PART D - SUPPLEMENTAL CONDITIONS

GENERAL

D1. GENERAL CONDITIONS

D1.1 In addition to the *General Conditions for Consultant Services*, these Supplemental Conditions are applicable to the Services of the Contract.

D2. PROJECT MANAGER

D2.1 The Project Manager is:

Tracy Stople, C.E.T., PMP

Email: tstople@winnipeg.ca

Telephone No. 204 986-2221

Facsimile No. 204 986-7311

D2.2 At the pre-commencement meeting, the Project Manager will identify additional personnel representing the Project Manager and their respective roles and responsibilities for the Services.

D2.3 Proposal Submissions must be submitted to the address in B7.10

D3. BACKGROUND

D3.1 The Site at 1460 Dublin Avenue was the home of Dominion Bridge, a bridge steel fabricating facility. It was constructed in the early 1910's and is approximately 11 ha in size. The Site is currently leased to several industrial manufacturing tenants and consists of:

- (a) A Main Shop with attached Works Office
- (b) Galvanizing Shop and Stores Building
- (c) Transept Shop with Grit Blast Room and Paint Shop attached to the north side of the Main shop
- (d) Former Planning and Stock Office Building
- (e) Gate Shop
- (f) Shipping Office
- (g) PCB Storage Shed
- (h) Security Building

D3.2 A Remedial Action Plan has been developed that addresses the residual contaminants associated with the historic activities of the former Dominion Bridge facility. The purpose of the Remedial Action Plan was to describe activities to be undertaken to remediate soil, groundwater, sediment and surface water impacts identified at 1460 Dublin Avenue. This includes actions to mitigate any risks to human health or the environment presented by the identified impacts based on the current land use scenario (see Appendix A).

D3.3 Omands Creek lies along the west property line of the Site and flows south towards the Assiniboine River, located approximately 3 km south. Omands Creek remediation is limited to on-site portions of the Creek and is to be completed in conjunction with remediation work on rest of Site (see Appendix B).

D3.3.1 Omands Creek is classified as type A fish habitat in this section of Omands Creek (complex habitat containing indicator species). Communications with the Department of Fisheries and Oceans Canada regarding the proposed remedial methods and measures

employed to mitigate impacts to the aquatic environment during remediation and creek restoration activities will be necessary.

- D3.3.2 It is anticipated that the impacted sediment will be excavated in the fall season (low creek flow) to an excavation depth of 1 m.
- D3.4 Given the site conditions, contaminant types, depth of impacts and current industrial land use, excavation to a depth of 0.3m of impacted soil is considered the most effective method for removing the source of impacts at the Site. Omands Creek is to be excavated to a depth of 1 m.
- D3.5 Remedial activity does not include areas underneath current infrastructure.
- D3.6 The total Project budget is \$2,900,000 and includes all costs (Consulting fees, Construction, Administration fees, regulatory approval and permit fees, and any other costs associated with this Project).
- D3.7 An aggressive schedule is required to complete all Site remediation work.
- D3.8 For information only, Environmental Site Assessments have been included in Appendix C and Appendix D.
- D3.9 The project will be carried out for the City of Winnipeg under the direction of the Planning, Property and Development Department in collaboration with Manitoba Conservation and Water Stewardship and Department of Fisheries and Oceans Canada.

D4. SCOPE OF SERVICES

- D4.1 The Services required under this Contract shall consist of Professional Consulting Services for Site Remediation of the former Dominion Bridge Operations Yard, 1460 Dublin Avenue, in accordance with the following:
