## **PART E - SPECIFICATIONS**

### **GENERAL**

#### **E1. GENERAL**

E1.1 These Specifications shall apply to the Work.

#### **E2. GOODS**

E2.1 The Contractor shall supply light bars and accessories in accordance with the requirements hereinafter specified.

#### **E3. LED LIGHTBAR**

E3.1 The main structure of the lightbar must be a two-piece extruded aluminum top and bottom. Lightbars with plastic/polycarbonate tops are not acceptable, because they do not provide protection from hail damage and, in sunny conditions, the light will be washed out. The lightbar shall house all electronic components. The lightbar shall measure a maximum of 2.55 inches high x 12 inches wide x 48-1/2 inches long excluding mounting brackets. The lightbar must have Hi/Low power control of all inboard LED modules. Lightbars that do not offer this feature are not acceptable.

E3.2 The lightbar shall contain one (1) control module I/O board which shall contain all the electronics required to operate all internal lighthoods. This single module is required for ease of servicing the lightbar. Lightbars with multiple boards are unacceptable.

E3.3 The lightbar shall have a combination of:

- (a) four (4) corner Linear-LED lamps;
- (b) ten (10) Directional Linear-LED lamps; and
- (c) four (4) halogen modules [2 flashing Alleys and 2 Flashing Take Downs].

E3.4 The I/O card shall produce a minimum flash rate of 75 Comet® flashes per minute. There shall be ten (10) Scan Lock flash patterns to choose from. Each pair of LED lamps must be capable of activating independently of each other. Lightbars without this feature are unacceptable.

E3.5 The lightbar's primary warning shall have a maximum of four (4) linear LED modules [1 in each corner] with only the four corner modules. Lightbars that utilize more than four modules to meet SAE Class I requirements are not acceptable. A copy of the Testing Lab or AMECA Certificate confirming that the lightbar conforms to SAE Class 1 requirements is required with this bid. Failure to submit this documentation will disqualify the bidder. Lightbars that do not use Linear LED's as primary warning are not acceptable. The lightbar shall have linear LED modules in the four corners. Each Linear-LED corner module shall contain a single "removable" highly mirrored parabolic reflector for maximum light output. Corner light modules that utilize multiple reflectors or mirrors are not acceptable since they do not provide a true, even light spread. The Linear- LED's shall be mounted in a straight line and have a single diffuser panel mounted in front of them for maximum light output. All halogen lamps shall be 500 Series and must allow for steady burn as well as flashing. All inboard linear LED panels shall be the same design as the corner Linear-LED described above, but shall be of 500 Series size. This will allow for placement of this lighthouse in any inboard position. All LED modules must produce a minimum 180 degree light pattern. LED panels that do not produce significant light output at 45 degrees are not acceptable.

- E3.6 The I/O module shall be 100% solid state with built-in reverse-polarity protection and output-short protection. They shall operate from 10-16 VDC with no degradation in flash rate, and shall operate through a temperature range of -30 degrees Celsius to 60 degrees Celsius. The lightbar shall be designed to have up to eight (8) lamps to the front, eight (8) lamps to the rear, and one (1) on each end. Each lamp module position shall have a choice of five (5) single-layer colored lens sections, independent of the others. The lenses shall be constructed of polycarbonate with built-in spreader optics and a horizontal non-fluted strip across the center of each lens for maximum light output at the "zero" H-V point. The LED panel must be mounted within the lightbar. Systems in which the LED panel/lens assembly makes up the outside configuration of the lightbar are not acceptable.
- E3.7 The lightbar shall have:
- (a) two (2) Linear12's (1 Red/ 1 Blue);
  - (b) two (2) Halogen flashing take down lights;
  - (c) and four (4) inboard Linear-LEDs (2 Red/ 2 Blue) LED's to the front;
  - (d) two (2) Linear12's (1 Red/ 1 Blue) and 6 (six) split Linear-LED's (3 Red/Amber and 3 Blue/Amber to the rear (the Amber side of the each module must operate as a Traffic Advisor with Left/Right and Center/Out patterns); and
  - (e) two (2) Halogen alley lights, one on each end of the lightbar.
- E3.8 The lightbar's rear-facing 6 lamp split Traffic Advisor shall come with a separate wiring harness that is designed to operate on a ground switch control system and shall allow for multiple sequential patterns as well as multiple flash patterns.
- E3.9 The lightbar must utilize lenses that slide into a track and are held in place by two end caps that secure to the lightbar via four screws each. Lightbars that utilize domes held in place by clips are unacceptable as the domes will allow sunlight to wash out the warning light, and clips can fail over time. The outer lens color shall be clear. Color outer lenses must be available as an *option*. The use of clear outer domes with colored filter is not acceptable.
- E3.10 The lightbar shall contain a mounting kit to adapt the lightbar to most late model vehicles.
- E3.11 All components of the light bar assembly must be properly sealed to provide protection against damage from moisture or water penetration

#### **E4. DELIVERY**

- E4.1 Goods shall be delivered within forty-five (45) Calendar Days of the award of Contract, f.o.b. destination, freight prepaid.
- E4.2 Goods shall be delivered between 8:30 a.m. and 4:30 p.m. on Business Days.
- E4.3 The Contractor shall off-load goods as directed at the delivery location.
