Foreword

In order to enhance the annual budget process, the City has moved to extracting the trends and performance measures information into a separate volume. This provides context and timely information to support the upcoming budget decision-making process. This Community Trends and Performance Report is published to provide more profile to this data for the City of Winnipeg Council and the Public. This volume includes the following information:

1. Community Trends related to socio-economic information such as population, demographics, housing, etc.
2. An overview, including information on *OurWinnipeg* and an update on the City's Financial Management Plan.
3. Performance Measures organized as follows:
 - a. Specific City of Winnipeg services grouped by Standing Policy Committee; and
 - b. Organization-wide data.

This early context information is intended to facilitate discussion for the upcoming 2016 Budget process.

Community Trends

Selected Demographic and Economic Information

The Community Trends section is meant to be a compilation of various socio-economic information on Winnipeg.

Capital Region and Winnipeg CMA

Statistics Canada and the Conference Board of Canada often provide information based on Census Metropolitan Areas (CMA's). CMA's include the core city and any neighbouring municipalities where 50% or more of the labour force works in the core city.

In the coming pages there will be reference to Winnipeg's CMA. The map below shows the Capital Region, with Winnipeg CMA highlighted in green. Winnipeg CMA includes the rural municipalities of:

- Ritchot
- Tache
- Springfield
- East St. Paul
- West St. Paul
- Rosser
- St. Francois Xavier
- Headingley
- St. Clements
- Brokenhead First Nation
- MacDonald

Winnipeg – Its People and the Economy

“Population growth has exceeded 1% each year since 2011, up from an average of 0.5% during the prior 20 years.”

Conference Board of Canada, Metropolitan Outlook, Spring 2015

Winnipeg’s population continues to grow. In 2014, Winnipeg’s population was estimated at 709,300 – an increase of over 60,000 people over the past decade.

Over the last four years, the City has grown by about 10,000 people per year. This results in an annual rate of growth of 1.4% per year, which is significant.

The primary reason for this robust population growth, is historically high levels of immigration as a result of the province’s skilled-worker nominee program.

Population Forecast

According to the Conference Board’s long-term Population Forecast, Winnipeg’s population is expected to grow by 94,000 people in the next 10 years; and 189,800 people in the next 21 years. The Winnipeg region is expected to reach 1 million people by 2035.

The Conference Board is forecasting over the next 5 years, Winnipeg’s average population growth rate to be 1.3%. This will result in an additional 52,000 people by 2019 for the city region.

Relative to other large Canadian cities, Winnipeg has an average rate of growth. This is a change from the past where Winnipeg was at the lower end of growth rates for cities.

Interestingly, western cities have above average population growth rates relative to eastern Canadian cities.

It should be noted that Saskatoon and Regina are the cities with the highest average growth rate forecasted for the next 5 years – a change from the past. Followed closely by Calgary and Edmonton.

f = forecast

Migration (people moving)

“Migration has become an increasingly important factor for population growth, and Winnipeg’s ability to attract new migrants will continue to be an important determinant of its future economic potential.”

Conference Board of Canada, Winnipeg long-term forecast, 2012

Migration has been the primary factor for the increase in Winnipeg’s population.

- In 1996 Winnipeg saw a net loss of 4,600 people; but in 2014, Winnipeg saw a net gain of 9,800 people.
- With the success of the Provincial Nominee Program, which began in 1999, Winnipeg’s immigration has quadrupled and in 2014, over 13,000 immigrants arrived in the City.
- Winnipeg’s immigration level is currently trending above the Conference Board’s long-term forecast.

Net Migration to Winnipeg
Number of People, Winnipeg CMA

Source: Canadian Socio-economic Information and Management System (CANSIM), and the Conference Board of Canada, Long-Term Forecast, August 2012, actuals up to 2014

The trends in each of the three forms of migration are:

- Intra-Provincial: The net number of people moving to/from Winnipeg CMA and the rest of Manitoba has changed to a net loss of -140 people in 2014.
- Inter-Provincial: The net number of people moving to/from Winnipeg CMA and the other provinces has improved from -4,700 in 1997 to -3,100 in 2014.
- International: The net number of people moving to/from Winnipeg and other countries has increased significantly from 2,200 in 1997 to over 13,000 in 2014.

Immigration

“PROVINCE (required) TO CAP NUMBER OF OVERSEAS SKILLED WORKERS The province has received more than the 2014 nomination limit of 5,000 applications given by Citizenship and Immigration Canada...”

August 15, 2014. Winnipeg Free Press

Immigration

- During the 1990s, Winnipeg’s immigration decreased.
- A turnaround occurred following the Provincial Government start-up of the Provincial Nominee Program. The result is an increase in immigration to Winnipeg (and the rest of Manitoba).
- The Conference Board of Canada forecasts that Winnipeg’s immigration will plateau in the range of 9,000 immigrants per year – this is below the last four year’s actual immigration numbers.

Source: Citizen and Immigration Canada, Facts and Figures 2013

Winnipeg’s immigration is 6th highest of Canadian city regions in 2013

- The Toronto area receives the largest share of Canada’s immigrants. In 2013, Toronto saw approximately 81,800 immigrants, followed by Montreal (43,950), Vancouver (29,450), Calgary (17,505), Edmonton (12,717), and then Winnipeg (11,100).

Source Countries (2013)

- In 2013, the greatest number of people immigrating to Winnipeg were from the Philippines.
- This holds true for the rest of Manitoba, the Philippines is the number one source country, but in smaller numbers.
- Currently there are less differences between Winnipeg and the rest of Manitoba. Previously, Germany was the top source country for the rest of Manitoba.

Source: Manitoba Immigration	To Winnipeg (2013)		To Rest of Manitoba

Manitoba Immigration – Provincial Nominee Program (2013)

The Manitoba Government’s Provincial Nominee Program has been the primary factor for the increase in immigrants moving to Winnipeg. In 2013, the Program accounted for about 68% of Manitoba’s immigration. In 2013, immigration to Manitoba decreased by 1.6 per cent from 2012, totaling 13,100. The decline was due to both the federal cap to the Manitoba Provincial Nominee Program and some nominees brought smaller families. The level of immigration over the last several years is above what the Conference Board of Canada is forecasting for Winnipeg. Winnipeg was the top destination in the province, receiving 85 percent of immigrants to Manitoba, totaling 11,070.

Trends indicate that Manitoba’s provincial nominees are generally younger than other immigrants. In 2013, the immigrant median age was 28 years while the median age of Manitobans was 38 years. Male and female numbers were roughly equal.

For 2013, the top 5 professions were: Registered nurses, accountants/financial auditors, school teachers, college instructors/university professors, and general support office workers.

Aboriginal People and Visible Minorities

Aboriginal People

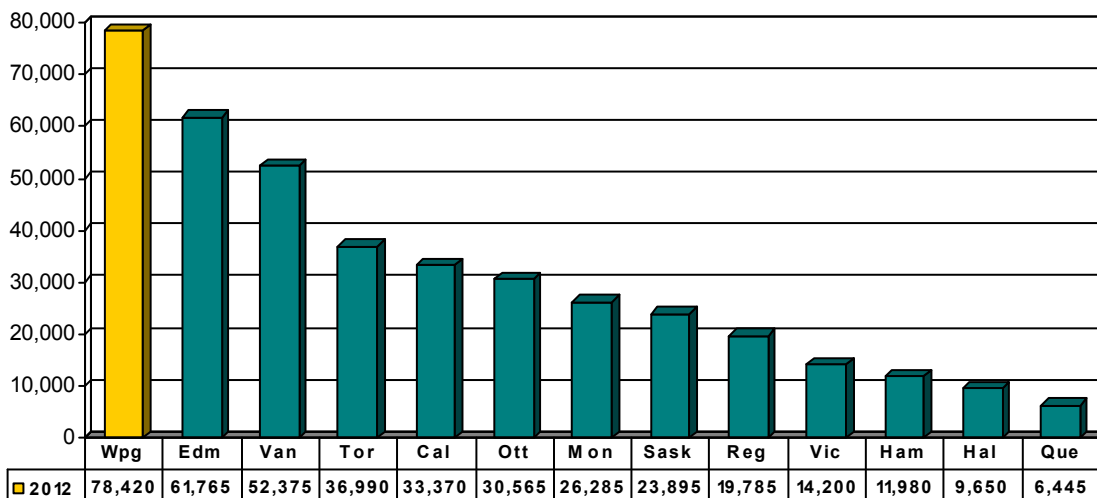

- The number of Aboriginal people in Winnipeg has been growing. In the City of Winnipeg, the Aboriginal people total 72,300 persons, while in the City region (CMA) the number is just above 78,400 persons.
- The City's Aboriginal people break down into three main groups: Métis (41,200 people) North American Indian (29,500 people) and Inuit (340 people).
- The chart below shows, that compared to other cities, Winnipeg has the greatest number of Aboriginal people.
- While the table to the right indicates that as a percentage of the total population, Aboriginal people account for 11% of the population in Winnipeg.
- Thus Winnipeg has both the highest concentration and the largest number of Aboriginal people out of large Canadian cities.

% Aboriginal Peoples

City Region	2006	2011

Visible Minorities

- Visible minorities number 140,800 people and now account for 20% of the population of the Winnipeg city region.
- People of Asian heritage account for over 75% of visible minorities in Winnipeg.
- The Filipino community is the largest visible minority group and comprise about 56,700 people, an increase of 20,000 people.
- Relative to other large Canadian cities, Winnipeg has an average proportion of visible minority people.
- Toronto and Vancouver's visible minorities are approaching 50% of the population.

Demographic Changes: Age Composition

“Debates on urban issues too often neglect a crucial element: demographics. Planning and development decisions have less impact on the way our cities develop than changes in the composition and needs of the population.”

David Foot (demographer and economist), 2000

Over the next 10 years, the demographic changes will be modest.

- The impact will be mostly due to the population increase and less due to the change in the age composition of the population.
- The greatest change will occur in the older age groups with the entrance of the baby boomers.

However, in the longer term, to 2035, there will be significant change in the age composition of Winnipeg’s population.

The baby-boomers, presently aged 47 to 66, will grow older and become a smaller % of the total population.

- Today, the baby boomers make up nearly 26% of the total population. By 2023, they will make up 21%, and by 2035, only 13%. This is a result of baby boomers getting older and passing away and an increase in the younger age groups, primarily due to immigration.
- However, at the same time, the senior population will increase by 68% when compared to today.
- With higher levels of immigration, the workforce age groups will see increases in all groups.

Housing – New Home Market

“Another source of strength in the Winnipeg economy this year will be the construction sector, as housing starts are forecast to increase after declining last year.”
 Conference Board of Canada, Metropolitan Outlook 1 – Winter 2015

Housing starts in the last 3 years were relatively strong

- In 2009, new home buyers were cautious due to the recession, but in 2010 the number of housing starts rebounded.
- From 2012 to 2014 there was a substantial increase in housing starts.
- Since 2012, multiple family dwellings outnumbered the amount of single family dwellings built. For example, in 2014, 61% of housing starts were multiples and the remaining 39% were singles.

Source: CMHC – Housing Now

Demand for new homes strongest in South area of the City

- Overall, the majority of new homes were built in the South area of the City – south St. Boniface, south St. Vital and Fort Garry.

Housing Starts by Area 2008 to 2014 Number of Dwelling Units

Average Winnipeg New House Price (single detached)

- Between 2000 and 2014 there was a 150% increase in the average price of a new house. (\$175,500 to \$438,200)
- Price increase is moderating. In 2014, the average price of a new house rose 4.2% with CMHC forecasting a 2.2% increase for 2015 and 2.2% for 2016.

Forecast: 95,000 units over next 21 years

- Going forward, the demand for housing will significantly increase. Over the next 21 years, 95,000 dwellings will be needed.
- Winnipeg’s housing market is forecast to go through a transformation as aging baby boomers and an increased demand for affordable housing units boost the demand for multi-family units, of which a large number will be apartment units as well as townhouses.

Forecast of Dwelling Units to 2035

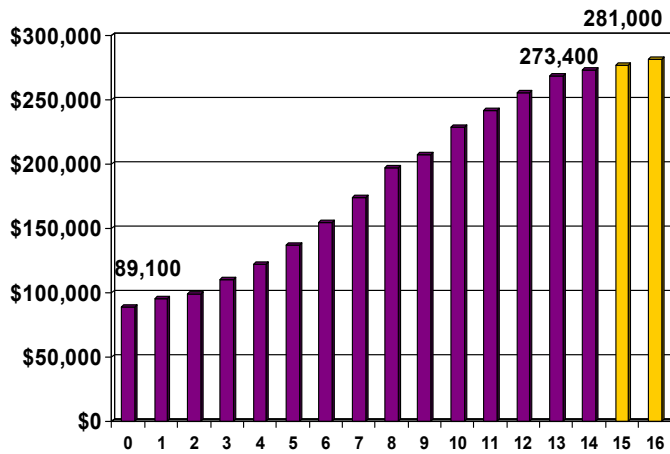

Housing – Resale Market

“Resale housing market keeps up steady pace”

Winnipeg Free Press, May 8, 2015

Average Resale House Price in Winnipeg 2000 to 2016f

Source: CMHC, Housing Market Outlook, Spring 2015
f = forecast

Price increase in resale market

- Winnipeg has seen a significant increase in housing prices over the last decade.
- Between 2000 and 2014 there was a 200% increase in the average price of a resale house in Winnipeg.
- But the housing market has moved to a balanced market and price increases have moderated.
- Further, for 2015 and 2016, CMHC is forecasting a modest increase of 1.3% and 1.4% respectively.

“Factors supporting demand for resale homes, notably employment and wage growth, will strengthen in 2015 and result in growth of 1.3% in 2015 to 12,300 transactions....”

CMHC Housing Market Outlook, Spring 2015

2014 Average Resale Prices in Other Cities Standard two-storey house, 1500 sq ft

Source: Royal LePage Survey Data, 2014, second quarter

Although Winnipeg has experienced significant increases in the average price of a home, when compared to other larger cities across Canada, Winnipeg continues to be a city with one of the lowest housing prices in Canada.

A two-storey home in Vancouver region would cost \$890,500 or 168% more than the same two-storey home in Winnipeg (\$332,500).

- House prices in Winnipeg have increased 42% over the last 7 years, with the average 2 storey, 1,500 sq. ft. house selling for about \$332,500.
- Edmonton’s housing values have not fully recuperated since the recession. Prices are still down 7% from 2007, with a current value of \$365,800.
- There is a flattening of house prices across Canada – that is, less variance between cities. Historically lower priced cities like Regina, Saskatoon, Quebec City, Hamilton, Halifax and Winnipeg have seen significant increases recently. The exception is Vancouver and Toronto where house prices continue to remain high.

Housing – Rental Market

“The steady vacancy rate can be attributed to a balance between existing renters moving to homeownership, more new renters entering the market through positive net migration, and a small increase in the supply of rental units.

CMHC, Rental Market Report, Fall 2014

Apartment vacancy rates

- The lowest 2014 vacancy rate was in Transcona, and the highest rate was in the Centennial area.
- The overall vacancy rate for Winnipeg is 2.5%.

2014 Apartment Vacancy Rates In various areas of Winnipeg

	Area	RATE
1	Fort Rouge	3.0%
2	Centennial	3.5%
3	Midland	2.1%
4	Lord Selkirk	2.8%
5	St. James	2.7%
6	West Kildonan	2.1%
7	East Kildonan	2.1%
8	Transcona	0.0%
9	St. Boniface	2.2%
10	St. Vital	2.1%
11	Fort Garry	2.5%
12	Assiniboine Park	2.8%

CMHC Rental Market Report, Fall 2014

In 2013, Winnipeg’s vacancy rate rose above 2% – making it the first year the rate has been above 2% since the year 2000.

- Winnipeg’s vacancy rate remained unchanged at 2.5% in both 2013 and 2014.

Rental costs are relatively low in Winnipeg

- When the average cost of a two-bedroom apartment is compared between cities, Winnipeg’s rent is at the lower end, \$1,016 per month.
- Montreal has the lowest average rent cost at \$739 per month.
- Calgary has the highest average cost at \$1,322 per month.

2014 Apartment Vacancy Rates In Other Cities

CMHC Rental Market Report, Fall 2014

Economy

“Real GDP in Winnipeg is expected to increase by 2.5% in 2015, up from 2.1% last year.”

Conference Board of Canada, Metropolitan Outlook, Spring 2015

Winnipeg’s economy is one of Canada’s most diversified economies. Overall, our economic indicators are positive relative to other parts of Canada.

In 2014, Winnipeg’s economic growth was similar to Canada’s.

As a result of gains in manufacturing and construction, real GDP in Winnipeg is expected to increase by 2.5 per cent in 2015, the strongest economic growth in 4 years. This is in contrast to Canada’s overall slower economic growth, at 1.9%.

Winnipeg’s Annual Economic Growth Real Gross Domestic Product, annual % change In constant 2002 dollars

Source: Conference Board, Metropolitan Outlook, Spring 2015- forecast

Over the next 5 years:

- Winnipeg’s economy is expected to create 39,000 jobs.
- Population in the Winnipeg region is forecasted to grow by 56,000 people.
- With robust population growth, Winnipeg’s housing construction is expected to continue at a steady pace similar to the last 3 years.
- GDP growth is forecast to average 2.3% per year.

These are good numbers for Winnipeg.

Source: City of Winnipeg, Building Permit Summary.

In 2014, Winnipeg saw over 1.5 billion dollars in building permit values.

- Residential permit values were up by 12%;
- The value in non-residential permits was down 33%;
- And, overall there was a 14% decrease in building permit values, but still historically at a high level.

2015 City Government Major Capital Investments - six year plan (in millions)

• Sewage Disposal	\$1,204
• Roads and Bridges	\$ 817
• Water System	\$ 204
• Transit System	\$ 198
• Public Safety Infrastructure	\$ 110
• Community & Municipal Facilities	\$ 97
• Community Services	\$ 95
• Land Drainage & Flood Control	\$ 32
• Active transportation facilities	\$ 28
• Solid Waste Disposal/Garbage Coll.	\$ 27
• Other	\$ 83
	\$2,895

Other Major Capital Investments (in millions)

• MB Hydro Keeyask Generating Station	\$6,500
• Bipole III	\$4,600
• Manitoba Core Infrastructure (over 5 years)	\$5,500
• Seasons of Tuxedo	\$500
• Convention Centre	\$180

Other projects by category (in millions)

• Commercial	\$1,098
• Industrial	\$392
• Institutional	\$1,229
• Residential	\$494

The City Government Infrastructure Projects over the next six years total \$2.9 billion, of which \$561 million is for 2015.

These projects, along with other significant major new capital investments in Winnipeg and the rest of the Province, require the construction industry to continue ramping up its capacity.

Labour shortages continue to exist along with upward pressures on construction wages. The result is that base construction inflation was 4% in 2014. Presently it is in the 5% range and expected to remain at that level for the next few years.

Cost of Doing Business KPMG’s 2014 Competitive

Alternatives examines location sensitive business costs in over 100 cities. Winnipeg has the lowest business cost of cities in Western Canada.

In fact, Winnipeg has lower business costs than all 74 U.S. cities examined. The U.S. – Canada exchange rate used in the study was 1.05 which would result in higher costs for Canadian cities compared to if the current exchange rate was used – thus Winnipeg would currently be even more competitive.

Jobs and Wages

“Manufacturing job growth persisted in 2014, coming in at a decent 3.6 per cent, following an even stronger 4.9 per cent jump in 2013.”

Conference Board of Canada, Metropolitan Outlook Spring 2015

Over the next five years, over 39,000 jobs will be created – on average, 7,800 additional jobs per year.

- Nearly all of the new jobs will be in the Service Sector.
- Four areas will see the most growth:
 - Non-Commercial Services
 - Personal Services
 - Business Services
 - Construction

Winnipeg’s unemployment rate is expected to continue to hover in the 5.1% to 5.4% range – more than a full percentage point below the Canadian average.

Manitoba’s median hourly wage has increased 2.6% in 2014 and 33% in the last 10 years which is above that of Canada’s overall increase of 28%.

During this same period, inflation in Winnipeg was 20% -- thus there were real wage gains in Manitoba, 13% over the decade, or an average of 1.3% per year.

The chart to the lower right indicates the percentage difference from Manitoba shown relative to Manitoba’s median hourly wage. The provinces which compete with Manitoba for labour, all have higher wages than Manitoba – from 8% higher in Ontario to 28% higher in Alberta.

Manitoba has made wage gains against the provinces of Quebec, Ontario and British Columbia. Currently wages in Ontario are 8% higher than in Manitoba, while back in 2000 they were 19% higher.

Wages in Saskatchewan and Alberta have increased at a greater pace than in Manitoba.

This information would further suggest that labour shortage will likely continue due to difficulty in retaining and attracting skilled labour.

Winnipeg Employment – By Sector

Employment Sectors	2014 Jobs	2015 - 2019 Additional Jobs
Total Employment	410,630	39,000

Disposable Income and Cost of Living

Real disposable income is stable

- In the early 1990's real personal disposable income decreased by 7.3%. This resulted in families having less money for discretionary spending.
- Over the last decade, Winnipeggers regained the lost real disposable income plus more for an increase of 10%.
- The Conference Board is forecasting only a 4.4% increase over the next 5 years. Thus, citizens will continue to have the same discretionary spending as today.

Winnipeg's Housing Affordability

(Using standard 2 storey and bungalow as the base)

- Housing affordability improved during the 1990s as a result of flat house prices and dropping interest rates. Mortgage carrying costs decreased from 30% of household income to less than 20%.
- Over the last decade, this trend has reversed. In 2014, the average household is spending 25% of their household income on mortgage costs.
- Other large Canadian cities are less affordable based on this measure.

Mortgage Carrying Costs - Winnipeg

	769,200	732,121	5.1%	37,079

This page provides base Census population figures on the Capital Region and larger communities in Manitoba. The information provides perspective relative to Winnipeg. For smaller communities, the Census is the only source of population information.

The majority of the population growth of the Capital Region was in Winnipeg

- The Capital Region includes 18 municipalities of which Winnipeg comprises 86% of the total population.
- Although some communities had significant population growth on a percentage basis, overall Winnipeg accounted for 81% of the total population growth in the Capital Region. (30,166 of the total 37,079)

Cities and Towns with Population over 2,500

City	Population			
	2011	2006	% change	# change

Minnedosa	2,587	2,474	4.6%	113

The majority of Manitoba's population growth was in the City of Winnipeg

- The table to the left comprises population figures for Winnipeg plus 20 of the largest cities and towns in Manitoba.
- Of the total population growth (43,254) of these 21 communities, Winnipeg makes up 70% of the total growth.
- Growth in these communities varies significantly. Steinbach had a growth rate of 22%, while Thompson had a decline of 4.6%. The most significant growth rate occurred in the smaller community of Niverville which experienced a 43% increase over these 5 years.
- Of these 21 larger communities, three are located in the north, Thompson, The Pas and Flin Flon all of which have had a decline in population.

