Further to 3.3 Item No. 2 the 1960 Cedarapids 543 Commander Jaw/Roll Crusher. There are three (3) conveyors and a feed hopper that go together with the crusher. The rolls were welded in 2003. The prescreener eccentric motor bearing, crusher finger gear, and bull gear have all been repaired in recent years. The crusher hopper has been welded and reinforced a number of times as well. The crusher has produced Traffic Gravel and base Course at approximately 60 tons per hour and clean stone or chips at 10 – 25 tons per hour. The crusher has been run on a 600 volt 3 phase hydroelectric line but the actual wattage required is unknown.

Further to Clause 4 Pick Up it remains the responsibility of the Contractor to arrange for means of loading items purchased on site. Glacial does not anticipate having sufficient resources available to rent equipment to meet the needs of all potential Contractors.
