling Program supports the following program areas:

Sidewalks Regional and Non-Regional - Various Locations

Includes construction of new sidewalks on regional streets where none presently exist and where provision is warranted. Provides additional funding to support pedestrian crossings improvements and/or crossing upgrades on regional streets. Future locations that are to be determined will be identified through the annual Pedestrian and Cycling Action Plan or through the yearly capital budget process.

Includes construction of new sidewalks on non-regional streets which must meet at least one of the following:

- connect existing sidewalks to a significant destination business/public facility/senior facility, etc.
- is located within 1.5 km of a school and has been identified by a Neighbourhood Based Consultation process (for example a School Travel Plan or Neighbourhood Area Plan);
- is required to connect pedestrians to a bus stop, where the property owners fronting the proposed sidewalk are not considered to be the main or a major benefiter from the new sidewalk, and likely would not support the sidewalk as a Local Improvement.

Future locations that are to be determined will be identified through the annual Pedestrian and Cycling Action Plan or through the yearly capital budget process.

Bicycle Corridors

Development of new bicycle facilities on the Bicycle Network as prioritized in the Pedestrian and Cycling Strategies. Provides support to complete gaps in the Bicycle Network. Supports the supply and installation of permanent and temporary bicycle parking through an annual Bicycle Parking Grant program. Provides additional funding to support the development of Neighbourhood Greenways during local street renewal projects. Considers support for a pedestrian and cycling monitoring strategy.

Public Education, Awareness and Promotion

Support educational programming, public safety and awareness in support of walking and cycling. Supports the promotion of new and existing pedestrian and cycling facilities including a walking and cycling communications strategy. Considers support for a City-wide wayfinding system.

PUBLIC WORKS - GENERAL CAPITAL FUND

Pedestrian and Cycling Program (continued):

Recreational Walkways and Bicycle Paths

Construction of new recreational walkways and off-street bicycle path facilities where no walkway or cycle facility presently exists, and where the provision of such a facility is warranted.

Updating information that affects the recommendations in the Transportation Master Plan is necessary to account for temporal changes in land use and transportation needs. This is also required to meet the needs of OurWinnipeg and Complete Communities.

A comprehensive revision commenced in 2019 concurrent with the update to OurWinnipeg. A detailed cost breakdown to include a class 3 estimate for this major revision will be provided at an early stage in the project. The budget will be developed by the project team as part of the initial project management initialization phase. The project will not proceed until a class 3 estimate is obtained.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

Class Estimate: Not applicable, as this is a scalable program

Projects in 2020 will not proceed to construction until a class 3 estimate is obtained.

Any surplus funds will automatically be transferred to the following years Regional and Local Street Renewal Program Budget.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Regional Street Renewal Program

The Regional Street Renewal program includes the renewal and reconstruction of the City's regional streets, sidewalks and recreational walkways/paths, as well as incorporating pedestrian and cycling facilities on regional street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies. The program also funds the condition rating of regional streets. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed pedestrian and / or cycling facility, the Regional Street Renewal program may implement the intention of the Winnipeg Pedestrian and Cycling Strategies.

All Regional Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Regional Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2020 Regional Street Renewal Program shall be approved by the Standing Policy Committee on Infrastructure Renewal and Public Works.

A Regional Street Renewal Reserve was established in 2014 to increase investment in regional streets. A separate 1% property tax increase planned until 2022 and 0.3% thereafter, will continually fund this reserve each year to ensure a dedicated funding stream for regional streets.

Use of the Regional Street Renewal Reserve for purposes other than regional street, sidewalk or bridge renewals requires approval of 2/3 of City Council.

On March 22, 2018, the City received approval in principle from the Province and on September 4, 2018 received approval in principle from the Federal Government indicating the federal and provincial contributions towards the Accelerated Regional Renewals Application will be in the order of \$100 million from each over 5 years (2019 to 2023).

On March 29, 2019, the City of Winnipeg and the Province of Manitoba executed the "Accelerated Regional Street Renewal Contribution Agreement", and on September 23, 2019, the City of Winnipeg and Canada executed the "Agreement for the City of Winnipeg Accelerated Regional Street Renewal Project". These agreement commit all parties to the funding arrangements as indicated in the Accelerated Regional Streets Renewal Program section of the Regional and Local Streets Program herein.

On March 20, 2019, Council authorized first charges in 2019 or prior to the adoption of the 2020 capital budget to facilitate timely delivery of these projects:

up to \$1.700 million for Broadway, Portage (Downtown Streets), etc. accelerated regional street renewal project;

up to \$0.250 million for the Archibald accelerated regional street renewal project;

up to \$0.750 million for the Watt / Munroe / Johnson, accelerated regional street renewal project;

up to \$1.400 million for the Stafford / Taylor / Corydon accelerated regional street renewal project;

up to \$2.200 million for the Erin / Wall / Sargent accelerated regional street renewal project;

up to \$0.400 million for the Roblin Blvd. - Dieppe to PTH101 accelerated regional street renewal project;

up to \$6.7 million for the Dublin Ave - Notre Dame to St. James accelerated regional street renewal project;

up to \$2.7 million for the St. James St. – Dublin to Saskatchewan accelerated regional street renewal project; and

up to \$12.186 million for Fermor Ave - Lagimodiere to Plessis accelerated regional street renewal project which includes Developer Funding in the amount of \$2.586 million that covers on demand payment for the Development Charge for Regional Streets and the estimated cost to construct auxiliary lanes and miscellaneous improvements,

On September 26, 2019, Council authorized a first charge in 2019 or prior to the adoption of the 2020 Capital Budget for up to \$500,000 for the St. James St. - Notre Dame to Omand's Creek accelerated regional street renewal project.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

On December 12, 2019 Council authorized first charges prior to the adoption of the 2020 capital budget to facilitate timely delivery of these projects:

up to \$6.300 million for Broadway, Portage (Downtown Streets), etc. accelerated regional street renewal project (this is in addition to the \$1.7 million authorized first charge from March 20, 2019 noted above, for a total of \$8.0 million in 2020);

up to \$3.400 million for Maryland St, Fawcett Ave to Maryland Br - accelerated regional street renewal project;

up to \$0.250 million for Day St / Pandora Ave - accelerated regional street renewal project;

up to \$0.350 million for Dunkirk Dr – Fermor Ave to St Mary's Rd - accelerated regional street renewal project;

up to \$0.400 million for Salter St - Dufferin Ave to Mountain Ave - Accelerated regional street renewal project;

up to \$0.500 million for Portage Ave Eastbound – Woodlawn Ave to Garden Rd - accelerated regional street renewal project;

up to \$0.300 million for Pembina Hwy – Rue Des Trappistes to Ducharme Ave - accelerated regional street renewal project;

up to \$0.500 million for Lagimodiere Blvd – Springfield Rd to 200m S of Headmaster Rw - accelerated regional street renewal project;

up to \$0.300 million for Sargent Ave – Empress St to St James St - accelerated regional street renewal project;

up to \$0.700 million for Selkirk Av – Arlington St to McPhillips St - accelerated regional street renewal project;

up to \$0.900 million for Pembina Hwy – McGillivray Blvd to Chevrier Blvd - accelerated regional street renewal project;

up to \$0.150 million for William Ave – Arlington St to McPhillips St - accelerated regional street renewal project;

up to \$0.900 million for Jubilee Ave – Osborne St to Pembina Hw - accelerated regional street renewal project;

up to \$0.900 million for Portage Ave Westbound – David St to Charles St accelerated regional street renewal project;

up to \$0.500 million for Lagimodiere Blvd Southbound – Reenders Dr to Regent Ave W - accelerated regional street renewal project;

up to \$0.300 million for Keewatin St – Selkirk Ave to Logan Ave - accelerated regional street renewal project;

up to \$0.150 million for King Edward St – Park Lane to Logan Ave - accelerated regional street renewal project;

up to \$0.300 million for Regent Ave W – Plessis Rd to Rougeau Ave - accelerated regional street renewal project;

up to \$0.150 million for Henderson Hwy SB - McLeod Ave to Leighton Ave - non-accelerated regional street renewal project

With the adoption of the 2020 Capital Budget, Council authorizes first charges on all 2021 accelerated streets (Total - \$84.5 million) in 2020 or prior to the adoption of the 2021 capital budget to facilitate timely delivery of the projects.

With the adoption of the 2020 Capital Budget, Council authorizes first charges on the following non-accelerated streets in 2020 or prior to the adoption of the 2021 capital budget to facilitate timely delivery of the projects:

up to \$0.500 million for Portage Av EB - St Charles St to David St - this project aligns with the accelerated regional street renewal project in the WB;

up to \$1.000 million for University Cr - Pembina Hwy to Chancellor Matheson Dr.

See next pages for program details.

Local Street Renewal Program

Local Streets are all non-regional streets including residential streets, collector streets, industrial streets, and park roads. The Local Street Renewal program includes the renewal and reconstruction of the City's local streets, sidewalks, lanes, and recreational walkways/paths, as well as constructing new sidewalks on local street renewal projects where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met. The program also funds the condition rating of streets, sidewalks, lanes and recreation walkways/paths. The purpose of this program is to maintain the level of service, structural integrity, and rideability of the transportation infrastructure network.

On May 14, 2008, Council concurred in the recommendation that a policy be adopted to incorporate Active Transportation facilities into any reconstruction or rehabilitation required on any infrastructure identified as an Active Transportation facility in the Proposed Active Transportation Network. On July 15, 2015, Council adopted the Pedestrian and Cycling Strategies as the long range pedestrian and cycling transportation policy for the City of Winnipeg. Depending on the proposed street renewal treatment and the planning and priority status of the proposed sidewalk, the Local Street Renewal program may include new sidewalks where identified in the Winnipeg Pedestrian and Cycling Strategies or where the terms for New Non-Regional Sidewalks under the Pedestrian and Cycling Program are met.

PUBLIC WORKS - GENERAL CAPITAL FUND

Regional and Local Street Renewal (continued):

On November 20, 2013, Council amended the Local Improvement process by creating a pilot program for six years (2014-2019) whereby the City of Winnipeg will finance asphalt paving of granular lanes as local improvements to the maximum of 50% of the cost of the improvement; and approved that the \$1 million Granular Lane Fund be used as a funding source for the City's share of the amended Local Improvement Program. On July 19th, 2018, the City of Winnipeg City Council approved a six year extension to this program (2020-2024). The Granular Lane Improvement Program's annual \$1 million includes \$350,000 per year that is dedicated to the pulvimixing program.

On April 25, 2019, Council adopted that the estimated \$40 million in additional dollars in Federal Gas Tax funding included in the 2019 Federal Budget be allocated as follows:

- \$19.25 million for 2019 Residential road renewals,
- \$0.75 million for three active transportation functional design projects,
- \$2.5 million to support road side safety measures in 2019, and
- up to \$20 million for road renewals and active transportation projects in 2020.

On July 9, 2019, the City received notification from the Province of Manitoba of a one-time top-up transfer of \$44.09 million in Federal Gas Tax funds. \$22.5 million will be allocated to 2019 projects, as approved by Council April 25, 2019. \$20 million will be allocated to Local Street Renewals in 2020 and \$1.59 million will be allocated to the Pedestrian and Cycling Program in 2020. During the 2020 budget process federal gas tax funding was replaced with external debt to allow for reallocation to other capital projects. The City will borrow \$20.0 million in 2020 to offset this reallocation and the Local Street Renewal Reserve will pay principal and interest charges on this new debt. 2020 debt payments are estimated at \$700,000 and 2021 - 2025 are estimated at \$1.120 million each year.

On December 12, 2019 Council authorized first charges prior to the adoption of the 2020 capital budget to facilitate timely delivery of these projects:

up to \$19.700 million for Local Streets (locations previously identified to Standing Policy Committee on Infrastructure Renewal and Public Works on May 28, 2019 as projects deferred from 2019 that would be awarded as a first priority going forward);

up to \$0.800 million for Local Sidewalks contracts.

With the adoption of the 2020 Capital Budget Council authorizes first charges in 2020 or prior to the adoption of the 2021 Capital Budget to facilitate timely delivery of these projects:

up to \$7.0 million for all the Local Street Renewals to facilitate delivery of industrial streets, residential streets, alley, and sidewalk renewals;

up to \$4.820 million for the combined Sherwin Rd - Dublin Av to Notre Dame Av road renewal and bridge project;

up to \$2.100 million for the Wellington Crescent River Bank Stabilization Project.

All Local Street Renewal projects have a warranty period after substantial completion and/or in-service date for which costs may be incurred by the City. The Director of Public Works is authorized to establish projects to a maximum of \$100,000 each to charge costs associated with warranty work should the related Local Streets project be closed. The capital budget for the new project will be allocated from other surpluses within the program.

Any new projects using surplus funds in the 2020 Local Street Renewal Program shall be approved by the Standing Policy Committee on Infrastructure Renewal and Public Works.

A Local Street Renewal Reserve was established in 2013 to increase investment in local streets, lanes and sidewalks. A separate 1% property tax increase planned until 2022 and 1.7% thereafter, will ensure a dedicated funding stream for local streets.

Use of the Local Street Renewal Reserve for purposes other than local streets, lanes, sidewalk or bridge renewals requires approval of 2/3 of City Council.

As per recommendations B.1 and B.2 of the Road Construction Working Group Report, approved by Council on September 26, 2019, specific local streets are included in the program details.

See next pages for program details.

Class Estimate: 4

The scope of work for this project has been revised to examine cost effective functional design alternatives for an active transportation grade separation, in the vicinity of the existing Osborne Street Underpass, to address a gap in the Active Transportation Network to cross the CN mainline. In addition, functional design will be undertaken to review rehabilitation of the existing Osborne underpass to address deficiencies in land drainage, vertical clearance, pavement condition, and traffic operations through the Osborne/Pembina/Corydon/Donald intersection.

This project includes the replacement of the Dublin Avenue Bridge over Omand's Creek and the reconstruction of Dublin Avenue between Notre Dame Avenue and St James Street, and the rehabilitation of St. James Street from Dublin to Saskatchewan, funded by the Regional and Local Street Renewal program.

On March 20, 2019, Council authorized a first charge of up to \$3.3 million in 2019 or prior to the adoption of the 2020 Capital Budget to allow for timely delivery of the project.

The replacement bridge is expected to provide service for 75 years.