Source: Statistics Canada, 2006 and 2011 Census

OurWinnipeg

OurWinnipeg is Winnipeg’s 25-year blueprint that will guide the growth and development of the physical, social, environmental, and economic development of our city as per The City of Winnipeg Charter.

OurWinnipeg integrates a detailed land use and development plan (**Complete Communities**) and three other Direction Strategies - **Sustainable Transportation, Sustainable Water and Waste**, and **A Sustainable Winnipeg**. Together, the four Direction Strategies provide detailed policies, directions, and strategies necessary for implementation.

OurWinnipeg guides and informs, but does not replace, more detailed planning on specific topics or for specific areas. As part of the OurWinnipeg initiative, the City of Winnipeg has developed the detailed Direction Strategies noted above, which add additional detail in key planning areas. The **OurWinnipeg** Plan should be read with the Direction Strategies – **Complete Communities** in particular - as companion documents.

OurWinnipeg Direction Strategies

The **Complete Communities Direction Strategy** is a detailed land-use and development plan (secondary plan), adopted as a By-law by City Council in 2011. **Complete Communities** is an innovative, practical plan that accompanies **OurWinnipeg** in guiding land use and development for Winnipeg. Its primary focus is to describe Winnipeg’s physical characteristics and lay out a framework for the city’s future physical growth and development.

Three other strategies were endorsed by City Council in 2011. Although these strategies have not been adopted as By-law, they remain important policy documents as Winnipeg changes and grows.

The **Sustainable Water & Waste Direction Strategy** promotes actions required to protect public health and safety, ensure the purity and reliability of our water supply and maintain or enhance the quality of our built and natural environments.

The **Sustainable Transportation Direction Strategy** provides a vision for transportation in Winnipeg for the next 25 years. Its emphasis is on moving people, goods and services in a way that is sustainable. This strategy formed the basis for the development of the Transportation Master Plan, which was subsequently approved by Council in November 2011.

A Sustainable Winnipeg is an integrated community sustainability strategy that outlines a plan of action, proposes a system of sustainability indicators and measures.

Annual OurWinnipeg Report to the Community

Every year, the City provides an update on *OurWinnipeg* related activities connected to key areas of the plan. This report includes an overview of recent city and community activities, programs, projects and initiatives, as well as a “tracking progress” section with a mix of qualitative and quantitative information to track trends over time. The initiatives and results captured in the annual report are a testament to the collaboration of the many thousands of Winnipeg citizens and organizations who participated in the creation of *OurWinnipeg*, and who encourage the City to continue taking steps towards implementing Winnipeg’s development plan.

Our Vision

Drawing on contributions from thousands of SpeakUpWinnipeg participants, the vision statement for creating the kind of city Winnipeggers want in 25 years is:

OurWinnipeg: living and caring because we plan on staying.

A Growing City

We are now competing, on a global scale, for economic development. We need to continue to offer the sustainability advantages and the quality of life that current citizens expect and prospective citizens will value. We are early in a cycle of strong growth, the pace of which we haven’t seen for decades. We’re welcoming new citizens and businesses, and embracing sustainability opportunities.

Today, as a city, we face a number of questions:

- How are we going to accommodate growth and change?
- How do we capitalize on growth while making sure our city stays liveable, affordable and desirable?
- How do we make sure that all Winnipeggers benefit from this growth?
- How do we maintain and enrich what we value while finding room for a growing population?

OurWinnipeg answers these questions and positions Winnipeg for sustainable growth, which is key to our future competitiveness. It sets a vision for the next 25 years and provides direction in three areas of focus - each essential to Winnipeg's future:

A City that Works

Citizens choose cities where they can prosper and where they can enjoy a high quality of life. A well-run city is an important starting point. The “basics” matter: public safety, water quality, wastewater infrastructure, and public amenities and facilities are the essentials to keeping people healthy. But quality of life goes beyond the basics. Our communities need to support various lifestyles, providing a range of options for living, working and playing. A variety of housing styles for residents to choose from are required, as are transportation choices for residents and businesses alike. The whole system has to work together efficiently and sustainably.

A Sustainable City

Sustainability is part of how the City does business, reflected in policies and programs that respect and value the natural and built environments – protecting our city's natural areas and heritage resources. We act as a corporate role model for social, environmental and economic sustainability, and measure and report progress in key corporate and community sustainability areas.

Quality of Life

Beyond providing a “City that Works” and planning for sustainability, our city needs to offer a high quality of life in order to be competitive. Three important aspects of quality of life are access to opportunity, the maintenance of vital healthy neighbourhoods, and being a creative city with vibrant arts and culture. All of these areas include social aspects that are critical to the overall well-being of our city.

The City is committed to collaborating within its mandate with other governments and service providers in these areas. In some cases, further intergovernmental discussion or strategic planning is required to move forward on the directions included in the plan.

For more information on OurWinnipeg, please visit:

<http://winnipeg.ca/interhom/CityHall/OurWinnipeg/>

Financial Management Plan Update

City Council adopted its most recent Financial Management Plan on March 23, 2011. The *OurWinnipeg* Plan requires periodic review and reporting on the Financial Management Plan, which provides financial strategies and targets with a view to long term financial health and sustainability. The following provides a progress report on the Financial Management Plan goals:

Goal #1: Promote economic growth
Target: Increase assessment base

The City's property assessment base is growing.

THE CITY'S PROPERTY ASSESSMENT BASE IS GROWING

Goal #2: Support environmental sustainability

Target: Financial decisions that support environmental sustainability

The measurement adopted by Council for this goal was to develop a multi-criteria approach to prioritize capital investment, including environmental sustainability, by 2013.

A multi-criteria approach to prioritize capital investment based on a triple bottom line approach, which includes assessing projects based on Social, Economic and Environmental factors has been developed as part of the asset management initiative. This new annual prioritization methodology is being utilized by all departments for projects greater than \$100,000 in the budget year plus two forecast years.

An ongoing example of this is the upgrading of City of Winnipeg traffic signals to LED fixtures. This project was funded by the City with support from the Manitoba Hydro Powersmart incentive program and has realized significant energy cost savings, as well as societal benefits. These triple line benefits may be summarized as follows:

Economic: In 2015, energy costs avoided are estimated to be \$295,000. This is in addition to reduced maintenance costs since incandescent signals are serviced about 4 times more often than LEDs.

Environmental: From 2007-2013, energy use from traffic signals decreased by more than 30% despite steady City growth. 2015 energy savings are estimated to be 2.4 million kWh along with an annual greenhouse gas reduction of 10 tonnes of carbon dioxide equivalents.

Social: With less maintenance, LED lights increase traffic safety as they minimize the number of signal outages and the number of closed intersections from staff changing bulbs. Some jurisdictions report positive responses from residents because of the brighter light that is emitted from LEDs which is perceived to increase safety in poor weather conditions.

Goal #3: Maintain infrastructure assets

Target: Implement leading practices for asset management

The measurement adopted by Council for this goal was to complete Phase 2 of the Asset Management Initiative by the end of 2012.

Phase 2 of the Asset Management Initiative has been completed. This phase included development of an Asset Management Policy FI-011, Asset Management Administrative Standard FM-004 and integrating leading practices in asset management such as an integrated investment planning process by incorporating business case assessments and multi-criteria prioritization to establish prioritized Capital Investment Plans. The City's current focus for the Asset Management Program is the development of Asset Management Plans, including a State of the Infrastructure Report and having departments continue to expand the asset management processes to all their asset classes.

Goal #4: Manage debt
Target: A manageable level of debt

The measurement adopted by Council for this goal was to develop a debt strategy, including maximum debt limits.

City Council approved a debt strategy on June 22, 2011, including maximum debt limits. The approved maximum limits are listed in the table below. The table also includes the City's position with respect to these ratios as at December 31, 2014. It is anticipated that these actual ratios will increase in the next several years as the City undertakes planned increases in capital investment.

Debt Metrics	Maximum	As At December 31, 2014
Debt as a % of revenue		
City	85.0%	51.9%
Tax-supported and other funds	60.0%	53.9%
Utilities and Other	220.0%	47.9%
Debt-servicing as a % of revenue		
City	11.0%	5.8%
Tax-supported and other funds	10.0%	5.8%
Utilities and Other	20.0%	5.9%
Debt per capita		
City	\$ 2,400	\$ 1,313
Tax-supported and other funds	\$ 1,050	\$ 886
Utilities and Other	\$ 1,300	\$ 210

Note: "City" includes "tax-supported and other funds", "Utilities and Other" and consolidated entities;
 "Tax-supported and other funds" includes Municipal Accommodations and Fleet Management; and
 "Utilities and Other" includes Transit System, Waterworks System, Sewage Disposal System and Solid Waste Disposal.

Amendments to the debt strategy are currently being reviewed by the Public Service for City Council's consideration.

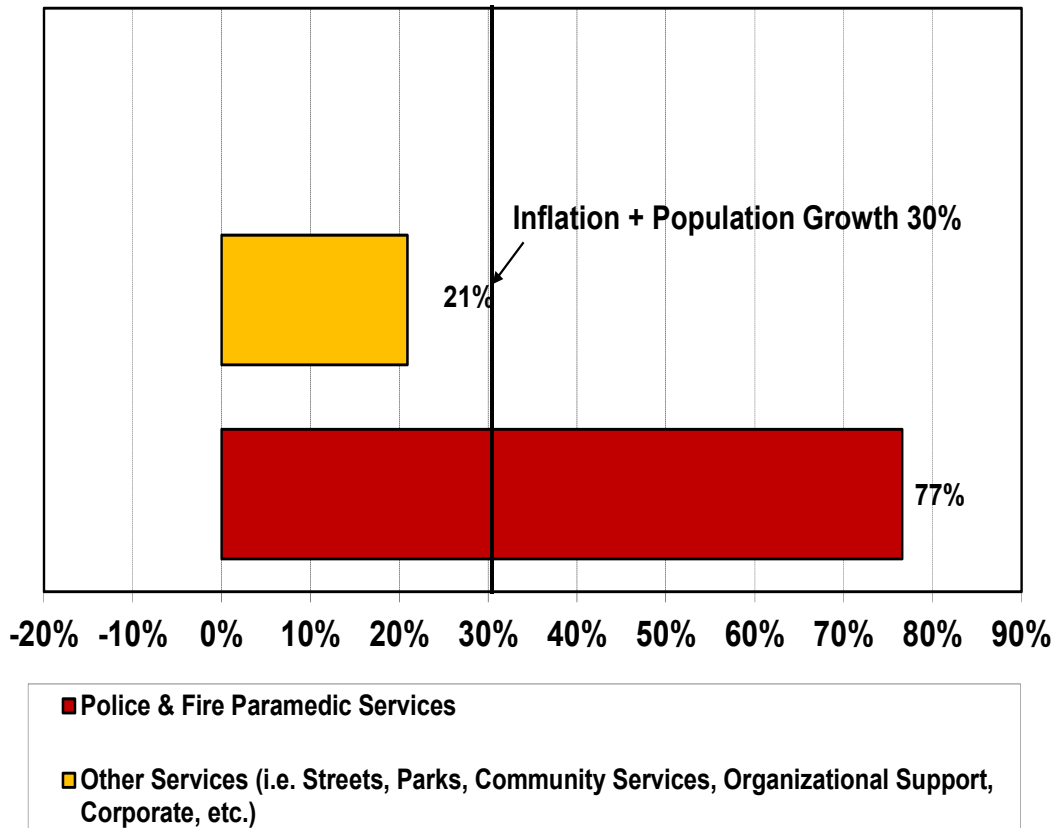

Source: City of Winnipeg 2014 Annual Financial Report

Goal #5: Manage expenditures

Target: Tax supported operating expenditure increases should not exceed inflation adjusted for growth, net of operational efficiencies

Cost increases since 2005 related to City services other than police and fire paramedics have kept below the inflation adjusted for growth level of 30% as shown in the following graph. Over this same period, costs related to police and fire paramedic services have increased 77%, more than double the 30% level. The citizens of Winnipeg have identified public safety as a high priority and these services have been enhanced as a result.

**TAX SUPPORTED SERVICES:
Percentage Change - 2005 to 2015 Expenditure Budgets**

Goal #6 Ensure a sustainable revenue structure

Target: A revenue structure that keeps pace with inflation adjusted for growth

The measurement adopted by Council for this goal was that the increase in operating revenue should be, at a minimum, inflation adjusted for growth. Between 2013 and 2014 inflation adjusted for growth was 3.3%. Consolidated operating revenue for 2014 of \$1.442 billion increased 3.3% compared to the previous year. New sources of growth revenue are being explored to address both inflationary pressures on service costs as well as the significant infrastructure deficit. In 2015, Council's long term plan to improve local and regional streets was continued.

The City will continue to negotiate and advocate for long-term, inflation-adjusted, dedicated funding from the other levels of government.

Goal #7

Support a competitive tax environment

Target:

Municipal residential property taxes below the average of other Canadian cities

Winnipeg's 2014 municipal residential property taxes are the lowest compared to other large Canadian cities.

LOWEST MUNICIPAL PROPERTY TAXES ON AVERAGE HOUSE

For the year 2014, Municipal portion only

Source: Prepared by City of Winnipeg using derived information

Goal #8 Ensure adequate reserves

Target: Stabilization Reserves maintained at a minimum of 8% of tax supported expenditures

On September 28, 2011, Council approved merging the former Fiscal Stabilization and Mill Rate Stabilization Reserves to form a new Financial Stabilization Reserve. The ending balance in the Financial Stabilization Reserve is above 2014 target level at 8.3% of tax supported expenditures. On March 23, 2015 Council approved that the target level for the Financial Stabilization Reserve Fund be changed from 8% to 6% of tax supported expenditures.

STABILIZATION RESERVE(S)

Performance Measurement

Performance measures have been published annually by the City of Winnipeg since 2010 and are a gauge of how well services are being provided. Performance measurement provides the necessary data to identify needs and to support reallocation of resources or realignment of strategic objectives to improve processes and priorities. Performance indicators are used as a tool to:

- enhance transparency and accountability to citizens of Winnipeg
- improve service delivery
- increase shared knowledge and promote mutual improvements through benchmarking to other municipalities

The City's performance measurement framework uses three types of measures including historical data for trending purposes:

Service Level Statistics

- provides an indication of the service or activity levels, by reflecting the amount of resources approved by City Council or the volumes of service delivered to residents.

Effectiveness Measures

- measures the quality of service delivered relative to service standards or the customer's needs and expectations.

Efficiency Measures

- compares the resources used to the number of units of service provided or delivered. Typically this is expressed in terms of cost per unit of service.

Benchmarking with other municipalities provides a comparison to assist in evaluating how well we are doing and where we could improve the services being delivered. One of the major benchmarking organizations in which Winnipeg participates is the Ontario Municipal Benchmarking Initiative (OMBI). OMBI is a collaboration of 14 municipalities including Ottawa, Toronto, Calgary, Winnipeg, and most recently Montreal. Led by Chief Administrative Officers and City Managers, this initiative fosters a culture of service excellence in municipal government by measuring, sharing and comparing performance statistics and operational practices.

Expert Panel members from each municipality meet as a group to collaborate, learn, network with peers and share information. OMBI allows for meaningful comparisons by

having a performance measurement framework with a detailed data collection protocol, costing methodologies, and peer-reviewed data. Defined standards are set by a Financial Advisory Expert Panel and are consistent with the Public Sector Accounting Board to ensure the indirect costs of the services are included.

Since joining OMBI in 2010 as a pilot project, Winnipeg is now reporting on most services using benchmarking with OMBI municipalities. Winnipeg also continues to include benchmarking data from other service-specific benchmarking organizations such as the Canadian Urban Transportation Association (CUTA).

Building a body of knowledge through performance measurement will strengthen accountability by keeping elected officials and citizens informed about standards, costs and value.

In this section, the most recent data available at production time has been used:

- The OMBI Office publishes their benchmarking data annually in November, therefore OMBI measures are reflected for 2013 in this document.
- Service Level Statistics and non-OMBI Performance Measures are from 2014, the last internal data collection year.
- Where other performance or benchmarking data is gathered from other professional organizations, it is included as available.
- The Citizen Survey data presented is from 2015.

Citizen Survey

In this performance report, one of the key effectiveness measures is citizen satisfaction with the various services the City provides. Prairie Research Associates (PRA) was commissioned by the City of Winnipeg to conduct the 2015 Citizen Survey from May 1 to 14, 2015. Six hundred Winnipeg residents were randomly surveyed by telephone, including 27% from the inner city area. The survey results are provided with a margin of error of +/-4% to a 95% confidence level (19 times out of 20). Data used in this document is based on results from citizens who answered each survey question (excludes “don’t know” or “refused responses”).

Quality of Life

In 2015, 90% of Winnipeggers believe the quality of life in Winnipeg is very good or good.

very good
 good

Citizens were also asked: *“What actions do you think the City of Winnipeg could take to improve the quality of life in the city?”*

When these suggestions were reviewed in the context of the respondent’s response to the quality of life in Winnipeg question, the following was noted:

Quality of Life	Most common suggestions
Good or Very Good (90%)	<ul style="list-style-type: none"> • Fix streets • Improve infrastructure • Improve transit • Improve walking and bicycle trails
Poor or Very Poor (10%)	<ul style="list-style-type: none"> • Lower taxes • Fix streets

These suggestions for actions the City could take to improve the quality of life were grouped into categories and compared to previous years. In 2015, “More Things to Do” (which included responses such as more recreation programming, and more activities for seniors and youth), replaced Transit as the third of the top three identified priority categories for City government as ways to improve quality of life in the city:

- 1) Roads/Infrastructure
- 2) Crime/Policing
- 3) More Things to Do

Groupings	% of Respondents				
	2011	2012	2013	2014	2015
Roads/Infrastructure	21.8%	32.9%	28.0%	31.2%	54.0%
Crime/Policing	47.2%	39.5%	38.6%	27.8%	12.1%
More things to do	1.5%	7.5%	2.0%	0.7%	10.5%
Transit	7.1%	10.8%	6.3%	4.2%	7.4%
Taxation	1.0%	1.7%	5.5%	3.2%	6.9%
City Beautification	1.5%	1.5%	0.6%	1.5%	6.5%
City Planning	1.0%	2.5%	0.8%	3.5%	6.4%
Housing	1.0%	1.2%	1.6%	0.3%	5.5%
Bicycle & Walking Trails	3.4%	8.5%	3.5%	1.3%	4.8%
Poverty	3.2%	6.4%	0.8%	0.0%	3.0%
Economy	0.2%	1.4%	0.4%	0.2%	2.6%
Healthcare	0.0%	0.6%	0.4%	0.4%	1.7%
Downtown Renewal	5.2%	6.6%	2.4%	2.5%	1.5%
Recycling/Environment	0.7%	0.2%	0.2%	0.5%	0.4%
Insect Control	0.5%	0.6%	0.2%	0.2%	0.1%

Note: Respondents may provide more than one response; totals are adjusted accordingly and may add up to greater than 100%.

Service Satisfaction

Overall satisfaction with City services was approximately 86% in 2015.

very satisfied
 somewhat satisfied

Overall satisfaction with services remains high. Individual service results are provided within each reporting service area.

Value for Tax Dollars

In 2015, 62% of Winnipeggers surveyed believe they receive good to very good value for their municipal property tax dollar (an increase from 36% in 2014). Respondents were then asked to provide a reason for this response.

When the reasons provided were reviewed in context of the respondent's response to the value received for municipal tax dollars question, the following was noted:

Value for Tax Dollars	Most common reasons
Good or Very Good (62%)	<ul style="list-style-type: none"> • Feel the City is doing the best with the money available • Satisfaction with specific services (including snow clearing, garbage collection)
Poor or Very Poor (38%)	<ul style="list-style-type: none"> • Dissatisfaction with condition of streets, backlanes, etc. • General dissatisfaction with services • Dissatisfaction with spending decisions

Customer Service

Of those Winnipeggers surveyed and who had contact with the City,

- 80% made contact using a telephone (down from 95% in 2014);
- 15% made contact using e-mail or internet (up from 2% in 2014); and
- 72% rated their experience as very satisfied or somewhat satisfied.

Citizens were asked: *“Thinking about your personal dealings with the City of Winnipeg and your general impressions, do you agree or disagree with the following statements?”*

Strongly Agree and Somewhat Agree	2011	2012	2013	2014	2015
City staff are courteous, helpful and knowledgeable	88%	86%	70%	87%	90%
The quality of service from the City is consistently high	73%	63%	58%	83%	69%
The City responds quickly to requests and concerns	60%	54%	62%	72%	60%
City staff are easy to get a hold of when I need them	53%	53%	48%	70%	55%

Citizens were also asked to provide a suggestion regarding ways the City’s customer service could be improved.

When the suggestions provided were reviewed in context of the respondent’s response regarding their satisfaction level, the most common suggestions from both the satisfied and dissatisfied groups were to increase staffing, and answer phones more quickly with less time for Citizen’s to be on hold.

Roadway Construction and Maintenance

Includes:

- Bridge Construction & Maintenance
- Regional Streets Construction & Maintenance
- Local Streets Construction & Maintenance
- Regional Sidewalk Construction & Maintenance
- Local Sidewalk Construction & Maintenance

Description

To provide citizens with access to well-maintained roadways, sidewalks and bridges in order to ensure the safe, efficient movement of people, goods and services.

Key Goals

1. Expand and refine Roadway Asset Management systems.
2. Support Downtown revitalization.
3. Provide optimized delivery of infrastructure projects.
4. Utilize principles of environmental stewardship.
5. Coordinate processes with other major project stakeholders.
6. Implement active transportation components in regional street projects where feasible.

Service Level Statistics

Description	2012	2013	2014
Roadway transferred from developers (lane-km)	50.57	71.28	53.2
Capital Addition of Regional Streets (lane-km)	6.8	17.5	27.8
Capital Reconstruction of Regional Streets (lane-km)	1.5	0	10.2
Capital Rehabilitation of Regional Streets (lane-km)	17.7	24	25.2
Capital Reconstruction of Local Streets (lane-km)	3.75	8.42	19.2
Capital Rehabilitation of Local Streets (lane-km)	61.46	67.28	85.66
Capital Addition of Surfaced Alleys (lane-km)	0.414	0.662	0.501
Capital Reconstruction of Alleys (lane-km)	4.34	8.36	3.16
New pedestrian/cycle pathways (meters)	2,270	6,735	7,969
Major Bridge Rehabilitations	4 locations \$13,850,000	3 locations \$19,045,654	2 locations \$4,157,000
Significant Bridge Maintenance Repair Works	25 locations \$601,000	27 locations \$504,000	26 locations \$775,500

Roadway Construction and Maintenance

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Condition of Major Streets (such as Portage Ave. or Pembina Hwy.)

