

APPENDIX H – EXISTING LFG COMPRESSED AIR SYSTEM DETAI

are supplied with each order. Specific types, such as chlorine resistant sealants or hardware with protective covers, are made for the individual application. Heavy duty plastic bolt caps are also available for added protection.

Additional options and accessories.

Additional accessories are available to meet use and specification needs. Accessories include:

- Colors
- Caps and sealer
- Nozzles
- Baffles
- Roof walkways, railings and staircases
- Level indicators

Colors

Aquastore glass coatings are available in standard cobalt blue or four other exterior colors. Forest green, sky blue, desert tan or white colors are available. Inquire for custom colors. Interior color is always white.

After mechanically beveling the sheet edges, the edges are thermally sprayed with a stainless steel alloy

Bolt holes are covered with sealant during assembly so metal is not exposed to the air or the stored product

Edgecoat® Protection

CST's proprietary Edgecoat® process thermally sprays the sheet edge with a protective stainless steel alloy before the glass finish is applied to the entire sheet for maximum protection.

▲ Glass-fused-to-steel panels on the production line

Selling and erecting an Aquastore tank dealer, sales and service specialists can offer the following:

- Value engineering – total cost analysis
- Tank configuration and layout data
- Budgeting
- Product engineering specifications
- Design criteria assistance
- Tank layout drawings
- Approval drawings
- Certified drawings
- Site preparation and layout
- Tank construction scheduling
- Structural calculations
- Tank testing and commissioning
- Tank inspection and repair
- Maintenance services
- Relocation or expansion
- Concrete work
- Pipe work (inlet, outlet, overflow, decant, etc.)
- Insulation (spray foam, battens, etc.)
- Dome installations
- Turn-key tank construction
- After sale service

An Aquastore tank requires minimal maintenance over its life cycle and CST Authorized Dealers can provide complete service packages tailored to your application needs. Most importantly, the glass-fused-to-steel technology experiences little environmental impact and never needs painting, saving hundreds of thousands of dollars over time.

Sealants

Aquastore tanks feature sealants specifically formulated for chemical resistance appropriate to the application. Each sealant is inspected on a batch-by-batch basis to ensure quality. The sealant is suitable for contact with potable water and is certified to meet ANSI/NSF Additives Standard 61 for indirect additives and is chlorine resistant. Sealants cure to a rubber-like consistency, have excellent adhesion to the glass coating, low shrinkage and are suitable for interior and exterior use.
