

**1. GENERAL**

The Contractor shall provide and maintain access as required for all building stone cladding components. All access costs including labour, equipment, rentals, design, permits, etc. will be included in the appropriate Contract Fixed Price.

**1.1 Related Work**

- .1 Section 04 40 10: Masonry Repair
- .2 Section 04 50 50: Removal of Stone Masonry

**2. SCAFFOLDING**

- .1 The Contractor shall provide and maintain heavy duty scaffolding as required for access for the duration of the project. Scaffolding shall be designed, erected, and maintained in accordance with Workplace Safety & Health: Guidelines for Access Scaffolding.
- .2 Provide a drawing of scaffolding configuration and support details sealed by an engineer licensed to practice in the Province of Manitoba to Contract Administrator for review prior to mobilizing on site.
- .3 Any damage to landscaping or building due to access or construction operations is to be restored to the satisfaction of the Contract Administrator.

**END OF SECTION**