The overpass on Pembina Highway over Bishop Grandin requires bridge deck rehabilitation, including reconstruction of the exit loop ramps. The timeline for preliminary design, detailed design, and construction is noted in the Class Estimate table above.

Note that construction of a pedestrian-cycling overpass over Pembina Highway, connecting legs of the Bishop Grandin Greenway, is not included in the project scope.

The rehabilitated structure will provide an additional 50 years of service life and the new pedestrian overpass structure will provide a service life of 75 years.

This project includes major rehabilitation of the Lagimodiere Twin Overpasses over Concordia Avenue and the CPR Keewatin rail lines. Improvements to traffic capacity and roadside safety will be determined as part of a preliminary design study. The timeline for preliminary and detailed design is noted in the class estimate table above. Construction is forecasted to take place over a two year period from 2026 to 2027 with a total project class 5 estimate of \$44 million.

The rehabilitated structure will provide an additional 50 years of service life.

Class Estimate: Not applicable

The Disraeli Bridges and Overpass Facility was procured using a P3 approach and the facility opened on November 19, 2012.

The City will make on-going lease payments to Plenary Roads Winnipeg (PRW) extending until 2042. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the facility as well as the maintenance of the facility.

There are significant provisions in the contract to ensure the City's performance specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs related to land titles registration are also included in this budget. Payments to PRW are performance based and are reduced where the City's performance specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the facility, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

A portion of the project (\$75 million) was financed by \$25 million in external debt, with the balance being financed internally. The Public Service issued \$25 million in external debt at an interest rate of 3.759% over a repayment term of 40 years. Debt servicing represents interest and principal repayment of external debt and internal financing.

PUBLIC WORKS - GENERAL CAPITAL FUND

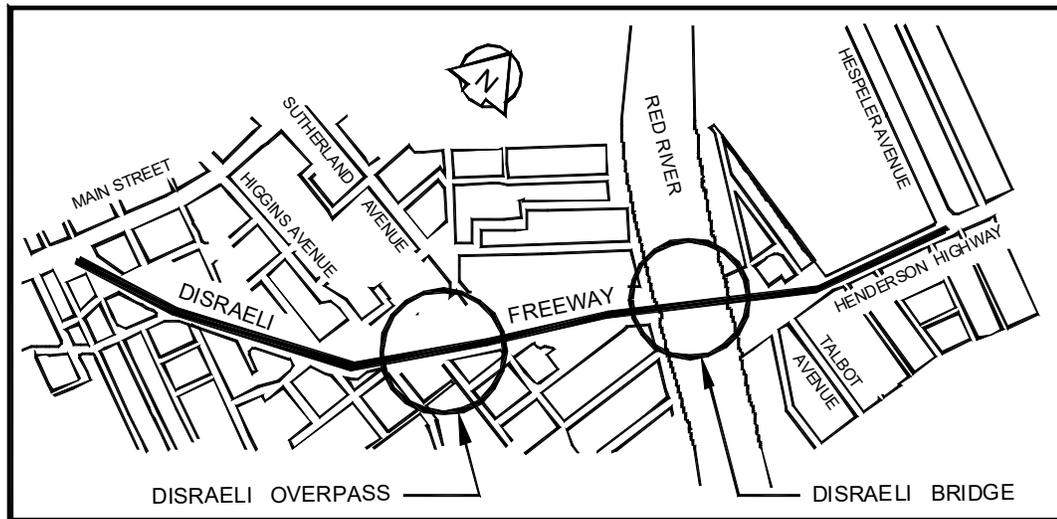

Disraeli Bridge and Overpass Facility (continued):

The above annual estimates relate to the maintenance phase of the project and include the authorization for the lease payments and debt servicing related to the facility.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of annual capital budget in the event the capital budget is adopted after December 31 in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002 where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and Interest charges.

The asset management program being implemented in the Public Works Department is centered on the application of quality management principles to the operation, maintenance, and renewal of infrastructure. A primary objective is the development and implementation of methodologies to preserve the infrastructure and to identify the funding necessary for the long term preservation of the assets.

An objective of the asset management program is to extend this systematic structural quality management approach to all the infrastructure under the Public Works Department responsibility. Funds are required to implement new or maintain existing asset management programs.

Refurbishment and/or improvements to various parks to repair aging park infrastructure and related amenities.

2021 and 2023 funding will contribute to short and long term implementation strategies for Kilcona Park rehabilitation and enhancements based on the 2014 Strategic Renewal and Action Plan prepared by Hilderman Thomas Frank Cram Landscape Architecture in consultation with Meyers Norris Penny LLP, MMM Group Limited and Prairie Architects Inc.

Prioritization of projects is subject to the Regional Parks Investment Strategy and Parks Strategic Master Plan, planned for completion in September 2020.

Program is focused on playground restorations, including play equipment and safety surface replacements, along with associated amenity and pathway improvements to enhance accessibility, and other park and recreation enhancements. It is generally delivered by the Planning, Property and Development Department on behalf of the Parks and Open Space Division of the Public Works Department.

Funding is to be allocated annually as follows:

- Approximately \$300,000 each year dedicated to address general playground and amenity safety concerns as they arise city wide.
- remaining funding to be divided equally between each of the fifteen electoral wards.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

This capital program is required to support minor renovations and replacement of interior infrastructure (e.g. workstations, public work space, furniture, shelving and children's literacy areas) at libraries. Renovations and interior infrastructure replacement is required in order to ensure that library branches are safe, functional, accessible and part of a welcoming environment for library users, that meet defined customer levels of service.

Included in 2024 is \$351,000 rebudgeted from the adopted 2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

The Winnipeg Library Service supports the digital economy and fosters digital literacy by making public access computers available to all customers. Capital funds are required to upgrade and replace public access and staff personal computers and support new innovative and efficient technology applications in libraries to address the changing needs of customers and move towards consistent service levels in all facilities by:

- Increasing the number of public access computers system wide.
- Upgrading and replacing aging public access computers, monitors and peripheral devices.
- Providing access to public training sessions using current eReader and mobile technology.
- Expanding and enhancing information services through technological innovation and digitalization projects.

The acquisition of information technology has an impact on the Library Services operating budget due to maintenance and/or licensing costs associated with equipment and applications.

Included in 2020 is \$116,000 rebudgeted from the adopted 2019 capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: 5

The Library Facility Redevelopment Strategy was adopted by Council January 29, 2013. Funds are necessary to replace and furnish modern, safe, and accessible libraries that are able to accommodate the changing needs of library users.

Total capital funding for the West Kildonan Library of \$3.713 million is based on a preliminary class 5 estimate for planning, design, construction, and interior infrastructure and is subject to change as class estimates are refined. The assumption is that West Kildonan Library will be a leased facility; therefore, estimated funding represents this assumption.

Until such time that the new site is identified, the impact to the operating budget for Municipal Accommodations charges is unknown.

Construction will not commence until a class 3 estimate is obtained.

Class Estimate: Not applicable, as this is a scalable program

This capital program addresses workplace and public safety, health, and accessibility issues.

Recreation and aquatic facility amenities must be refurbished to meet public health and safety standards, regulations, and to enhance facilities to meet the needs of the public including:

1. Safety issues need to be addressed including upgrading lighting, installing and upgrading closed circuit television (CCTV) video monitoring technology, automated external defibrillator (AED's) replacements at facilities and other building upgrades as required to ensure that facilities remain safe and welcoming to the community.
2. Address physical and customer service accessibility issues including washrooms, change rooms, specialty change rooms, kitchens, signage, public entrances and installing life safety apparatus to meet the needs of persons with disabilities. Priority projects include renovation of the community kitchens at Magnus Eliason Recreation Centre and/or Turtle Island Recreation Centre to meet accessibility and public health requirements as well as community program needs.
3. Upgrades and replacements to facility signage including electronic signs for promotion of services and programs.

Each year a portion of the funds will be utilized for projects within the City's aquatic facilities and recreation centres based upon established priorities.

Funding includes \$413,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

Capital funding is required to replace cardio and strength based fitness equipment, on a rotating cycle, at the City's multi-use recreation and aquatic facilities, to continue to meet the program needs of patrons, and to minimize safety issues that could arise from aging fitness equipment. Life cycle renewal of fitness equipment is a key part of the department's asset management plan in order to maintain customer levels of service.

Funding includes \$197,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Capital funding in 2019 and previous budgets is for renovation and renewal of the St. James Civic Centre building systems to ensure continued facility operation. Critical building systems (e.g. electrical, heating, ventilation and air conditioning, building envelope and mechanical) within the facility have reached the end of their useful life and require repair or replacement. The project will also address building code compliance within the existing facility. The total project cost for building systems renewals is \$6.0 million. Design and construction documents for the building systems work was developed in 2019, with construction in 2020.

On October 24, 2019, Council authorized a first charge of up to \$3.7 million in 2019 or prior to the adoption of the 2020 Capital Budget to facilitate timely delivery of the project.

Projected funding of \$3.7 million in 2020 is required for structural repairs of the St. James Civic Centre Arena (Ab McDonald Memorial Arena) concrete slab and building envelope renewal in the facility for total facility renewal funding of \$9.7 million. Additional engineering analysis and development of a class 3 estimate is required to confirm final project scope and costs. Construction will not commence until a class 3 estimate is obtained.

The St. James Civic Centre - Facility Expansion project was approved by Council on September 26, 2019, as one of the projects for federal and provincial funding under the Investing in Canada Infrastructure Program.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

These capital funds will provide new, enhanced, or refurbished recreation and park amenities in the St. James community and include community input through a public consultation process.

On January 25, 2018, Council approved:

- That a \$1.4 million commitment from the Land Operating Reserve, for investment in the development of recreation amenities within the Assiniboia Community Committee area be referred to the 2019 budget;
- That a portion of the \$1.4 million be used in consultation with the Public Service to enhance the trails, lighting, security and green space along Sturgeon Creek in the area of 255 Hamilton Avenue;
- That a public consultation process be implemented within the proximity of 255 Hamilton Avenue, subsequent to approval of the \$1.4 million in the 2019 budget, to seek community input on the development of recreation amenities with the remainder of the \$1.4 million;
- That the public consultation be funded from the Commitment Reserve out of \$50,000 set aside in the 2014 budget per the intention of Recommendation 9 of Item #9 of the Report of the Executive Policy Committee dated February 22, 2013, adopted by Council on February 27, 2013.

Two phases of public engagement took place between July and October, 2019 that included an online survey to confirm current use and needs for parks and recreation amenities, two public workshops and an online 'budget allocator' survey to confirm project priorities. From that input, the following four projects were prioritized for implementation through the \$1.4 million in funding:

- Upgrade the wading pool at Assiniboia West C.C. (Buchanan site) with spray features, safety surfacing, benches and landscaping, as well as renewal of the existing wading pool asset.
- Development of an off-leash dog area near Sturgeon Road and Silver Ave.
- Lighting and asphalt pathway improvements on Sturgeon Creek Greenway between Hamilton Ave. and Saskatchewan Ave.
- Voyageur Park improvements including new fitness nodes.

Construction will not proceed until a class 3 estimate is obtained.

Capital funding is required to support renovations to the specialty change rooms including the development of universal change rooms at the Pan Am Pool. The existing facility is inadequate to fully meet service requirements of the community and does not meet City of Winnipeg Universal Design / Accessibility Standards.

The Pan Am Pool Feasibility Study was completed in September 2015. The study identified a number of requirements that also included the need for renovations to the specialty change rooms and the development of universal / family change Rooms.

Capital funding for the Pan Am Pool Change Room Upgrade in 2021 includes development of tender documents and construction.

Class Estimate: 5

Capital funding is required to support facility renewal and upgrades to extend the service life of Boni-Vital Pool, including but not limited to critical building systems renewal, accessibility improvements and renovation of public spaces.

The current funding requirements are based on class 5 estimates developed through planning level assessments and previous building studies. These funding requirements will be revised as engineering progresses; cost estimates will be updated to class 3 prior to construction.

Capital funds in 2021 include \$500,000 for preliminary design and \$4.86 million for construction.

With the adoption of the 2020 capital budget, Council authorizes a first charge of \$500,000 in 2020 or prior to the adoption of the 2021 capital budget to facilitate timely delivery of the project.

Capital funding is required for technological initiatives which allow Community Services to upgrade existing information technology systems and introduce new / innovative technologies. The projects will incorporate technology that will allow increased efficiencies and reliability, and improve service delivery by being more responsive to customers. The funding will be used for hardware, software and consulting services.

Projects for 2021 may include but are not limited to:

1. Staff Scheduling System to enable enhance scheduling efficiency of staff at facilities.
2. Facility Utilization Data Collection System for various sites and review of possible pilot sites including indoor and outdoor pools.
3. Continuation of the Advertising Program which includes the implementation of digital displays signage at Community Services facilities.
4. Electronic reader outdoor signage for multi-use recreation and aquatic facilities.
5. Charging Stations for several indoor pool and recreation facilities.
6. Miscellaneous upgrades including the purchasing and installation of projectors, mobile software, etc.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Class Estimate: Not applicable

The Community Centre Renovation Grant Program (CCRGP), approved in February 2012, is to provide up to \$965,000 in dedicated funding to renovation projects for city-owned, board-run community centres in order to maintain and/or improve community centre infrastructure. On March 20, 2019, Council approved an increase to the program with an annual transfer of \$1.035 million starting in 2019, up to 2023. The program is open to all General Council Winnipeg Community Centres (GCWCC) in Winnipeg, is subject to an application process with two intake periods per year, project evaluation completed by a joint committee of GCWCC and the City, with maximum City contributions to each project of \$100,000 per project, subject to the grant program criteria.

Annually, up to \$965,000 is funded by the Land Operating Reserve. Transfers from the Land Operating Reserve (not to exceed \$1.2 million in aggregate) to the General Revenue Fund (\$235,000 for GCWCC programming grant) and General Capital Fund (\$965,000 for this CCRGP) are to be equal to 15% of the aggregate of gross land sales and the City's proportionate share of land sales derived from government business partnerships for the fiscal year two years prior to the budget year under consideration (e.g. transfer amounts for the 2020 budget year are based on 15% of the aggregate of actual gross land sales and the City's proportionate share of land sales derived from government business partnerships from 2018).

If actual gross land sales and the City's proportionate share of land sales derived from government business partnerships are less than the amount to achieve the maximum \$1.2 million aggregate amount (i.e. \$235,000 programming grant + \$965,000 for the CCRGP) for this program, the transfer to the General Revenue Fund of up to \$235,000 is made first with the residual balance, if any, transferred to the General Capital Fund for the CCRGP.

