### D3.2 ENERGY AUDITS

- (a) Buildings represent one of the largest sources of greenhouse gas (GHG) emissions in Winnipeg, accounting for 44.4 percent of community-wide emissions in 2022. At the corporate level, City facilities accounted for 34 percent of overall energy use and 21 percent of emissions. Most building emissions at the community-wide and corporate levels come from the use of natural gas for heating purposes.
- (b) OurWinnipeg 2045 sets out the City's climate target of net zero emissions by 2050 which aligns with federal and international targets. The Community Energy Investment Roadmap (CEIR) identifies City and community-wide systems level actions and investments to achieve this updated target. CEIR identifies that, after reducing the need for energy and increasing energy efficiency, electrification of buildings is key to meeting our climate targets. Council directed the Public Service to implement CEIR in July 2022.
- (c) The main objectives of the Energy audits are to:
  - (i) Reduce energy consumption in the listed buildings through various measures, including building envelope improvements and equipment upgrades.
  - (ii) Lower building utility costs.
  - (iii) Decrease peak electricity demand
  - (iv) Develop strategies for transitioning to low-carbon energy sources, with a specific focus on moving from fossil fuels to electricity in Manitoba.
- (d) The ASHRAE Level 2 energy audit shall include, but is not limited to the following:
  - (i) Facility description including, schedules, energy sources and comfort or health concerns including indoor environmental quality (IEQ) deficiencies.
  - (ii) Descriptive information for the following components, but not limited to:
  - (iii) Building envelope
  - (iv) Overall enclosure tightness
  - (v) HVAC
  - (vi) Domestic hot water
  - (vii) Lighting (interior and exterior)
  - (viii) Plug loads
  - (ix) Monthly and annual utility data; a minimum of 12 months is required, however ideally 2-3 years of data should be analyzed.
  - (x) Utility rate information
  - (xi) Annual Energy Use Intensity and Energy Cost Index
  - (xii) Energy End-Use Breakdown
  - (xiii) Benchmarking against similar facilities.
  - (xiv) Identify potential capital EEM recommendations, including:
    - Estimated implementation cost.
    - Approximate measure lifespan.
    - Life Cycle Cost Analysis (LCCA) which measures total cost of ownership over the lifecycle of the retrofit, including installation, operation, maintenance, and disposal costs.
  - (xv) The financial analysis should incorporate a 2% annual escalation for electricity and natural gas prices. The carbon tax should increase until it reaches \$170/tonne of CO<sub>2</sub> in 2030, after which a 2% yearly escalation should be applied.
  - (xvi) Potential energy and carbon reduction incentives and grants from organizations such as Efficiency Manitoba and the Green Municipal Fund etc.
- (e) Efficiency Manitoba offer financial incentives and technical support for building owners that complete ASHRAE Level 2 or 3 audits for eligible commercial buildings: <https://efficiencymb.ca/business/commercial-energy-audit-program/>. Where possible, please take advantage of the Efficiency Energy Audit Program, however, please note that

the energy auditor has to be a pre-qualified Consultant and the application must be approved prior to on-site assessment work.

- (f) The City will provide a minimum of 1 year, up to 3 years of energy, demand and cost data along with the Manitoba Hydro rate each facility falls under to the selected consultant. It is understood that currently, electricity costs more than natural gas. The City acknowledges that transitioning to electricity may result in increased utility costs, however, the City is keen on exploring electrification options that leverage a coefficient of performance (COP) higher than 1 for applicable applications.
- (g) Before and/or during the building walkthroughs, the consultant team shall create a draft layout for the energy audit report, outlining the contents of each section. This draft to be reviewed and approved by the City of Winnipeg project team.
