- Revise: D27.1 to read: The unit prices specified on Form B: Prices will be adjusted on **June 1, 2024**, and once per year on each subsequent annual anniversary date thereafter, based on the percentage increase or decrease in the unit prices for the Contract year, based on:
 - (a) 85% of percentage change in Index "A",
 - (b) plus 10% change in Index "B",
 - (c) plus 5% change in Index "C".
- Revise: D27.2 to read: The inflation rates for "A", "B" and "C" will each be calculated comparing the average of the 12- month period from May of the previous year to June of the current year to the average of the 12- month period of the year prior. For example, to calculate 2024's adjustment, the average from all 3 indexes from **May 2023-June 2024** will be compared against the average from all 3 indexes from **May 2022- June 2023**. The change between these averages will be the inflationary adjustment.