An additional \$1.035 million per year is provided for the program for five years beginning in 2019 and is funded from the Financial Stabilization Reserve.

Operating expenses for 1 temporary full-time equivalent, effective in 2020, are required to administer the expanded program and will be fully recovered through the CCRGP capital.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

COMMUNITY SERVICES - GENERAL CAPITAL FUND

The Community Incentive Grant Program (CIGP), established by Council on March 6, 1985, was designed to encourage non-profit community recreation and sport organizations to undertake capital projects which would result in long-term benefits to the community at large in terms of improved service and facilities. On July 23, 2003, and again on July 18, 2012, Council adopted expanded criteria for the program.

Community committees are the delegated authority to allocate CIGP funding.

Operating expenses for 1 full-time equivalent Community Development Worker is budgeted in the operating budget and recovered through the CIGP capital for direct costs to administer the program.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

These capital dollars represent the City's ongoing commitment to Assiniboine Park building repairs, upgrades and park improvements.

The first year of funding for this capital grant was 2010 with \$5.123 million provided each year from 2010 to 2019.

The capital grant was subject to redetermination after 2019.

The release of capital funds is subject to annual explanation and submission from APC of projected cash flow needs, to the Public Service.

As this is a capital grant program, it is exempt from interest and administrative overhead capital charges.

Funding includes \$627,000 rebudgeted from 2019 adopted capital programs - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this program's on-going nature.

Capital funding for this project will be used to transform the former coffee shop located in the main floor lobby of Millennium Library into a Community Connection space. This new, highly visible service area will provide library visitors with access to specific services, including:

- Access to Library Community Crisis Workers (CCW) and community social agencies in a semi-private space
- Community meeting space for Community Crisis Workers and other agencies to meet, network, and share information and resources
- Access to print and other resources on library services and handouts on local mental health, substance use, and basic needs resources

On January 30, 2020, Council approved this project as part of the Downtown Public Safety Strategy (Phase 2).

Total capital funding request for this project is based on a preliminary class 5 estimate for planning, design and construction and is subject to change as class estimates are revised.

Construction will not commence until a class 3 estimate is obtained.

On July 18, 2007, Council approved the award of a public-private partnership (P3) contract for the development and operation of the East District Police Station based on a 30-year lease term. Occupancy date was in September 2008.

The above annual cash flow estimates include the authorization for the lease payments to be incurred and charged to the project in the General Capital Fund. They include technical maintenance, but not utility and other operating maintenance expenses.

As financing and administration costs are implicit in the lease payments, this capital project is exempt from the administration and short-term financing charge.

On March 22, 2016, Council authorized a first charge of up to 30% of the annual lease payments prior to the adoption of the annual capital budget, in the event the capital budget is adopted after December 31, in order to facilitate payments on the P3 contract.

In accordance with Bylaw 8164/2002, where the City's capital budget has not been adopted before January 1 of the year to which the budget is applicable, the Chief Administrative Officer is authorized, before the adoption of the capital budget, to approve expenditures not exceeding 30% of the amount the City of Winnipeg is contractually obligated to pay annually in respect of Public-Private Partnerships, as a first charge against the General Capital Fund.

Class Estimate: 5

Tenant improvements are required to upgrade leased accommodations for the Evidence Archive Facility.

While the new headquarters had provided comparable square footage it had not provided comparable cubic footage and, with additional number of exhibits that need to be stored every year, space requirements will continue to grow. A lease site has yet to be identified and the class estimate will be refined as the project advances.

Construction will not proceed until a Class 3 estimate is obtained.

The mobile computing technology in Police Service vehicles must be evergreened every 5 years due to the obsolescence of this equipment and the harsh environment to which they are subjected. Currently 235 vehicles require mobile computing devices plus a small contingency for spare devices. This includes the evergreening of laptops/tablets and keyboards, docks, modems, antennae, mounting equipment and associated cabling necessary to maintain connectivity with Winnipeg Police Service Public Safety systems. Ergonomically placed computing devices in vehicles are critical for prevention of injuries to police officers. The increase in funding for 2025 is due to program expansion of mobile computing into other specialty unit fleet vehicles and consolidation of mobile computer hardware evergreening.

This project is estimated in US dollars and converted to Canadian currency.

Funding for upgrading audio loggers and related Next Generation 911 equipment at the 911 communication centre and backup site. The loggers are evergreened on a 5-year plan to ensure operations of the main and back-up sites comply with Public Safety Answering Point legislation timelines for bringing systems back online.

This project is estimated in US dollars and converted to Canadian currency.

Class Estimate: 3

With this capital funding the Winnipeg Fire Paramedic Service seeks to maximize the efficiency of the station network. This is achieved through relocations, replacements, and major enhancements to stations that help reduce costs but maintain the desired level of response.

Consolidate St. Boniface Industrial Area station (9, Marion) and Windsor Park station (15, Autumnwood). The new consolidated station will service the industrial area currently served by the St. Boniface Industrial Area station. This station will support a relocated ambulance from the Fort Rouge station (30) as well as an engine, a rescue, a water tanker, and existing fire prevention officers into the new station.

2022:

- Finalize detail design and begin construction.

2023:

- Complete construction.

- Decommission Marion station for resale.

The Land Operating Reserve funding amount shown above is based on the assessed value of the disposition of Marion St. Station.

These capital funds support an ongoing program that deals with the replacement of equipment that is at the end of its operating life, to ensure the continuity of front line emergency services.

The Fire Paramedic Service needs to replace the following specialized equipment in a cyclical process as it nears the end of its operating life. Funding for this equipment is provided by both the City of Winnipeg (CoW) and Shared Health (SH). The following list identifies the equipment and the funding source:

2020

CoW funded assets:

- Self-Contained Breathing Apparatus equipment, which allows fire fighters to breathe when entering a building, to check for occupants, and to extinguish fires;

SH funded assets:

- Cardiac monitor/defibrillators to provide paramedics with mobile patient cardiac monitoring and resuscitation capabilities;
- Power stretchers to transfer patients to and from ambulances safely and smoothly without causing paramedic injury.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Equipment Obsolescence (continued):

2021

CoW funded assets:

- Consoles used by emergency call takers and dispatchers.

SH funded assets:

- Cardiac monitor/defibrillators to provide paramedics with mobile patient cardiac monitoring and resuscitation capabilities;
- Power stretchers to transfer patients to and from ambulances safely and smoothly without causing paramedic injury;
- Consoles used by emergency call takers and dispatchers.

2022

CoW funded assets:

- Tough books to provide fire fighters with information en route and to record incident details;
- P25 radio equipment replacement;
- VESTA system upgrade for Next Generation 911.

SH funded assets:

- Cardiac monitor/defibrillators to provide paramedics with mobile patient cardiac monitoring and resuscitation capabilities;
- Tough books to provide paramedics with information en route and to record incident details;
- P25 radio equipment replacement;
- VESTA system upgrade for Next Generation 911;
- SimMan replacement.

2023

CoW funded assets:

- Decontamination units to clean vehicles that are exposed to dangerous fluids and compounds;
- Mechanical hoist replacement to enable safe maintenance of Fire apparatus.

SH funded assets:

- Cardiac monitor/defibrillators to provide paramedics with mobile patient cardiac monitoring and resuscitation capabilities;
- Decontamination units to clean vehicles that are exposed to dangerous fluids and compounds;
- Stair chairs used to bring patients safely to the ambulance from higher levels.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** This project will not proceed until confirmation of funding is received from Shared Health (Province of Manitoba entity).

*** The City of Winnipeg will take out debt on behalf of Shared Health for this project. Shared Health will pay the interest and principal on this debt over an 8 year period.

These capital funds support an ongoing program of repair and structural maintenance to ensure station asset lives are maximized, thereby ensuring the service has an operable station network from which emergency response vehicles can be deployed across the whole city to meet required response times.

2020

- Building repairs and reconfiguration to stations 5 and 30;
- Roof replacement for stations 10 and 24.

2021

- Building repairs and reconfiguration to stations 14, 20, 22, and 25;
- Roof replacement for stations 5;
- Security upgrades.

FIRE PARAMEDIC SERVICE - GENERAL CAPITAL FUND

Station Capital Maintenance (continued):

2022

- Building repairs and reconfiguration to stations 6, 24 and 26;
- Roof replacement for stations 10, 20 and 25.

2023 and ongoing

- Building repairs and reconfiguration to various stations;
- Roof replacement for various stations;
- Concrete repairs to station forecourts.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** This project will not proceed until confirmation of funding is received from Shared Health (Province of Manitoba entity).

The Emergency Medical Service (EMS) utilizes SimMan (adult male) and SimBaby (child) mannequins to provide high fidelity patient simulations during the training and recertification programs for paramedics.

This project will acquire a SimMom (adult female) mannequin to provide high fidelity simulation for patients in active labour in a pre-hospital setting along with SimView equipment to control the simulation.

SimView provides the instructor with remote operation of the mannequin away from the student to make the environment as realistic as possible. SimView enables the instructor to initiate mannequin responses to patient care decisions during a scenario, thus maximizing the learning experience for the student.

** This project will not proceed until confirmation of funding is received from Shared Health (Province of Manitoba entity).

This is an on-going office automation program. Its primary goals are to deliver cost-effective solutions that provide convenient customer service to our citizens and to improve organizational efficiencies. These goals can be achieved through expansion of online services, office/workflow automation, re-engineering of legacy systems, electronic documents management, and systems integration (e.g. database synchronization) between Planning, Property and Development's applications and those of other departments.

It is anticipated that maintaining and improving a solid technological framework can provide the basis for organizational improvements that increase efficiency and reliability. In order to improve service delivery, the goal is to make information more accessible, streamline workflows, and reduce any duplication of efforts. It can also be argued that some initiatives such as electronic document submissions are not only citizen-friendly but environmentally responsible as well.

A general program of ongoing system improvement is suggested and is seen as reasonable to ensure the continued longevity and viability of the City's investment in office automation.

City funding is for the purchase and installation of columbaria and mausoleum interment facilities at City cemeteries. Also, Brookside Cemetery requires the establishment of new full body interment sections, including the installation of new roadways and landscaping, as existing interment sections are at capacity with less than 18 months of product remaining for sale in main sections. The Military Field of Honour (FOH) requires a new cremation interment area, to include columbaria, wall plaques, gardens and pathways. St. Vital cremation gardens requires extending to accommodate new product sales. These revenue-generating products/services will contribute to the Cemetery Service's goal of reaching financial self-sustainability. In addition, these funds are used for landscaping, materials and other costs comprising the City's contribution toward the FOH refurbishment project, which is described below.

Funding received from Veterans Affairs Canada (VAC), under a joint City-Federal funding agreement, is specifically for the refurbishment of the Military Field of Honour at Brookside Cemetery. The FOH is considered Canada's most significantly designated Military Field of Honour in which more than 10,000 Veterans, Service Men and Service Women and War Heroes are interred. All interments are marked by the Military Grey Barrie granite upright monument, mounted in a beam. The FOH refurbishment project involves the replacement of failed concrete beam foundations as well as the cutting, pinning, and cleaning of military monuments. VAC have provided funding for the Field of Honour since 2007 and will continue until the refurbishment is complete; anticipated timeline for completion is reduced to 5 years as VAC now has a funded program in place. The City contributes approximately \$1 for every \$3 contributed by VAC. This 5-year program will see all refurbishment complete and no funding required after 2022.

On October 26, 2016, Council approved that should future VAC funding commitments exceed the amount included in a given year's Cemeteries Improvements capital budget ("the incremental amount"), that the budget be increased by the incremental amount, subject to the execution of a Letter of Agreement. As such, in those instances where VAC provides funding commitments to the City for the refurbishment of Brookside Cemetery Military Field of Honour in excess of the amount included in the capital budget, the appropriate year's Cemeteries Improvements Capital Budget will be increased by the incremental amount.

Anticipated changes to VAC funding are not included in the submission as the agreement is pending.

The program objective is the functional and aesthetic improvements and required upgrades to public spaces and streetscapes in the Downtown and Exchange District National Heritage Site. The funds enhance accessibility, safety, comfort and urban design quality of pedestrian environments and fulfill the commitment to the "Downtown First" philosophy. The Downtown Winnipeg Urban Design Guidelines provide the guiding principles to support design and enhance the livability of Winnipeg's Downtown urban environment.

The program supports and develops ongoing partnership opportunities for future Public / Private development and redevelopment partnerships and projects such as: Old Market Square, Broadway, Hydro Tower, Millennium Library Park, Bonnycastle Park and the Assiniboine River Walk. Projects have traditionally relied on and/or leveraged other partnership opportunities and have supported private redevelopments.

These public open space and streetscape improvements are over and above and exclusive of work assumed by the Public Works, Transit, and Water and Waste Departments who are responsible for existing infrastructure such as curbs, street and sidewalk repairs, street trees, planters, boulevards, required maintenance and accessibility standards.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Downtown Enhancement Program (continued):

Priorities in 2020 - 2025 include but are not limited to:

- Air Canada Park
- Old Market Square
- Downtown and Exchange District Pedestrian Facilities Enhancements
- East Exchange Interpretative Strategies
- Chinatown
- Public Art Integration
- Halo SHED (Sports, Hospitality and Entertainment District) developments including: 266 Graham Avenue, Garry Street, Smith Street, Edmonton Street and St. Mary Avenue
- Ross Avenue sidewalk improvements and streetscaping
- Alexander Docks
- Supporting Exchange and Downtown BIZ placemaking initiatives
- Streetscaping support for larger scoped Public Works initiatives
- Broadway pedestrian enhancements

The City of Winnipeg reinvests in partnered projects in Business Improvement Zone (BIZ) districts and Neighbourhood Main Streets. These areas have their own distinct character with their own style of mixed-use, walkable business districts that serve as the cores of their neighbourhoods. With the completion of "OurWinnipeg" and the adoption of the document "Complete Communities", these funds provide the opportunity for the City to work with the resident and business owners in partnerships between the City, BIZ, private sector, not-for-profit, other funding agencies, and other government bodies. This capital fund gives the incentive for the BIZ groups to go out and match dollars from sources other than the City. This capital fund, through partnerships, assists in stimulating community revitalization.

This enhancement program takes the form of decorative medians, pedestrian lighting, banner poles, special entry nodes, special pavement treatments, character signage, plants, trees and site furnishings, to ensure the renewal and sustainment of the infrastructure that creates a sense of place and destination in and along Business Improvement Zones and on Image Routes.

