  - (h) For the purpose of this Bid Opportunity a permanently sealed register shall be a register protected by a formed joint that can only be unsealed by destroying one or more of the components forming the joint.
- E2.11 When installed by the City of Winnipeg, the meter will be sealed using a copper seal wire. Meters supplied shall meet one of the following provisions:
- (a) Where bayonet mount register is provided, meters shall be supplied to accept a three-point seal to the register, through a bolt with a hole in the head of the bolt, which bolt secures the bottom cover, and to the upstream coupling nut/flange; or
  - (b) Where the register is mounted inside the top cover, a two point seal to the top cover and to the upstream coupling nut/flange; or
  - (c) Some alternate sealing wire technique as may be proposed by the Contractor that is acceptable to the City of Winnipeg. Such alternate sealing wire technique must be approved by the City of Winnipeg **prior** to the Bid Opportunity closing time, in accordance with B5.
- E2.12 With respect to Table 1 in AWWA Standard C700-95, revise "Maximum Pressure Loss at Safe Maximum Operating Capacity" from 15 psi to 13 psi.
- E2.13 Registration accuracy shall meet or exceed requirements of AWWA C700-95, Sec. 4.2.8. Accuracy testing of each meter and register shall be performed. Each meter shall be factory tested for accuracy of registration at flow rates and test flow quantities in accordance with Section 4.2.8 of AWWA C700-95 and AWWA Manual M6. The manufacturer shall furnish a certificate(s) showing that each meter and register has (have) been tested for accuracy of registration and that the meter assembly complies with the accuracy and capacity requirements of AWWA C700-95 within ten (10) Working Days from a request by the Contract Administrator.

- E2.14 The City may, at its discretion, randomly test up to five (5) percent of the water meters in any given shipment in accordance with the foregoing. The City will test each meter at three (3) flow rates, these being "minimum test flow" and the upper limit and lower limit for "normal test flow limits" as listed in Table 1 AWWA C700-95, Section 4.2.8. Should the City test a meter and find that it does not meet the specified accuracy requirements, the following shall apply:
- (a) Up to ten (10) percent of the shipment quantity shall be accuracy tested by the City, at the Contractor's expense. This applies to all costs of testing following discovery of a non-conforming meter; and
  - (b) Should **any** other meter be found not to meet the specified accuracy requirements the entire shipment shall be replaced or adjusted by the Contractor at the Contractor's expense.
- E2.15 Meters and registers supplied under this Bid Opportunity become the property of the City of Winnipeg and the Contractor acknowledges that the City may use these meters and registers in any way that the City shall decide. Without limiting the foregoing, the City will be able to read any meters or meter registers purchased under this Bid Opportunity using meter interface units manufactured or otherwise provided by any supplier, vendor or manufacturer of the City's choice at any time in the future. The Contractor acknowledges that such use would not be an infringement on any patent or any other intellectual property rights as may be claimed by the Contractor in any such meters or registers.
- E2.16 The meters to be supplied under this Contract are for use in residential buildings and commercial buildings. Meters are often installed in close proximity to the daily activities of the inhabitants. Accordingly, noise levels emitted from the meter should be such that they do not impact on the inhabitant's lifestyles.
- E2.17 All meter main cases shall be made of a lead-free brass containing a minimum of eighty-five (85%) percent copper that meet NSF 61 standard. The serial number should be stamped between the outlet port of the main case and the register. Main case markings shall be cast raised and shall indicate size, model, direction of flow and NSF 61 certification. Plastic main cases are not acceptable.
- E2.18 All lead-free brass main cases shall be guaranteed free from manufacturing defects in workmanship and material for the life of the meter.
