- B5.2 Substitutions shall not be allowed unless application has been made to and prior approval has been granted by the Contract Administrator in writing.

B12.2 The acceptance by the City of any Bid shall not release the Bids of the next two lowest evaluated responsive Bidders and these Bidders shall be bound by their Bids on such Work until a Contract for the Work has been duly executed and the performance security furnished as herein provided, but any Bid shall be deemed to have lapsed unless accepted within the time period specified in Paragraph 11 of Form A: Bid.

B13. WITHDRAWAL OF BIDS

B13.1 A Bidder may withdraw his/her Bid without penalty by giving written notice to the Manager of Materials at any time prior to the Submission Deadline.

B13.1.1 Notwithstanding C23.3, the time and date of receipt of any notice withdrawing a Bid shall be the time and date of receipt as determined by the Manager of Materials.

The City, in such event, shall be entitled to all rights and remedies available to it at law, including the right to retain the Bidder's bid security.

B14. EVALUATION OF BIDS

B14.1 Award of the Contract shall be based on the following bid evaluation criteria:

- (a) compliance by the Bidder with the requirements of the Bid Opportunity, or acceptable deviation therefrom (pass/fail);
- (b) qualifications of the Bidder and the Subcontractors, if any, pursuant to B9 (pass/fail);
- (c) Total Bid Price;
- (d) economic analysis of any approved alternative pursuant to B5.

B14.2 Further to B14.1(a), the Award Authority may reject a Bid as being non-responsive if the Bid is incomplete, obscure or conditional, or contains additions, deletions, alterations or other irregularities. The Award Authority may reject all or any part of any Bid, or waive technical requirements or minor informalities or irregularities, if the interests of the City so require.

B14.3 Further to B14.1(b), the Award Authority shall reject any Bid submitted by a Bidder who does not demonstrate, in his/her Bid or in other information required to be submitted, that he/she is responsible and qualified.

B14.4 Further to B14.1(c), the Total Bid Price shall be the sum of the quantities multiplied by the unit prices for each item shown on Form B: Prices adjusted, if necessary, as follows:

- (a) if the lowest evaluated responsive Bid submitted by a responsible and qualified Bidder is within the budgetary provision for the Work, no adjustment will be made to the Total Bid Price; or
- (b) if the lowest evaluated responsive Bid submitted by a responsible and qualified Bidder exceeds the budgetary provision for the Work, the Total Bid Prices of all responsive Bids submitted by responsible and qualified Bidders will be adjusted by progressively deducting lanes in the reverse order they are represented. That is, Woodhaven Blvd / Glendale Blvd Lane will be deducted first followed by Buchanan Blvd / Knox St Lane, and so on until a Total Bid Price within the budgetary provision is achieved.

B14.4.1 If there is any discrepancy between the Total Bid Price written in figures, the Total Bid Price written in words and the sum of the quantities multiplied by the unit prices for each item, the sum of the quantities multiplied by the unit prices for each item shall take precedence.

- B14.4.2 Any bid with an apparent imbalance between the unit prices for the lane parts and the provisional items part may be determined to be non-responsive and rejected by the Award Authority in its sole discretion, acting reasonably.
- B14.4.3 The electronic Form B: Prices and the formulas imbedded in that spreadsheet are only provided for the convenience of Bidders. The City makes no representations or warranties as to the correctness of the imbedded formulas. It is the Bidder's responsibility to ensure the extensions of the unit prices and the sum of Total Bid Price performed as a function of the formulas within the electronic Form B: Prices are correct.

B15. AWARD OF CONTRACT

- B15.1 The City will give notice of the award of the Contract or will give notice that no award will be made.
- B15.2 The City will have no obligation to award a Contract to a Bidder, even though one or all of the Bidders are determined to be responsible and qualified, and the Bids are determined to be responsive.
- B15.2.1 Without limiting the generality of B15.2, the City will have no obligation to award a Contract where:
- (a) the prices exceed the available City funds for the Work;
 - (b) the prices are materially in excess of the prices received for similar work in the past;
 - (c) the prices are materially in excess of the City's cost to perform the Work, or a significant portion thereof, with its own forces;
 - (d) only one Bid is received; or
 - (e) in the judgment of the Award Authority, the interests of the City would best be served by not awarding a Contract.
- B15.3 Where an award of Contract is made by the City, the award shall be made to the responsible and qualified Bidder submitting the lowest evaluated responsive Bid, in accordance with B14.
- B15.3.1 Following the award of contract, a Bidder will be provided with information related to the evaluation of his/her Bid upon written request to the Contract Administrator.