2020 - 2025: Projects are adjusted based upon community readiness and partnership opportunities.

These organizations utilize grants received from the City to leverage additional funding to undertake projects. Some of the BIZ's considered for funding in 2020 include, but are not limited to; West End BIZ, Osborne Village BIZ, Norwood Grove BIZ, Transcona BIZ, West Broadway BIZ, Selkirk Ave BIZ, and North End BIZ. Specific allocations to BIZ groups will be subject to Council approval of a separate report in early 2020. Project funding will be delivered as a grant to each BIZ group through legally executed Grant Agreements.

On September 24, 2003, Council approved in principle the Public Art Policy of the Mayor's Task Force on Public Art in Winnipeg and directed that the Chief Administrative Officer work in conjunction with Winnipeg Arts Council to develop the necessary procedures for implementing the direction of the policy, including but not limited to those areas relating to governance and funding. Council adopted a Public Art Policy on October 27, 2004.

The Winnipeg Arts Council, as the City of Winnipeg's implementation partner, submits for approval annually, a plan for the works to be undertaken.

This program is excluded from corporate administrative overhead charges.

The City of Winnipeg is legally obligated through the approved Development Agreement Parameters to provide payback on older Developer Agreements based on the approved 48/52 split on the development of park costs. The funding formula is that the City of Winnipeg contributes 52% to the park development costs. Additionally, recognizing the need to do work concurrently beyond the basic requirements of the Development Agreement, these funds will cover provision of basic amenities that are more cost-effective and practical to install at the time of initial development (such as pathways, lighting, site furnishings, tree planting), particularly for linear park developments.

Applications from some of the outstanding (older) agreements are now being received due to the ongoing build out.

Calculations are based on industry consultation and the actual reviewed costs of works as they are completed each calendar year. Capital requirements are updated on an ongoing basis to reflect industry build out and Development Agreement amendments.

In 2000, the Riverbank Stability Characterization Study evaluated stability conditions of 106 km of City owned riverbank property which comprises approximately 45% of all such river frontage within the City of Winnipeg. This initial assessment of City owned riverbanks has since been supplemented with a risk based asset management approach utilizing the proprietary Riverbank Asset Management System (RAMS), with a comprehensive update completed in 2015, with incremental updates since. To effectively provide erosion protection or stabilize all City owned riverbanks that generally exhibit positive benefit to cost ratio (considering the value of land lost over time to riverbank processes), a funding commitment of approximately \$60 million would be required to fully address the 27 sites identified as "critical risk" and an additional \$150 million to address the 89 sites categorized as "significant risk" (out of the 220 sites that have been assessed on the Red and Assiniboine Rivers).

To date, seven major priority sites have been stabilized via the Riverbank Stabilization and Physical Asset Protection Fund since 2003, namely, Annabella Street to May Street (2003), St. John's Park (2006), Bunn's Creek (2006), St. Vital Park (2008), Churchill Drive Park (2012), King's Park (2015) Guay Park (2016), and Tache between Provencher and Cathedral (2017) at a total cost of approximately \$10 million.

The priority list provided below is not intended to be a program schedule and is subject to change with ongoing updates to RAMS, changes to the risk assessment, the results of investigations and monitoring programs, the addition of more sites to the database, or where cost savings can be achieved by collaborating with other City departments on specific projects. In particular, several of the following projects are interrelated with strategic Active Transportation projects.

PLANNING PROPERTY AND DEVELOPMENT - GENERAL CAPITAL FUND

Riverbank Stabilization - Physical Asset Protection (continued):

The project priority listing as of May 2019, including Class 5 cost estimates (Except Wellington Crescent), is as follows:

Site	Amount
Assiniboine River - Wellington Crescent right of way from Assiniboine Park to Academy Road (See note below)	2,500,000
Red River - Osborne St - Brandon Ave to Woodward Ave (to support AT path development)	2,100,000
Red River - River Rd to Rivergate Dr (to support AT path development)	2,900,000
Red River - Crescent Dr Park	1,600,000
Red River - St. Cross St - Mortimer Pl to Anderson Ave	2,400,000
Red River - Canoe Club (subject to cost/benefit related to land use)	6,400,000
Red River - Lyndale Drive Park and Lyndale Dr Lawndale Ave to Claremont Ave	3,400,000
Red River - D'arcy Dr	3,800,000
Red River - River Road at Minnetonka	1,100,000
Red River - Michelle Jean Park	2,000,000
Total	28,200,000

Wellington Crescent Right of Way from Assiniboine Park to Academy Road:

The Wellington Crescent project is currently in the functional design phase. The project is addressing the impacts and risk of riverbank instability to paths, gate chambers, outfalls, streets and greenspace along approximately 1km of the south bank of the Assiniboine River. The project is presently being managed by Planning, Property and Development (PPD) staff, and consultant assignments are funded from the 2016 Riverbank Stabilization capital program. As this project also addresses risk to Public Works Department (PWD) and Water and Waste Department (WWD) assets, it is proceeding with collaborative input and funding from all three departments. The following cost estimate is considered to be Class 4, and includes anticipated consulting fees and 25% contingency. The following cost estimate, based on the most favourable design strategy developed in the initial functional design exercise (completed spring 2019), includes riverbank stabilization, erosion protection as well as path and road realignment along various segments of the project site. Project construction will commence in 2020 or 2021 subject to the selected design option and the budget approval and funding availability.

Class 4 estimate:		9,650,000
PPD	Riverbank Stabilization-Physical Asset Protection (re-budget \$0.264 million from 2016 and \$1.377 million from 2017; utilize \$0.359 million from existing, approved 2018 & 2019 budgets; 2020 budget request of \$0.5 million)	2,500,000
WWD	\$2.0 million from Outfall Rehabilitation program	2,000,000
PWD	Up to \$3.0 million in 2020 and \$2.1 million in 2021 funded under the Public Works - Regional and Local Street Renewal program	5,100,000
Other	Grant - Great Trail	50,000

Geotechnical investigations and monitoring programs are underway at the Wellington Crescent, Osborne Street, River to Rivergate, Lyndale Drive Park and River Road at Minnetonka sites.

Re-budgeted funds to be spent in 2020 are earmarked for the implementation of the inter-departmental "Wellington Crescent Riverbank Path and Roadway Works Project". Funding in 2020 of \$1.641 million includes rebudgeted amounts from 2016 and 2017 - see Appendix 4.

Project will not proceed until a class 3 estimate is obtained.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Prior capital forecast allocated \$1 million in 2019 for public consultations and possible amenities, such as tennis courts or soccer facilities, at the Canoe Golf Course site due to the lease expiry in April 2019. The previous years' capital detail sheet also stated that, should the lease for the current 9-hole course be renewed, the funding may be returned to other area parks projects. The lease on the Canoe Club Golf Course has now been extended for three years due to ongoing debate about the changes to the course layout.

In order to better consider the future of the Canoe Club site in the context of a multi-year budget, the funding set aside for onsite improvements in 2019 had been deferred to 2020. Owing to the proposal in the 2020 multi-year budget to proceed with a review of all City golf courses and possible transformative use, the funding will no longer be allocated to amenities at the Canoe Club golf course site. \$200,000 will be used to procure third party resources to assist in the development of the golf lands re-purposing plan contained in the operating budget recommendations (refer to recommendation 1.G). The remaining \$800,000 will be used for other area park and recreational projects as follows:

- Norberry-Glenlee Community Centre universal play structure (\$100,000)
- Glenwood Community Centre rink projects (\$80,000)
- Greendell Park Community Centre rink boards (\$80,000)
- Memorial Park site improvements (\$80,000)
- Shirley Render Park pathways (\$60,000)
- Ron Duhamel park tennis / pickleball project (\$240,000)
- Highbury Park baseball project (\$50,000)
- Greenwood Park play structure renewal (\$80,000)
- Trail improvements McCubbins Cross Country and Kilcona Dog Park – Kilcona Park (\$30,000)

Class Estimate: 5

The project is comprised of these major elements:

- Analysis phase in 2020 will determine the roadmap/plan to achieve the required business outcomes and produce the class 3 estimate required to proceed to solution procurement.
- Foundational business process re-engineering will be performed concurrent to procurement activities to prepare for automation of the permit processes.
- Solution implementation will require extensive business and technical resources over an 18-month period as the optimized business processes are deployed within the selected solution.

The project outcomes will support the move to the digitization of all online functions on the permitting and inspections process, providing improved efficiency by:

- actively managing workflows and workplace monitoring,
- enabling multiple departments, agencies, and jurisdictions to share data across a single database,
- supporting online permit and appointment requests, and
- providing enhanced customer reporting and enhanced document management, among many other benefits.

In the event the Permit Reserve is unable to generate sufficient funds to cover the project in any given year, the General Capital Fund will interim finance until repaid by the reserve.

The 2020 program may include a maximum of 6 temporary capital funded full-time equivalents. Temporary staffing costs of \$0.93 million are included in the \$4.181 million overall project budget.

* The costs are included in the operating budget net of revenues assuming full cost recovery. In 2021, costs and revenues will be adjusted to present gross amounts but still reflecting full cost recovery.

On January 29, 2013, Council approved \$5.8 million for the expansion of the Transcona Centennial Pool outdoor aquatic facility that included expanded splash pad and slides; beach entry to the pool; improved mechanical system upgrades; site works and landscaping; as well as improvements to the change rooms and other components of the current building (mechanical, electrical, windows, etc.).

Although the occupancy permit was issued in 2017, there remain several deficiencies to be addressed by the general contractor prior to issuance of the Certificate of Total Performance. The 2020 re-budgeted amount, originally budgeted in 2013, is to be utilized for final payments subject to all deficiencies being satisfactorily addressed and a Certificate of Total Performance being issued.

Funding in 2020 of \$100,000 includes rebudgeted amounts from the 2013 budget - see Appendix 4.

On December 17, 2013, Council approved \$1.671 million in capital funding for the reopening of Sherbrook Pool. The funding consisted of \$0.2 million from the Mayor's 2013 Civic Initiatives Fund, \$0.4 million from the 2014 Parks and Recreation Enhancement Program, \$0.6 million from the Daniel McIntyre Recreation Initiative, \$0.271 million from Building Communities Initiative (BCI) II - Phase 3 (formerly "Recreation and Leisure Facilities" amended by the City and Province October 2, 2013) and \$0.2 million from the Municipal Accommodations operating funds. On June 27, 2014, BCI Policy Committee approved an additional allocation of \$0.15 million from BCI II - Phase 2.

On March 7, 2014, it was announced that the Kinsmen Club of Winnipeg will make a Sponsor Winnipeg contribution of \$1 million towards the renovation of Sherbrook Pool. Subsequent to this announcement, the City learned that such contributions are now deemed subject to GST, reducing the net contribution from \$1 million to \$0.952 million. On May 16, 2014, the Province announced a contribution of \$1 million in 2015 Manitoba-Winnipeg Infrastructure Agreement funding toward the rehabilitation project.

On September 24, 2014, Council approved that the Kinsmen Club, if required, be provided with the option to extend the time period for the payment of their sponsorship contribution to a 9-year period with the final payment to be received by the City in 2022. It was anticipated that \$572,000 (60%) in payments would be received by the end of 2015 with payments of \$95,000 (10%) each year from 2016 to 2019.

PLANNING PROPERTY AND DEVELOPMENT - MUNICIPAL ACCOMMODATIONS FUND

Sherbrook Pool Reopening (continued):

On January 27, 2016, Council approved a revised payment schedule for the Kinsmen Club as follows: the first payment of \$500,000 (i.e. \$476,000 net of GST) to be received by the City on or before March 31, 2016; the remaining payments of \$100,000 (i.e. \$95,000 net of GST) per year to be received on or before December 31 in each year beginning with the year 2016 and continuing until December 31, 2020 with all payments totaling \$1 million including GST. The payments of \$476,000 before March 31, 2016 and \$96,000 in 2016 equals the Council approved 2015 budget of \$572,000. Kinsmen Club, if required, was also permitted to extend the time period of the payment of its sponsorship contribution to a 9-year period with the final payment to be received by the City no later than 2024. The Kinsmen Club exercised this option in 2019 and remitted \$48,000 (\$50,000 net of GST) and will remit the remaining \$144,000 in \$48,000 installments from 2020 to 2022.

By combining staff input and the results of industry expert findings, this plan will focus on facility status reporting, prioritization, funding and accountability. This will include the following:

- 1) addressing capacity, to minimize service delivery gaps and anticipate growth, 2) meeting changing health and safety regulations, 3) establishing an asset prioritization framework, 4) compiling a detailed building asset inventory, 5) meeting environmental and climate commitments, 6) preparing a risk plan for facilities and, 7) achieving financial sustainability with facilities that are affordable to build, operate, maintain, renew and dispose (life cycle approach); always in alignment with and support City mandates.

The Strategic Facilities Master Plan goal is to ensure that in 20 years, the City of Winnipeg's current delivered services are continuing to be delivered and where possible, improved in a manner that is financially affordable, environmentally sound and delivers best value for residents to 2040 and beyond.

The two existing weather protected walkways over Carlton Street were constructed in 1974 in support of the development of the Winnipeg Convention Centre. The existing concrete cladding panels are in poor condition and exhibit varying degrees of cracking, delamination and spalling. The existing windows are original to the structure and have exceeded their intended service life. Emergency cladding stabilization was completed in 2016 in order to delay the need for full replacement of the cladding for 3 years. Replacement of the cladding on the two weather protected walkways is now required to maintain the existing level of service. Further inspections were initiated in 2019 to determine the extent of required interim repairs prior to the scheduled cladding replacement in 2020.

It is recommended that the cladding replacement on both of the weather protected walkways in question be completed at the same time. Both existing walkways are of similar age and construction. Completing construction on both the walkways at the same time will reduce costs and disruption to users of the walkways and the street below.

Construction will not commence until a class 3 estimate is obtained.

Capital program to fund investments ensuring health/life safety requirements and the highest-and-best use investments associated with preserving continued facility operations that arise annually. Specifically, this program encompasses planned or emergency refurbishment, replacement, repair and maintenance upgrade projects for fire and life safety (e.g., emergency lighting), heating, ventilation, air conditioning, electrical, plumbing, building envelope, structural requirements, emergency power generation, and uninterrupted power systems. Funding is also allocated for critical systems including building automation and climate control, security, access control, and closed-circuit television systems. This program also ensures adherence to regulatory compliance upgrades, asbestos and other hazardous material remediation, and asset condition assessments. Finally, this program addresses physical accessibility issues such as lighting, signage, and public entranceways.