	2011	2012	2013	2014	2015
Total Satisfied	64.0%	37.7%	51.9%	65.5%	42.5%

Source: City of Winnipeg Annual Citizen Survey

In 2015, the level of citizens who were somewhat satisfied or very satisfied with the condition of major streets was 42.5%, dropping from 65.5% in the previous year. The Public Works Department's condition ratings of regional streets, provided ratings of 60% in 'Good' condition in both 2013 and 2014. Winnipeggers expect the condition of major streets to continue to improve and funding has been increased to the Public Works Department to address this concern.

Citizen Satisfaction with Condition of Residential Streets in Neighbourhood

	2011	2012	2013	2014	2015
Total Satisfied	71.8%	40.2%	46.1%	53.6%	52.7%

Source: City of Winnipeg Annual Citizen Survey

The level of citizens reporting somewhat satisfied or very satisfied with residential streets increased from a low of 40% in 2012 to 53% in 2015.

Average Condition of Regional Streets

Wpg.Trend	Condition	2010	2011	2012	2013	2014
	Good	52.2%	45.7%	57.5%	60.4%	60.8%
	Fair	30.7%	39.6%	26.6%	25.7%	25.2%
	Poor	17.1%	14.7%	15.9%	13.9%	14.0%

Source: City of Winnipeg Public Works Department

Most Canadian cities have more asphalt pavement than Winnipeg, which uses concrete pavement to a much greater degree. Winnipeg uses concrete as many areas sit on weak susceptible soils or highly expansive clay soils. Using concrete is seen as a way to "bridge" these weak soils, eliminating the need to dig out and replace poor sub surface material.

The Public Works Department completed reviews of the condition of regional streets in each year from 2010 to 2014. In 2005, a less costly method of rehabilitating roadways known as "mill and fill" was introduced and has increased the amount of regional street lane kilometres in the good condition rating category since 2011.

Roadway Construction and Maintenance

Average Condition of Local Streets

Wpg. Trend	Condition	2010	2011	2012	2013	2014
	Good	63.4%	65.4%	63.5%	58.6%	59.7%
	Fair	17.4%	15.0%	18.9%	22.6%	22.8%
	Poor	19.2%	19.6%	17.6%	18.8%	17.5%

Source: City of Winnipeg Public Works Department

The Public Works Department also completes reviews of the condition of local streets. In 2014, the percentage of streets rated as being in 'Good' and 'Fair' condition increased and those rated as 'Poor' decreased slightly.

Efficiency Measurements

Total Costs for Paved (Hard Top) Roads per Lane Kilometre

Wpg. Trend	2011	2012	2013
	\$10,467	\$10,154	\$9,429

Source: Ontario Municipal Benchmarking Initiative (OMBI)

Total paved roadway operating costs are higher in Toronto, Hamilton and Windsor, according to 2013 Ontario Municipal Benchmarking Initiative (OMBI) data.

Operating Cost for Roads per Unpaved (Loose Top) Lane Km (2013)

Wpg. Trend	2011	2012	2013
	\$15,305	\$7,863	\$10,358

Source: OMBI

Winnipeg's costs include gravelling, chip sealing, blading, dust control and oiling of unpaved roads. The increased cost in 2013 is a result of increased infrastructure maintenance activities.

Roadway Construction and Maintenance

Average Cost to Rehabilitate/Reconstruct by Street Type per Lane Km (in millions of \$)

Type	2010	2011	2012	2013	2014
Local - Reconstruct	\$1.220	\$1.220	\$0.800	\$0.930	\$1.340
Local - Rehabilitate	\$0.555	\$0.520	\$0.470	\$0.510	\$0.630
Regional - Reconstruct	\$1.258	\$1.700	\$1.780	n/a	\$2.040
Regional - Rehabilitate	n/a	\$0.780	\$0.760	\$0.570	\$0.939

The average cost for Regional rehabilitation projects in 2014 represents a proportionally blended rate of the various asphalt treatments, excluding 'mill and fill' rehabilitation methods. The 2013 Regional Rehabilitation cost has been restated to ensure consistency in reporting.

The Public Works Department encourages the use of asphalt paving materials as a cost-effective treatment in the City's roadway asset management strategy. Where appropriate, the Department utilizes both asphalt and concrete pavement designs for new and reconstructed roadways as an effective life cycle asset management approach for both regional and residential streets. Over the last 5 years, the Department has rehabilitated over 115 lane kilometres of regional network using asphalt overlays and resurfacing as part of its roadway asset management program.

Transportation Planning and Traffic Management

Includes:

- *Transportation Planning & Design*
- *Traffic/Right-of-Way Management*

Description

To plan, design and manage the transportation system and the traffic regulatory environment to provide a safe, environmentally-aware, accessible and sustainable transportation system.

Key Goals

1. Provide integrated transportation and land use planning.
2. Provide an accessible transportation system.
3. Invest in equipment and technology that supports a sustainable transportation system.
4. Expand the Active Transportation System network.
5. Support Downtown revitalization initiatives.
6. Maintain or improve service levels on the street system.

Service Level Statistics

The proportion of work trips by vehicle drivers continues to rise. Bicycle mode share of work trips has increased over the 10 year period.

Work Trip by Mode	2001 Census	2001 %	2006 Census	2006 %	2011 Census	2011 %
Vehicle Driver	207,095	68.6%	216,675	69.1%	229,155	69.1%
Vehicle Passenger	25,825	8.5%	28,065	9.0%	24,380	7.3%
Transit	42,960	14.2%	42,375	13.5%	48,530	14.6%
Walk	19,375	6.4%	18,685	6.0%	18,095	5.5%
Bicycle	4,565	1.5%	5,295	1.7%	7,075	2.1%
Other	2,520	0.8%	2,235	0.7%	4,550	1.4%
Total	302,340	100%	313,330	100%	331,785	100%

Description	2012	2013	2014
Lane Kilometres of Regional Streets	1,778*	1,782*	1,810*
Lane Kilometres of Truck Routes	1,754*	1,754*	1,768*
Number of Signalized Intersections	637	638	649
Number of Accessible Pedestrian Signals	267	293	398
Number of Pedestrian Corridors	157	166	169
Kilometres of Active Transportation Facilities	392	394	396
Kilometres of Multi-use paths	195	197	197
Kilometres of Bike Lanes	35	35	37
Kilometres of Sharrows	37	37	37
Kilometres of Bike Boulevards	56	56	56

Transportation System Use Estimates

Daily Vehicle-Kilometer of Travel	10,129,741	10,129,741	10,129,741
-----------------------------------	------------	------------	------------

* Variation in the number is due in part to a refinement of the inventory calculation. The Regional Streets Network increased in 2014 due to the opening of the Kenaston Extension. Truck Routes Lane Kilometres increased in 2014, however the net increase was reduced by the opening of Centreport Way.

Transportation Planning and Traffic Management

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with the Management of Rush Hour Traffic Flow

Citizen satisfaction with traffic management during rush hour is approximately 47% in 2015 of citizens either somewhat satisfied or very satisfied.

The City has increased annual capital spending for traffic signal enhancements on major routes with \$2.3 million each year from 2008 to 2012 for a total of \$11.5 million. The Public Works Department is developing a Transportation Management Centre to better manage traffic flows.

	2011	2012	2013	2014	2015
Total Satisfied	80.3%	43.0%	71.7%	60.9%	46.5%

Source: City of Winnipeg Annual Citizen Survey

AM Peak Hour Average Travel Time on Major Routes (minutes)

Route	2010	2011	2012	2013	2014
Henderson Hwy.	13.7	16.0	13.6	20.5	15.6
Main St.	16.4	18.1	n/a	21.9	22.2
Pembina Hwy.	n/a	18.4	n/a	n/a	17.8
Portage Ave.	26.2	20.5	22.9	n/a	20.4
St. Mary's Rd.	n/a	n/a	n/a	17.5	17.3

All times for routes listed here are from the Perimeter Highway to downtown Winnipeg. Travel times can be impacted by a number of factors such as construction or rehabilitation projects.

Average Time to Repair Signalized Intersection

	2010	2011	2012	2013	2014
Average Repair Time (hrs)	6.4	6.5	6.0	6.5	5.4

The repair time is affected by the time of day and day of week when the damage occurs. The repair time can fluctuate when damage occurs during unscheduled shift hours (i.e., between 16:00-08:00 and on weekends) due to the reduced availability of staff who can work on the repairs. 2014 saw an improvement in the average signal repair time.

Transportation Planning and Traffic Management

Efficiency Measurements

Cost of Transportation Planning and Traffic Management per Lane Km of Regional Road

Wpg. Trend	2010	2011	2012	2013	2014
	\$2,782	\$2,960	\$2,781	\$3,490	\$3,087

There had been little change in the cost for providing this service until 2013. In 2013, this cost increased due to additional expenditures on Traffic Signal Asset Management as a result of considerable increase in winter related snow damage. In 2014, this measure decreased as less funds were expended for Traffic Signal Asset Management and the number of lane kilometers of regional roads increased.

Maintenance Cost per Signalized Intersection

Wpg. Trend	2010	2011	2012	2013	2014
	\$5,839	\$6,552	\$6,389	\$7,301	\$6,653

The cost of traffic signals maintenance decreased in 2014 from 2013. In 2013, increased repairs to signal infrastructure, a decline in cost recoveries from insurers, and an inventory adjustment contributed to this increased cost.

Average Signal Damage Repair Cost

Wpg. Trend	2010	2011	2012	2013	2014
	\$3,595	\$2,725	\$2,752	\$3,377	\$2,797

Damages are a result of a third party or an environmental event causing damage to traffic signals infrastructure. This figure includes salaries, services (e.g., telephones, fleet equipment, consumables, electrical bills, training, etc.), materials, parts and supplies.

Roadway Snow Removal and Ice Control

Includes:

- *Regional Streets Snow and Ice Removal*
- *Local Streets Snow and Ice Removal*
- *Sidewalk Snow and Ice Removal*
- *Park & Facility Snow and Ice Removal*
- *Snow Disposal Sites*

Description

Undertake effective roadway snow and ice control services in order to provide safe and accessible conditions on city streets and sidewalks during the winter season.

Key Goals

1. To provide the citizens of Winnipeg with safe and accessible roadway infrastructure during the winter months by delivering efficient and effective snow and ice control services.
2. To implement Best Management Practices for the municipal use of road salt for snow and ice control in winter months in accordance with Environment Canada's Code of Practice for Road Salt Management.
3. To work closely with the private sector to ensure there is a sustainable quantity of private sector equipment to assist the City in carrying out the winter snow clearing operations.
4. To examine various options for the provision of snow disposal sites and develop a long term strategy to provide this service in a cost-effective manner in the future.

Service Level Statistics

Description	2012	2013	2014
Annual Snowfall (centimetres)	112	150	131
Days of Snowfall (3 cm or more)	14	15	57
Regional Streets - Priority 1 Truck Plows (Department budgets for 3 events)	4	7	7
Regional Streets - Priority 1 Grader Plows (Department budgets for 3 events)	2	3	4
Bus Routes and Truck Routes - Priority 2 Truck Plows (Department budgets for 3 events)	4	6	7
Bus Routes and Truck Routes - Priority 2 Grader Plows (Department budgets for 2 events)	2	3	5
Residential Streets - Priority 3 Grader Plows (Department budgets 2 events)	1	3	3
Alleys (Department Budgets for 2 events)	2	6	7
Salt Applied (tonnes)	25,835	22,547	29,484
Sand Applied (tonnes)	60,485	105,000	97,200
Snow Removed/Hauled (cubic metres)	64,003	757,982	1,526,000
Sidewalks Plowed (kilometres)	33,826	42,632	31,607

Roadway Snow Removal and Ice Control

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Snow Removal

While the 2014-15 winter was not quite as harsh as the previous year, considerable amounts of salt and sand had to be applied to deal with icy roadways. The City's snow removal efforts continued to see a 70% citizen satisfaction level under these conditions.

	2011	2012	2013	2014	2015
Total Satisfied	87.3%	78.1%	89.9%	74.7%	70.5%

Source: City of Winnipeg Annual Citizen Survey

Percentage of Winter Events Where Response Met or Exceeded Service Levels for Snow Clearing

Wpg. Trend	2010	2011	2012	2013	2014
	91%	100%	95%	93%	91%

Source: City of Winnipeg Public Works Department

Winnipeg met the snow clearing service level standards in 2011 as per the City's Snow Clearing Policy, dropped slightly in 2010, and was at 95% in 2012 and 93% in 2013 and dropped again in 2014 to 91% due to the difficult conditions experienced in the early months of 2014.

Efficiency Measurements

Total Costs for Winter Maintenance of Roadways per Lane Km Maintained in Winter (2013)

Wpg. Trend	2010	2011	2012	2013
	\$3,431	\$5,406	\$4,298	\$6,279

Source: Ontario Municipal Benchmarking Initiative (OMBI)

These costs are affected by many factors which include, but are not limited to, amount of snowfall, frequency and severity of events, winter temperatures, freeze-thaw cycles and the price of fuel. Costs for Winnipeg's winter road maintenance were higher in 2013 due to considerably less favourable weather conditions than in 2012.

Cost per Lane Km to Apply Salt/Sand for Ice Control

Wpg. Trend	2010	2011	2012	2013	2014
	\$1,095	\$1,059	\$1,301	\$1,443	\$1,375

Source: City of Winnipeg Public Works Department

The cost per lane km to apply salt and sand for ice control varies from year-to-year due to weather conditions. 2012 - 2014 winter conditions were more extreme which reflected higher costs than in the previous 2 years.

Public Transit

Includes:

- Regular Transit
- Handi-Transit
- Chartered and Special Events Transit

Description

To plan, develop, and operate public transportation service in Winnipeg that:

- Provides mobility for those who do not or choose not to use other modes;
- Provides weekday peak period service levels that minimize the City's requirement for investment in roadway and bridge infrastructure;
- Reduces pollution generated by the overall urban transportation system; and
- Reduces energy use by urban transportation.

To provide a parallel public transportation service for people who are unable to safely and independently maneuver the fixed route transit system due to a significant impairment to their mobility or a cognitive disability in accordance with eligibility criteria.

Key Goals

1. Improve accessibility, mobility, comfort, convenience, and safety.
2. Improve speed, reliability and ridership.
3. Improve environmental sustainability.
4. Improve productivity.
5. Improve passenger information.
6. Improve service reliability. (Handi-Transit)
7. Improve productivity. (Handi-Transit)
8. Improve customer relations. (Handi-Transit)

Service Level Statistics

Regular and Chartered Transit

Description	2012	2013	2014

Public Transit

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction for Users Who Used Transit at Least Once per Week

For those respondents who used Transit at least once per week, total service satisfaction was 76% in 2015.

	2011	2012	2013	2014	2015
Total Satisfied	86.5%	71.4%	72.7%	89.0%	76.1%

Source: City of Winnipeg Annual Citizen Survey

Regular Transit Passengers per Capita (2014)

Winnipeg's per capita ridership was unchanged between 2013 and 2014.

Wpg. Trend	2010	2011	2012	2013	2014
	70	72	73	74	74

Source: Canadian Urban Transit Association

Handi-Transit Passengers per 1,000 Population

Wpg. Trend	2010	2011	2012	2013	2014
	786	774	729	728	695

Since 2006, Handi-Transit registrants with unlimited eligibility have been allowed to ride for free on the regular fixed-route system. This policy, an increased number of Easy Access buses, and improved screening of applications to determine eligibility have contributed to the decline in Handi-Transit usage.

Public Transit

Percentage of Scheduled Service Operated

Service Reliability	2010	2011	2012	2013	2014
Percentage	99.6%	99.6%	99.6%	99.6%	99.6%

Service delivery has been stable over recent years.

Weekday Service Reliability

Service Reliability	2010	2011	2012	2013	2014
Early	8.8%	8.7%	9.2%	9.4%	9.3%
Late	8.4%	9.1%	10.0%	10.4%	11.7%
On-Time	82.8%	82.2%	80.7%	80.3%	79.0%

Increases in traffic congestion have reduced on-time reliability in recent years.

Efficiency Measurements

Regular Transit Operating Cost per Passenger (2014)

Winnipeg consistently operates one of the most cost efficient transit systems in Canada.

Wpg. Trend	2010	2011	2012	2013	2014
	\$2.49	\$2.47	\$2.53	\$2.63	\$2.80

Source: Canadian Urban Transit Association

Public Transit

Handi-Transit Operating Cost per Passenger (2014)

Winnipeg consistently operates one of the most efficient para-transit systems in Canada. Handi-transit operating costs per passenger trip have remained amongst the lowest in Canada.

Wpg. Trend	2010	2011	2012	2013	2014
	\$17.95	\$19.12	\$20.89	\$21.07	\$22.96

Source: Canadian Urban Transit Association

Total Operating Revenue/Total Direct Operating Expenses (R/C ratio) (2014)

Winnipeg has one of the highest recovery-to-cost ratios in Canada.

Water

Includes:

- *Water Supply and Treatment*
- *Water Distribution*

Description

To provide citizens with a safe and adequate supply of potable water for residential and commercial use through water supply, storage, treatment, pumping, distribution and metering.

Key Goals

1. To improve the state of the environment and public health.
2. To exceed our customers' needs and expectations.
3. To continue improving water quality through ongoing operation and maintenance of the water treatment plant and the water distribution systems.
4. To increase the efficiency and effectiveness of our services.
5. To implement best practices.
6. To maintain a high quality safe working environment.
7. To improve information management.

Service Level Statistics

* Reflects complaints received through the City's 311 system.

** 2013 restated to correct a reporting error.

Water

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Quality of Drinking Water

Water Services faced considerable challenges with a record breaking winter and unprecedented numbers of frozen services in the start of 2014. In addition, although the issuance of a precautionary Boil Water Advisory in January 2015 was later determined to be related to sampling/testing error, public opinion of the system was likely negatively impacted.

	2011	2012	2013	2014	2015
Total Satisfied	94.8%	89.0%	92.9%	87.9%	76.3%

Source: City of Winnipeg Annual Citizen Survey

Number of Breaks at Watermain per 100 kilometres

Watermain breaks are caused by a number of factors including soil conditions, seasonal climate extremes, frost penetration, pipe age, material and the condition of the piping. Winnipeg's soil is highly conductive and corrodes metallic pipes from the outside in.

Over the past two decades the number of breaks has been reduced from about 100 per 100 Km due to cathodic protection of metallic mains, strategic watermain renewals and the use of PVC pipes for new construction and renewals.

Wpg. Trend	2011	2012	2013
	21.3	31.0	25.4

Source: Ontario Municipal Benchmarking Initiative (OMBI)

2012 saw an unprecedented, short term increase in watermain breaks due to prolonged hot, dry weather.

Water Use (megalitres distributed) per Household (2013)

Water use per household has been steadily declining since the mid-1990's due to water conservation measures which include changes to the plumbing code (low flow toilets, shower heads etc.), low water use appliances, and increased environmental awareness. This measure represents the water use by residential households (single family and multi-family residential).

Water

Water Treatment Testing

Parameters Tested Operating Licence Requirements	2010**	2011	2012	2013	2014
Free Chlorine (No less than 0.5 mg/L)	1.08	1.30	1.14	1.14	1.21
Free Chlorine percent compliant with Provincial Licence	100%	100%	100%	100%	100%
Turbidity (No more than 0.30 NTU)	0.14	0.14	0.10	0.09	0.12
Turbidity % compliance with Provincial Licence **	100%	100%	100%	100%	100%

** Percent compliance results were calculated from July 1 until December 31, 2010 when the revised Provincial Operating Licence came into effect implementing the current licence requirements.

Water tests are conducted to ensure that the water supplied to customers meets Provincial regulations and Federal Health Guidelines. The City of Winnipeg ensures that a high quality of water is delivered to customers and actions are taken to continuously improve water quality.

On October 9, 2009, the City of Winnipeg was issued a Public Drinking Water System Operating Licence. On December 9, 2009 the new Water Treatment Plant came into operation. The City has increased the number of tests performed and ensures conformity with guidelines and regulations. Results are not provided for the years prior to the water treatment plant.

Distribution System Water Testing

Parameters Tested Operating Licence Requirements	2010	2011	2012	2013	2014
Free Chlorine (No less than 0.1 mg/L)	0.53	0.56	0.64	0.74	0.81
Free Chlorine percent compliant with Provincial Licence	99%	100%	100%	100%	9,995%
Trihalomethanes (No more than 100 ug/L)	59.0	32.7	28.8	28.1	22.5
Trihalomethanes percent compliant with Provincial Licence	100%	100%	100%	100%	100%
Fluoride (Range of 0.5 mg/L to 0.9 mg/L) *	0.85	0.72	0.70	0.65	0.69
Fluoride % compliance with recommended range	100%	100%	100%	96%	100%
Total Coliform Samples (minimum 1820 samples required)	3,172	3,163	3,159	3,128	3,149
Positive Total Coliform (Less than 10% positive)	0.50%	0.63%	0.22%	0.83%	0.29%

Note: Yearly average results for the period are provided for free chlorine, trihalomethanes and fluoride.

* Fluoride was added in accordance with the Provincial Fluoridation Program guideline to reach an optimal concentration of 0.85 parts per million (range of 0.80 mg/L to 1.20 mg/L) until March 22, 2011 when the setpoint was changed to 0.70 parts per million (range of 0.50 mg/L to 0.90 mg/L).

The City performs routine testing for certain parameters throughout the water distribution system. Microbiological samples are taken weekly at over 60 locations throughout the system. Because water quality is so important, our level of monitoring and sampling exceeds Provincial regulatory and operating licence requirements. Winnipeg's water is frequently tested for coliform bacteria and less than 1% of the samples are positive, which is well below the regulated requirement of less than 10%. Whenever a positive result is encountered, further investigation is conducted and subsequent testing is performed to ensure the water is safe.

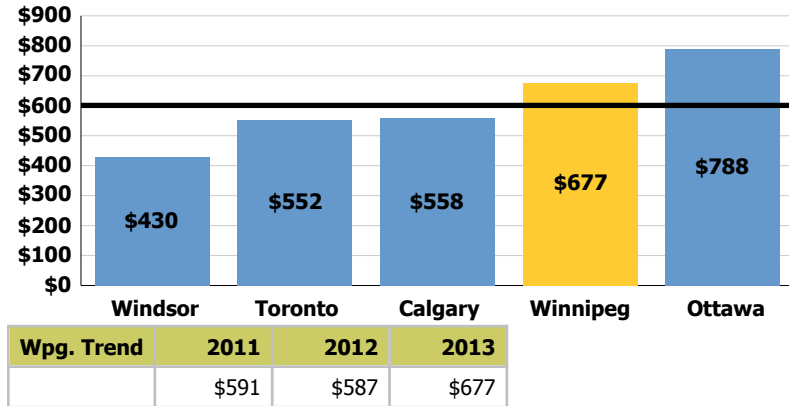

In addition to routine testing, we conduct other testing to measure general water chemistry, heavy metals and microbial parasites. We also respond to customer inquiries and complaints about water quality.

