D3. BACKGROUND

D3.1 In 2012 the City of Winnipeg developed the "ST. Vital Park: Building Condition Assessment and Facility Masterplan" in conjunction with 1x1 Architecture Inc. The document reviewed the history of planning for St. Vital Park, programming, building installations and adaptive uses as well as current conditions and fitment for purpose. Two buildings, the garage, and the former public washroom/concession building had notable deficiencies in their current for parks maintenance equipment and staff. The single car 700 square foot garage was constructed in 1963 to house park equipment of the day. The review found that the building is in poor physical condition, with significant rot on the interior bottom plate and lower portion of the studs. There is also visible mould from building envelope perforation and water infiltration under the garage door. This situation has resulted in a Provincial Health Order that limits the amount of time staff can spend in the building, and there are broken asbestos entrained exterior wall tiles. As well, the garage lacks sufficient electrical capacity and is drastically undersized to meet the maintenance and storage needs of modern park operations. The former concession building sees staff enter through a utility room that has building equipment, small tools and some staff space. The common room is undersized and there is no staff changing rooms, lockers or access to washrooms from the interior. The building is in reasonable physical condition, but both of these now programmed uses are not compatible within the public realm of the park. The section of the report describing these two buildings suggests that a modern combined facility should be located in the more discreet location of the current nuisance grounds.

D3.2 In 2020, \$2.65 million was forecast in the 2021 Public Works Department capital budget: Parks and Open Space Division - Parks Buildings, for the construction of a new parks maintenance facility for St. Vital Park.