Projects include the following at various locations:

- Fire alarm system, fire separations, exit signs and associated repairs and upgrades
- Asbestos and hazardous materials remediation
- Elevator repairs and upgrades

PLANNING PROPERTY AND DEVELOPMENT - MUNICIPAL ACCOMMODATIONS FUND

Health/Life Safety/Emergency Systems Refurbishment/City-Wide Accessibility (continued):

- Structural evaluations and repairs
- Roof repairs and replacements
- Building System (heating, ventilation, and air conditioning, building envelop, electrical, plumbing, structural, etc.) repairs and replacements
- Uninterrupted power systems and emergency power generation systems repairs and upgrades
- Diesel exhaust fume mitigation
- Building automation, access control, intrusion, closed-circuit television, intercom systems repairs and upgrades
- Parking lots and underground services repairs and upgrades
- Rink floors, pool tank and deck repair, etc. repairs and upgrades
- Lighting conversions and retro-commissioning

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: 5

The City Clerk's Department, Archives and Records Control Branch, supports records and information management City-wide, manages access and privacy responsibilities for the City, and operates the City of Winnipeg Archives and the Corporate Records Centre. During 2018 and 2019, the branch prepared for and coordinated the move of the Corporate Records Centre out of 311 Ross into newly outfitted space at 1450 Mountain. This move enabled the branch to increase storage capacity for records scheduled under the records management by-law, utilize specialized shelving solutions to better accommodate variable sized box transfers from departments, and realize operational efficiencies. Archival storage and public access/research services continue to be delivered out of a leased facility at 50 Myrtle.

This project will ensure that the Corporate Records Centre continues to meet demand for storage of records scheduled under Records Management By-law 86/2010 ("by-law"). Costs will include installation of additional specialized shelving solutions and the purchase of equipment to manage inventory to ensure that City records are protected as required by by-law and can be accessed and retrieved in an effective manner.

Costs will be well known given 2018/2019 request for proposals developed to implement storage solutions.

Ongoing development of the Corporate Records Centre is essential to sound records management. Cost-effective storage and inventory management services enable departments to better manage records in accordance with the by-law and the administrative standard, resulting in an increase in routine transfers of records out of expensive operational space to the Corporate Records Centre. A further capital project will be established at the 5-year mark from this project. Development of the Corporate Records Centre supports the City's commitment to increased transparency and better response times to requests through access legislation.

In accordance with the department's statutory responsibility to compile a List of Electors and convene elections, every four years the department ensures the renewal of equipment and systems used in election processes.

As some of the systems are only used every 4 years, they require either extensive renovations or complete rewrites to allow them to function with changed systems, networks, and databases. In the past, this has involved corporate mainframes and a large number of staff hours. For the 2018 election, the City Clerk's Department ensured systems were operational using in-house resources and contract personnel, and by purchasing ready made systems from election partners, such as our voting machine partner, Election Systems and Software and our voters list partners, Elections Canada and Elections Manitoba.

Systems which need to be upgraded / revitalized for the 2022 election include the List of Electors system, Geographic Information System mapping, election night reporting systems and web sites, especially those utilizing the Internet for increased security and more effective communication with candidates, media, and the public.

The Innovation Strategy Program (ISP) will enable the City to create innovative ideas, utilize innovative technologies, and approaches to improve existing systems, tools, and processes to primarily reduce costs or increase revenue, improve service levels, and add new capabilities. This will enable the Chief Innovation Officer to fulfill the mandate of driving innovation for the City of Winnipeg to make us smarter, more efficient, and more effective in meeting the needs of a growing City.

Winnipeg currently operates below optimum service levels in many areas. Adequate resource levels are often cited for the gap between what should be delivered and what is delivered for both external, citizen centric services as well as internal, administrative services. Prior to 2019, consideration of innovation to explore alternative technologies, ideas, processes and build new capabilities to bridge the gap has been limited. Winnipeg is filling its resourcing gap with innovation capability and outcomes that focus on offering a return on investment.

Projects within the ISP will be selected and delivered to build and reinforce a culture of innovation and provide the City with tangible outcomes. Transforming how services are delivered, or changing the service levels that a service can provide will be the focus. These projects will be delivered with a balanced approach that blends Innovation Engineering methods with the City's project management principles. Projects undertaken as part of the ISP will produce expected benefit of operational efficiency gains, cost avoidance, citizen impact, revenue increase and cost decreases.

INNOVATION TRANSFORMATION AND TECHNOLOGY - GENERAL CAPITAL FUND

Innovation Strategy (continued):

The portfolio of innovation investments may include, but not be limited to:

- Innovation Technology Pilots will encompass pilot and trial projects that focus on the applications of novel technologies or novel applications of commodity technologies to business problems with an emphasis on identifying small projects that answer questions and test hypotheses to better inform future incrementally larger trials.
- Innovation Business Process Enhancement will look at the application of business modelling techniques to existing business processes that are currently a significant bottleneck or hindrance. This will focus less on technology and more on addressing the human and organizational business process elements and how those can be optimized for cost savings through appropriate analysis and application of Innovation Engineering methodology.
- Innovation Prototyping represents a collection of small projects aimed at testing concepts in a fail-fast-fail-cheap mindset. If efficiency gains are proven they will often be the precursor to projects started in the other areas. These small initiatives will aim to gather information about the viability of an idea, technology, or approach in order to ensure that follow-up project decisions are made with demonstrated value.

Included in 2020 is \$360,000 rebudgeted from the adopted 2016-2018 Innovation Capital Fund (City Clerks) - see Appendix 4.

The 2020 program may include a maximum of 7 temporary capital funded full-time equivalents.

The program budget is available for the Chief Innovation Officer to make allocations to projects as deemed necessary.

City departmental services depend on foundational systems (e.g. people, process, technology) that are critical to the successful delivery of those services. These foundational systems and capabilities will be the focus of the Smart Cities Innovation Program, improving shared, or foundational, areas to raise the level of effectiveness across the organization.

The Smart Cities Innovation Program will enable the City of Winnipeg to investigate and pilot LEAP innovations (LEAP innovations is a term for high impact, high risk innovations that have the potential to transform how a business delivers services, or the services a business delivers) in systems that are currently good enough for the present expectations, and yet are foundational to, and unable to support, service delivery long-term. The Smart Cities Innovation Program will deliver projects which in turn will lay the groundwork for building business cases to improve systems and processes. The Smart Cities Innovation Program will be fundamental to creating strategic outcomes.

The Smart Cities Innovation Program projects will be delivered in a manner consistent with the Innovation Strategy Program, ensuring that high-risk, high-uncertainty, projects are delivered appropriately, and in a way that limits risk exposure with prioritization based on potential impact and ability to support strategic outcomes and goals, as outlined in strategic and visionary plans (e.g. OurWinnipeg). The Smart Cities Innovation Program will enable businesses and departments to identify and begin to address barriers to delivery of strategic objectives proactively as opposed to reactively.

Smart Cities Innovation Program projects will align with strategic and architectural frameworks and roadmaps, and in some cases shape future strategy and architecture for the City of Winnipeg and with consideration for awareness and collaboration with other municipalities to create and share benefits.

INNOVATION TRANSFORMATION AND TECHNOLOGY - GENERAL CAPITAL FUND

Smart Cities Innovation Program (continued):

The projects may include, but not be limited to:

- Transportation Management Centre Expansion - expand capabilities to support additional service improvements (e.g. automated analysis of video footage for snow clearing, road condition, active transportation usage patterns; emergency vehicle traffic signal pre-emption).
- Economic Development Data Analysis - identify the data that can support the best possible economic development decision making through City planning and establish the processes and technology to allow for evidence based decision making.
- Technical Architecture - implementation of city-wide standardized technical architectures that allows business services to be delivered and sustained at lower cost and reduced business risk.
- Citizen Experience - establish the processes, data, and technology required to allow citizens to have access to their complete relationship with the City when they contact 311 or through online service options.

The 2020 program may include a maximum of 4 temporary capital funded full-time equivalents.

The program budget is available for the Chief Innovation Officer to allocate funding to projects based on financing requirements.

The City utilizes enterprise servers and storage and systems software infrastructure to address the computing requirements of a wide variety of critical business functions (311, PeopleSoft, Property Assessment, Taxation, Permitting, Parking Enforcement, Public Facing Internet, etc.). This infrastructure has a finite lifespan and needs to be replaced (evergreened) on a periodic basis to ensure its continued operation and support of the business functions. There are also requirements to expand the capacity of this infrastructure to support the growing requirements of the organization.

Included in 2025 is \$775,000 rebudgeted from 2015 - 2019 adopted capital programs - see Appendix 4.

The initiatives in the 2020 program may include a maximum of 4 temporary capital funded full-time equivalents.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Communications Network Infrastructure is the implementation and enhancement of the backbone network infrastructure which connects the computers in civic departments. This is a high speed infrastructure to enable the sharing and distribution of corporate information across departments with more management, control, flexibility, and ease of use at the department level.

Included are rebudgeted amounts totaling \$2.219 million from adopted 2015-2019 capital programs - see Appendix 4.

The initiatives in this program may include a maximum of 1 temporary, capital funded full-time equivalent.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Information Security initiatives will provide the minimum acceptable level of protection against the rapidly increasing number of threats to City business systems. The program will implement the processes, tools, and people elements required to manage the risk. Without the program, the City will be facing levels of security risk that could cause widespread business impact and prevent the City from meeting legislated responsibilities for the confidentiality, integrity, and availability of critical data.

Included are rebudgeted amounts totaling \$1.453 million from adopted 2015-2019 capital programs - see Appendix 4.

Incremental Full Time Equivalent Positions	-	-	-	-	-	-

Class Estimate: Not applicable, as this is a scalable program

Organizational support services depend on modern industry technologies for the delivery of their City-wide supports. As business needs continue to grow and change, so does the need for enhancement to existing systems, or entirely new systems to support these changes.

The Intake Program will provide a way for initiatives, which have been estimated to cost under \$100,000, to secure capital funding. This ability will improve the digital dexterity of the organization and better position the City of Winnipeg for a sustainable future. Projects within the program will be prioritized based on highest positive citizen impact, business value, return on investment projection, and cross organizational use.

Approximately 40 applications per year are received for project funding from the Intake Program. Examples of projects being funded from this program:

- Asset Management Application Alignment - Currently there are more than 15 applications used to track IT assets across the city, as well as myriad Excel databases. This leads to duplicate support costs and inefficiencies. Proposed project will likely be able to eliminate at least one-quarter of the applications, resulting in operational savings.
- Public Email Notification - current email list management solution (ELMS) license allows a limited number of subscribers and is labour-intensive to manage. Contract with the existing vendor is expiring and a new solution is required that can handle the anticipated increase in volume of subscribers that will come with implementation of the Citizen Portal project, when the tax assessments and notifications will be distributed online. A new solution will also enable immediate posting of news releases on-line, keeping citizens and media better informed.
- Electronic Bid Evaluation - Materials Management uses a time-consuming and highly manual process to evaluate bids currently, using Outlook for document distribution and Excel to evaluate bids and consolidate evaluations. Implementing electronic bid evaluations in MERX (Government of Canada/ Province of Manitoba bid posting solution) will yield a significant return on value given the significant amount of staff time expended on evaluating and consolidating bid results.

Included are rebudgeted amounts totaling \$411,000 from adopted 2015-2019 capital programs - see Appendix 4. The initiatives in this program may include a maximum of 2 temporary capital funded full-time equivalents.

The funding is for system upgrades and rehabilitation to key assessment and taxation systems that interface with the two main Computer Aided Mass Appraisal and Manta systems. There are approximately 40 subsystems that interface directly to these systems and funding is required to ensure that they continue to work effectively and efficiently with upgraded platforms and operating systems.

The initiatives in this program may include a maximum of 3 temporary capital funded full-time equivalent positions in 2021 and future years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Local Improvement capital projects are those which are financed partly by a direct levy on the properties benefited. The program is governed by Local Improvements By-Law No. 98/72 and is subject to advertising and subsequent approval by the majority of ratepayers involved. The types of expenditure generally falling within this category are: paving of local streets and lanes; sidewalk and boulevard construction; installation of new watermains and sewers; ornamental street lighting and lane lighting.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Transit Information Technology Program mainly provides technology upgrades to systems that support interaction between Transit operations and the public, as well as improvements to transit terminals and shelters, including rapid transit stations, and allows for improved technology throughout the department.

Transit also uses this program to implement innovative practices throughout the department to improve efficiency. Equipment related to achieving this innovation may be funded through this program.

Includes the following temporary positions: 2 Analyst Programmer full-time equivalent (FTE) positions for ongoing technology upgrades and 3 FTEs related to the redevelopment of Transit's Maintenance Management Information System (MMIS) including 1 Project Coordinator, 1 Information Specialist, and 1 Analyst Programmer.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Surplus funds will automatically be transferred to the following year's Transit Building Replacement/Refurbishment program budget.

Transit's operations are housed at three primary facilities - the Fort Rouge complex, North Main garage and Brandon garage. The Fort Rouge and North Main facilities are approximately 40 and 80 years old, respectively, and are operating at capacity. The department funds the maintenance of its facilities through the operating budget; however, many of the structural, mechanical and electrical systems in the existing facilities are past their design and economic lives and capital funding is required to bring the facilities up to acceptable standards.

This multi-year capital program addresses the need for smaller scale projects within Transit's existing facilities and stations. These projects are mainly required due to the age and condition of the assets.

Includes 2 temporary capital funded full-time equivalent Facility Coordinator positions.

Project (in \$000s)	2020	2021	2022	2023	2024	2025	Total

Class Estimate: Not applicable, as this is a scalable program

Surplus funds will automatically be transferred to the following year's Transit Roof Replacement and Ventilation Upgrade project budget.

Transit's Fort Rouge Garage (FRG) at 421 Osborne Street includes two major buildings that total approximately 480,000 square feet in area. The buildings were constructed in 1969 and 1978 and house over 70% of Transit's bus inventory. The roofs are now at the end of their economic and useful lives and need to be replaced.