For a more complete list of results, please refer to the City of Winnipeg, Water and Waste Department web page at <http://winnipeg.ca/waterandwaste/water/testResults>

Water

Efficiency Measurements

Total Cost for Supply, Treatment and Distribution of Water per Megalitre of Drinking Water Treated (2013)

Source: OMBI

For Winnipeg, total cost for supply, treatment and distribution of water per megalitre pumped has been increasing over the years.

This is primarily due to increased costs resulting from construction of and operating costs for the water treatment plant which was brought on line in 2010 combined with lower pumpage as a result of conservation efforts and weather fluctuations.

Total Cost for the Distribution / Transmission of Drinking Water per km of Water Distribution Pipe

Source: OMBI

Winnipeg's total cost for the distribution of water per kilometre is among the lowest of the municipalities listed.

Annual Residential Water Bill (2014)

Based on 238 cubic metres per year consumption, Winnipeg's annual water cost is among the lowest of major western Canadian cities.

Wastewater

Includes:

- Wastewater Collection
- Wastewater Treatment

Description

To provide property owners with the collection, transmission, disposal, treatment and monitoring of wastewater in order to ensure the environmentally appropriate handling of high volume sewage discharge.

Key Goals

1. To improve the state of the environment / public health.
2. To exceed our customers' needs and expectations.
3. To increase the efficiency and effectiveness of our services.
4. To successfully develop and implement the Winnipeg Sewage Treatment Program.
5. To operate and upgrade the Sewage Treatment Plants to achieve environmental licence requirements.
6. To strive to better monitor and reduce combined sewer overflows.
7. To implement best practices throughout the Department.
8. To maintain a high quality safe working environment for our staff.
9. To improve information management in the Department.

Service Level Statistics

Description	2012	2013	2014
Number of billed sewer accounts	197,530	199,498	201,439
Number of complaints - raw sewer backup*	748	1,017	1,313
Number of complaints - clean sewer backup*	495	772	1,099
Volume of wastewater processed (ML/D)	248	245	279
Kilometres of collection system pipeline**	2,549	2,579	2,583
Number of pumping stations	74	74	74
Number of diversion chambers	14	14	14
Kilometres of sewer inspected and cleaned	169	104	152
Number of industrial waste tests conducted	26,761	40,938	50,403
Number of treatment plant tests conducted	107,601	110,796	117,540
Number of maintenance holes	45,518	46,266	46,524
Average monthly residential sewer bill	\$31.75	\$36.09	\$38.32

* Reflects total complaints received through the City's 311 system. After investigation, it has been determined that a high percentage of these are problems within the customer's system, not the City system.

** Includes sanitary, combined and interceptor sewers.

Wastewater

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Protection from Sewer Back-up

Citizen satisfaction for protection from sewer backup remains high.

	2011	2012	2013	2014	2015
Total Satisfied	95.1%	77.7%	87.6%	90.1%	86.0%

Source: City of Winnipeg Annual Citizen Survey

Number of Sewer Back-up Complaints per 100 kilometre of Collection System Pipeline

Heavy rainfalls and/or high river levels in areas where there is a combined sewer system contribute to increased incidents of sewer back-ups.

Wastewater

Sewage Treatment Plants

North End Sewage Treatment Plant - Daily limit exceedences[a]

Year	Provincial Limits for TSS (mg/L) > 30	Provincial Limits for BOD5 (mg/L) >30
2010	42	73
2011	30	200
2012	29	184
2013	26	95
2014	93	40

The City regularly monitors plant operations and quality of effluent discharged from the Sewage Treatment Plants to the rivers. The Environment Act licences set terms and conditions that the City is required to meet in operating the sewage treatment plants.

South End Sewage Treatment Plant - Daily limit exceedences [b]

Year	Provincial Limits for TSS (mg/L) > 25*	Provincial Limits for cBOD5 (mg/L) >25*	Provincial Limits for BOD5 (mg/L) >30*
2010	48	n/a	114
2011	56	n/a	64
2012**	11	3	67
2013	22	4	n/a
2014	2	0	n/a

Occasions when the limits do not meet the licence limits are typically caused by high flows and operational or maintenance issues in the plants. Operational measures are being implemented and the plants are being upgraded to consistently meet licence limits.

The licences and monitoring results are published on the department website, <http://winnipeg.ca/waterandwaste/sewage/wpcclicensemonitor.stm>

West End Sewage Treatment Plant - Daily limit exceedences [c]

Year	Provincial Limits for TSS (mg/L) > 30	Provincial Limits for cBOD5 (mg/L) >25
2010	34	0
2011	9	0
2012	19	0
2013	15	2
2014	117	0

[a] NEWPCC Licence 2684 RRR (revised June 19, 2009), previously Licence 2684 RR, reporting in effect since June 1, 2005.

[b] SEWPCC Licence 2716 RR (revised April 18, 2012), previously Licence 2716 R, reporting in effect since March 3, 2006.

* Annual 98% compliance limit for cBOD5 and TSS.

** As of April 18, 2012, the licence limit for TSS changed from 30 to 25 mg/L, cBOD5 limit of 25 mg/L was introduced, and BOD5 was no longer required.

[c] WEWPCC Licence 2669 ERR (revised June 19, 2009), previously Licence 2669 ER, reporting in effect since September 2004.

For 2014, the West End polishing cells (ponds) reported higher than normal TSS values due to increased algae growth, bad weather conditions, and a high amount of geese population in the late summer and fall resulting in higher than normal values.

Wastewater

Efficiency Measurements

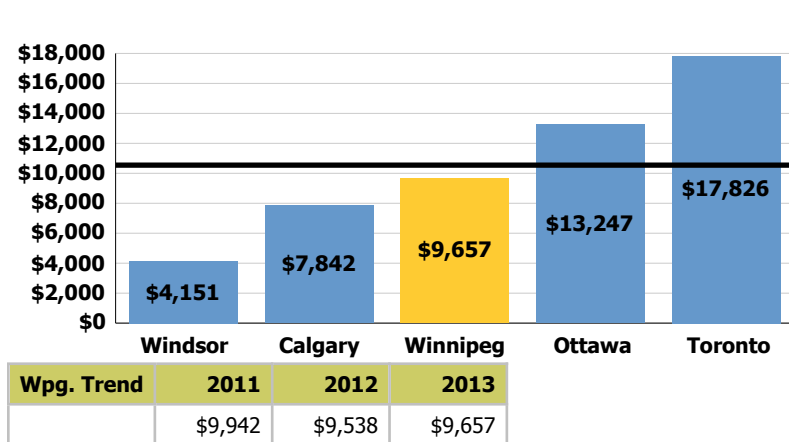

Total Cost for Wastewater Treatment/Disposal per Megalitre Treated (2013)

Winnipeg's cost per megalitre has increased over the years due to significant upgrades to the wastewater treatment plants mandated by Provincial licencing requirements.

Total Cost for Collection of Wastewater per Kilometre of Wastewater Pipe (2013)

Winnipeg's costs for collection of wastewater include operational expenses related to collection and support services. Wastewater pipe kilometers exclude connections.

Source: OMBI

Annual Residential Sewer Bill - City Comparison (2014)

Winnipeg's annual sewer costs are higher compared to other western Canadian cities based on 238 cubic metre consumption per year. When costs related to land drainage and flood control are factored in, Winnipeg ranks fourth among the cities. Rate increases are partially attributed to capital improvements mandated by Provincial licencing requirements.

	\$3.79	\$22.54	\$2.69	\$2.99	\$3.47

The fluctuation of flood protection costs is reflective of the varying river levels.

Solid Waste Collection

Description

2014 was the second year of implementation of the Comprehensive Integrated Waste Management Strategy (CIWMS). The amount of garbage collected and landfilled through the residential collection program in 2014 decreased 19.2% from 2011 tonnage, the last full year for the old services.

The collection services include weekly collection of garbage carts from all single-family homes. Other miscellaneous services include surplus waste collection, large item collection, dead animal collection and collection of appliances.

Key Goals

1. To improve the state of the environment / public health.
2. To exceed our customers' needs and expectations.
3. To increase the efficiency and effectiveness of our services.
4. To implement best practices throughout the Department.
5. To maintain a high quality safe working environment for our staff.

Service Level Statistics

Description	2012	2013	2014
Number of dwelling units served	283,546	286,600	289,137
Number of small commercial clients	563	579	606

Solid Waste Disposal

Description

The Brady Road Resource Management Facility is the only active landfill for the City of Winnipeg and takes all of the City's residential garbage and some of the commercial garbage.

The facility is open every day of the year except for New Year's Day, Remembrance Day, and Christmas Day.

This area also includes the maintenance and environmental monitoring of the 33 closed landfills within the City.

Key Goals

1. To improve the state of the environment / public health.
2. To increase opportunities to reduce the amount of material landfilled.
3. To exceed our customers' needs and expectations.
4. To increase the efficiency and effectiveness of our services.
5. To implement best practices throughout the Department.
6. To maintain a high quality safe working environment for our staff.
7. To initiate landfill gas recovery projects to reduce greenhouse gases.

Service Level Statistics

Description	2012	2013	2014
Number of tonnes disposed	432,653	394,924	392,996
Total number of small load vehicles*	93,585	93,506	91,968
Total number of commercial and residential vehicles	62,537	67,485	65,691
Number of landfill accounts	823	851	906
Number of landfill billings per year	9,876	10,212	10,872

* Small load vehicles statistics represent residents hauling their own residential garbage (old fences, furniture and fixtures etc.) by car or truck to the landfill.

Solid Waste Disposal

Effectiveness Measurements

Residential Tonnes Disposed per Capita

Wpg. Trend	2010	2011	2012	2013	2014
	0.410	0.403	0.392	0.316	0.313

Residential solid waste disposed per capita has been declining since 2009. Tonnage includes residential small loads.

Volume of Leachate Hauled and Treated (Kilolitres)

Wpg. Trend	2010	2011	2012	2013	2014
	56,754	58,785	62,997	54,136	60,812

The volume of leachate hauled and treated over the years fluctuates due to weather conditions. The capture of leachate minimizes the impact on the environment. Leachate is the liquid collected from the breakdown of solid waste.

Efficiency Measurements

Solid Waste Disposal - Operating Cost per Tonne (2013)

This chart shows the total cost per tonne to dispose of all residential, commercial, industrial and other municipality waste.

Recycling and Waste Diversion

Includes:

- *Recycling*
- *Waste Diversion*

Description

2014 was the second year of implementation of the Comprehensive Integrated Waste Management Strategy (CIWMS). Winnipeg's diversion rate in 2014 was 29.7%, surpassing the 2014 targeted diversion rate of 25%.

In 2014 we experienced a 28% increase in yard waste composted and a 1.6% increase in recycling material collected through curbside, depot and public space collection programs.

In its first full year of operation, the new landfill gas system at the Brady Road Resource Management Facility captured and flared 109,740 tonnes of carbon dioxide. This is equivalent to avoiding the carbon dioxide emissions of 23,046 passenger cars.

In 2014, almost 30,000 metric tonnes of yard waste was composted on the new (2013) nine-hectare compost pad. Additionally, construction was completed on a new three-hectare pilot facility at the Brady Road Resource Management Facility that will compost about 20% of the more than 50,000 tonnes of the nutrient-rich end product of sewage treatment (biosolids) produced each year at the City's three sewage treatment plants.

Waste minimization services include waste diversion depots and an educational program that supports backyard composting, grasscycling, giveaway weekends, and other waste diversion initiatives.

The Brady Road Resource Management Facility is the future home to the first 4R Winnipeg Depot, scheduled to open in 2015.

Key Goals

1. To improve the state of the environment / public health.
2. To increase the opportunity to reduce the amount of material being landfilled.
3. To exceed our customers' needs and expectations.
4. To increase the efficiency and effectiveness of our services.
5. To implement best practices throughout the Department.
6. To maintain a high quality safe working environment for our staff.

Service Level Statistics

Description	2012	2013	2014
Number of dwelling units served	283,546	286,600	289,137

Parks and Urban Forestry

Includes:

- Park Grass Maintenance
- Park Amenity Maintenance
- Athletic Field Maintenance
- Park Pathway Maintenance
- Park Planning / Development
- Tree Planting
- Tree Pruning & Removal (non-DED)
- Dutch Elm Disease Control (DED)
- Weed Control
- Natural Areas Management
- Playground Management
- Winter Amenity Maintenance
- Boulevard Maintenance

Description

To enhance the quality of life for citizens and visitors by providing services that focus on maintenance, preservation and stewardship of parks, open spaces, the urban forest and natural areas.

This service includes park, boulevard, and open space maintenance; litter collection; athletic field maintenance; pathway maintenance; park planning and development (shared with Planning, Property and Development); tree planting, pruning, removal; Dutch Elm Disease control (inspection, removal, disposal, public education); weed control (inspection, serving of weed notices); natural areas management (replanting of native species, controlled burns, native and invasive species monitoring, education); playground equipment inspection and repair; and winter amenity maintenance (knock-down hockey rinks, pleasure skating rinks/ponds, toboggan slides/hills, park pathway snow clearing, cross-country ski trails and speed skating oval maintenance).

Key Goals

1. Maintain and improve parks, athletic fields, playgrounds and related amenities to meet community leisure needs and interests.
2. Provide natural environment and conservation education.
3. Preserve and enhance natural areas across the City's park and open space system.
4. Protect and enhance the urban forest through effective tree care practices and replacement planting.
5. Invest strategically in new and existing infrastructure.

City Beautification

Includes:

- Litter Collection
- Public Gardens / Landscaping
- Ornamental Lighting / Flags & Banners / Public Art
- Graffiti Control
- Regional Street Cleaning
- Local Street Cleaning

Description

To provide citizens and visitors with flower gardens, streetscaping, cleanliness, graffiti control and public art in order to promote the aesthetic appeal of the City of Winnipeg.

Key Goals

1. Maintain and continuously improve image route streetscaping to contribute to the beautification of our city.
2. Continue to beautify the city through enhanced floral displays, streetscaping, street cleaning and other clean and green initiatives.
3. Reduce graffiti occurrences through ongoing education and awareness while improving the level of service for graffiti removal through partnerships with volunteer community groups and maintaining a database for tracking graffiti incidents.

Service Level Statistics

Description	2012	2013	2014
Number of litter containers in park sites	2,750*	2,750*	2,750*
Number of street litter containers	1,587	1,566	1,591
Tonnes of boulevard abrasives removed (streets only)	32,070	24,045	22,000
Flower Beds (raised/fixed) (m2)	3,267*	3,267*	3,267*
Flower Beds (in-ground) (m2)	23,391*	23,391*	23,391*
Flower planters (m2)	1,604*	1,604*	1,604*
Hanging baskets (m2)	10*	10*	10*
Number of park lighting units	3,828*	3,828*	3,828*

City Beautification

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with City's Efforts in Keeping the City Clean and Beautiful

Approximately 71% of citizens are either somewhat satisfied or very satisfied with the City's efforts in keeping Winnipeg clean and beautiful.

	2011	2012	2013	2014	2015
Total Satisfied	89.7%	72.3%	87.9%	76.8%	70.5%

Source: City of Winnipeg Annual Citizen Survey

Litter Score Index

Wpg. Trend	2010	2011	2012	2013	2014
	2.2	2.2	2.2	2.1	2.2

The Litter Index is rated 1 to 4, with a score of 1 representing no litter, and a score of 4 representing extremely littered. The index is an average of 12 areas of the city. It is conducted prior to the spring clean-up by Take Pride Winnipeg in March of each year.

Efficiency Measurements

Cost per Hectare for Manual Litter Collection

Wpg. Trend	2010	2011	2012	2013	2014
	\$565	\$478	\$468	\$514	\$560

Hectares include both boulevards on Regional Streets and all other maintained parks areas (excluding natural areas). 2014 hectares decreased as a result of a grey infrastructure (non-turf hectares) adjustment. Manual litter collection costs increased in 2014.

City Beautification

Cost per Graffiti Removal Incident

Wpg. Trend	2010	2011	2012	2013	2014
	\$119	\$146	\$144	\$259	\$137

As the number of graffiti incidents reported to and treated by Graffiti Control increased in 2014, the cost per graffiti removal decreased due to fixed unit costs required to deliver basic services.

Cost per Lane Km of Street Sweeping

Wpg. Trend	2010	2011	2012	2013	2014
	\$737	\$750	\$776	\$717	\$733

The Public Works Department sweeps all paved streets during the spring clean-up and then moves to a Regional Street cleaning program in summer months. The remaining streets are swept on an as required basis. Costs are dependent on the number of street sweeps conducted per year and the amount of ice control materials removed from the streets during the spring clean-up.

Cost per Square Metre for Floral Displays

Wpg. Trend	2010	2011	2012	2013	2014
	\$97	\$104	\$109	\$108	\$102

This is an average of all types of floral displays and includes hanging baskets as well as ground displays. Values do not include costs or square meters associated with shrub beds.

Direct costs have decreased in 2014. Square meters have remained constant. Shrub bed maintenance represents a lower percentage of total Public Gardens and Landscaping service costs than 2013.

Winnipeg Fleet Management Agency (SOA)

Description

Winnipeg Fleet Management Agency provides economical, state-of-the-art, safe and eco-friendly fleet vehicle, equipment and other asset management services to The City of Winnipeg and other public sector organizations, in support of their service delivery. The Agency delivers the following comprehensive fleet management services to City of Winnipeg departments:

1. Specification, inspection and contract administration
2. Insurance, licensing and registration
3. Manufacturing and fabrication
4. Seasonal and short-term rentals
5. Surplus sales and disposal
6. Fleet supply with maintenance lease
7. Fuel
8. Repair and maintenance

Key Goals

1. Provide planned, and unscheduled, fleet vehicles and equipment to City departments, meeting operational performance, environmental, and safety requirements.
2. Maintain Fleet Service Centres to support the City's geographically dispersed and varying fleet, providing superior customer service, reliability and safety.
3. Manage the City's fuel distribution system on a day-to-day and emergency basis, providing a safe, dependable and convenient fuel supply.
4. Encourage fleet greenhouse gas emission awareness through research, education, testing, and offering environmentally friendly vehicles and equipment, recommendations and alternative fuels.

Service Level Statistics

Description	2012	2013	2014
Number of vehicle and equipment units managed*	2,014	2,224	2,317
Number of vehicle and equipment bid opportunities completed	75	55	46
Number of vehicle and equipment units acquired	182	236	175
Number of insurance and license registrations completed	1,768	1,805	1,893
Number of service repairs, by work order lines completed	36,248	29,298	34,687
Number of service labour hours completed	64,685	66,035	57,336
Number of parts transactions	40,846	34,511	39,661
Number of fuel fill-up transactions and odometer readings verified	112,144	116,205	118,899
Litres of unleaded gasoline, clear diesel, and marked diesel provided	8,096,954	8,133,861	8,293,750
Number of vehicle and equipment motor pool rental days provided	74,472	89,703	84,619
Number of vehicle and equipment units disposed	115	26	81

* The increase in fleet units managed reflects expansion of the Winnipeg Police Service fleet, conversion of a portion of external rentals to internal rentals and external long-term rentals to fleet leases, and fleet units awaiting disposal.

Winnipeg Fleet Management Agency (SOA)

Performance Measurements

Effectiveness Measurements

Overall Customer Satisfaction

Winnipeg Fleet Management Agency conducted a customer survey and approximately 73% of the customers were very satisfied or satisfied with Fleet Management services.

Wpg. Trend	2011	2012	2013	2014
	75.0%	85.0%	75.0%	73.0%

Efficiency Measurements

Fuel Efficiency by Category - Light Vehicles in litres per 100 kilometre

Light fleet average fuel efficiency is based on data gathered from January 1, 2011 to December 31, 2014 and is reported for the City excluding Transit.

Winnipeg Fleet Management Agency (SOA)

Fuel Efficiency by Category - Heavy Vehicles and Specialty Equipment in litres per hour

Heavy vehicles and specialty equipment average fuel efficiency is based on data gathered from January 1, 2011 to December 31, 2014, and is reported for the City excluding Transit.

Operating Cost by heavy Vehicles and Specialty Equipment in dollars per kilometre (2013)

Operating costs for the City exclude Transit, Winnipeg Police Service and Winnipeg Fire Paramedic Service, and are presented by municipal equipment category excluding off-road vehicles, as defined by Ontario Municipal Benchmarking Initiative (OMBI) on a per kilometre basis.

Wpg. Trend	2010	2011	2012	2013
	\$1.06	\$1.15	\$1.53	\$1.67

Water & Waste - Wastewater	21.60	23.10	22.80	18.90
Water & Waste - Water Services	21.70	22.30	22.60	19.80

Fuel efficiency is presented for City departments excluding Transit by light vehicles based on litres per 100 kilometres.

Winnipeg Parking Authority (SOA)

Description

The Parking Authority manages fees for on and off-street parking and City owned public parking facilities. It provides leadership to local parking service providers, and encourages the development of all parking services in support of public policy objectives.

Key Goals

1. Manage a dynamic service delivery structure for all on-street and off-street parking.
2. Improve the quality of service offered to customers.
3. Maintain coordination with key stakeholder groups.
4. Provide effective facilities management, optimizing the productive use of physical assets.
5. Optimize use of off-street facilities for longer-term parking, and on-street parking for short-term occupancy.

Service Level Statistics

Description	2012	2013	2014
Number of Pay Stations on Street*	626	637	631
Number of Pay Stations in City Lots	12	10	12
Number of Parking and Non-Moving Violations Issued	164,041	142,697	152,181
Number of High Demand On-Street Spaces	1,271	1,305	1,298
Number of Low Demand On-Street Spaces	2,486	2,507	2,507

* Long term construction projects can impact the number of on-street paystations on a year over year basis.

Winnipeg Parking Authority (SOA)

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with the Management of On-Street Parking

In 2015, when asked their level of satisfaction with "the City's efforts in managing on-street parking (availability, convenience, etc.)", approximately 63% of citizens were satisfied or somewhat satisfied. Citizen satisfaction levels have been shown to dip when changes to on-street paid parking are proposed.

	2011	2012	2013	2014	2015
Total Satisfied	89.2%	50.2%	88.2%	74.6%	63.1%

Meter Rates in Canadian Cities (2014)

Winnipeg has among the lowest overall meter rates compared to 6 other Canadian cities. High rate is limited to high demand zones and hospital areas. Currently 34% of on-street spaces are in high demand and hospital zones.

