B4.4 Responses to enquiries which, in the sole judgment of the Contract Administrator, do not require a correction to or a clarification of the Bid Opportunity will be provided by the Contract Administrator only to the Bidder who made the enquiry.

B4.5 The Bidder shall not be entitled to rely on any response or interpretation received pursuant to B4 unless that response or interpretation is provided by the Contract Administrator in writing.

B5.3 The Bidder shall acknowledge receipt of each addendum in Paragraph 10 of Form A: Bid. Failure to acknowledge receipt of an addendum may render a Bid non-responsive.

B6. SUBSTITUTES

B6.1 The Work is based on the Plant, Materials and methods specified in the Bid Opportunity.

B6.2 Substitutions shall not be allowed unless application has been made to and prior approval has been granted by the Contract Administrator in writing.

- If the Contractor has not arranged for an approved disposal Site, the City shall provide an optional disposal Site for all surplus clean clay from the construction Site. The material is not to include any refuse, concrete, metals, wood, organics, construction waste or any other deleterious materials. Any surplus soil material not meeting these requirements shall not be considered clean clay and shall not be permitted.
 - The disposal location provided by the City will be at the Summit Road Landfill Site. The Contract Administrator will make arrangements with Colin Potter (986-4463) at the landfill Site for the disposal of the surplus soil material.

E3. PROTECTION OF EXISTING TREES

- E3.1 The Contractor shall take the following precautionary steps to avoid damage from his construction activities to existing boulevard trees within and adjacent to the limits of construction:
- (a) The Contractor shall not stockpile materials and soil or park vehicles and equipment on boulevards within 2 metres of any tree.
 - (b) Mature tree trunks shall be strapped with 25 x 150 x 2400 (1" x 6" x 8') wood planks. Smaller trees shall be similarly protected using appropriately sized wood planks.
 - (i) Excavations shall be carried out in such a manner so as to minimize damage to existing root systems. Roots over 50mm in diameter which must be cut to facilitate an excavation shall be neatly pruned with a saw prior to excavation and coated with an appropriate wound dressing to prevent infection.
 - (ii) Work on Site shall be carried out in such a manner so as to minimize damage to existing tree branches. Where damage to tree branches does occur, the Contractor shall neatly prune the damaged branch.
 - (c) American elm trees are not to be pruned between April 1st and August 1st and Siberian elm trees between April 1st and July 1st of any year under provisions of The Dutch Elm Disease Act.

- E3.3 No separate measurement or payment will be made for protection of trees. It shall be considered incidental to the Contract Work.

E4. SUSPENSION OF WORK ACTIVITIES WHEN SEWER CONTROL GATES ARE ACTIVATED DURING PERIODS OF HIGH RIVER LEVELS

- E4.1 The Contractor is advised that as the elevation of the Red and Assiniboine Rivers rise from the normal winter or summer levels due to spring runoff or periods of heavy rainfall, the City is required to close various control gates located on sewer system outfalls. Similarly, as the elevation of the rivers drop to normal levels, the City is required to open the control gates that have been closed. Control gates begin to be closed when river levels reach elevation 224.51 (James Avenue 9.0). As well, higher river levels can cause the level of flow in sewers to be higher than normal.
- E4.2 In the event the Red and Assiniboine Rivers rise to an elevation where the City has to begin closing control gates, the Contract Administrator will direct that Work activities in any sewers affected by the gate closure be suspended and the risk of runoff causing flooding in the sewer evaluated. Work will continue to be suspended as long as there is a risk of the sewer being flooded while the control gate is closed unless the Contractor provides flow control measures approved jointly by the Contract Administrator, City of Winnipeg Collection System and Flood Control Branch and Local Services Branch.
- E4.3 Similarly, as river elevations drop and the City has to open control gates that have been closed, the Contract Administrator will direct that Work activities in any sewers affected by the control gate opening be suspended due to the risk of the river flooding the sewer once the gate is opened. Work will continue to be suspended as long as the sewer is being flooded from the river unless the Contractor provides flow control measures approved jointly by the Contract Administrator, City of Winnipeg Collection System and Flood Control Branch and Local Services Branch.

E4.4 The Contractor will have no claim for extra Work or compensation as a result of suspension of Work due to the City closing and opening control gates during periods of rising and dropping river levels. If in the opinion of the Contract Administrator the suspension will cause the completion of the Work to occur after the specified date for Critical Stages or Substantial Performance and the Contractor's schedule would have reasonably permitted completion of the Work before the required date, the date for Critical Stages or Substantial Performance will be adjusted accordingly.

E4.5 The following flood activation elevations for each site are as follows:

Table E4.5: Flood Activation Elevations

Work Location				Flood Manual Activation Elevation	
Street Name	Asset ID	Sewer District	Lowest Invert (m)	Elevation (m)	Referenced to Datum

E5. TEMPORARY SURFACE RESTORATIONS

E5.1 Further to clause 3.3 of CW 1130, excavations within the pavement and sidewalk on Buffalo Place, Harvard Avenue, and Windermere Avenue shall be left in a temporarily restored condition as follows:

E5.1.1 Temporarily restore disturbed surfaces as follows:

- (a) Asphalt and concrete pavements: minimum 50 millimetre thick layer of Type II Asphaltic concrete pavement as specified in CW 3410.
- (b) Sidewalks: minimum 50 millimetre thick layer of cold mix asphalt or cement-stabilized fill.

E5.1.2 Maintain temporary surface restoration until permanent surface restoration or completed or Contractor for Bid Opportunity 224-2007 takes control of the site.

E5.1.3 If temporarily restored surfaces are not maintained within 24 hours of being notified to do so by the Contract Administrator, the work may be directed to be done by City forces and the cost deducted from future payments to the Contractor.

E5.1.4 Excavations within the pavement on Centennial Street shall be permanently restored in accordance with CW 2130.

E5.2 Measurement and Payment

E5.2.1 Costs for pavement and sidewalk removal, temporary surface restoration and maintenance will be included with the sewer and watermain installations.

E6. PARTIAL SLAB PATCHES

E6.1 Construct partial slab patches in accordance with CW 3230. Partial Slab Patches shall be measured on an area basis and paid for at the Contract Unit Price per square metre for "Partial Slab Patches" in Form B of the Bid Submission.

E6.2 No separate measurement or payment will be made for drilled dowels or tie bars, the cost for which shall be included in the prices bid for Partial Slab Patches.

E7. CENTENNIAL STREET SEWER REPAIRS

E7.1 The Contractor is advised that the sewer on Centennial Street is a Segmental Vitrified Clay Tile Sewer. Segmental clay tile pipes, like brick sewers, require uniform external pressures around the pipe to maintain the integrity of their cross section. Exercise all reasonable precautions to maintain uniform external pressures around the pipe during the course of the work to minimize the potential for causing any damage to the existing pipe during the course of excavation, repair, and backfilling.

E7.1.1 The sewer service reconnection on sewer MA60007872 (Drawing 06003) is to be done in accordance with CW 2130 and SD-009 with the following exceptions:

(a) The maximum vertical shaft diameter is not to exceed 1500mm.

E7.1.2 The repair on sewer MA60006693 (Drawing 06004) is to be done in accordance with CW 2130 and SD-022A with the following exceptions:

(a) The Contractor must take all reasonable precautions not to unnecessarily disturb the existing segmental sewer or the ground around it in any manner that produces non-uniform loading on the existing pipe at the point of the sewer connection.