The FRG storage and maintenance facilities require replacement of the existing ventilation systems, which includes makeup air units and exhaust fans, in response to a regulatory change in allowable levels of airborne nitrogen dioxide (NO2) in diesel exhaust, age and inefficiency of equipment, and pressure imbalances throughout the buildings.

The breakdown between roof and ventilation work is subject to change, but estimated as:

Project (in \$000s)	2020	2021	2022	2023	2024	2025	Total
Fort Rouge Garage Roof Replacement **	900						900
Upgrade Garage Ventilation Systems **	600	1,947	1,500	1,500	1,800		7,347
	1,500	1,947	1,500	1,500	1,800	-	8,247

Estimated useful life - dependent on the specific project.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** Projects are considered annual scalable programs and will incorporate annual tenders and are not considered a major capital project.

Surplus funds will automatically be transferred to the following year's Transit Buses program budget.

This project is for the on-going purchase of low-floor urban transit buses for the replacement of buses that have reached the end of their useful life. Costs will also include all outfitting costs associated with these purchases.

	2020	2021	2022	2023	2024	2025
Forecasted Number of Buses Included in Budget and Forecast above **	32	30	30	30	30	30

The 2020 budget estimate includes provision for 2 additional buses required for the Children Under 12 Ride for Free program.

Includes 1 temporary capital funded full-time equivalent (FTE) position (Coordinator Contracts).

Additional maintenance hours are required to maintain new and more complex systems on today's bus. New buses have more complex electronics, emission controls systems, air conditioning units, and fire suppression systems which result in increased maintenance hours. Additionally, the change in composition to the fleet with the addition of articulated buses also increases the maintenance needs.

TRANSIT - TRANSIT SYSTEM FUND

Transit Buses (continued):

Estimated useful life - 18 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

** The projection of the number of buses included in the budget is provided as an estimate only and is subject to change as the price per bus changes based on a number of factors. These factors include the movement in the Statistics Canada Monthly Industrial Product Price Index which is influenced by the fluctuation in the Canadian currency and inflation, steel tariffs, timing of order placement in relation to the budget approval, and changes to technology or product development.

The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (SWRT) was approved by Council on June 25, 2014 using a P3 approach and the transitway is expected to be opened in April 2020.

TRANSIT - TRANSIT SYSTEM FUND

Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass (continued):

The Previous Budget and Approximate Overall Project Funding (in \$000s):

City	187,000	40%
Province	187,000	40%
Federal	93,300	20%
	<u>467,300</u>	

Debt and Other Financing

Council approved additional borrowing authority of \$31 million (March 23, 2015) and \$112 million (July 15, 2015), for a total of \$143 million, as a method of interim financing the project, to be repaid as funding from the Province of Manitoba is received. This repayment is expected to be complete by 2022 with payments flowing as follows:

(in \$000s)	Authorized	2019	2020	2021	2022	Total
Interim Financing - External Debt / (Repayments)	143,000	(31,000)	(67,000)	(22,500)	(22,500)	-

There is also \$40.05 million approved in external debt for this project. All related debt and financing charges from this loan will be funded through the Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass Payment Reserve.

Operating and Maintenance Payments

The City will make on-going lease payments to Plenary Roads Winnipeg Transitway LP (PRW) extending until 2049. These payments are required under a 30-year contract with PRW and cover the remaining capital cost of the Transitway as well as on going maintenance.

There are significant provisions in the contract to ensure the City's performance specifications are met and the facility is returned to the City in good condition at the end of the contract. Costs associated with monitoring this contract, including the salary recovery of the Senior Project Review/P3 Specialist and other P3 costs, are also included in this budget. Payments to PRW are performance based and are reduced where the City's performance specifications are not met.

A portion of the payment to PRW represents an annual amount dedicated to the maintenance of the Transitway, including long-term rehabilitative costs. This amount is adjusted for changes to the Consumer Price Index on an annual basis.

The ongoing maintenance costs for the Transitway was previously assumed to be shared by the City 50% and Province 50%. However the Province has confirmed they will not provide this funding and the assumption now is the City will be assuming full responsibility for these costs.

As financing and administration costs are implicit in the lease payments, this project is exempt from the Corporate Administration and interest charges.

* No amounts have been included in the "Previous Budgets" related to P3 Annual Service / Finance Payments due to this project's on-going nature.

The Heavy Shop Equipment Replacement Program will replace several of Transit's outdated and aged equipment in the maintenance shop. This will minimize equipment and bus downtime, save money on expensive custom parts, and ensure buses are available for service in a timely manner.

Includes a shared temporary, capital funded full-time equivalent position (Project Manager) with the Accessibility Program and the Hoist Replacement at Fort Rouge Garage.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

On October 24, 2019, Council approved the Low Income Transit Pass Program Policy. As per this Council directive and the 2019 operating budget recommendations, the Public Service is progressing on the implementation of the Low Income Transit Pass Program with a launch date of April 1, 2020. The project is on schedule to begin accepting applications on April 1, 2020, with the May 2020 monthly bus pass being the first low income product for sale.

This project facilitates the set up of all aspects of the low income pass program including, but not limited to, technological and system requirements, program administration including application routing and review, and customer support.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, delivers water to Winnipeg from Shoal Lake, a distance of 156 kilometers (97 miles).

Funds are for condition assessment and rehabilitation work identified through on-going monitoring and inspection programs. Work identified to date includes rehabilitation of the aqueduct pipe, berm, and underdrain system, rehabilitation of the drainage siphons crossing under the aqueduct, and the rehabilitation/replacement of select boathouses, overflow structures, bar screens, stop logs, vent pipes, manholes, culverts, ditches, bridging structures and railway crossings signals.

The expected life of this asset is 40 years.

Class 3 estimate applies to projects in 2020 only. Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Shoal Lake Aqueduct, which has been in continuous service since 1919, is the sole water supply infrastructure for the City. The Shoal Lake Intake Structure is the transition headworks to receive water from Shoal Lake and to control the water flow into the aqueduct. Given the critical nature of the intake structure and its associated venturi structure to the safe operation of the aqueduct and the City's water supply, a condition assessment was undertaken and identified a number of rehabilitation and replacement requirements. This included the replacement and refurbishment of various mechanical components that date back to the original construction, upgrades to the mussel control system, as well as upgrades and improvements to the existing infrastructure. The recommended improvements will be completed in phases according to priority.

Preliminary design will provide a class 3 estimate prior to construction.

\$900,000 from 2017 capital budget authorization was returned to Retained Earnings for redistribution and is being budgeted in 2021.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Branch I and II Aqueducts, along with the Branch Interconnection Aqueduct are specialized pipes which are unique in size, materials, construction techniques and failure modes. The Branch I Aqueduct was installed between 1914 to 1918 and the Branch II and Interconnection Aqueducts were installed between 1959 and 1963. All of these require specialized inspection, testing, and maintenance to preserve the asset.

Funds are for the condition assessment and rehabilitation of the Branch and Interconnection Aqueducts along with their associated ancillaries.

Preliminary planning will provide a class 3 estimate prior to inspection and/or construction.

Funding in 2020 includes \$1,000,000 rebudgeted from capital budget authorized in 2017 - see Appendix 4.

The expected life of this asset is 40 years.

The Tache Booster Pumping Station, on the Branch 1 Aqueduct, was constructed in 1950 in order to develop the full capacity of the aqueduct. A study identified a number of required upgrades to the pumping station and the aqueduct surge tower adjacent to the station. The work includes upgrading the station's electrical, heating and ventilation systems, upgrading the foundation and roof structures, and upgrading and reconfiguring the valve and piping system between the pumping station and the surge tower. Also, aesthetic, security fencing, and landscaping upgrades to the site and facilities will be undertaken to integrate with the proposed residential redevelopment of the surrounding area.

Preliminary design work will provide a class 3 estimate prior to construction.

The expected life of the rehabilitated asset is 50 years.

The McPhillips, Wilkes and MacLean reservoirs provide balancing storage to meet fluctuating daily water demands; the McPhillips, Hurst, and MacLean pumping stations provide the final pumping to deliver water to the water utility customers. These pump stations and reservoirs were constructed in the early 1960s. It is anticipated that the building structures will require upgrading to ensure the uninterrupted operation of these pumping facilities.

Condition assessments will be undertaken at the reservoirs to identify any repairs needed to ensure the reservoirs remain operational for the next 50 years. Additional investments in the pumping stations and reservoirs will be put forward as a result of the condition assessments.

The expected life of these assets is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The Drinking Water Quality Strategy Project has determined that chlorination at the existing pumping stations should continue in order to maintain a chlorine residual in the distribution system. The existing chlorination system uses chlorine gas, which is a hazardous chemical.

Funds are for the design and installation of a new chlorine system or for the existing system to be upgraded in order to reduce risks.

The expected life of these assets is 25 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The City's Regional Supervisory Control and Data Acquisition (SCADA) system, which is used to provide automated control and visualization of the water supply and distribution system, has reached the end of its useful life. Further, the Programmable Logic Controllers (PLCs), which are specialized hardware with customized software that provide local control of the water distribution system, have also reached the end of their useful life. To ensure a continuous supply of water to the City of Winnipeg, the Regional SCADA system and PLCs need to be replaced. Power reliability upgrades will be undertaken in conjunction with the SCADA and PLC upgrades to address shortcomings in the existing control and instrumentation design and will add redundancy to ensure greater station reliability.

The major benefits of constructing this project include maintaining essential level of service.

Significant risks associated with constructing this project include impact on service delivery during construction and changes in market conditions.

Significant risks of not constructing the project or deferring the project include inability to maintain essential level of service.

The expected life of these assets ranges from 5 to 12 years.

The waterworks system is made up of complex infrastructure that delivers water from Shoal Lake to Winnipeg homes and businesses. Operating the waterworks system is subject to legislation including the Drinking Water Safety Act, Public Health Act, Operator Certification Regulations, Workplace Safety and Health Act, and Environment Act. Safeguarding our infrastructure from accidental or intentional damage or destruction is critical to drinking water quality and public health. Funding is required for increased security measures to adequately protect the waterworks system.

Preliminary design work will provide a class 3 estimate prior to construction.

Funds for this program will be included in future years as needs are identified.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: 5

The Deacon Reservoir is used to supplement the City's water supply when the daily demand exceeds the capacity of the Shoal Lake Aqueduct and to provide water during Shoal Lake Aqueduct shutdowns. A topographic survey of the top of the reservoir dikes found some top of dike elevations that were substantially lower than design elevations. Geotechnical testing was completed and found that the dike fill remains well compacted and consolidation of the soils below the dikes is ongoing but is slowing over time. Based on existing water demands and the operational strategy of the reservoir, consolidation will continue to be monitored through dike surveys and any dike raises will be deferred until water demands increase.

The expected life of this asset is 50 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

The Deacon Booster Pumping Station suction header pipe has been identified as a single point of failure for the supply of treated water to the City.

Funds are used to effectively divide the suction header. This will permit a continuous supply of water to the City in the event a leak occurs on this suction header.

The expected life of this asset is 50 years.

The Deacon site ditch drainage system experienced overland flooding due to high water levels in the drain discharging into the floodway during the 1997 flood. With the expanded floodway and the increased water levels, additional flood protection measures must be installed to protect the water treatment plant and related onsite buildings.

Preliminary design work will provide a class 3 estimate prior to construction.

Funding in 2020 includes \$1,825,000 rebudgeted from capital budget authorized in 2017 - see Appendix 4.

The expected life of this asset is 50 years.

Class Estimate: 4

The McPhillips, Hurst and MacLean pumping stations provide the final pumping to deliver water to the water utility customers. The pump stations use chillers and distribution water to maintain operating temperatures in the facilities and for the equipment. The chillers at McPhillips and Hurst have to be replaced as the refrigerant currently used will be phased out in 2020. The natural gas engines and the fluid couplings use distribution water for cooling which is then sent to waste. A new method for cooling the natural gas engines will be investigated and implemented.

Preliminary design work will provide a class 3 estimate prior to construction.

The estimated life of this asset is 20 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Detailed Design & Construction	700	1,735				

Filtered water produced by the water treatment plant undergoes final treatment by ultraviolet light at the Deacon Booster Pumping Station before being delivered to the City's water distribution system. The ultraviolet light disinfection system is an integral pathogen barrier in the treatment process. An assessment report was finalized in 2016 to evaluate upgrade options to address recent research findings in medium-pressure lamp technology, maintenance concerns from several key system components at or near the end of their useful life, as well as optimization of the system for the treated water quality. Funding is to complete the recommended upgrades.

Preliminary engineering will develop a class 3 estimate prior to construction.

Funding in 2020 includes \$855,000 rebudgeted from capital budget authorized in 2017 - see Appendix 4.

\$880,000 from 2017 capital budget authorization was returned to Retained Earnings for redistribution and is being budgeted in 2021.

The expected life of this asset is 20 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Class Estimate: 5

The in-town pumping stations supply 100% of the City's daily water use. Accurate flow measurement of water leaving the pumping stations is critical to the operation of the water distribution system. Due to age and lack of hardware support, the accuracy of the existing meters is not within an acceptable range.

Funds are to replace the meters and provide a means of secondary measurement.

Preliminary design will provide a class 3 estimate prior to construction.

The estimated life of this asset is 25 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Class Estimate: 5

The water treatment plant provides treated drinking water to the City of Winnipeg. The continued upkeep and maintenance of the water treatment plant's assets is required to ensure a continuous supply of water. An asset refurbishment and replacement plan has been developed to address asset lifecycle issues at the water treatment plant as they arise.

Condition assessment of the water treatment plant assets is ongoing and the asset refurbishment and replacement program will address items as they are identified and prioritized.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Class Estimate: 5

The electrical power supply is the primary source of energy to drive the pumps in the drinking water pump stations. Electrical power disruptions have caused the electric pumps to shut down for protection purposes, which results in reduced water service. In order to identify the deficiencies in the system, a Water Pumping Station Power Reliability Study was completed. One of the recommendations of the study was to carry out water pumping stations electrical inspections. The study and the inspections produced recommendations for a number of electrical and control improvements to reduce the effects of electrical power disruptions.

The required improvements will be completed in phases according to priority. The Water Pumping Station Power Reliability Study also recommended a number of upgrades to address risks associated with the configuration of the pumping and ancillary equipment. These reliability upgrades will address shortcomings in the existing control and instrumentation design and will add redundancy to ensure greater station reliability. These reliability upgrades will be undertaken in conjunction with the Supervisory Control and Data Acquisition upgrade project to minimize station shut-down times.