DESCRIPTION

- E11.1 General
- E11.1.1 This specification shall cover the construction of 150 mm reinforced concrete pavement a distance of 4.5 m in length on either side of existing catch basins. This is done in an effort to prevent the catch basins from being covered over by base course during routine blading and maintenance of the lanes.
- E11.1.2 Referenced Standard Construction Specifications
- (a) CW 3310 – Portland Cement Concrete Pavement Works
 - (b) SD-220A – Catch Basin and Manhole Isolation Detail (New Pavements)

MATERIALS AND EQUIPMENT

- E11.2 As per clause 5 of CW 3310.

CONSTRUCTION METHODS

- E11.3 As per clause 9 of CW 3310, as modified by subsequent clauses below.
- E11.4 Construct catch basin apron using 150 mm thick reinforced concrete pavement.
- E11.5 Form concrete as shown on drawings, providing a ramp on either end of the apron for granular material to be placed up to. Where the apron drops below grade, construct a smooth radius of at least 25 mm.
- E11.6 Provide a single transverse sawcut, 3 mm wide and 50 mm deep at the centreline of the catchbasin, and at the location where the apron drops below grade. Provide a single longitudinal sawcut, 3 mm wide and 50 mm deep at the centreline of the catchbasin.
- E11.7 Isolate catch basin from adjacent apron as per SD-220A

MEASUREMENT AND PAYMENT

E12. ENVIROGRID

DESCRIPTION

- E12.1 General
 - E12.1.1 This specification shall cover the supply and installation of EnviroGrid. This product provides cellular confinement of the base course in spot locations to provide a more stable road structure.

MATERIALS

- E12.2 EnviroGrid® –EGA208P manufactured by Geo Products, LLC.
 - E12.2.1 "8P" refers to eight inch (200 mm) cell depth, and perforated cells.
 - E12.2.2 The sections are shipped to the jobsite in collapsed form.
 - E12.2.3 Expanded size is 2.56 m x 6.52 m by 200 mm depth.

EQUIPMENT

- E12.3 Manual installation only. No specialized equipment is necessary.

CONSTRUCTION METHODS

- E12.4 Perform these works after excavation of sub-grade and placement of the specified geotextile fabric as shown on the drawings.
- E12.5 Refer to the drawings for the general location of the EnviroGrid product.
- E12.6 Determine where the first section of EnviroGrid is to be placed and put stakes at the four corners.
- E12.7 Stretch a section beyond its intended length and then allow it to relax. Place the section over the embedded stakes. Additional stakes may be needed along the perimeter in order to get full expansion of each cell. Adjacent sections are installed in a similar fashion and butted or stapled together to achieve continuous coverage.
- E12.8 Cut full sections of EnviroGrid as necessary to match the width of the lane.

- E12.9 Install the base course material in the first rows of cells with a front-end loader or dump truck and push the rock into cells using shovels or a bulldozer blade. A "ramp" of fill material immediately adjacent to the EnviroGrid will likely be necessary to allow equipment to climb onto the EnviroGrid. Continue until all cells are filled. Never allow any equipment to drive over unfilled cells. Always overfill the cells slightly to allow for consolidation.
- E12.10 Compact the EnviroGrid system. The most common method of compacting is through multiple passes by the tracked equipment used to spread the infill to satisfaction of Contract Administrator. A vibrating roller and/or water may be required to achieve the specified level of compaction.
- E12.11 Continue placement of base course material over the EnviroGrid structure and compact to final depth as shown on the drawings.

MEASUREMENT AND PAYMENT

- E12.12 Supply and installation of EnviroGrid will be paid for at the Contract Unit Price per square metre for " EnviroGrid", The area to be paid for will be the total number of square meters of EnviroGrid that is installed in accordance with this specification, accepted and measured by the Contract Administrator.