Wpg. Trend	2010	2011	2012	2013	2014
	\$1.28	\$1.28	\$1.34	\$1.34	\$1.34

Parking Spaces per 100,000 Population (2013)

Please note that the City of Thunder Bay provides the majority of parking in the City due to the lack of any zoning requirements for businesses to provide any parking. Typically cities with in excess of 1,000 spaces per 100,000 manage multiple off-street parking facilities.

Wpg. Trend	2009	2010	2011	2012	2013
	954	805	788	698	703

Source: Ontario Municipal Benchmarking Initiative (OMBI)

Winnipeg Parking Authority (SOA)

Percentage of Tickets Overturned by Court

	2012	2013	2014
Total Tickets Issued	166,356	142,697	152,181
Ticket Action	2012	2013	2014
Total Tickets to Court	3,883	3,127	3,084
Percentage of Issued	2.33	2.19	2.03
Total Fine Imposed	2,225	1,665	1,741
Fine Imposed (% of Total)	1.34	1.16	1.15
Total Reprimand	1,501	1,213	1,047
Reprimand (% of Total)	0.9	0.85	0.69
Total Stayed by Crown Attorney	119	249	275
Stayed by Crown Attorney (% of Total)	0.07	0.17	0.18
Total Acquitted	38	10	21
Acquittee (% of Total)	0.02	0.01	0.01

In 2014, 0.01% of tickets issued were overturned by the courts and 0.69% of tickets issued were converted to a reprimand. Figures include where the court dismissed the charge at trial or where the driver pled guilty and the judicial justice of the peace reduced the fine to a reprimand.

Gross Number of All Parking Tickets Issued per 100,000 Population (2013)

Increased focus on the education of motorists, particularly at community events, combined with a reduction to areas of metered parking due to construction, resulted in fewer offence notices being issued. Extreme cold winter weather for extended periods had a negative impact on equipment and personnel.

Wpg. Trend	2009	2010	2011	2012	2013
	22,297	24,318	24,186	23,798	20,406

Wpg. Trend	2009	2010	2011	2012	2013
	\$449	\$800	\$794	\$853	\$718

Source: OMBI

Paystation technology incorporates wireless reporting functions and issues receipts. While this results in increased operating costs, there is significant benefit as a result of the audit capability provided by the reporting functions and offers greater payment options for the customer.

Calgary, Toronto and Ottawa have contracted out maintenance and collection services for on-street parking. Winnipeg has only contracted maintenance services and continues to use city staff to perform collection services. With over 4,000 paystations, Toronto enjoys significant economies of scale.

Parking Services Operating Cost per Off-Street Surface Paid Parking Space Managed (2013)

Wpg. Trend	2011	2012	2013
	\$320	\$260	\$324

Source: OMBI

The primary variable cost for WPA surface lots is snow clearing which can vary significantly dependent on the amount and type of snowfall in a given year.

Parking Services Operating Cost per Off-Street Structure Paid Parking Space Managed (2013)

Wpg. Trend	2011	2012	2013
	\$2,020	\$3,124	\$5,373

Source: OMBI

Structured parking requires a higher per space operating cost due to additional maintenance and staffing costs along with potential ventilation and heating costs. Mid-life refit of Millennium Library Parkade resulted in all fixed operating costs being shared across a lower number of spaces and increased costs of operation of the facility during the refit in 2013.

City Planning

Includes:

- *Area Development & Renewal Planning*
- *City-wide Long Range Planning*

Description

To manage a wide range of planning initiatives, such as the OurWinnipeg Development Plan and Complete Communities Direction Strategy, which guide growth and change in Winnipeg. The service reviews ongoing development proposals in a fair and objective manner to ensure the creation of sustainable and complete communities that are responsive to community values, while advising Council on planning processes and development applications. The service enables development and growth that follows the City's development plan through local area planning initiatives, policies, regulations, guidelines and tools while working collaboratively with stakeholders.

Key Goals

1. Support the implementation of OurWinnipeg through a range of effective tools and guidelines.
2. Ensure the City has an adequate supply of land to accommodate projected growth in a sustainable manner.
3. Enhance existing infrastructure and assets in ways that make most amenities for daily living universally accessible.
4. Integrate land use and infrastructure planning in support of the creation of complete communities.

Service Level Statistics

Description	2012	2013	2014
No. of Development Servicing Agreements Administered	34	17	53
No. of Urban Design Applications Reviewed	111	82	89
No. of Zoning Agreements Processed	82	46	83
No. of Survey Information Requests (for construction work)	1,974	2,307	2,216
No. of Surveys Performed (Contract / In-house)	38 / 106	45 / 95	32 / 70
No. of Survey Monuments Restored	148	88	32
No. of Street Closings / Openings	16	29	15
Number of new *greenfield dwelling units	2,127	1,900	2,096
Number of new **infill dwelling units	1,056	1,184	2,149
No. of new dwelling units within 400 meters of a regional mixed-use corridor	256	476	872

* Greenfield refers to units built in areas designated as 'Emerging Communities' and 'New Communities'. 'Emerging Communities' are a subset of 'Areas of Stability - Recent Communities' that have been recently planned and are still under development.

** Infill refers to units built in 'Areas of Stability', excluding 'Emerging Communities'.

City Planning

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Community Planning

Citizen satisfaction has decreased to approximately 60%.

Wpg. Trend	2011	2012	2013	2014	2015
	89.1%	49.7%	87.9%	69.9%	58.9%

Source: City of Winnipeg Annual Citizen Satisfaction Survey

Number of Local Area Plans Completed

Wpg. Trend	2010	2011	2012	2013	2014
	6	2	2	7	7

Local Area Plans take the policies laid out in OurWinnipeg and elaborate on them, tailoring them to guide the development or redevelopment of a specific area. Local Area Plans include neighbourhood plans, area master plans, precinct plans and area structure plans. The number of plans adopted or endorsed per year is a function of both developer-initiated and City-initiated plans, which reflects the overall pace of development.

As of the end of 2014, there were 33 plans in effect, with 7 new plans being adopted or endorsed in the calendar year.

Number of Amendments to Local Area Plans

Wpg. Trend	2010	2011	2012	2013	2014
	2	2	0	3	6

Periodically, amendments to existing plans, such as neighbourhood plans, area master plans, precinct plans, and area structure plans, are required.

As of the end of 2014, there were 6 amendments completed to existing plans.

City Planning

Number of Development Applications Received per 100,000 Population

Wpg. Trend	2010	2011	2012	2013	2014
	167	179	165	178	158

This measure allows us to monitor trends in the number of development applications over time. From 2010 - 2014 the volume of development applications has remained robust.

Efficiency Measurements

Planning Operating Costs per Capita (2013)

Winnipeg has been reporting this measure using OMBI methodology since 2012. Total planning costs increased by 2% between 2012 and 2013 but still remained below other benchmark cities.

Wpg. Trend	2010	2011	2012	2013
	n/a	n/a	\$7.01	\$7.15

Note: In 2013, Ottawa did not report this performance measure.

Neighbourhood Revitalization

Includes:

- Community Development

- Housing Initiatives

Description

Provide neighbourhood residents with tools and support to build resilient, healthy communities and to promote and deliver community based projects and programs that support sustainable neighbourhoods and healthy communities. This service is provided jointly by Planning, Property and Development, Community Services, and Corporate Support Services. Service activities include the administration of Council's neighbourhood and housing programs including, but not limited to:

- Aboriginal Relations
- Housing Renewal, Building Communities and Affordable Housing Initiatives
- Residential Infill Tax Credit Program
- Neighbourhood Multi-Family / Mixed-Use Building Grant Program
- Downtown Multi-Family / Mixed-Use Building Grant Program
- LiveSAFE in Winnipeg - Crime Prevention through Social Development
- Delivery of Homelessness Partnering Strategy
- Downtown Residential Development Grant Program

Key Goals

1. Increase community confidence in their neighbourhood and encourage residents to remain and invest in their own communities.
2. Encourage and promote community involvement in defining neighbourhood values and needs and prioritizing neighbourhood infrastructure improvement projects that meet those values and needs.
3. Participate directly in the revitalization of the downtown as a collection of vibrant residential neighbourhoods.
4. Facilitate the development of recreation services that are more responsive to the specific recreational needs of communities with a priority focus on high needs neighbourhoods.
5. Develop, maintain and enhance initiatives and partnerships based on community and corporate priorities to support the engagement and participation of Aboriginal citizens.
6. Work in partnership with community and other levels of government to develop and implement a continuum of crime prevention initiatives.

Service Level Statistics

Description	2012	2013	2014
Targeted Development Grant Programs - # of units created	479	399	200
Housing Reserve - \$ invested in neighbourhood revitalization and aboriginal housing via housing coordination, infill development, fix up grants, etc.	872,699	788,230	1,021,578

Community Building

Initiative Type	2010	2011	2012	2013	2014
Number of crime prevention initiatives implemented (prioritizing for the Major Improvement Areas) per year	28	33	34	51	3
Number of Aboriginal youth initiatives developed within the Public Service and/or in partnership with the Aboriginal community	20	27	24	3	12

This measurement identifies Neighbourhood Revitalization Initiatives supported by the Community Services Department. Support includes staff involvement in the coordination, facilitation, planning and implementation of initiatives to improve a community's capacity to address issues impacting their quality of life. The decreases in the measures for 2014 are a result of a reduction in resources allocated to community development-related supports.

Neighbourhood Revitalization

Change in Average Assessed Value of Residential Property in Winnipeg's Inner City

	2008-2010	2010-2012	2012-2014
Percentage Change	13%	19%	11%

Note: The number of years between assessments has changed from 4 years to 2 years.

The change from April 1, 2012 to April 1, 2014 for the Inner City is 11%.

The Winnipeg residential market has slowed down from its previous pace.

Efficiency Measurements

Administrative Cost for Neighbourhood Housing Revitalization Programs

Program Type	2010	2011	2012	2013	2014
Administrative Cost per \$ of Funding Disbursed for Housing Programs	\$0.05	\$0.05	\$0.04	\$0.03	\$0.04

Administrative cost per dollar of funding disbursed for housing programs has remained relatively stable.

Development Approvals, Building Permits and Inspections

Includes:

- Residential Development Approvals & Inspections
- Commercial Development Approvals & Inspections

Description

Ensure compliance with provincial building codes, by-laws and standards through consultation, education, administration, inspections and the regulatory enforcement of property standards, construction, renovation, and demolition of buildings. This service includes:

- Plan examination
- Inspections for compliance with codes and other by-law standards
- Enforcement action including warnings, penalties, and charges

Key Goals

1. Ensure safe, healthy, accessible buildings through the administration and enforcement of building by-laws and property standards.
2. Continue to streamline the building permit application and approval process for industry professionals and non-professional customers.
3. Enhance our customers' awareness of necessary, safety and non-safety-related building project requirements.
4. Improve our ability to provide timely site inspection services and proactive by-law enforcement.
5. Pursue financial self-sufficiency.
6. Transparency of actual performance to targets.

Service Level Statistics

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction for Zoning Regulations and Building Permits

Service satisfaction dropped to 60% in 2015.

	2011	2012	2013	2014	2015
Total Satisfied	97.3%	56.9%	95.8%	89.7%	60.4%

Source: City of Winnipeg Annual Citizen Survey

Note: Previous reports depicted only results from respondents who also indicated they used the service. In order to maintain an adequate sample size, 2015 displays overall results; 2011 to 2014 has been restated for consistency.

New Dwelling Units Created

New Dwelling Units Created	2012	2013	2014
New - Singles	1,853	1,478	1,454
New - Semis	121	124	136
New - Rows	332	727	443
New - Apartment	1,268	1,401	2,592
TOTAL	3,574	3,730	4,625

In 2014, increases in the numbers of new dwelling units can be attributed mainly to increases in the multi-family category.

Residential Permit Volumes

# of Residential Permits	2012	2013	2014
New - Single	1,933	1,510	1,487
New - Semi	99	105	117
New - Row	545	468	486
New - Apartment	69	68	77
All - Alterations	2,186	1,584	1,551
All - Additions	413	384	379
All - Accessory Structures	1,705	1,605	1,694
Sub-Total Residential	6,950	5,724	5,791

After 2012, the City no longer required building permits for basement development. Residential permit volumes have remained relatively consistent since 2013.

Development Approvals, Building Permits & Inspections

Non-Residential Permit Volumes

# of Non-Residential Permits	2012	2013	2014
New - Commercial	86	63	46
New - Industrial	48	44	57
New - Office	17	9	11
New - Hotel/Motel	11	8	1
New - Public Bldgs/Theatres	16	23	12
New - Institutional	33	23	14
All - Alterations	2,786	2,392	2,530
All - Additions	57	82	68
Sub-Total Non-Residential	3,054	2,644	2,739
# of Other Permits	2012	2013	2014
All - Trades Permits	17,288	17,568	17,498
All - Other Building Permits	0	3	1
Waterways Permit Applications	125	104	99
Total Permits Issued	27,417	26,043	26,128

Permit volumes have remained relatively stable.

Residential Permit Values (in thousands of \$)

	2012	2013	2014
New - Single	\$404,341	\$344,267	\$364,140
New - Semi	\$13,922	\$18,184	\$18,524
New - Row	\$44,440	\$76,944	\$54,475
New - Apartment	\$183,976	\$211,239	\$305,749
All - Alterations	\$64,000	\$60,232	\$66,463
All - Additions	\$20,146	\$27,331	\$13,747
All - Other Residential	\$22,596	\$24,775	\$26,275
Sub-Total Residential Permits	\$753,421	\$762,972	\$849,373

Permit value is the value of the project declared by the applicant at the time of permit application.

Non-Residential Permit Values (in thousands of \$)

	2012	2013	2014
New - Commercial	\$76,082	\$107,493	\$79,419
New - Industrial	\$120,620	\$53,387	\$28,128
New - Office	\$9,830	\$4,300	\$12,840
Hotel/Motel	\$29,415	\$44,686	\$70
Public Bldg/Theatres	\$72,294	\$144,712	\$104,479
New - Institutional	\$56,290	\$143,330	\$51,768

All - Additions	\$87,595	\$170,795	\$112,741
All - Other Non-Residential	\$0	\$1	\$0
Sub-Total Non-Residential Permits	\$777,040	\$1,001,665	\$675,922
Total Permit Value	\$1,530,460	\$1,764,637	\$1,525,295

Permit value is the value of the project declared by the applicant at the time of permit application.

Development Approvals, Building Permits & Inspections

Zoning Variances Processed and Completed

Wpg. Trend	2010	2011	2012	2013	2014
	1,131	983	985	1,032	928

The majority of these are minor residential variances that are approved administratively.

Number of Variances Received per 100,000 Population

Wpg. Trend	2010	2011	2012	2013	2014
	143	142	140	147	131

The number of variances received per 100,000 population has been relatively stable over the past 4 years.

Number of Defects per 10,000 Inspections

Commercial Inspections

Inspection Type	2010	2011	2012	2013	2014
Building	715	797	891	1,167	713
Electrical	990	441	1,388	1,774	2,035
Plumbing/Mechanical	2,567	919	1,027	1,165	885
Total Commercial	1,523	732	1,076	1,356	1,193

Housing Inspections

Wpg. Trend	2010	2011	2012	2013	2014
	2,493	3,576	4,291	4,376	4,581

Volume varies with market demand.

Combined Commercial and Housing Inspections

Wpg. Trend	2010	2011	2012	2013	2014
	2,125	2,378	2,726	3,179	3,223

Volume varies with market demand. The Combined Commercial and Housing Inspections are derived by dividing the total number of defects by the total number of inspections multiplied by 10,000.

Declared Value of Construction per Capita

Wpg. Trend	2012	2013	2014
Declared Value	2,219	2,526	2,151

This measure is the total declared value of all permits divided by the population of the City of Winnipeg.

Development Approvals, Building Permits & Inspections

Declared Value of Construction per Building Permit

Wpg. Trend	2012	2013	2014
Declared Value	55,822	67,759	58,378

This measure is the total declared value of all permits divided by the total number of permits.

% of Commercial Building Permits Reviewed (ICR) Within Industry Accepted Targets

Wpg. Trend	2012	2013	2014
% Within Targets	n/a	37.0%	39.8%

Starting in June 2013, an Initial Complete Review (ICR) was introduced to track the number of working days it takes to perform a full review for Interior Alteration permits for all code disciplines, zoning, and other related by-laws. Also introduced was a shift to a complexity streaming and concurrent review process.

Efficiency Measurements

Commercial Building Permits Issued by Building Plan Examiner per Full-time Equivalent Position

Permit Type	2010	2011	2012	2013	2014
New construction/additions	56	42	45	44	42
Alterations	259	200	188	163	208
Occupy only/change of use	35	30	33	24	27
TOTAL	350	272	266	231	277

Building permits issued will fluctuate annually depending on a number of factors including volume of construction activity and complexity of applications.

Number of Inspections per Full-Time Equivalent Position

Commercial Inspections

Wpg. Trend	2010	2011	2012	2013	2014
Building	2,356	2,419	3,005	2,437	2,740
Electrical	2,219	1,849	2,099	1,613	1,949
Plumbing	1,588	1,505	1,954	1,762	2,304
Total Commercial	2,030	1,902	2,353	1,920	2,201

Total Commercial represents an overall efficiency measure for commercial inspections calculated by taking the total number of plumbing, building, and electrical inspections completed divided by the total number of commercial inspector FTE's.

Housing Inspections

Wpg. Trend	2010	2011	2012	2013	2014
	4,024	4,137	3,720	3,235	3,675

Outputs per FTE vary based on experience level and complexity of inspection requirements.

In 2010, total FTE count changed to reflect only those employees used to generate inspection data.

Combined Commercial and Housing Inspections

Wpg. Trend	2010	2011	2012	2013	2014
	2,802	2,767	2,899	2,541	2,897

Development Approvals, Building Permits & Inspections

Development Planning Applications Operating Costs per Development Application Received

Wpg. Trend	2010	2011	2012	2013	2014
	\$1,535	\$1,681	\$1,172	\$1,548	\$1,734

The goal is to achieve financial self-sufficiency through rate adjustments and efficiency gains over time.

Operating Cost for Building Permits and Inspection Services per \$1,000 of Construction Activity (2013)

Winnipeg began reporting this measure using OMBI methodology in 2013.

Economic Development

Description

To provide information to Council and economic development agencies as well as coordinate resources across City departments in order to respond effectively to high priority projects of strategic and economic importance to the City.

Service activities include:

- Collaborate with the Province of Manitoba, Economic Development Winnipeg, CentreVenture and other stakeholders to deliver Winnipeg's Economic Development Strategy.
- Coordinate interdepartmental technical assistance and due diligence on proposals and initiatives.
- Negotiate incentive strategies through business plan and pro-forma analysis.
- Manage strategic projects.
- Assist in the preparation of communication strategies.
- Support 16 Business Improvement Zones (BIZ), representing more than 4,500 businesses throughout the City.

Key Goals

1. Build a strong economic climate for Winnipeg.
2. Identify priority investments that support economic development activity.
3. Assist in the development of taxation policy that enables economic opportunity.
4. Broaden service access and convenience to customers wanting to do business with the City.
5. Capitalize on opportunities to establish intergovernmental and public private partnerships.

Service Level Statistics

Heritage Conservation

Description

To promote the long-term conservation of heritage assets in the City of Winnipeg.

Key Goals

1. Ensure the long-term conservation of heritage resources in Winnipeg through the implementation of new incentives, integrated planning, district/area designation, regulatory reforms, well established design standards and principled design review.
2. Be a catalyst for greater public awareness, education and participation in heritage conservation.
3. Improve the suitability of Heritage Buildings for occupancy by City Departments and other civic uses.

Service Level Statistics

Description	2012	2013	2014

Number of Heritage Resources De-Listed	1	3	0
Number of Buildings Receiving Heritage Support from City Council **	5	0	25
Number of Heritage Permits Issued	19	20	21

* The Commemorated list came into effect June 1, 2014 with the enactment of the Historical Resources By-law 55/2014.

** These numbers were changed starting in 2014 to reflect the total number of buildings receiving the Heritage Conservation Tax Credit as well as funding support through the Gail Parvin Hammerquist Fund.

Heritage Conservation

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with City's Efforts in Preserving Heritage Buildings

Satisfaction with the City's efforts in preserving heritage buildings remains very high.

	2011	2012	2013	2014	2015
Total Satisfied	96.5%	73.9%	83.5%	84.5%	85.0%

Source: City of Winnipeg Annual Citizen Survey

City Funding for Heritage Programs 1996-2014

Funding Type	City Funded Provided from 1996-2014
Gail Parvin Hammerquist Fund	\$2,264,156
Winnipeg Development Agreement	\$5,800,000
Downtown Heritage Tax Credit	\$2,500,000
CentreVenture Downtown Heritage	\$1,732,000
CentreVenture Heritage Tax Credit	\$3,500,000
Heritage Conservation Tax Credit	\$35,622,484
City-Wide Heritage Grant	\$724,817
Downtown Heritage Grants	\$2,960,000
Total Funding	\$55,103,457

Since 1996, the City of Winnipeg has undertaken a number of incentive programs to promote heritage building preservation.

Heritage Buildings Used for Civic Purposes - Number of Buildings

	2010	2011	2012	2013*	2014
Number of Buildings	10	12	12	25	29
Assessed Value (in Millions)	\$22.8	\$23.0	\$23.0	\$48.3	\$52.2

The public benefits of heritage conservation are that an investment in heritage can provide economic stimulus and support community development. Heritage is good for the City's economic environment and good for business. Investment in heritage conservation pays off in enhanced tax assessments, improved urban environments and opportunities for business.

* Beginning in 2013, the definition of 'Heritage Buildings Used for Civic Purposes' was expanded to include properties such as museums, historic fire halls and other historic houses.

Heritage Conservation

Efficiency Measurement

Average Maintenance/Operating Cost of Heritage Buildings

Building	2010	2011	2012	2013	2014

* Leased

Note: Operating costs per square foot incurred by the City for leased facilities that are paid directly to the landlord are not contained herein. Readers are cautioned that the information may not be appropriate for their purposes.

The City through leadership and partnerships protects and celebrates a broad range of heritage resources through direct use. This makes a valuable contribution towards a complete understanding of Winnipeg's history.

Building maintenance costs vary between buildings depending on the terms and conditions of lease agreements.

Property Asset Management

Includes:

- Land & Property
- Municipal Accommodations
- Pool Facilities
- Arena Facilities
- Recreation Centres
- Community Centre Facilities

Description

The Property Asset Management Service facilitates the acquisition, development, operation, maintenance, security and disposition of City-owned land and buildings. The service is composed of two sub-services:

LAND and PROPERTY: oversees property sales, acquisitions, and appraisals.