Power quality benchmark testing has found that the electric motors used to distribute potable water from the McPhillips Regional Pumping Station are causing an unacceptable temporary voltage drop upon motor start-up. Preliminary design will be undertaken to determine the options available to limit voltage drop and may identify power quality upgrade requirements at other water pumping stations.

The estimated life of this asset is 60 years.

WATER AND WASTE - WATERWORKS SYSTEM FUND

Project Name: **Study of Backup Power Supply for the Hurst Pumping Station**

Class Estimate: 4

The MacLean and McPhillips pumping stations are driven using two sources of energy: electrical power supply and natural gas. The Hurst Pumping Station, serving the largest portion of the City's water demand, is equipped solely with electrically driven pumps. Despite some redundancy in the electrical supply to the station, Hurst has experienced electrical power disruptions that caused the electric pumps to shut down for protection purposes, which resulted in reduced water service.

In light of electrical interruptions at Hurst Pumping Station, the Regional Water Supply Conceptual Planning Study Update recommended assessing the need for backup power supply to this station. This study will evaluate options for backup power supply and provide cost estimates for options.

Study to be updated to a class 3 estimate following further discussion with Manitoba Hydro as part of pre-bid estimate.

\$400,000 from 2017 capital budget authorization was returned to Retained Earnings for redistribution and is being budgeted in 2021.

The estimated life of this asset is 50 years.

Feeder mains are specialized pipes which are unique in size, materials, construction techniques, and failure modes. The majority of feeder mains were installed in the 1960s and require inspection, testing, and maintenance to preserve the asset. The program will also include replacement of valves and operators, related pipe connections, valve chambers, structural assessments, and restoration works.

Additional investments in Feeder Main Condition Assessment and Rehabilitation will be put forward as a result of recent and ongoing condition assessment.

The estimated life of a rehabilitated asset ranges from 20 to 80 years, depending on asset type, condition, and the rehabilitation method used.

Individual projects within this program will be revised to class 3 estimates through preliminary engineering prior to construction.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The majority of the City's inventory of water meters are at end of life. Funds in 2020 will be used to review current water meter technology, validate the best replacement technology, and develop a plan and class 3 estimate for implementation of a multi-year direct-read water meter replacement program.

Implementation of the water meter renewal program is forecast to be funded by the Water Meter Renewal Reserve fund in 2025. On January 30, 2020, Council authorized the establishment of the Water Meter Renewal Reserve. The reserve will accumulate funds starting in 2020 for replacement and renewal of aging water meters and an advanced meter system.

The estimated life of a water meter is 15 years.

This is a continuing program to replace and/or rehabilitate deteriorating water main infrastructure. Funding is used for water main replacement, cathodic protection, valve and hydrant replacement/rehabilitation, correction of dead end mains, upgrading of substandard mains, water system studies, assessments, development of design standards and replacement of problem water services within the City right-of-way, and hydraulic improvements for fire protection purposes. Funding is also used for integrated right-of-way renewal programs coordinated with the Public Works Department.

The expected remaining life of each rehabilitated water main ranges from 20 to 80 years, depending on the rehabilitation technology and the asset condition.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater and Solid Waste services. Oracle Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the Customer Care and Billing and Oracle Work Order and Asset Management systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

The estimated life of this asset is 10 years.

Funding for this program is split between the Waterworks System Fund and the Sewage Disposal Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

This program will develop and implement technology solutions that can be leveraged by plant and field employees to perform their work more effectively and efficiently, and provide timely information to the public and 311. This will increase productivity by reducing manual effort, improve accessibility to information, improve accuracy and quality of information, reduce time to record and retrieve information, improve communication, and improve customer service and experience.

This project may include a maximum of 1.25 temporary capital funded full-time equivalents.

The estimated life of this asset is 10 years.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: 4

The Water and Waste Department's three sewage treatment plants utilize a Distributed Control System (DCS) with a Process Control View (PCV) Human Machine Interface (HMI) for process control. It is an intricate network of specialized computers that monitor thousands of sensors throughout the plants and controls the treatment processes by making calculations and adjustments prescribed by operators and process control analysts.

An Automation Master Plan was developed for the sewage treatment plants in 2012. The DCS system will be replaced with a Programmable Logic Controller (PLC) based system and a new HMI system will be installed at all three treatment plants. The replacement of the DCS and HMI systems at the North End and South End Sewage Treatment Plants are part of the major capital upgrade projects at these facilities.

This program will develop a plan to ensure operational reliability throughout the upgrades and in the long term once the upgrades are complete. The major components of this program include: maintaining the DCS and HMI systems until replacement, upgrading the inter-plant communication systems and network security components, and replacement of the West End Sewage Treatment Plant DCS and HMI systems.

The class estimate will be refined to a class 3 prior to undertaking upgrades.

\$4,000,000 from 2017 and 2018 capital budget authorization was returned to Retained Earnings for redistribution and is being budgeted in 2021 and 2024.

The expected life of the new PLC system is 20 years and the new HMI system is 10 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Class Estimate: Not applicable, as this is a scalable program

A risk and criticality review of the City's three sewage treatment plants has been undertaken to assess the condition of assets and to develop a refurbishment and replacement plan for the next 25 years. The improvements identified will address process reliability, mechanical, electrical, structural components, building envelope and safety at all three locations including any related works required such as environmental studies/assessments or decommissioning of assets. Operational efficiency improvements will also be identified and implemented in a coordinated fashion with the enhanced maintenance program.

Asset assessment and plan development are ongoing, which will continue to address items as identified.

Class estimates for individual projects within this program will be revised to class 3 through preliminary engineering prior to construction.

The expected life of the structure upgrades is 50 years and the expected life of the electrical and mechanical components is 25 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

In 2008, the West End Sewage Treatment Plant was upgraded to meet new nutrient removal regulations. Some assets were not upgraded and are now nearing their end of life.

The plan will assess capacity and expansion options of key process components (e.g. headworks) to meet projected growth in the catchment area and identify ancillary assets for replacement and/or refurbishment. Ancillary assets include process piping, heating and ventilation, mechanical and electrical components. This is done to support process operations and maintain environmental compliance.

Additional funds will be required in future years to implement the recommendations of this plan.

As part of the Canadian Standards Association Occupational Health and Safety program, a new standard entitled CSA Z462, Workplace Electrical Safety Standard has been adopted within the new Canadian Electrical Code.

The program will implement the recommendations from the Arc Flash Study on a priority/risk basis in conjunction with other electrical upgrades at the Department's facilities. This work includes decreasing the potential arc flash energy at various distribution points, upgrading equipment to lower fault energies, procuring personal protective equipment and providing training. This is for compliance to the arc flash requirements in the electrical code.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: 3

Currently all of the land in Winnipeg, south of Bishop Grandin Boulevard and west of the Red River plus the communities of Lindenwoods and Whyte Ridge, are serviced by the D'Arcy Wastewater Lift Station located at the Red River and the Fort Garry Bridge.

During high water events on the Red River, if pump capacity is lost at the South End Sewage Treatment Plant (SEWPCC) the risk to basement flooding is substantial. To mitigate this risk, the D'Arcy Wastewater Lift Station needs to be reconfigured to allow the use of lift pumps to pump flows to the Red River during emergency situations.

The expected life of this asset is 50 years.

This project is for the condition assessment, rehabilitation and/or replacement of the sewer river crossings and for the installation of leak detection equipment on the existing waterway crossings.

The department has completed a risk assessment of all river crossings in order to determine a prioritization plan for ongoing condition assessment as well as to upgrade and replace any at-risk crossings as required by Environment Licences issued by the Province of Manitoba for the wastewater collection system in the City of Winnipeg.

These funds will also be used to install continuous leak detection monitoring equipment at river crossings as required by the Provincial Environmental Licence.

A class 3 estimate will be obtained prior to construction or inspection work.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The Combined Sewer Overflow (CSO) and Basement Flood Management Strategy projects will be driven by the Combined Sewer Overflow Master Plan, which was approved by the Province on November 13, 2019, developed to meet the requirements of Environment Act Licence No. 3042. The objectives of this multi-year program are to: comply with the regulators to mitigate the impact of CSO's on the local water courses and improve basement flooding protection.

On November 24, 2017, Manitoba Sustainable Development directed the City to finalize the CSO Master Plan by August 2019 to implement CSO control to capture a minimum of 85% CSO volume in a representative year by 2045 or an alternative date subject to approval of the director of Manitoba Sustainability Development. The City was also directed to provide a further plan by 2030 to achieve a secondary control target of a maximum of 4 CSOs in a representative year, and provide an updated implementation timeline.

Funds budgeted are for the development and implementation of a CSO Master Plan as well as for sewer relief works associated with basement flooding and CSO mitigation including sewers, chambers, weirs, and other related works. Funds are also budgeted for monitoring and reporting programs and systems, pilot studies, land acquisition, and integration with other major sewer programs.

All projects will be updated to a class 3 estimate through preliminary and detailed design prior to any construction work.

The expected life of the sewers is 50 years, mechanical components is 25 years and SCADA system is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

This program involves the rehabilitation of 19 sewage pump stations which have decommissioned comminutor chambers associated with them. These stations currently have open concrete flumes located inside the station, which sewage flows through. Due to these open flumes, high levels of hydrogen sulfide (H2S) and excessive moisture have caused corrosion damage to electrical equipment, remote terminal unit (RTU) panels, motor control centers (MCC) and the electric motors. Installation of a closed pipe through these open flumes will eliminate or reduce the levels of H2S in the stations and therefore reduce the amount of corrosion to the equipment in these stations and will improve station reliability.

The expected life of this asset is 50 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

	2020	2021	2022	2023	2024	2025
Class Estimate					5	5
Preliminary Design					2,500	
Detailed Design & Construction					2,500	35,000

Currently, all sewage from the land in Winnipeg south of Bishop Grandin Boulevard and west of the Red River plus the communities of Lindenwoods and Whyte Ridge flow to the South End Sewage Treatment Plant (SEWPCC). This flow crosses the Red River between the Fort Garry bridges; at this location the D'Arcy lift station raises the sewage to a sufficient height to allow it to flow by gravity under the Red River.

This crossing represents a single point of failure. If there is a failure of the lift station or the siphon, there is a substantial risk of basement flooding and/or overflows to the Red River. System redundancy is required to convey flows to the treatment plant in the event of a failure of either D'Arcy lift station or the associated siphons. Also, due to the high wet weather flows experienced at the D'Arcy lift station, the additional system capacity will reduce the risk of basement flooding and overflows to the river.

The South West Interceptor Crossing will provide an additional gravity crossing of the Red River. A conceptual study will be undertaken to review options and sizing.

The major benefits of constructing this project include enabling growth in south-west Winnipeg and maintaining essential level of service.

Significant risks associated with constructing this project include unknown ground conditions and construction of a river crossing.

Significant risks of not constructing the project or deferring the project include inability to accommodate future growth and inability to maintain essential level of service.

The expected life of this asset is 75 years.

WATER AND WASTE - SEWAGE DISPOSAL SYSTEM FUND

Environmental Standards Division operates a Canadian Association for Laboratory Accreditation (CALA) accredited laboratory for testing, monitoring, and compliance reporting on behalf of the Water and Waste Department. To ensure the laboratory can continue to stay up-to-date with CALA accreditation standards, meet future regulatory monitoring and reporting requirements, and accommodate the increasing demands of the laboratory's internal clients, a new facility plan is required. The plan will also investigate options to bring additional testing in-house with further accreditation requirements.

Additional funds will be required in future years to implement the recommendations of this plan.

Class Estimate: Not applicable, as this is a scalable program

This is a program to replace and/or rehabilitate combined, wastewater, and land drainage sewer infrastructure that are no longer meeting level of service objectives. A portion of the funding will be used for condition assessment of sewer assets; sewers will be replaced or rehabilitated using appropriate technologies on a risk-based level of service basis. Funds will also be utilized to update the sewer asset register, and ongoing operating costs associated with software licensing and maintenance have been included.

Funding will also be utilized for the assessment, repair and/or replacement, under certain conditions, of private wastewater sewer services within the public right-of-way under the Sewer By-Law, and for the development of wastewater and land drainage design standards.

The expected remaining life of each rehabilitated sewer ranges from 20 to 100 years, depending on the rehabilitation technology and the asset condition. The expected life of the asset register is 10 years.

Funding in 2020 includes \$10,000,000 rebudgeted from capital budget authorized in 2016, 2017 and 2018 (funded by Sewer System Rehabilitation Reserve) - see Appendix 4.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Developing Levels of Service (LOS) was identified as a next step in the Corporate and Departmental Asset Management Plan project. The LOS component of an asset management plan describes what people experience from a municipality's infrastructure. Part of an LOS framework also includes determining metrics by which to gauge asset performance. The LOS framework, along with asset metrics, provides the basis for risk-based decision making, ensures adequate funding is available to meet LOS, and also enables discussion about current and/or proposed LOS to be achieved over time.

The expected life of this asset is 10 years.

This project will develop a solution that will improve access to data and information, provide improved analytics, dashboarding, and reporting functionality, provide timely reporting of data, and generate insights to improve evidence-based decision-making.

Starting in 2020, this program will require 1 additional full-time equivalent (FTE) of a Tech Lead/Senior Data Engineer that will be responsible for data architecture, collection, ingestion, and quality management; and 1 additional FTE of a Systems Operations Developer that will be responsible for infrastructure setup and support.

Starting in 2022, this program will require 1 additional FTE of a Data Scientist that will be responsible for developing, training, and optimizing models for analytics.

This project may include a maximum of 1 temporary capital funded FTE.

The estimated life of this asset is 10 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Customer Care and Billing (CCB) is used to manage customer accounts and collections for Water, Wastewater and Solid Waste services. Oracle Work Order and Asset Management (WAM) is used in the delivery of Water and Wastewater services for work planning, management, infrastructure preventative maintenance and renewal programs. Both CCB and WAM require ongoing product updates to ensure these systems can support the day-to-day operations within the Water and Waste Department.

This program will maintain the Customer Care and Billing and Oracle Work Order and Asset Management systems to meet current and future business requirements resulting from functional, technical, and business continuity changes.

The estimated life of this asset is 10 years.

Funding for this program is split between the Waterworks System Fund and the Sewage Disposal Fund.

