## **PART D - SUPPLEMENTAL CONDITIONS**

### **GENERAL**

#### **D1. GENERAL CONDITIONS**

D1.1 In addition to the *General Conditions for Consultant Services*, these Supplemental Conditions are applicable to the Services of the Contract.

#### **D2. CONSULTING CONTRACT ADMINISTRATOR**

D2.1 The Consulting Contract Administrator is:

Johnson Aina

Telephone No. 204 451-6630

Email Address: jaina@winnipeg.ca

D2.2 At the pre-commencement meeting, the Consulting Contract Administrator will identify additional personnel representing the Consulting Contract Administrator and their respective roles and responsibilities for the Services.

#### **D3. BACKGROUND**

D3.1 The administrative structure for the City of Winnipeg is a Chief Administrative Officer (CAO) who is the head of the public service and provides overall leadership to all City departments.

D3.2 The Fort Rouge Transit Base at 421 Osborne Street includes two major buildings: Storage and Repair Garage. The base was constructed in three phases with nearly 400,000 sq. ft. of buildings completed in 1969, an expansion to the storage tracks of 80,000 sq. ft. completed in 1978 and a new expansion of the repair garage of 60,000 sq. ft. completed in 2020.

D3.3 Thirty-nine (39) two post in-ground lifts were installed in the Repair Garage at the same time that the building was initially erected. These bus lifts are integral to all Transit bus maintenance and repairs. An additional set of two and three post in-ground lifts were installed as part of the new bus maintenance garage expansion. At the same time, one of the original two post lift was decommissioned to make room for a new exit door, bringing down the number of old lifts to thirty-eight (38)

D3.4 All these 38 in ground bus lifts and surrounding concrete in the Fort Rouge Bus Repair Garage need to be completely replaced due to non-compliance with current codes and standards, deterioration due to age and heavy use, and inefficient and outdated designs.

D3.5 The replacement will have to occur in stages to ensure that a minimal number of bus lifts are out of service in order to guarantee that the bus repair and maintenance garage can keep up with daily demands.

D3.6 The current lifts have deteriorated and are in very poor condition. Repairs and refurbishments have been done to keep them in acceptable working levels. Since the majority of parts are obsolete, the replacement components need to be custom fabricated, which increases the price of the repair significantly.

D3.7 Although refurbishing the lifts bring them to working condition, they still do not meet the required current safety standards. They were designed from a time where secondary safety locks were not essential.

D3.8 According to ANSI/ALI-ALCTV:2017, Automotive Lifts – Safety Requirements for Construction, Testing and Validation – Request for Interpretation – Response (June 15, 2017), relating to Section 9.2.11 – Load Holding Devices, “all automotive lifts... shall incorporate a mechanical device to prevent downward movement of more than six (6) inches after stopping motion.

Function shall begin within twenty-four (24) inches of the rise and shall continue to the full rise position.”

- D3.9 If a proper safety locking system is not present, a bus can fall while hoisted and cause severe damage and potential injury to staff.
- D3.10 Furthermore, the concrete that surrounds the pit is deteriorating and crumbling as well, requiring full replacement due to saturation of oil and diesel that has been absorbed over the years.
- D3.11 The structural slab that surrounds the lifts is supported by the pit walls. The foundation for the pit and structural floor slabs is situated at the bottom of the pits where the concrete piles are placed, as shown in the drawings found in Appendix A.
- D3.12 The concrete floor sections located between the structural slab where the lifts are installed, and the center grade, are not structural but slab on grade concrete floors.
- D3.13 The estimated phases are as follows:
- (a) Phase 1: In Ground Lifts #13 to #18, completed as per Tender 787-2019
  - (b) Phase 2: In Ground Lifts #8 to #12, completed
  - (c) Phase 3: In Ground Lifts #2 to #7, completed
  - (d) The remainder of the Lifts #19 to #25, #26 to #33, #35 to #39 and #1 are to be completed in this tender