MUNICIPAL ACCOMMODATIONS: manages leases, operates, maintains, protects and preserves the City's physical building infrastructure/assets to provide for current and future program accommodation needs and provides design and project management of new and existing civic buildings.

Key Goals

1. Develop and implement a Real Estate Transaction Management Framework (RETMF).
2. Optimize infrastructure condition through a Physical Asset Management Program for City buildings.
3. Provide effective facilities management.
4. Develop and implement environmental stewardship policies and programs to guide the management and maintenance of all new and existing City facilities.

Condition of Recreation Leisure and Library Buildings- Facility Condition Index (FCI)

Facility	FCI 2010**	FCI 2011	FCI 2012	FCI 2013**	FCI 2014	Investment Required Over 10 Years (2014 to 2023)
Field Houses	0.13	0.15	0.15	0.11	0.11	\$4,465,000
Daycares	0.13	0.17	0.17	0.09	0.10	\$5,122,000
Indoor Pools	0.18	0.17	0.17	0.18	0.22	\$117,254,000
Community Centres/Soccer/Arena Complexes	0.16	0.19	0.22	0.13	0.14	\$146,484,000
Libraries	0.17	0.19	0.21	0.14	0.15	\$30,935,000
Recreation Centres/Leisure Centres	0.17	0.20	0.21	0.21	0.23	\$21,695,000
Arenas	0.32	0.33	0.34	0.26	0.28	\$55,181,000
Wading Pools	0.43	0.43	0.43	0.43	0.43	\$4,300,000
Senior Centres	0.23	0.25	0.25	0.17	0.18	\$2,223,000
Outdoor Pools	0.58	0.59	0.48	0.14	0.14	\$5,444,000
TOTAL	n/a	n/a	n/a	n/a	n/a	\$393,103,000

* Facility Condition Index (FCI) is a ratio of the estimate for identified requirements and system renewals for a five year period, divided by the estimated replacement value for the facility. A FCI of 0 equates to "new" condition and as the condition worsens, the FCI increases to 1.0, the point where refurbishment equals cost of replacement. The City has adopted the Recreation and Leisure Facilities Policy (RALFP) which states the city will strive toward a "managed care" level for existing facilities. Managed care is where the FCI is in the range from 0.1 to 0.2.

** The 2010 and 2013 reassessment resulted in increases to replacement values due to more accurate assessment techniques. This could result in decreases to FCI that are not related to condition.

Cost Comparison of City Buildings Owned and Leased

	2010	2011	2012	2013	2014
Total City Leased Space Cost per sq. ft.	\$16.57	\$16.06	\$17.64	\$18.45	\$17.38
Total Owned Space Cost per sq. ft.	\$16.49	\$16.41	\$17.23	\$17.29	\$17.29
\$/sq. ft. difference	\$0.08	\$0.35	\$0.40	\$1.16	\$0.09
Percent Difference	-0.5%	-2.1%	-2.4%	-6.7%	-0.5%

Cost comparisons are based on generally accepted cost allocation methods consistent with industry practice.

Comparison of In-house and Contracted Custodial Costs

Service Provider	2010	2011	2012	2013	2014
In-house Costs per Square Foot*	\$3.17	\$3.39	\$3.41	\$3.40	\$3.47
Contracted Costs per Square Foot**	\$1.27	\$1.33	\$1.29	\$1.35	\$1.51
Total Average Cost per Square Foot	\$1.95	\$2.07	\$2.06	\$2.09	\$2.22

* In-house costs include salaries, benefits, cleaning supplies, uniforms and vehicle costs of the mobile cleaning crew.

** Janitorial costs as reported in the Division's year end financial statements.

Cemeteries

Includes:

- *Brookside Cemetery*
- *St. Vital Cemetery*
- *Transcona Cemetery*

Description

Provides interment services and perpetually maintained cemeteries in order to ensure that all citizens have access to a range of choices in interment services. Service activities include:

- Interments
- Sale of plots/lots, niches and interment vaults
- Collection of fees and charges
- Maintaining and preserving interment records
- Interment searches
- Installation of flat marker memorials
- Tours of Brookside Cemetery Field of Honour
- Facilitation of open air memorial services
- Custodian of historical military monuments
- Design and preparation of future interment sites
- Facilities and physical site improvements
- Perpetual maintenance of cemetery grounds

Key Goals

1. Ensure that the service evolves to reflect the diversity of the community and increase public awareness.
2. Increase revenues to enable self sufficiency while continuing to act as a benchmark for cemetery services within Winnipeg.
3. Continue to develop environmentally sound work processes and practices.
4. Maintain the heritage of cemeteries and continue to promote their significance in the community.

Service Level Statistics

Description	2012	2013	2014
Lineal Feet of New Poured in Place Monument Beam Foundation Installed, in Public Sections	0	880	1,056

Effectiveness Measurement

Comparison of Perpetual Maintenance Reserve Funds of Municipally Owned and Operated Cemeteries (2014)

City	Cremation Lot	Full Size Internment Lot	Niche	Scattering
Brandon	20%	20%	20%	20%
Calgary	40%	40%	40%	0%
Edmonton	15%	15%	15%	0%
Winnipeg	25%	25%	15%	10%

Winnipeg's municipally owned and operated cemeteries' perpetual maintenance reserve funds ensure that general maintenance and improvements will continue in the future after the cemetery is closed and no further property is available for sale.

Note: There is no legislated requirement for a municipality, religious denomination or religious auxiliary owned and operated cemetery to have a perpetual maintenance fund. Each cemetery may create a perpetual maintenance fund by setting aside in a reserve fund a defined percentage of the purchase price of each type of cemetery property or service. Interest earned on investment of the perpetual maintenance fund contributes towards (i) the cost of maintenance and improvement of the cemetery grounds in perpetuity and (ii) reinvestment into the fund to ensure its continued growth. Perpetual care includes general maintenance, improvement and/or embellishment of cemetery properties, grounds, buildings and infrastructure.

Police Response

Includes:

- *Police Response*
- *Contract Policing*
- *Crime Investigation*
- *Police Training*

Description

The Police Response Service provides emergency, urgent, and non-urgent responses to public calls for service. This includes disaster situations, danger to life and property situations, and lower risk to persons and property situations. In addition, the Service undertakes criminal investigations potentially leading to offender identification, arrest or other resolution. The Service is also responsible for training all police and civilian members of the Winnipeg Police Service (WPS). Finally, the Service ensures public order through planned response to large public events such as professional sporting matches and film industry productions. The Service must efficiently marshal its resources to ensure that adequate response is always available to answer to public needs.

Key Goals

1. Reduce crime through evidence-based policing strategies.
2. Improve public service delivery in frontline operations.
3. Focus on downtown safety while balancing the needs of targeted neighbourhoods.
4. Focus on criminal prosecutions through improved quality and timeliness of report and evidence disclosure.

Regina				
Violent Crime	163.10	128.10	116.90	112.30
Non-Violent Crime	130.60	129.90	122.90	115.20
Total Crime Severity Index	140.00	130.00	121.50	114.60

The Crime Severity Index (CSI) is a tool for measuring police-reported crime by taking into account the change in volume of a particular crime, and the relative seriousness of that crime in comparison to other crimes (the seriousness is based on an assigned weight derived from incarceration rates for the offence type and the average prison sentence). CSI is expressed as a standardized measure adjusted to equal 100 in the base year 2006.

CSI will allow more serious crimes to carry a higher weight than less serious crimes. As a result, changes in more serious crimes would have a greater impact on the Index than on the traditional crime rate.

Crime Prevention

Includes:

- *Community Policing*
- *Street Lighting*
- *Park Patrol*
- *Crime Prevention Initiatives*

Description

To provide citizens with crime awareness and education, enhanced relationships with targeted neighbourhoods and schools, as well as provide effective street lighting in order to proactively aid in crime prevention and disorder.

Key Goals

1. Promote positive interaction within neighbourhoods and among cultural groups.
2. Reduce crime victimization.
3. Increase effectiveness and cost efficiencies of street lighting.

Crime Prevention

Efficiency Measurements

Number of Police Initiated Events per FTE

Wpg. Trend	2010	2011	2012	2013	2014
	24.9	27.3	33.7	43.5	55.5

Police initiated events are events viewed by police officers who are proactively patrolling. If an event occurs, the officers advise the communication centre, which generates an event number and assigns the task.

Traffic Safety and Enforcement

Includes:

- Traffic Safety & Enforcement - Automated
- Traffic Safety & Enforcement - Officer
- Traffic Safety & Enforcement - Division

Description

To change driver behaviour through public awareness and enforcement initiatives in order to ensure safer streets and highways for all citizens.

Key Goals

1. Enhance traffic safety through a strategic approach that includes traffic data analysis and targeted enforcement.
2. Enhance traffic safety through increased public awareness and education.
3. Increase effectiveness of the photo enforcement program.

Service Level Statistics

Efficiency Measurements

Number and Cost of Photo Enforcement Tickets

The cost of photo enforcement tickets is impacted by service contract costs, fixed service costs, and the number of tickets issued. Generally when more tickets are issued, the cost per ticket is less.

Photo Enforcement Costs per Capita

Wpg. Trend	2010	2011	2012	2013	2014
	\$7.91	\$7.61	\$7.75	\$5.91	\$6.62

Number of Offence Notices Issued per Officer by Conventional Means

Wpg. Trend	2010	2011	2012	2013	2014
	26.5	27.9	30.2	17.3	18.3

Although these figures relate to the total police complement, most enforcement is conducted by members from uniformed units.

Reduction in conventional speeding offence notices in 2013 is due to discontinuation of voluntary enforcement days.

Fire and Rescue Response

Includes:

- *Fire and Rescue Response*
- *Fire Investigation*

Description

To provide quick, proficient, emergency and non-emergency fire suppression and rescue assistance to victims of fire, accidents, and other disasters or emergencies in order to prevent or minimize loss of life or property. This includes fire suppression, notification and evacuation of citizens, rescue services including motor vehicle extrication, high angle, trench, elevator, water, and ice rescue, investigation and mitigation of carbon monoxide or other gas leaks, and other hazardous materials incidents.

Additional contributions include standby fire and rescue service at public events, support to public education programs, supplement fire inspection and by-law enforcement program, fire investigation services potentially leading to offender identification, arrest and/or counselling in regard to incidents of deliberately set fires and response to medical emergencies.

Key Goals

1. Improve capacity to effectively respond to emergencies and disasters in a manner that is financially sustainable for the citizens of Winnipeg.
2. Invest in technology, equipment, and staff training to maximize safety for all emergency responders as well as the public.
3. Invest in technology, equipment, and staff training to protect the environment.
4. Ensure a respectful work environment and positive public image.

Fire and Rescue Response

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Fire Service Response to Fire Incidents

Citizen satisfaction with fire service response to fire and rescue incidents remains high. Citizen and customer service remains a focus for new employee orientations and continuing education programming for existing employees. New strategies are being employed in fireground operations that enable improved life safety, property conservation, and incident stabilization.

	2011	2012	2013	2014	2015

Fire and Rescue Response

Number of Unique Incidents Responded to by Fire Services per 1,000 Population (2013)

Winnipeg's fire service responds to more incidents than many other fire services due to the integrated service model that dispatches paramedic-staffed fire trucks to moderate the medical incident volume assigned to ambulance units.

Source: OMBI

Efficiency Measurements

Fire Staffing Costs per Capita (2013)

The overall per capita cost for fire protection remains stable due to the population increases being experienced. Additionally, the 2013 cost increase is also reflective of negotiated and arbitrated award settlements.

Source: OMBI

Fire Suppression Staff per 1,000 Population (2013)

In 2013, a noticeable decline in fire/rescue personnel was seen, with Winnipeg having 1.19 sworn fire/rescue personnel per 1,000 citizens. This reflects a less than optimum number of Fire Response Personnel for a system the size of Winnipeg. 2014 saw a budgetary realignment bringing the staffing ratio back to 1.29 per 1,000 population.

Source: OMBI

Fire and Injury Prevention

Includes:

- Fire & Injury Prevention Education
- Fire Inspection

Description

To protect citizens, and minimize loss of life and property due to fire through ensuring adherence to existing building standards for construction, safety, and egress.

To provide citizens with fire and life safety education, advice, and promote safe choices that will reduce the need for emergency fire, rescue and medical services.

Key Goals

1. Ensure safety of housing and other buildings through plan examinations, inspections, and fire code and by-law enforcement.
2. Identify and engage key target audiences to maximize effectiveness of educational opportunities.
3. Decrease the incidence of fire or injury emergencies through expansion of public education programs.
4. Investigate and pursue partnerships to enhance ability to prevent fire and injuries.
5. Save lives through promotion of public access defibrillation, and 'demand reduction' initiatives such as plan examinations and residential sprinklers.

Service Level Statistics

Description	2012	2013	2014

* 2013 Data restated to correct reporting error.

[A] WFPS continues to achieve service efficiencies by focusing fire and injury prevention education lectures on larger groups, and inspections of bigger and 'high risk' occupancies such as hotels and rooming houses which require more resources. Operations crews are increasingly responsible for performing regular inspections.

[B] The Public Education Branch provides fire safety presentations to all public requests (schools, seniors residences, etc.)

[C] Youth Fire Stop Program numbers are dependant on the referral process.

[D] WFPS is embracing social media as a means of distributing information on Fire and Injury Prevention.

[E] 2014 saw a continuing effort among City of Winnipeg departments.

Fire and Injury Prevention

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Fire Service Efforts in Fire and Injury Prevention

Citizens continue to be satisfied with efforts in fire and safety education.

	2011	2012	2013	2014	2015

Medical Response

Includes:

- *Medical Response*
- *Medical Transfers*

Description

To provide quick, proficient primary response to all medical emergency situations, including the provision of pre-hospital patient care, patient transport to hospital, patient transfer services between facilities, and standby at critical police and fire rescue incidents, and special events.

Key Goals

1. Improve capacity to effectively respond to medical emergencies in a manner that is financially sustainable for the citizens of Winnipeg.
2. Improve quality of medical service provided.
3. Expand the quality improvement process to quantify and improve customer satisfaction.
4. Pursue partnerships to enhance delivery of medical service.
5. Ensure a respectful work environment and positive public image.

Service Level Statistics

Description	2012	2013	2014
Emergency Medical Incidents	64,998	63,619	66,161
Medical Incidents with ambulance dispatched (Emergency)	56,078	54,020	55,687
Medical Incidents with only fire dispatched (Emergency)	8,920	9,599	10,474
Scheduled Inter-facility Patient Transfers	8,506	7,531	8,317

* Community Paramedicine Patient Contacts (EPIC) data capture began in early 2013.

Medical Response

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Emergency Response (paramedics or ambulance - respondents who used services)

Clients continue to express much satisfaction with emergency medical response in Winnipeg.

	2011	2012	2013	2014	2015
Total Satisfied	91.5%	91.5%	64.6%	89.0%	86.4%

Source: City of Winnipeg Annual Citizen Survey

90th Percentile Response Time

Wpg. Trend	2011	2012	2013	2014
	7.97	7.90	7.80	7.90

In 2014, from the time of unit notification of an emergency call, a paramedic-staffed unit arrives at the scene in 7:54 or less (or 7.90 minutes), 90% of the time.

Winnipeg's integrated service delivery model that dispatches paramedic-staffed fire trucks and/or ambulances to medical incidents provides fast response times.

Total EMS Responses per 1,000 Population (2013)

In 2013, the Winnipeg Fire Paramedic Service responded to 125.38 medical incidents for every 1,000 citizens. The long-term trend is increasing due in part to an aging population combined with shorter hospital stays and increasing numbers of palliative care patients staying in the community. This is a trend seen in other municipalities. Despite increasing demand, Winnipeg's integrated model has maintained quick response times.

Wpg. Trend	2011*	2012*	2013
	102	113	125

Source: Ontario Municipal Benchmarking Initiative (OMBI)

* Restated to reflect population restatement by Statistics Canada.

Medical Response

Percent of Ambulance Time in Excess of Standard 30 Minutes Lost to Hospital Turnaround (2013)

Source: OMBI

For each emergency patient transport to hospital, 59.4% of the time the unit is out of service at hospital on that call for more than 30 minutes after arrival at hospital. This is due to the hospitals' capacity to accept patients in a timely manner. Winnipeg Fire Paramedic Service and the Winnipeg Regional Health Authority continue to work on strategies to address these issues. Many other municipalities experience significant delays at hospital in transferring care of patients and returning to service.

Efficiency Measurements

Emergency Medical Service Actual Operating Cost per 1,000 Population (2013)

Source: OMBI

The cost per capita for Emergency Medical Services saw an increase in 2013 to \$75.44, which was primarily driven by negotiated and/or arbitrated salary, benefit, and retroactive settlements. While only a small portion of this is funded through City's tax-supported budget, the Winnipeg Fire Paramedic Service continues to negotiate a new funding formula with the Winnipeg Regional Health Authority for implementation in the next agreement.

Winnipeg's cost per capita for provision of Emergency Medical Services remains competitive despite the settlement awards and the fact that costs for equipping and staffing fire apparatus are also included. Winnipeg's 2013 cost would have been \$68.33, an increase of 3.5%, had it not been faced with the additional costs associated with salary, benefit and retroactive settlements.

Medical Response

Emergency Medical Service Actual Total Cost per Patient Transported (2013)

Wpg. Trend	2011	2012	2013
	\$778	\$788	\$989

Source: OMBI

The actual service cost per patient transport in 2013 was \$989.29. These 2013 cost increases were driven by negotiated and/or arbitrated salary, benefit, and retroactive settlements, an increase in the number of Advanced Care Paramedics, as well as a reduction in revenue generation related to the implementation of Community Paramedics, which has resulted in a decrease in the number of transports overall. Continued negotiations with the Winnipeg Regional Health Authority will need to establish a new funding formula which takes into account the reduction in revenue associated with the Emergency Paramedic in the Community (EPIC) program.

Despite the above, Winnipeg's cost per patient transported remains competitive with other municipalities. Without the salary, benefit and retroactive settlements imposed for 2013, Winnipeg's cost per patient transport would have been \$869.56.

Disaster Preparedness and Response

Description

To provide a prompt and coordinated response by the City of Winnipeg to major peacetime disasters by:

- Minimizing the impact of an emergency or disaster on the City of Winnipeg.
- Protecting and preserving the health and property of the citizens of Winnipeg.
- Maintaining and restoring essential services during an emergency or disaster.
- Acting as a host community for evacuees from outside the city upon request from the proper authority.

Key Goals

1. Prepare and test plans and strategies for new and emerging health risks and hazards.
2. Develop new and/or enhance current partnerships with other levels of government, authorities and community agencies.
3. Enhance the City's emergency plan to be more responsive to the needs of at risk populations (e.g. disabled, seniors, and children) and geographic communities and stakeholders within Winnipeg.
4. Provide emergency preparedness education and training to staff, partnering agencies and the general community.

Service Level Statistics

Description	2012	2013	2014

Percentage of City Staff Trained in Emergency Management

Wpg. Trend	2010	2011	2012	2013	2014
	13.0%	12.0%	12.0%	12.0%	11.5%

In 2014, 11.5% of all City staff were trained in Emergency Management. Training level is on pace with the rate of personnel leaving due to retirements; a trend seen in other cities.

Training increases the level of awareness and planning for disasters and major emergencies within the city workforce and major partners.

Number of Mock or Real Emergency Responses Handled Well

Event	2010	2011	2012	2013	2014
Emergency Exercises	2	3	4	7	2
EOC Activation	3	3	2	2	32

The City continues to stage several mock disasters/exercises each year including partner agencies to ensure inter-agency awareness and effective working relationships are in place.

Real emergencies provide a practical application of the working knowledge and relationships developed during these exercises. In 2014, the EOC was open for 30 days due to frozen pipe events and 2 days for summer heat alerts.

Disaster Preparedness and Response

Efficiency Measurements

Emergency Operations Centre (EOC) Operating Cost per Capita

The per capita cost of dedicated emergency preparedness staff remains quite low. This is due to the distribution of emergency preparedness responsibilities throughout the City, instead of concentration in a centralized Office of Emergency Management.

Wpg. Trend	2010	2011	2012	2013	2014
	\$0.42	\$0.45	\$0.47	\$0.45	\$0.46

Recreation

Includes:

- Aquatics Programs
- Arenas
- Casual Facility Use
- Community Centres
- Ice Skating
- Recreation Programs

Description

Provide high quality aquatics, recreation and leisure opportunities/programs in order to enhance life skills, community leadership development and overall quality of life for citizens in our neighbourhoods.

Key Goals

1. Continuously improve services to be more responsive to the recreational, cultural and leisure needs of Winnipeggers.
2. Provide leadership and support the work of other service providers to build the foundation for quality of life and to promote a safe and healthy community.
3. Provide recreation services by collaborating and leveraging resources through partnerships.
4. Provide equitable opportunities to participate in recreation programs and services.
5. Provide meaningful and relevant recreational opportunities to increase the participation of Aboriginal youth in City of Winnipeg services.
6. Provide community development and recreation opportunities for vulnerable youth as an integral component of crime prevention efforts.
7. Provide safe and healthy environments in the delivery of programs conducive to an enjoyable experience and personal well-being.

Service Level Statistics

Description	2012	2013	2014
% of Prime Time Ice Sold in the Regular Season [A]	92%	91%	87% [B]
Number of Recreation and Leisure Programs	3,435	3,158	3,212
Number of Aquatic Classes Annually	7,660	8,125	7,677 [C]
Number of Hours of Wading Pool Free Programming	26,698	26,739	26,174
Number of Hours of Spray Pad Free Programming [D]	7,912	9,968	13,893
Total Value of Registered Programming/Facility Access Pass Fee Waivers	\$210,326	\$188,291	\$185,304
Total Value of Admissions to Free Swims	\$378,640	\$498,242	\$617,643 [E]
Number of Public Swim Visits to Outdoor Pools	106,426	96,971	99,100

[A] For each calendar year, the regular season consists of January 1 - February 28 and October 1 - December 31.

[B] The % of prime time ice sold in the regular season decreased due to the revision of cancellation/return policies in fall 2014.

[C] The number of aquatic classes offered decreased due to the closure of Elmwood Kildonans Pool (May 8 - December 31, 2104).

[D] In 2014, 12 unsupervised spray pads operated from June 2 - Sept 14. All spray pads operated under extended hours from June 2 - Sept 1, and the season for all spray pads was extended until Sept 14 with extended hours. This resulted in an increase in the hours of spray pad programming in 2014. The 2013 result has been restated to include the St. James Assiniboia Pool Spray Pad, which opened at the beginning of the 2013 season.

[E] As part of a 2-year pilot project, admission to all five non-heated outdoor pools was free in the summer of 2014, which led to an increase in the total value of admissions to free swims. 2014 was the first year of the pilot project.

