E8. LEACHATE DISPOSAL

- E8.1 This Section covers the disposal of leachate from the various locations at BRRMF and Summit Road Landfill Sites and Westview and Kilcona Parks at the NEWPCC located at 2230 Main St.
- E8.2 The tanker driver shall obey all traffic rules and regulations within the NEWPCC property. The driver shall exercise due caution, obeying all traffic signs and speed limits, and shall adhere to all rules established by the NEWPCC management. The Contractor shall be responsible for any and all damage resulting from failure to comply with these rules and regulations.
- E8.3 The leachate shall be unloaded into the leachate disposal lane or as directed by the Contract Administrator. The discharge manhole will accommodate a maximum one hundred (100) millimetre diameter hose. The discharge hose shall have a collar wider than the discharge hole preventing it from falling into the manhole. There is no restriction on the discharge rate for unloading leachate into the disposal manhole. At any time the Contract Administrator may install a flow meter at the discharge manhole recording the discharge from the Contractor.
- E8.4 The Contractor shall take one (1) sample from each load at the sampling port at the tank connection using containers provided by the City and according to instructions provided by the Contract Administrator. The samples shall be identified with a barcode sticker provided by the City of Winnipeg attached to the bottle by the Contractor and shall be delivered to the Laboratory Services Division at the NEWPCC, as directed by the Contract Administrator, as soon after sampling as possible.
- E8.5 A maximum daily total of approximately four hundred and eighty (480) kilolitres is to be disposed of at the NEWPCC, unless otherwise approved by the Contract Administrator.
- E8.6 An interval of at least thirty (30) minutes is required between disposal of loads.
- E8.7 There may be other users of the leachate disposal lane therefore causing the Contractor to have to wait a short period for disposal.
- E8.8 The Contractor shall be responsible for any costs for mishandling or an accident that damages the leachate reaching facility, for example when the leachate hose is lost inside the discharge pipe.
- E8.9 The time it takes to egress from the NEWPCC can be an inconsistent process due to traffic volumes concerning Main Street.