*N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Solid waste must be disposed of in engineered landfill cells under the conditions of the Environment Act Licence No. 3081 R. As the capacity of existing landfill cells is consumed, new cells and their supporting infrastructure must be designed and constructed. The funding identified provides for design, excavation, liners, leachate collection, associated surface and ground water management, access roads, and associated engineering work.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

Class Estimate: Not applicable, as this is a scalable program

The Closed Landfill Site Improvement program was initiated in 2016 as a response to the Landfill Disposition Study that prioritized projects to improve and upgrade closed landfill components, including the protective cap, leachate and landfill gas collection systems, and monitoring equipment.

The program also includes a soil fabrication pilot project at Summit Landfill. This is an operational-scale demonstration of an all-season operation that uses city residuals, such as biosolids, street sweepings from winter road operations (sand and grit) and woodchips, to fabricate top soil to complete the cap system at Summit Landfill. Capping the landfill is a regulatory requirement that will protect human health and the environment. The soil blends are designed to be environmentally protective and support vegetative growth, while restoring the landfill to a native prairie landscape.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Class Estimate: Not applicable, as this is a scalable program

This is a program for all-season fabrication of soil to supplement city topsoil requirements. The soil fabrication process uses city residuals, such as biosolids, street sweepings from winter road operations (sand and grit) and woodchips, to fabricate top soil. This is then spread and seeded with native prairie species at city landfills. Operations include ongoing environmental and vegetative monitoring.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

On October 19, 2011 Council adopted the Comprehensive Integrated Waste Management Strategy for implementation starting in 2012. The strategy includes a recommendation for Solid Waste Services to undertake a review, analysis and development of a roadmap of the City's solid waste systems every five years. The next review will take place in 2023.

WATER AND WASTE - SOLID WASTE DISPOSAL FUND

Class Estimate: 5

A Source Separated Organics (SSO) pilot project will be initiated in some Winnipeg neighbourhoods. The purpose of the pilot is to gauge homeowner interest and participation in a program that diverts and collects organic waste separately from the traditional waste stream. Information obtained from this project will determine the feasibility of, and develop a business case for, the implementation of a full city-wide program.

On December 12, 2019, Council authorized a first charge of up to \$1,800,000 in 2019, or prior to the adoption of the 2020 Capital Budget, for Source Separated Organics contract procurement for a curbside pilot project.

A class 3 estimate will be developed prior to pilot project implementation.

This project will provide an integrated collection management information system that will manage cart inventory and delivery, billing and payment processing, vendor and contract management, customer service inquiries and operational and compliance reporting capabilities. The scope of this project will include building new system functionalities within the in-house developed Collections Management System (CMS), integrating CMS with garbage and recycling contractor's application systems as well as with other internal City systems, and developing tools to generate compliance, operational and financial reports and dashboards.

The expected life of this asset is 10 years.

Class Estimate: Not applicable, as this is a scalable program

A 2007 report on the adequacy and operation of the City's regional flood pumping stations identified station upgrades required in the near and long term. These upgrades improve overall station reliability during high river levels and rainfall events and may include changes to ventilation, electrical, mechanical, structural, or architectural components of the stations and associated structures, chambers, weirs, outfall pipes and gates. A program to address high priority reliability items has been developed for implementation. All stations will be upgraded for remote monitoring which is critical during flood and rainfall events.

Funding in 2020 includes \$500,000 re-budgeted from capital budget authorized in 2017 (funded by Sewage Disposal System fund) - see Appendix 4.

The expected life of this asset is 50 years.

Class Estimate: Not applicable, as this is a scalable program

All land drainage gate chambers have been upgraded to a protection level of James 24.5 ft. The current focus is to upgrade the City's storm relief sewer (SRS) gate chambers to provide improved dewatering in combined sewer districts during summer rainstorms. The older SRS systems are only isolated from the river with sluice gates. An engineering study has been undertaken to develop conceptual designs and cost estimates for adding flap gates and permanent pumping as required for some of the identified sites, and will be undertaken for remaining sites in future years.

Funds are also provisioned for the rehabilitation of sewer flap gates and associated structures to ensure that all systems are adequately protected from river water intrusion.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

An Outfall Condition Assessment was completed in 2019. This assessment prioritizes Winnipeg's outfall sites that require renewal/rehabilitation, identifies potential renewal/rehabilitation techniques for each outfall, and provides high level cost estimates for this work. The City will program and undertake risk-based work on a yearly basis to maximize use of funding for the rehabilitation of sewer outfalls, repairs to piping and related appurtenances, and to improve riverbank stability issues.

Approximately \$2.0 million of project funding from current and prior years has been allocated to the Wellington Crescent Project. See the Riverbank Stabilization - Physical Asset Protection project under Planning, Property and Development for more details.

The expected life of this asset is 50 years.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

The provision for development agreement payback is an allowance for the City to repay developers who bridge finance the installation of oversized underground infrastructure at the request of the City at a time when City capital funding is not provided. The policy framework for bridge financing the oversized services was defined in the Development Agreement Parameters, adopted by Council on July 17, 2002.

Development agreement paybacks will be funded by two sources:

- 1) Developer capacity charges: used to fund paybacks related to oversized regional land drainage services. Paybacks will be managed based on available funds in the Developer Capacity Charges account.
- 2) Transfer from Sewage Disposal System Fund: generally used to fund local underground services oversizing.

The expected life of the installed assets are over 50 years.

The Winnipeg Fleet Management Agency (WFMA) offers three types of fuel at below market prices - unleaded gasoline, clear diesel and marked diesel available at five fully automated 24/7 locations strategically located throughout the city. Fuel is managed using a charge-back system based on fuel consumption for each individual fleet vehicle. This program funds capital improvement expenditures to infrastructure at WFMA fuel sites.

This program supports the delivery of on-street and off-street enforcement of parking related by-laws, as well as enforcement related to the Vehicles For Hire by-law, by investing in technologies that allow for effective enforcement practices and increased compliance with by-laws. Capital funding is used to both replace automated license plate recognition (ALPR) units and purchase new inventory and necessary information technology infrastructure, such as laptops.

Planned investments for 2020 include:

Two new ALPR units to support improved school zone, fire lane and surface lot enforcement, plus laptop replacements.

* N/A - No amounts have been included in the "Previous Budgets" due to this project's on-going nature.

This project will replace the existing Parking Access Revenue Control System at the Millennium Library Parkade that has reached the end of its useful life. The replacement of payment systems at the parkade and upgrades to the entry and exit gate systems will ensure the reliability of hardware and software systems, allow for numerous improvements to customer service as well as ensure Payment Card Industry Data Security Standard compliance.

This project is an extension of the Parking Access and Revenue Control System project to enhance security at the Millennium Library Parkade. The project will include installation of a new access control system in the stairwells of the parkade for enhanced security, which will be funded through the Destination Marketing Reserve. Work will not proceed until a class 3 estimate is obtained. The project was approved by Council on January 30, 2020.

City of Winnipeg Cost Estimate Classification*

Cost Estimate Class	Project Definition	Project Definition/ Design % Complete	Accuracy of Cost Estimate
Class 5	Concept Screening, Rough Order of Magnitude Estimate	1%	-50% to 100%
Class 4	Feasibility	10%	-30% to 60%
Class 3	Preliminary Design (for Budget Authorization)	~30%	-20% to +30%
Class 2	Detailed Design in progress	60%	-15% to 20%
Class 1	Detailed Design Documentation Complete, Pre-Tender Estimate	99%	-10% to 15%
Scalable	Project/Program scope can be adjusted to fit the Budget	N/A	N/A

Cost Estimate Class Descriptions

- Class 5 Rough estimate prepared based on very limited information. Used to make an assessment of initial viability and for long range capital planning.
- Class 4 Estimates prepared based on limited information with some engineering work completed and preliminary scope determination.
- Class 3** Estimates based on completed preliminary design documentation. This Class 3 estimate will form the basis for budget authorization and set initial control estimate against which project deliverables will be measured (i.e. on budget).**
- Class 2 Estimates prepared in progressive detail from a Class 3 and are used to establish a contract value against which decisions can be made to revise the scope of the project and manage risk at a specific milestone in the design development.
- Class 1 Pre-tender estimates prepared based on completed detailed design documentation (i.e. drawings, plans, specifications, etc.) as well as complete project delivery plans.
- Scalable Scalable projects/programs will be sized according to the final budget authorization.

* Determined using the AACE International, Recommended Practices 17R-97, 18R-97, 56R-08, 97R-18 & 98R-18

Public Private Partnership Payments as a Percentage of Cash to Capital / Gas Tax

(In thousands of dollars)	2019	2020	2021	2022	2023	2024	2025
Tax Supported Public Private Partnership Payments:							
1 Charleswood Bridge	\$ 1,478	\$ 1,478	\$ 1,478	\$ 1,478	\$ 1,478	\$ 1,478	
2 Disraeli Bridge and Overpass Facility	14,780	13,117	13,170	13,225	13,325	13,337	13,395

Financing Sources:							
1 Cash to Capital	\$ 21,260	\$ 22,846	\$ 23,014	\$ 21,533	\$ 21,625	\$ 20,000	\$ 20,000
2 Federal Gas Tax	58,682	53,716	53,131	49,988	50,415	48,440	48,420
Total Cash to Capital and Gas Tax	\$ 79,942	\$ 76,562	\$ 76,145	\$ 71,521	\$ 72,040	\$ 68,440	\$ 68,420
Payments as a Percentage of Cash to Capital and Gas Tax	30.74%	29.97%	30.26%	32.36%	32.37%	34.26%	32.26%

Notes:

- Public Private Partnership Payments include annual service/financing payments and debt servicing payments.
- On December 15, 2009, Council adopted that the annual lease/service payments and debt servicing costs for tax supported public private partnerships be funded annually up to a maximum of 30% of the cash to capital contribution and the federal gas tax. Except for 2020, the 30% tax supported limit has been exceeded. This is attributable to the reductions to cash to capital, which decrease the base for the calculation. No further public private partnerships will be authorized until payments fall within the 30% limit.
- The Southwest Rapid Transitway (Stage 2) and Pembina Highway Underpass capital project was approved by Council on June 25, 2014. As this is a Utility and Other project, it does not impact this Public Private Partnership Payments calculation.

Federal Gas Tax Funding*	44,396	46,414	46,414	48,432	48,432	48,432
Annual Variance	9,320	6,717	3,574	1,983	8	(12)
Total 6-Year Variance**	21,590					
* Amounts in 2020 - 2023 are based on the Federal Gas Tax Funding (GTF) Allocation - 5 Year Period letter from the Province dated December 27, 2018 outlining funding from 2019 - 2023. Funding for 2024 and 2025 was submitted consistent with 2023 funding levels.						
** On July 9, 2019 the City received notification from the Province of Manitoba of a one-time top-up transfer of \$44.09 million in Federal Gas Tax funds. \$22.5 million was allocated to 2019 projects. The remaining \$21.590 million was allocated to projects in the 2020 Capital Budget and Five Year Forecast.						

Major Capital Projects

On October 28, 2015 Council concurred in the recommendation of the Executive Policy Committee and adopted the following:

- That an adjustment to the dollar value for the definition of a Major Capital Project for reporting to the Standing Policy Committee on Finance be approved from \$10 million to \$20 million to reflect construction inflation since Council originally adopted the policy in 1999.
- That the threshold for Major Capital Project reporting to the Standing Policy Committee on Finance be automatically revised annually for construction inflation and disclosed in the Annual Capital Budget put forward to Council for adoption.
- That the adjusted dollar value for reporting to Standing Policy Committee on Finance be applied on a prospective basis. Projects currently reporting that are under the revised threshold will continue reporting until the project is completed.

Year	Threshold (in millions)	Construction Inflation*	Revised Threshold after Inflation (in millions)
2017	\$21.7	5%	\$22.7
2018	\$22.7	3%	\$23.4
2019	\$23.4	3%	\$24.1

*Forecasted construction inflation is used to prepare the threshold for the following year.

Thus, for 2020, projects \$24 million or greater are required to form a Major Capital Projects Advisory Committee within 180 calendar days of project authorization and begin reporting financial status to the Standing Policy Committee (SPC) on Finance. Reporting is to be done on a quarterly basis, unless otherwise directed by SPC Finance, until the project is complete. The SPC Finance may, at its discretion, request projects below this threshold to report to the Committee.

Listing of Major Capital Projects previously approved and active for 2020:

- 1) Automatic Fare Collection System
- 2) North End Sewage Treatment Plant (NEWPCC) Biological Nutrient Removal Upgrade
- 3) South End Sewage Treatment Plant (SEWPCC) Upgrading and Expansion
- 4) Southwest Rapid Transitway (Stage 2) / Pembina Highway Underpass
- 5) Expansion of Transit Vehicle Overhaul and Maintenance Facilities
- 6) Water Supervisory Control and Data Acquisition (SCADA) Upgrade and Expansion
- 7) Waverley Street at CN Mainline (Rivers) Grade Separation
- 8) North District Police Station (NDPS) & Archival and Exhibit Building
- 9) Fermor Avenue Bridge (Seine River), Underpass and Roadworks
- 10) Empress Street Portage Avenue to St. Matthews Avenue, Pavement Renewals, Overpass Rehabilitation and Associated Works

Authorized Net Debt as at December 31, 2019

The City issues sinking fund and serial or instalment debentures and has entered into public private partnership agreements for funding capital investment. Net debt is presented on a consolidated basis and includes debt of other civic corporations and entities such as the Winnipeg Convention Centre. The authorized net debt figure below includes net debenture debt, public private partnership obligations, capital lease obligations, mortgages and bank loans.

Council adopted The City of Winnipeg Debt Management Policy to provide guidance surrounding debt financing and management decisions. The City recognized that the foundation of any well-managed debt program is a comprehensive debt policy. This Policy sets forth the parameters for issuing debt and managing outstanding debt and provides guidance to decision makers regarding the timing and purposes for which debt may be issued and the types of debt and structural features that may be incorporated.

Council more recently adopted a Debt Strategy to establish a prudent level of debt to support the City's capital infrastructure program, while maintaining an appropriate credit rating, long-term financial flexibility and sustainability. The total authorized net debt of the City as outlined below is within the limits set by Council.

Consolidated Long Term Net Debt (in thousands of dollars)	Total
Net debt outstanding as at December 31, 2019	\$ 1,458,062
Outstanding borrowing authorizations	1,260,478
Net change subsequent to year end *	16,266
Total Authorized Net Debt	\$2,734,806

* On March 20, 2020 Council authorized net new borrowing of up to \$16.266 million.
