QUESTIONS AND ANSWERS

- Q1: We would like to know if it is possible to say the maximum number of resources that can be requested at once, considering each of the roles, working in parallel on N projects. This question is to understand the quantity of resources we need to have available since we can have several projects running in parallel.
- A1: The City cannot say the maximum number of resources that can be requested at once. Refer to section E1.7. *“The City anticipates that there will be projects running approximately 75% of the time for the duration of the contract, with a demand for 1 to 3 resources per project.”*
