D3. PROJECT SCOPE

D3.1 Background

The Fire Underwriters Survey conducted in 2014 and updated in 2018 identified that Fire and Paramedic Station 9 at 864 Marion Street and Station 15 at 1083 Autumnwood Drive have overlapping fire response coverage areas, and that one could be removed without impacting service, provided the same type of fire vehicle deployment remained in the area. This included a Pumper Engine, a Rescue, and a Hazardous Materials response vehicle. The report also recommended additional water tanker and ladder truck apparatus.

The Standards of Coverage and Master Plan completed in 2018 suggested that one third of Winnipeg Fire Paramedic Service (WFPS) stations need to be replaced and another third require significant renovations to meet current fire service needs. The Standards of Coverage highlighted some of the more urgent building renovation issues and recommended consolidating Fire Paramedic Stations 9 and 15, and the creation of a new station in Waverley West to provide appropriate response times to this new community.

With these recommendations in mind, WFPS undertook preliminary design work on a proposed new amalgamated Station 9/15 in 2018. A preliminary (30% completion status) design was undertaken by Cibinel Architecture Ltd. for the purpose of establishing a Class 3 cost estimate to be used for securing a capital budget and proceed with infrastructure development. The plan associated with this design is to build a new amalgamated Station 9 on the current site of Station 15 and on adjacent City-owned land at 955 Cottonwood Road; that property being the site of the former Windsor Park Library which now stands vacant – refer to Figure 1.

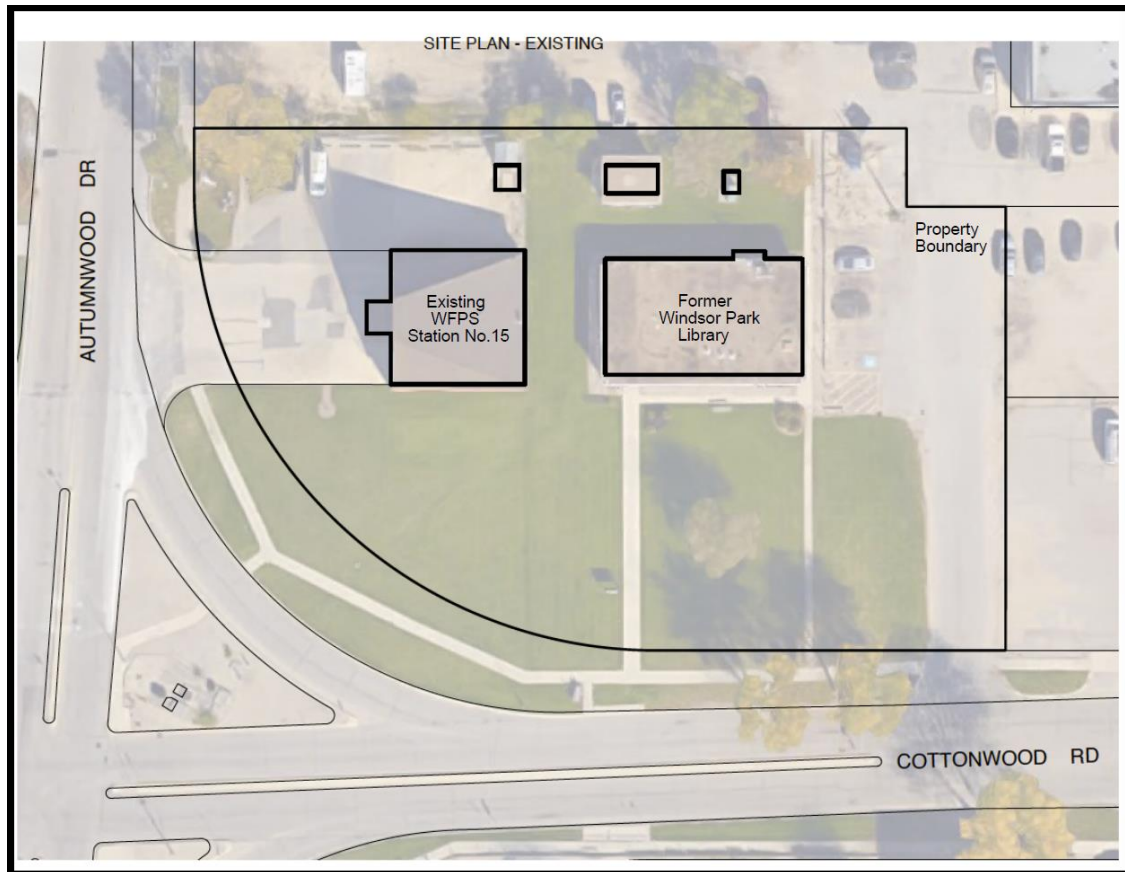

Figure 1: project development site

In order to address the facility condition issues noted in the Fire Underwriters Survey, the desired approach is to minimize the repair work and associated investments required to keep Stations 9 and 15 operational until the new station is commissioned. The required development timeline to meet operational requirements is to begin construction by the latter half of 2022 and achieve completion by the end of 2023. This would enable all fire response vehicles to be housed in the area as required; the St. Boniface Industrial and Windsor Park areas and Waverley West following the redeployment of the liberated Engine resulting from the closure of Station 15. As construction of the new Station 9 advances to completion, Station 15, which must remain in service for as long as possible, will have to be decommissioned and demolished to make way for the completion of the new Station site whilst minimizing WFPS operational impacts.

In terms of new facility development, the project scope of the new amalgamated Station 9 is a new five (5) vehicle/apparatus bay station housing both Fire and Paramedic operations with integrated training facilities and hazardous materials equipment storage, built on 2 floors with a gross floor area of approximately 1,895 square metres, and a site development area of approximately 3,770 square metres. It is the intent of the City of Winnipeg to proceed with the development of the new Station 9 at the proposed location, 955 Cottonwood Road.

- D3.2 The project will be carried out for Winnipeg Fire Paramedic Service under the direction of the Assets & Project Management Department. The project team from The City of Winnipeg will be comprised of representatives of the Winnipeg Fire Paramedic Service and the Assets & Project Management Department. The total construction budget for the project is \$9,875,000 (all applicable taxes included) comprising a net building cost limited to \$6,000,000 plus \$1,100,000 for site development, and the balance attributed to contract general conditions and other fit-up costs such as furniture, fixtures, building equipment, signage, etc. This budget amount does not include Consultant fees.

- D3.3 In terms of the new infrastructure deliverables associated with this project, Consultant services in this contract shall include, but not be limited to, all the necessary activities and deliverables for:

 - iii. Design and specifications for demolition of the former Windsor Park Library building at 955 Cottonwood Road, so as to coordinate with construction of the new Station 9 (Note, demolition of Windsor Park Library to be its own separate construction contract; work to be procured by the City of Winnipeg).
