

Estimated Residential Residual Waste Disposed and Waste Diverted Year-by-Year over the Planning Period (2012-2031)

The Conference Board of Canada is projecting even stronger population growth for Winnipeg in the coming years. 180,000 new people are anticipated to make Winnipeg their home by 2031 increasing the population to an estimated 837,000.

This residual residential waste in the above graph includes approximately 50,000 tonnes a year of material taken directly to the Brady Road Resource Management Facility.
