Heritage Resources Protection Plan (HRPP) Guidelines

Purpose of HRPP – Preventative Action:

To assist [insert company name] with informing managers, employees, contractors on what to do and whom to call should heritage resources accidentally be encountered when testing and development is underway on site. The HRPP consists of operational procedures to limit damage or destruction of heritage resources accidentally found during site work.

Key Steps:

- 1. All workers on-site should be informed of the HRPP in advance of work proceeding and who to contact should there be a chance encounter during on-site activity.
- 2. If heritage objects or human remains are discovered on site, activities are to stop at that location immediately and the Historic Resources Branch be notified. (HRB.archaeology@gov.mb.ca, (204) 945-2118)
- 3. In the case of human remains, the nearest law enforcement agency (i.e., RCMP or local police department) must be contacted to first rule out any forensic issues.

Why Report?:

Many people find heritage objects accidentally. If these items are reported to the Historic Resources Branch, their significance can be assessed and the resulting information can generally shared with the public. Some heritage objects can be several thousand years old.

Legislation and Policy:

The Heritage Resources Act (The Act) and the Province of Manitoba Policy Concerning the Reporting, Exhumation and Reburial of Found Human Remains (Burials Policy) apply to protecting heritage resources.

Preparing the HRPP

These are <u>basic</u> guidelines to <u>help developers</u> draft an HRPP.

This is a non-exhaustive guideline involving a single stakeholder. Projects involving multiple stakeholders/ community partners will require more detail.

Provide purpose/intent of HRPP to general user.

Explicitly state key message/takeaway for user

All on-site workers should be aware of or briefed about the protocol.

Introduce the need to report findings.

Identify the relevant legislation pertaining to heritage resource protection.

What are Heritage Resources?:

Heritage resources and heritage objects are defined under the *Heritage Resources Act*:

"heritage resource" includes

- (a) a heritage site,
- (b) a heritage object, and
- (c) any work or assembly of works of nature or of human endeavour that is of value for its archaeological, palaeontological, pre-historic, historic, cultural, natural, scientific or aesthetic features, and may be in the form of sites or objects or a combination thereof

"heritage object" includes

- (a) an archaeological object,
- (b) a palaeontological object,
- (c) a natural heritage object, and
- (d) an object designated as a heritage object by the Lieutenant Governor in Council under subsection (2);

"archaeological object" means an object

- (a) that is the product of human art, workmanship or use, including plant and animal remains that have been modified by or deposited due to human activities,
- (b) that is of value for its historic or archaeological significance, and
- (c) that is or has been discovered on or beneath land in Manitoba, or submerged or partially submerged beneath the surface of any watercourse or permanent body of water in Manitoba;
- "palaeontological object" means the remains or fossil or other object indicating the existence of extinct or prehistoric animals, but does not include human remains.
- "natural heritage object" means a work of nature consisting of or containing evidence of flora or fauna or geological processes;
- "human remains" means remains of human bodies that in the opinion of the minister have heritage significance and that are situated or discovered outside a recognized cemetery or burial ground in respect of which there is some manner of identifying the persons buried therein;

Notes/Comments

Provide verbatim definitions of heritage language as presented within The Heritage Resources Act.

Example of a Palaeontological Object

Discovery and notification structure:

Better safe than sorry: do not hesitate to report potential or suspected finds. The Historic Resources Branch is here to provide advice and expertise at no cost to the developer.

- 1. If heritage resources, including human remains are encountered, stop work immediately.
- 2. Notify the on-site manager about the discovery.

[Insert contact information here, including names, position, and phone numbers]

- 3. Mark-off area with "flagging tape" to identify and restrict the area.
- 4. The on-site manager will contact the Historic Resources Branch at (204) 945-2118
- 5. In the case of possible found human remains, the on-site manager will contact
 - a. Historic Resources Branch at (204) 945-2118
 - b. [Insert local police authority name and contact information here.]

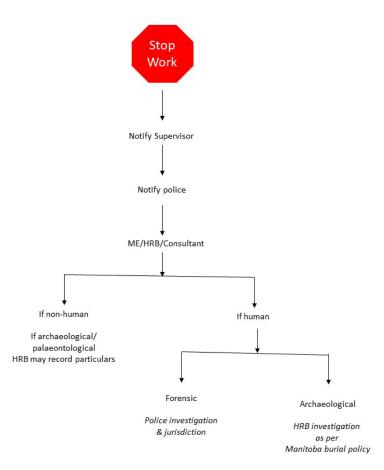

Notes/Comments

Provide step-by-step instruction on what to do and who to contact should heritage resources be accidentally encountered.

- Who is the site supervisor?
- Who do you contact if supervisor is unavailable?
- What are the phone numbers for these individuals?
- What is the name of the local police authority?
- What is the phone number during the day and after hours?

What to expect after notification for possible found human remains:

- 1. The local police authority will immediately attend the site and further secure the site.
- The local police authority may notify the Medical Examiner's (M.E.)
 Office of a potential case of founding human remains as per The
 Fatalities Inquiries Act.
- 3. The local police authority and/or the ME's office may contact the Historic Resources Branch (HRB) or their own forensic anthropology consultant.
- 4. The police and their consultant will determine if the remains are:
 - a. Human or animal
 - b. Forensic or archaeological in nature.
- 5. If the remains are forensic in nature or cannot be immediately assessed, the police authority and ME will have jurisdiction over the area.
- 6. If remains are determined to be non-forensic (i.e., archaeological) in nature and their removal is required, HRB will be responsible for their exhumation and reburial as per Manitoba Burial Policy

Notes/Comments

Under no circumstances should site information be shared with the media or the public. Site locations are protected by the Freedom of Information and Protection of Privacy Act (FIPPA).

Communication should be limited to the local police authority or the Historic Resources Branch.

What to expect after notification for heritage objects other than human remains:

- 1. The Historic Resources Branch (HRB) will visit the site
- 2. The HRB will determine if additional heritage mitigation work will be required.
- 3. If further mitigation work is required, the developer may need to contract a qualified archaeological consultant to conduct a Heritage Resources Impact assessment (HRIA) of the proposed development location, in order to identify and assess any heritage resources that may be negatively impacted by development. If desirable, the Branch will work with the developer/land owners and its consultant to draw up terms of reference for this project.

Stop Work Notify Supervisor Notify HRB Work may proceed If heritage resources if no further heritage are significant, further significance archaeological assessment will be required (HRB may record site particulars) Notify Supervisor Hire an archaeological consultant for further assessment (HRIA)

Notes/Comments

The HRB will determine if a heritage resource management strategy needs to be implemented by the developer to mitigate the effects of the development on the heritage resources.

Potential penalties

Under the Manitoba Heritage Resources Act 69(1), any person who contravenes or fails to observe a provision of this Act or a regulation, order, by-law, direction or requirement made or imposed thereunder is guilty of an offence and liable, on summary conviction, where the person is an individual, to a fine of not more than \$5,000 for each day that the offence continues and, where the person is a corporation, to a fine of not more than \$50,000 for each day that the offence continues.

Notes/Comments

Identifying potential penalties serves to emphasize the importance of this legislation
