**IMPORTANT: ASBESTOS NOTIFICATION AND ACKNOWLEDGMENT**

Every effort has been made to identify known asbestos containing materials within the area of the proposed work. As a precautionary measure, where material is encountered by trades and contractors that is suspect or suspicious, the Trade/Contractor/Subcontractor is to contact the Contract Administrator who will have samples taken and tested to confirm its composition.

Mb. Reg. 53-88 (Workplace Health Hazard Regulation), Mb. Reg. 100-88R (Fibrous and Silica Regulation) and associated Guidelines apply to all maintenance and renovation work that may disturb asbestos or suspect asbestos-containing materials in the Workplace. Such regulations and guidelines state that any disturbance of asbestos-containing materials may only be performed by workers or by an outside contractor who have first received the required training in asbestos-related precautions.

WORKING WITH ASBESTOS CAN BE DANGEROUS. INHALING ASBESTOS FIBERS CAN CAUSE VARIOUS TYPES OF LUNG DISEASE INCLUDING CANCER. SMOKING INCREASES THE RISK OF LUNG CANCER FROM ASBESTOS EXPOSURE.

**ACKNOWLEDGMENT:**

In undertaking the work of this project, we the trade or contractor agree to perform our work in such a manner so as NOT to disturb any asbestos-containing materials without:

- giving notice to the appropriate supervisor, individual manager and/or project coordinator at the Water and Waste Department that known or suspected asbestos-containing material(s) will be/needs to be disturbed, or
- having work and giving notice to the Contract Administrator when unforeseen suspected asbestos-containing materials are uncovered during the provisions of services/materials.
