

# **APPENDIX A**

## **Biowin™ Configurations**

**APPENDIX A - BIOWIN™ CONFIGURATIONS**

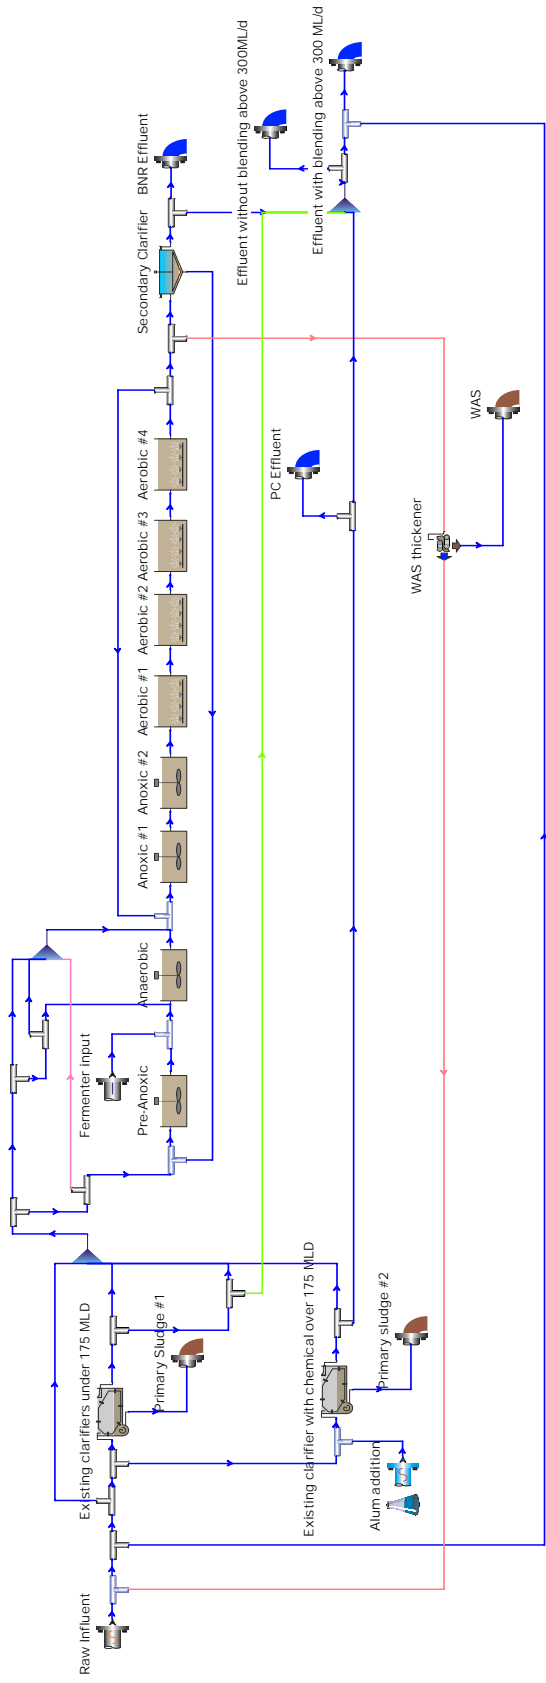

**Figure A1: BioWin™ Input for Option C – MJP configuration**

**Note:**

- The model set-up reflects two (2) anoxic and four (4) aerobic stages per train.
- The WWF strategy utilizing only the existing PC for flows up to 200 ML/d with chemicals incorporated.

**APPENDIX A - BIOWIN™ CONFIGURATIONS**

**Figure A2: BioWin™ Input for Option C – Westbank configuration**

**Note:**

- Refer to notes in Figure A1
- Flow split to Pre-anoxic and Anaerobic is 5 % and 15 % maximum or on annual average basis.