Recreation

Aquatics	47.71	47.07	49.32	50.49	44.77
Recreation and Leisure	47.16	43.41	35.80	32.31	30.37

* The number of registrants for Aquatics programming decreased in 2014 due to the closure of Elmwood Kildonans Pool (May 8 - December 31, 2014).

This measurement represents the number of registrants for paid programming only and does not include free programming participants. Recreation and Leisure excludes Aquatics and Learn to Skate.

This performance measurement is indicative of efficiencies in the quantity of programs conducted, particularly with respect to Recreation and Leisure programming.

Recreation

Efficiency Measurements

Cost per Aquatic Attendee - Indoor Pools

Attendance includes public swim visits, drop-in visits, rentals/permitted visits and registered aquatic program visits.

The number of indoor pool attendees decreased in 2014 due to the closure of Elmwood Kildonans Pool (May 8 - December 31, 2014). This resulted in an increase in the total cost per attendee.

Costs include programming, facility maintenance and allocations from Community Services Department's internal support divisions (Finance and Administration, Human Resources, and Strategic Management and Business Support Services).

Cost per Learn to Skate Attendee

An individual is counted as an attendee every time they attend an arena for Department operated skating lessons.

The increased cost per attendee in 2014 relates to an organizational restructuring and a refinement of internal services allocations to the Learn to Skate program.

Costs include programming, facility maintenance and allocations from Community Services Department's internal support divisions (Finance and Administration, Human Resources, and Strategic Management and Business Support Services).

Operating Cost of Recreation Programs per Person (2013)

Recreation programs include both registered programs and unregistered drop-in programs or clubs.

Operating costs exclude interest on long-term debt and amortization.

The average of the comparable cities reported is \$61.07.

Wpg. Trend	2011	2012	2013
	\$32.83	\$32.20	\$33.33

Source: Ontario Municipal Benchmarking Initiative (OMBI)

Recreation

Sports and Recreation User Fees as a Percentage of Operating Cost (2013)

Operating costs include both programming and facility based elements and exclude interest on long-term debt and amortization.

The average of the comparable cities reported is 27.7%.

Golf Services (SOA)

Description

The City of Winnipeg has operated municipal golf courses since 1921. Winnipeg Golf Services was established in 2002 to administer the City's 12 golf course assets. The Agency is responsible for operating and maintaining golf courses, managing contracts and leases for City lands used by privately operated golf courses, managing a contracted cross country ski operation and other services compatible with a golf operation.

Key Goals

1. Improve golf course playability.
2. Provide high quality customer service.
3. Ensure financial and environmental sustainability.
4. Improve the image of municipal courses.
5. Increase revenues from associated services.

Service Level Statistics

Description	2012	2013	2014
Kildonan (39.49 hectares)			
Days Open	202	169	175
Total Rounds	29,481	28,753	27,631
Windsor (46.13 hectares)			
Days Open	192	153	161
Total Rounds	25,212	22,500	20,058
Crescent Drive (15.39 hectares)			
Days Open	161	156	148
Total Rounds	16,006	13,936	13,562
Harbour View (12.8 hectares)			
Days Open	201	164	180
Total Rounds	15,010	13,298	10,083

There are four different types of arrangements under which the golf courses are managed.

City Operated and Maintained: Kildonan Park, Windsor Park, Crescent Drive

Leased Properties: Rossmere, St. Boniface, Transcona, Wildwood Club, Assiniboine, Canoe Club, Tuxedo

Managed Contract: John Blumberg

City Maintained/Contractor Operated: Harbour View Golf Course and Recreation Complex

Community Liveability

Includes:

- *Community By-law Enforcement*
- *Bicycle Recovery*
- *Citizen Crisis Response*
- *Social Grants*

Description

Through outreach, promotion, prevention, protection and regulatory services, support the development of a healthy community including:

- Community By-law Enforcement Services (CBES) with a focus on neighbourhood liveability including housing and property standards.
- Business Licensing (Doing Business in Winnipeg By-law) and Taxicabs.
- Crisis response coordination - connecting citizens to available services as required in relation to mandated city services.
- Emergency health and social services response to citizens during local emergencies and disasters.
- Administration of social grants to community organizations to provide a service that the City of Winnipeg would otherwise need to provide in support of safe and healthy neighbourhoods.
- Administration of a bicycle recovery program.

Key Goals

1. To continue to build and enhance performance measurement/accountability systems in order to improve service quality, operational due diligence, and customer service.
2. To continue to build on the success of our community-based civic engagement model to strengthen partnerships and increase community capacity.
3. To continue to deliver an efficient and comprehensive Vacant Building Program designed to accelerate property restoration and re-occupancy.

Service Level Statistics

Description	2012	2013	2014
No. of Service Requests	15,287	16,460	14,717
No. of Service Requests per By-Law Officer	659	712	654
No. of Property Standards Inspections/Officer & By-Law Support Worker Visits*	21,311	24,128	30,060
No. of Vacant Buildings as at January 1**	431	397	390

	\$330,786	\$341,402	\$331,244	\$341,502	\$356,509

Cost has increased due to an increase in temporary staff resources in 2014.

Cost includes allocations from Community Services Department's internal support divisions (Finance and Administration, Human Resources, and Strategic Management and Business Support Services).

Libraries

Includes:

- *Library Circulation*
- *Library Information*
- *Children's Library*

Description

To enrich the lives of all Winnipeg citizens and their communities by providing high quality, responsive and innovative library services.

Key Goals

1. Provide excellent customer service as public needs evolve.
2. Enhance strategic partnerships with organizations to better meet the unique needs of the community.
3. Invest in more programs and services that advance digital literacy.
4. Support the development of early literacy skills in young children through increased investment in materials, services and programs for families, childcare providers and educators.
5. Ensure all library branches are welcoming and accessible destinations.
6. Adjust open hours of library branches to encourage new library users to visit and to be more convenient.
7. Select material that reflects the diverse needs of the community so that relevant print, digital and special collections are freely available.
8. Increase awareness of the library and its benefits through expanded promotion of programs/services.
9. Develop stronger relationships with newcomers and Indigenous peoples by providing responsive programs and services.
10. Provide opportunities for older adults to meet, learn and contribute so that we build strong connections within the community.
11. Expand the impact of the library beyond branches through community outreach and digital services.

Service Level Statistics

Description	2012*	2013*	2014*
Number of Items Circulated	5,599,002	5,330,496	5,211,846

Number of Annual In-person Visits	2,692,447	2,736,059	2,861,674

* In 2012, 2 libraries were closed for renovations for a total of 8 weeks of closures; In 2013, 1 library was closed for renovations for a total of 34 weeks of closures; In 2014, 4 libraries were closed for repair/renovations for a total of 20 weeks of closures.

** New tracking software was used in 2014. Results reflect true information questions.

*** Ongoing removal of outdated/worn material and replacement, where possible, with electronic resources. Ebook collection is no longer combined with the Provincial collection therefore reflects only Winnipeg's collection.

**** 2012 and 2013 data restated to better reflect OMBI reporting. Data for all years now includes social media activity. Starting in 2013 online catalogue sessions are also included.

Libraries

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Libraries (respondents who used libraries)

Citizen satisfaction remains very high for library services. Satisfaction was 97% in 2015.

	2011	2012	2013	2014	2015
Total Satisfied	96.6%	87.6%	83.7%	91.5%	97.1%

Source: City of Winnipeg Annual Citizen Survey

Material Expenditures per Capita (2013)

The .01% decrease in 2013 reflects lower revenue in trust and book sale accounts.

The average of the comparable cities reported is \$4.70.

Wpg. Trend	2009	2010	2011	2012	2013
	\$4.39	\$4.09	\$4.53	\$4.20	\$4.16

Source: Ontario Municipal Benchmarking Initiative (OMBI)

Annual Non-Electronic Circulation per Capita (2013)

The downward trend in non-electronic circulation per capita is due to the growing popularity of e-formats and the fact that the increase in materials budget has not kept pace with the increase in population.

The average of the comparable cities reported is 8.39.

Wpg. Trend	2009	2010	2011	2012	2013
	8.45	7.89	7.76	7.63	7.19

Source: OMBI

Libraries

Electronic Library Uses per Capita (2013)

The increase in the 2013 result reflects increased electronic circulation of Ebooks and Emagazines, wireless sessions and catalogue search sessions. 2013 is the first year that Winnipeg included catalogue search session data to reflect what other OMBI libraries are recording.

The average of the comparable cities reported is 11.28.

Wpg. Trend	2009	2010	2011	2012	2013
	4.1	4.1	4.3	5.3	15.2

Source: OMBI

Annual Program Attendance per Capita (2013)

Total library program attendance increased 8% in 2013 from 74,127 to 80,382 due in part to an increase in the number of programs offered.

The average of the comparable cities reported is 0.24.

Wpg. Trend	2009	2010	2011	2012	2013
	0.11	0.09	0.11	0.11	0.11

Libraries

Annual Library Uses per Capita (2013)

Wpg. Trend	2009	2010	2011	2012	2013
	17.3	17.8	18.1	18.9	28.4

Source: OMBI

One of the primary goals of the library is to maximize the use of library resources and services. Library use includes total use from circulation, program attendance, in library use, workstation use, wireless connections, electronic database use, reference transactions, electronic reference transactions, library visits, and electronic visits (website and estimated catalogue visits). 2013 is the first year that Winnipeg included catalogue search session data to reflect what other OMBI libraries are recording.

The average of the comparable cities reported is 26.38.

Arts, Entertainment and Culture

Includes:

- Arts, Entertainment and Culture Grants
- Arts, Entertainment and Culture Events
- Museums
- Assiniboine Park Conservancy

Description

To provide citizens and visitors with attractions, entertainment, arts and cultural events that contribute to a dynamic urban image, economic development and a vibrant city lifestyle through:

- Operating and capital grant support to the Assiniboine Park Conservancy Inc., a not-for-profit corporation established to manage, fundraise and redevelop Assiniboine Park and its attractions. Assiniboine Park is a 400 acre manicured English landscape style park featuring a zoo with one of Canada's largest animal collections, a conservatory with ever-changing botanic displays, outdoor gardens, theatre, performance and art displays, annual community events, trails, meadows and athletic fields for year-round leisure activities;
- Grant support to museums, arts, entertainment and cultural communities to provide a wide range of events, shows and displays for Winnipeg residents and visitors to the City; and
- Attracting and assisting film-makers and event organizers by providing logistical support, facilitated contact and liaison with civic departments, private sector business and organizations in support of a welcoming community for film activities and a strong and vibrant calendar of cultural and special events.

Key Goals

1. Work with Assiniboine Park Conservancy to support capital development and improvement to the Park.
2. Support film, culture and special events by working cooperatively with civic departments and other organizations to provide logistical support to the film industry, event organizers, and arts organizations.

Insect Control

Description

Provide insect abatement in order to protect persons and properties against the negative effects of insects while minimizing impact on the environment.

Key Goals

1. Effective and coordinated nuisance mosquito control and West Nile Virus response.
2. As part of the Insect Control Strategy, larviciding is completely biological in 2015.
3. Protect the urban forest by reducing the damage caused by defoliating insects such as cankerworms and gypsy moths, and controlling Elm Bark beetles, the carrier for Dutch Elm disease.
4. Enhance insect abatement initiatives while minimizing the impact on the environment.
5. Enhance public education and communication systems related to Insect Control.

Service Level Statistics

Description	2012	2013	2014
No. of hectares larvicided with biorational insecticides	10,966*	15,114*	18,344*
No. of hectares larvicided with chemical insecticides	1,671	3,864	4,714
No. of hectares larvicided by aircraft	6,174	10,209	15,350
No. of hectares larvicided by ground-based operations	6,463	8,769	7,728
No. of hours committed to larval mosquito surveillance	31,975	28,544	24,941
No. of hectares fogged for adult nuisance mosquito control	0	24,913	90,475
No. of trap nights for adult mosquito surveillance	5,082	4,917	5,016
No. of boulevard and parkland trees treated for defoliator insects	28,553	15,966	1,270
No. of parkland trees treated for the control of Elm Bark beetle	27,756	74,406	86,134
No. of stumps treated for the control of Elm Bark beetle	2,632	3,047	4,326

No. of website visits	122,483	249,562	351,998

* In addition to Winnipeg, portions or all of the following municipalities are larvicided: East St. Paul, Headingley, Ritchot, Rosser, Springfield, St. Clements, Tache, West St. Paul, MacDonald, St. Andrews.

Insect Control

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Insect Control

77% of citizens are either somewhat satisfied or very satisfied with Insect Control services in 2015, a drop of 10% from 2014. The late wet spring of 2014 caused increased numbers of mosquitos that required nuisance fogging.

	2011	2012	2013	2014	2015
Total Satisfied	91.4%	88.2%	83.7%	87.0%	77.6%

Source: City of Winnipeg Annual Citizen Survey

*Restated to correct reporting error.

Percentage of Hectares Treated with Biorational Insecticides

Wpg. Trend	2010	2011	2012	2013	2014
	58.4%	72.4%	86.8%	79.6%	79.6%

The City of Winnipeg was the first municipality to use biorational insecticides (environmentally friendly) for mosquito control. These programs began in 1984. The percentage of hectares treated in 2014 was 79.6%. This is a combination of treated areas both within the City of Winnipeg and the Capital Region.

Number of Days Nuisance Mosquito Fogging Required

Wpg. Trend	2010	2011	2012	2013	2014
	21	0	0	3	17

Fogging instances vary significantly depending on the weather. In 2010, a very wet spring was followed by a wetter than normal summer. In 2011 and 2012, a normal spring was followed by an extremely hot and dry summer. In 2013, a late spring was followed by a cooler, dry summer. 2014 was a very late wet spring followed by an average summer.

Insect Control

Efficiency Measurements

Cost per Hectare for Aerial Application of Biorational Larvicides

Wpg. Trend	2010	2011	2012	2013	2014
	\$166	\$170	\$154	\$159	\$169

Since 2010, the cost for Aerial Application of Biorational Larvicides has varied due to two factors: the number of hectares which are treated each year and the product type and quantity which is used each year. In years when more hectares are treated, the cost per hectare will be lower. There is also significant cost differences between the different biorational larvicides.

Cost per Hectare for Ground Application of Biorational Insecticides

Wpg. Trend	2010	2011	2012	2013	2014
	\$407	\$1,315	\$539	\$437	\$533

The cost per hectare is directly related to weather conditions and includes fixed and variable costs. The increase in cost per hectare in 2014 was attributable to a decrease in hectares treated and an increase in fixed and variable costs compared to 2013. The cost increases included: increase in helicopter costs, increase in overtime costs due to significant rainfall events which had to be treated in a short period of time, and using longer lasting biorational larvicides which are more expensive.

Cost per Hectare for Residential Nuisance Fogging

Wpg. Trend	2010	2011	2012	2013*	2014
	\$1.51	\$0.00	\$0.00	\$3.44	\$6.36

* Restated to correct reporting error.

The cost per hectare is directly related to weather conditions and includes fixed and variable costs. In 2011 and 2012, an effective spring and summer larviciding program coupled with drier than normal summer conditions removed any requirements for an adult nuisance mosquito residential fogging program. In 2013, a small program was required which resulted in an increased cost per hectare due to fixed costs. In 2014, a very late wet spring resulted in increased residential nuisance fogging.

Animal Services (SOA)

Description

To provide animal control measures under the City of Winnipeg Act and related by-laws. The Agency's service consists of four sub-service areas:

- Licensing: Animal licensing and registration, animal permits.
- Kenneling: Kenneling and care for stray animals and dogs running at large picked up by the Agency, quarantine kennelling for biting dogs.
- Adoption/Community Education: Provides adoption opportunities for unclaimed dogs reducing euthanasia. Provides outreach pet ownership and animal safety education to school groups and various service organizations.
- By-Law Enforcement: Enforcement of all animal related by-laws, neighbourhood dispute resolution, investigation and response, picking up injured animals, after hours emergency response, police and fire assists, investigation of illegal animal complaints.

The Agency also provides funding to the Winnipeg Humane Society for the intake/sheltering of stray cats, care of injured animals and a subsidized cat spray/neutering program.

Key Goals

1. Reduce reliance on the Agency's mill-rate support.
2. Increase customer service and satisfaction.
3. Improve health and safety of neighbourhoods.
4. Improve the Agency's public image.

Service Level Statistics

Description	2012	2013	2014
Number of requests for service	13,396	12,162	10,233
Number of dogs impounded	1,601	1,317	1,108
Number of dogs adopted	497	363	371
Number of dogs returned to owners by the Animal Services Agency	819	692	671
Number of dogs reunited with their owner by 311*	927	856	646
Number of dogs sent to rescues	130	152	61
Number of dogs euthanized	91	70	52
Number of biting dog complaints**	423	402	269
Number of biting dogs quarantined	126	100	71
Number of dogs running at large complaints	2,897	2,755	2,505
Number of cats running at large complaints	544	487	374
Number of active dog licenses	63,689	64,538	60,453
Number of by-law charges laid	1,522	1,283	795

* 311 reunites dogs wearing licenses with their owners 24/7. These dogs were returned to their owners without having to set foot in the Animal Services facility.

** Starting in 2014, biting dog complaints only include cases with human involvement.

Animal Services (SOA)

Performance Measurements

Effectiveness Measurements

Citizen Satisfaction with Animal Services

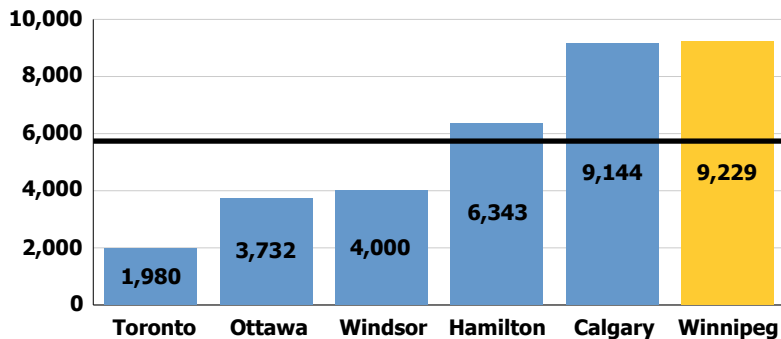

In 2015, 89% of respondents indicated they were satisfied with the provision of animal services.

	2011	2012	2013	2014	2015
Total Satisfied	92.2%	78.3%	83.8%	90.9%	88.6%

Source: City of Winnipeg Annual Citizen Survey

Number of Dog Licenses Issued per 100,000 Population (2013)

As the City of Winnipeg issues some 2-year licenses, the data reflects the number of active licenses each year, while comparable cities report the number of licenses issued. The slight increase in the number of active licenses is attributed to continuing efforts related to the zero tolerance policy introduced in 2011.

The average of the comparable cities reported is 5,738.

Wpg. Trend	2009	2010	2011	2012	2013
	5,188	6,080	8,841	9,036	9,229

Source: Ontario Municipal Benchmarking Initiative (OMBI)

Percentage of Dogs Returned to Owner

Wpg. Trend	2010	2011	2012	2013	2014
	52.6%	53.7%	51.2%	52.5%	60.6%

This measure reflects the number of dogs returned to owners as compared to the number of dogs impounded.

Both the number of dogs impounded and the number of dogs returned to their owner decreased from 2013 to 2014. Many of the dogs that enter the Animal Services facility are not licensed, which makes it difficult to return them to their owner. Licensed dogs are often reunited with their owner by 311 without ever setting foot in the Animal Services facility (they reunited 646 dogs with their owner in 2014).

Animal Services (SOA)

Efficiency Measurements

Percentage Recovery of Animal Control Costs (2013)

There has been a significant increase in percentage recovery due to the amnesty campaign in summer 2011 and introduction of zero tolerance effective September 1, 2011. 2012 was the first full year of zero tolerance.

Excludes mill rate support.

The average of the comparable cities reported is 44.14%.

Wpg. Trend	2011	2012	2013
	55.5%	69.9%	68.9%

Source: OMBI

Animal Services Operating Cost per 100,000 Population (2013)

The average of the comparable cities reported is \$531,784.

Wpg. Trend	2011	2012	2013
	\$409,340	\$419,808	\$426,198

Source: OMBI

Cost of Sheltered Animal

Wpg. Trend	2010	2011	2012	2013	2014
	\$242	\$247	\$227	\$244	\$242

Reflects the cost per dog impounded at the Animal Services facility.

Animal Services (SOA)

Cost per Dog Adopted

Wpg. Trend	2010	2011	2012	2013	2014
	\$278	\$303	\$341	\$409	\$424

Adoption dogs are advertised on Winnipeg.ca and www.petfinder.com, and through dog sales, media coverage and the use of social media. The total number of dogs adopted in 2014 was 371.

Organizational Support Services

Includes:

- Chief Administrative Offices
- Communications
- Financial Management
- Human Resource Management
- Information Technology Management
- Legal Services
- Production Services

Description

Organizational Support Services provides leadership and professional services to support the delivery of public services to the citizens of Winnipeg. By providing financial, human resource, and other specialized services, Organizational Support Services ensures that the civic organization has the capability and technical expertise to support the delivery of public services.

Key Goals

1. To provide organizational leadership in implementing Council's policies and priorities through proactive organizational planning, effective issues management, strategic communications, the provision of professional advice and follow-up through report management.
2. To provide sound financial stewardship towards responsible City government by strengthening financial performance, improving information for decision-making and managing risks and exposures.
3. To provide the organization with efficient and effective human resource management support in order to sustain a diverse, respectful, safe, healthy and productive workforce.
4. To provide strategic direction and leadership in the planning and governance of City-wide Information Technology, and provide innovative and cost effective IT shared services to departments.
5. To provide a full range of legal services to Council and its committees, the Chief Administrative Officer, and the civic public service.
6. To deliver effective and cost efficient printing, graphic design, translation and mail services to the civic public service and elected officials.

Service Level Statistics

* 2012 and 2013 reported by-laws drafted and/or amended.

** Significant increase due to the civic election.

Assessment, Taxation and Corporate

Includes:

- Assessment and Taxation
- Corporate Accounts

Description

To provide timely and accurate property and business valuations, tax billing and collection services.

General revenue and corporate expenses/savings that are not attributable directly to any other public or internal service, include:

- Taxation revenue and tax credits.
- Unconditional grants from the Province of Manitoba.
- Provincial payroll tax and offsetting support grant from the Province.
- Revenue from sale of Winnipeg Hydro/utility dividend.
- Pension contribution adjustments.
- Interest income.
- Debt and finance charges not attributable to any other City services.
- Corporate risk management.

Key Goals

1. Provide valuations that are accessible to the public.
2. Reduce the financial risk of assessment appeals.
3. Provide accurate valuations that are fair and timely.
4. Enhance the understanding of valuations and their underlying principles both internally and externally.
5. Deliver a timely, accurate tax billing and collection service.
6. Improve customer service.

Service Level Statistics

Description	2012	2013	2014

Arrears	65.0%	64.0%	58.8%

* General Reassessment

** In 2012 Entertainment Funding Tax reimbursements have been recorded as a contra-revenue account instead of an expense.

Contact Centre - 311

Description

To provide accurate information and enhanced customer service through requests for non-emergency services to the citizens and customers of the City of Winnipeg through a single point of contact.

Key Goals

1. Improve citizen satisfaction through the ease of use and access to 311.
2. Improve call tracking capabilities to better analyze citizen needs for service.
3. Improve City services through results management.
4. Improve service request routing and tracking to ensure accountability to citizens.

Service Level Statistics

Description	2012	2013	2014

Number of Mobile App Interactions*	n/a	646	1,343
Number of In-person Interactions*	n/a	10,688	29,081

Note: The difference between Total Calls Received and Total Calls Answered is due to a combination of abandoned calls, as well as the use of an Interactive Voice Response (IVR) system which answers the caller's question without needing to speak to an agent.

* Mobile app and in-person counter services launched September 2013.

Council Services

Includes:

- *Auditing*
- *Mayor and Council*
- *Archives*
- *Elections*
- *Citizen Access and Appeals*
- *Council Support*
- *Executive Support*

Audit

Description

The purpose of the Audit Department is to provide independent and objective information, advice and assurance with respect to the performance of civic services in support of open, transparent and accountable government. The Audit Department's primary client is City Council, through the Audit Committee (Executive Policy Committee). The value to Council is the ability to use credible information to support their decision-making efforts. Stakeholders are civic managers and citizens who are the recipients of our public reports.

Key Goals

1. To provide independent and objective assurance on the efficiency and effectiveness of City operations as well as timely, relevant and value-added recommendations for improvement.
2. To influence organizational outcomes and accountability by promoting good governance, effective risk management and controllership, and comprehensive and transparent performance information.
3. To deliver high quality, cost-effective audit services.

Council Services

City Clerks

Description

The City Clerk's Department provides direct policy, procedural and administrative services to the Mayor, Speaker and Members of Council, Executive Policy Committee, Standing Policy Committees, the Mayor's Office and Senior Administrators. The Department is the gateway to the City for political decision-making and providing access to information about the City, its services and the decision-making process. It captures, communicates and maintains a complete and accurate record of all Council decisions since the City's inception.

The City Clerk's Department has statutory responsibility for the administration of elections and by-elections as designated by The City of Winnipeg Charter, The Municipal Councils and School Boards Elections Act and for supporting Council and its Committees under The City Organization By-law. The City Clerk is also designated as the head of the public body under The Freedom of Information and Protection of Privacy Act (FIPPA). The Department leads the City-wide Records Management program and preserves civic history through the operation of the City Archives. The Department also undertakes all hearings related to assessment appeals through the Board of Revision.

Key Goals

1. To lead in the provision of customer service to our varied clients including the Mayor's Office, Councillors, the Administration and the public.
2. Enable cost savings and improve delivery of services to Council and the public through the ongoing development of information technology by continuing to enhance e-government and other electronic systems.
3. Review existing systems to ensure they are in keeping with changing environmental conditions and making full usage of technology and processes to reduce costs and maximize efficiency.
4. Ensure democracy at the local government level with ongoing election planning and delivery for by-elections and general elections.

Service Level Statistics

[A] Values restated to reflect Statistics Canada 2014 restatement of Winnipeg population for these years.

[B] Statistical measures relative to the International Association of Assessing Officers (IAAO) Standards are determined at the time of General Assessment. The measures indicate accuracy, uniformity and equity of appraisals relative to market value.

[C] The ISO quality standard specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide a product or service that meets customer and applicable regulatory requirements, and aims to enhance customer satisfaction through the effective application of the system. By being ISO 9001:2000 certified the Department has positioned itself among the industry leaders in the field of valuation and taxation.

[D] Restated to provide consistent methodology (support service's consolidated operating expense as a percentage of the City of Winnipeg's consolidated operating expense).

[E] The addition of self-service, mobile, and in-person customer interaction types in 2013 in addition to telephone and e-mail interactions, has increased efficiency.

[F] Length of time is measured from job closing date to the date the person starts in the position.

[G] This includes all civic recruitment with the exception of uniformed staff e.g. Fire Fighters, Paramedics, Police Officers, and Bus Operators. Recruitment and selection of uniformed staff in these areas is very specialized and intensive, including multiple steps.

[H] "In-house" training refers to that organized, registered and/or delivered by City employees. Exclusions 1. Police Recruit Training which is 37-weeks long and Police Cadet training which is 14 weeks long; 2. Fire/Paramedic Training; 3. "External Training" – which is measured by number of people, not training hours; and, 4. Transit Driver Training.

[I] Restated to report diversity representation of designated group members as of December 31 each year.

[J] Sick time usage per annual average headcount in 2014 assumes all employees included in the annual average headcount are enrolled in a sick plan.

Organizational Performance Measurements

Benchmarking

Credit Ratings - City Comparison (2013 - 2014)

City	Moody's	Standard & Poor's
Ottawa	Aaa	AA+
Calgary	no rating	AA+
Edmonton	no rating	AA+
Vancouver	Aaa	AA+
Toronto	Aa1	AA
Winnipeg	Aa1 (neg)	AA
Hamilton	no rating	AA
Montreal	Aa2	A+

Winnipeg's credit rating is similar to other Canadian cities.

Direct Debt as a Percent of Operating Revenues - City Comparison (2013)

Winnipeg's direct debt as a percentage of operating revenues is just below the average when compared to other major Canadian cities.

Wpg. Trend	2009	2010	2011	2012	2013
	41.7%	41.2%	43.9%	60.0%	56.6%

Operating Expenditures per Capita - City Comparison (2013)

In 2013, Winnipeg had the lowest operating expenditures per capita from the eight cities selected. All of the other cities had higher operating costs per capita than Winnipeg, ranging from 1% higher in Hamilton to 47% higher in Calgary.

To make this comparison, expenditures were adjusted to match a similar basket of services between cities by removing social services, housing and public health, ambulance, assessment, cemeteries, transit and electric utility. In addition, all cities include water costs except for Edmonton.

Financial Overview

Past – Present – Future

Prepared by the City of Winnipeg
Corporate Finance

Preamble

This document was assembled to help explain and inform how the City of Winnipeg was able to carry out 14 years of property tax cuts and freezes between 1998 and 2011. This document will also outline some of the current financial challenges such as the operating budget's structural deficit and the need for additional revenue sources.

The current City funding model is unsustainable.

The City is challenged by a growing structural operating deficit in the tax-supported budget. Ongoing revenues are not enough to cover current expenditures levels. In the past, in order to keep City tax rates competitive and affordable, one-time revenue sources have been used to balance the tax-supported operating budget. For 2016, the operating budget shortfall is projected at \$73 million.

A new funding model is required.

Source: Compiled and derived by the City of Winnipeg.

Financial Overview – Past

Going back to 1997, the City had comparably high residential property taxes and a high debt level (\$1 billion) relative to other cities. In 1998, the City began freezing its property tax revenue. For 14 years, the City achieved property tax cuts / freezes: 3 years of 2% property tax cuts (2000, 2001 and 2002) and 11 years of property tax freezes; an overall 6% property tax revenue reduction. During this period, the property tax rate (mill rate) was reduced by 60%, from 33.479 in 1998 to 13.372 in 2014.

Source: Compiled and derived by the City of Winnipeg.

During this time, the City stopped borrowing, deferred infrastructure spending, and began reducing operating costs through computerization, process improvements and expenditure management (deferring costs, reducing non-frontline staff, and annually trimming non-essential expenses).

Over the last 17 years, other cities have continued to approve annual property tax increases for use in both their operating budgets and their capital / infrastructure budgets. Of the other five cities compared to below, over the 17 years, the average property tax increase was just under 4% per year – while Winnipeg averaged 0.4% per year. Cumulatively, these amount to large increases (50% to 78%) relative to Winnipeg's 6.7%.

Property Tax Increases in Western Cities

	1999 to 2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	1999 to 2015

Quantifying the Savings and other Revenues

From 1997 to 2011, the tax-supported budget expenditures increased from approximately \$684 million to \$847 million – an overall increase of \$163 million. With such an increase in costs, how was the property tax freeze achieved?

The property tax cut / freeze was achieved by freeing up other funding, through cost reductions, that could then be used to pay for inflationary and volume cost increases:

- \$100 million in reduced debt payments
- \$12 million in reduced pension payments covered by the temporary pension surplus
- \$14 million in transferring land drainage costs to sewer utility
- \$20 million in a new water and sewer utility dividend
- \$14 million in a frontage levy increase
- \$55 million in sinking fund surplus withdrawals, total (amounts vary by year)
- \$10 to \$30 million annually in other various one-time revenues
- Capital closing process (\$11 million in 2011)
- Other costs / staff reductions throughout departments
- Including approximately \$16 million in targeted staff reduction

This resulted in approximately \$164 million in permanent cost reductions /additional revenues. (Does not include other reductions: process improvements and efficiencies etc.). This is equivalent to about a 40% property tax increase.

City of Winnipeg Staffing Changes Budgeted FTEs

Staffing has increased

Between 1999 and 2015 there has been a 9% increase in staff level.

Police, Fire/Paramedic, Transit, Water and Sewer were the 4 service areas which saw staffing levels increase by 1,067 FTEs.

The remainder of City service areas had a combined reduction of 286 positions. Resources were shifted to high priority areas.

On a per citizen perspective there has been a staff reduction of 4%.

* 81 staff transferred to Assiniboine Park Conservancy

+ Transit's 1999 figure adjusted to the same basis as the 2014 FTE Complement Report

** 1999 figures are restated to be consistent with 2015 presentation / organizational structure

Changes in Debt Levels

Winnipeg’s debt level went from just below \$1 billion in the late 1990s to a low of \$400 million in 2007. When all of the current borrowing commitments are factored in, the debt is projected to reach about \$1.6 billion by 2020. (Includes Rapid Transit Southwest, but does not include potential Waverley Underpass or Marion Underpass / Realignment projects.)

Debenture debt and P3 obligations included.

Future Budget Challenges

Today we have service cost increases and requirements, including deferred operating and maintenance costs, increased staffing levels in public safety and strategic areas, as well as infrastructure investment requirements.

Most of the City’s previous high interest debt is paid off. But the City has recently taken on new debt which requires new interest and debt repayment costs.

Our past reliance on non-recurring, one-time revenues and deferral of operating and maintenance costs is not sustainable. These factors have resulted in the City’s tax supported budget having a growing structural deficit: sustainable revenue streams do not cover ongoing operating expenditures.

In order to keep tax rates competitive and affordable, one-time revenue sources have been used to balance the tax-supported budget. For 2016, the tax-supported operating shortfall is projected at \$73 million. New long-term growth revenue sources will be required in the future to address the growing operating structural deficit.

Future Budget Challenges – Operating Budget

Below is a multi-year graphical depiction of the City’s tax-supported operating expenditures and revenues. The underpinning assumptions are hypothetical and are presented for discussion purposes only.

Overall operating spending is forecast to increase at 3.4% per year based on current trends.

Assuming no additional property tax increase for the operating budget, overall total operating revenue is projected to increase at 0.9% per year. The non-property tax revenues (e.g. frontage levy, user fees, regulatory fees, provincial grants) are forecasted to grow at 0.7% to 2.0% per year depending on the revenue source, based on current trends and volume growth.

The gap between forecasted spending and revenues, is estimated to grow at approximately \$35 million per year. By 2026, without other revenue increases or other new revenues, the funding gap grows to \$430 million per year.

As part of the 2015 budget, Council has committed to an annual 2.0% property tax increase for local and regional street renewal and also a 0.33% increase beginning in 2016 for rapid transit – for a total property tax increase of 2.33%. These funds are dedicated for infrastructure projects and cannot be used for operating expenditures.

Future Budget Challenges – Capital Budget

In addition, there are also significant challenges relating to the capital budget. For example, below is a listing of major road projects being contemplated in the Transportation Master Plan, to be renewed or constructed over the next 10 years but currently do not have funding sources:

Renewal

- Waverley Underpass
- Marion Underpass, realignment and widening
- Kenaston (Ness to Taylor), with bridges
- Louise Bridge
- Arlington Bridge or alternative
- St Mary's Widening (St Anne to Marion)
- Osborne Underpass - widening
- Fermor (Lagimodiere to Plessis)
- Pembina Overpass - rehabilitation
- St Vital Bridge – rehabilitation

Growth Related

- Chief Peguis Trail (Main to Route 90)
- Clement Parkway (Grant to Wilkes)
- Bishop Grandin (Lagimodiere to Fermor)
- Schreyer Parkway (Plessis to Peguis)

Thus the City will be facing difficult choices in balancing the operating and capital budgets, staying below the Council defined debt ceiling, prioritizing capital projects, determining what is affordable and what additional sources of revenue may be available.

City Spending on Infrastructure

“Although the negative impacts of inadequate public infrastructure are only starting to mount – and become visible to Canadians on a day-to-day basis – we believe that ongoing neglect of the nation’s capital stock presents one of the greatest risks to the country’s overall quality of life.”

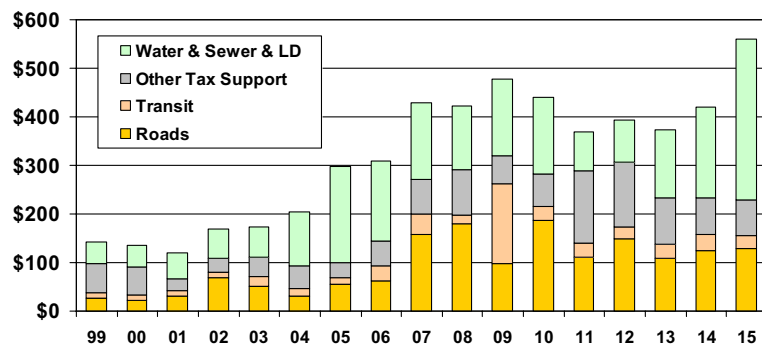

TD Bank, May 2004

Increased capital spending –

After reductions in capital spending in the late 1990s, the City has, over the last several years, significantly increased its capital budget. This is partly due to:

- Major Wastewater upgrades;
- Use of debt financing for rapid transit, police headquarters and other large projects;
- Use of P3s for the Disraeli Bridge and the Chief Peguis Trail extension;
- Increasing Infrastructure funding from the Federal and Provincial governments;
- More recently, dedicated property tax increases for local and regional road renewal.

City’s Capital Budgets, 1999 to 2015
(in millions \$)

Source: Annual Capital Budget documents

Factors increasing the need for Infrastructure Spending

- **Capital spending has been deferred** – During the 1990s, the City was borrowing sums annually to build new infrastructure and renew existing infrastructure. With no population growth and with the City’s debt having grown to nearly \$1 billion, the City stopped borrowing in 1998.
- **Asset management practices implemented** – City Departments have set up asset management units and are implementing leading practices to manage the City’s infrastructure. This more detailed and sophisticated examination will result in additional infrastructure deficit items being identified.
- **Construction inflation** – From 2000 to 2014, Winnipeg’s overall construction inflation is estimated at about 90%. Thus, even if the City infrastructure deficit inventory backlog was not growing, it would still cost 90% more to repair today than it did in the year 2000.
- **Population Growth** – The most recent population forecast was developed by the Conference Board of Canada in 2012. The City of Winnipeg is forecasted to grow by 189,800 people over the next 21 years with a corresponding need for 95,000 more dwelling units, of which nearly half will be multiple units. As comparison, once completed, all of Waverley West is expected to have approximately 11,000 dwelling units. Thus the City’s growth will necessitate additional capital projects for roads, bridges, rapid transit, water and sewer extensions, and facilities such as libraries, fire, police, recreation, etc.
- **Changing Provincial and Federal Legislation** – Wastewater Treatment – Due to provincial environmental and operating license legislation, the service must invest \$1.2 to \$1.8 billion to upgrade its wastewater treatment plants.

Infrastructure Deficit

“For the past 20 years, municipalities have been caught in a fiscal squeeze caused by growing responsibilities and reduced revenues. As a result, they were forced to defer needed investment, and municipal infrastructure continued to deteriorate, with the cost of fixing it climbing five-fold from an estimated \$12 billion in 1985 to \$60 billion in 2003. This cost is the municipal infrastructure deficit, and today it has reached \$123 billion.” Dr Mirza, McGill University, Nov 2007

In 2009, the City of Winnipeg Infrastructure Deficit was estimated at \$3.5 billion and is expected to grow by \$3.9 billion over the next 10 years resulting in an expected funding shortfall of \$7.4 billion by the year 2018. The \$7.4 billion Infrastructure Deficit is made up of two parts: \$3.8 billion relating to existing/current infrastructure and \$3.6 billion related to new growth infrastructure.

**2009 Average Annual Capital Budget (green)
With Infrastructure Deficit (blue)**

The chart shows the annual spending on infrastructure in green and the needed but unfunded projects in blue.

Source: City of Winnipeg, Information from 2009 Infrastructure Deficit report to Council

About 80% of the required growth infrastructure is related to transportation: roads, bridges, buses and rapid transit. By far the greatest gap between funded and unfunded need is for transportation (roads and transit). However, parks and City buildings (libraries, pool, arenas and other public building) require significant funding as well.

Inter-City Comparison: Operating Spending

Winnipeg now has the lowest operating costs per capita when compared to other large Canadian cities. In 2003 the average operating operating expenditures per capita of the other 7 cities was just above Winnipeg's spending. Thus Winnipeg was just below the average spending level of larger cities. Between 2003 and 2013, Winnipeg increased its operating spending by 45%, while the average of the other 7 cities resulted in an increase of 69%.

Basket of Services: Police, Fire, Roads, Water, Sewer, Land Drainage, Solid Waste, Recycling, Parks, Recreation, Libraries, Arts & Culture, City Planning, Development and Permits, Animal Services, Fleet, Municipal Buildings, Corporate Services, and Council (Edmonton also excludes Water.) Does not include: Ambulance, Assessment, Cemeteries, Public Health, Social Services, Housing, and Electric Utility, Transit and Interest.

Source: Annual Financial Reports of various cities. Prepared by The City of Winnipeg

NOTE: Since the Transit service varies significantly between cities and debt financing costs vary as well, due to past borrowing decisions, the chart excludes these costs.

In 2013, Winnipeg had the lowest operating costs of these large Canadian cities. The average of the other 7 cities was 23% more than Winnipeg; and at the high end, Calgary spent 47% more than Winnipeg. To put it in perspective, if Winnipeg spending level was the same as the average of the other 7 cities, Winnipeg would have an additional \$216 million to spend.

Inter-City Comparison: Infrastructure Spending

When comparing the average annual Capital Budgets of eight cities (tax-supported plus Transit), Winnipeg spends the least at \$327 per capita. Levels of capital spending vary significantly between cities. Winnipeg would need to triple its tax-supported capital budget to spend the average of what other cities are currently spending

Source: Compiled and derived by the City of Winnipeg

City Government Revenues

Even with the spending restraint and property tax revenue freezes and cuts, the overall City of Winnipeg government revenue measured in constant dollars increased by over \$200 million from 1998 to 2012 (adjusted for inflation). But during this period the City government became a smaller government relative to the size of the economy.

The City of Winnipeg government total revenues has grown by 16% over the last 14 years, when adjusted to factor out inflation.

When benchmarked against the economy, City total revenues have decreased from 4.1% of Winnipeg's GDP in 1998 to 3.6% of GDP in 2012.

Property Tax revenue had seen the largest change, going from 1.7% of GDP in 1998, down to 1.1% of GDP in 2012.

Along with the overall size of the City revenue pie increasing by over \$200 million (in constant dollars), there has also been a shift within the pie: taxation revenues have decreased and fees & charges along with government grants have increased.

- Property & business taxes together made up nearly half (46%) of the City's revenues in 1998. While in 2012 these same revenues accounted for just over a third, at 35% – a net reduction of \$65 million.
- During the same period, user fees & charges increased from 30% to 33% of total revenues – a net increase of \$124 million.
- Provincial and Federal government grants combined increased from 16% to 21% of total revenues – a net increase of \$115 million. The majority of the increase was in capital grants.

City Revenues – Compare to other Cities

Other prairie cities collect greater amounts of total property tax and business tax revenues than Winnipeg on a per capita basis. As well, other cities have access to additional and different revenues.

How are the revenues of other cities different from that of Winnipeg's revenue?

More:

- Commercial Property Tax Revenue
- Franchise Fee/ Utility Tax
- Higher User Fees
- More User Fees: Garbage fee, libraries fee, land drainage fee
- Capital Grants
- Developer Cost Charges

Note: In order to compare between cities, all information on this page is based on dollars per capita.

Source: City of Winnipeg, cities' 2010 annual financial reports

On a per capita basis Winnipeg collects the least total property taxes of the five prairie cities.

Even though Calgary and Winnipeg have low residential property taxes. Calgary collects significantly greater amounts of total taxes than Winnipeg – 53% more on a per capita basis. The result being that Winnipeg has lower commercial taxation.

In general, other prairie cities collect more revenues from:

- commercial property taxation
- fees on natural gas and electricity utilities (franchise fees)
- user fees (garbage, land drainage)
- developer cost charges (contributions from growth development), and
- capital grants

Overall, on a per capita basis, both Edmonton and Calgary are collecting significantly more revenues relative to Winnipeg – 67% more and 58% more.

Commercial Property Tax Ranking

The City of Halifax commissioned Colliers International to carry out a property tax comparison for commercial type properties. The following were the findings for a downtown office space and for an industrial property.

Downtown Office Space – Property Tax Paid

Industrial Properties – Property Tax Paid

Source: Colliers International, January 2011. Study commissioned by Halifax Regional Municipality.
Class 'A' is the newest, highest-quality office space

Changes in Government Taxation Revenues

Even with tax rate reductions, the Provincial government tax revenues have increased the most and well above that of economic growth.

The Federal Government has seen their tax revenues increase by 43% over an 11 year period, while the Provincial Government tax revenues have increased by 92% -- the benefits of revenue sources which are linked to economic growth.

During this same period of time, the City's tax revenues have only increased by 20% over the last 11 years which is below the rate of inflation and well below economic growth. This is the result of the property tax revenue freezes. From 1998 to 2014, the property tax rate was reduced by 60%.

Winnipeg's Tax Pie – Who collects the taxes?

In 1997, 7.9% of all the taxes Winnipeggers paid went to the City of Winnipeg; while 41.9% went to the Province, and 50.2% went to the Federal Government.

By 2012, the City government's portion of the tax pie has decreased; and so has Federal Government's portion. While the Province's portion of the pie has increased.

In 2012, the City of Winnipeg now collects only 6.1% of the total taxation paid by Winnipeggers, down from 7.9% in 1997.
