B2. BACKGROUND

- B2.1 On December 5, 2023, the Government of Canada, through the Canada Mortgage and Housing Corporation (CMHC), entered into an agreement with the City of Winnipeg for \$122.4 million in funding from the Housing Accelerator Fund (HAF).
- B2.2 The HAF funding is contingent upon the City achieving a total of 14,101 building-permitted housing units over a three-year period. This includes 3,166 net new units specifically enabled by HAF initiatives, with the remaining 10,935 units expected to be permitted without HAF support.
- B2.3 One of the key initiatives within the City's agreement with CMHC is the creation of a Land Enhancement Office (LEO). This office is intended to meet the objectives of the CMHC agreement by facilitating the development of affordable, supportive and mixed-income housing on strategic City-owned land. This would include preparing City-owned land for sale/lease to non-profits, Indigenous groups, and housing developers to build affordable housing.

- B2.4 The unit targets for the LEO over the 3-year agreement is to get to 611 building permits on City-owned land by December 2026. This will include 545 units within close proximity to the Frequent Transit Network and 313 affordable units.
- B2.5 The City of Winnipeg [Real Estate – Declaration as Surplus and Sale of Property Policy \(No.PD-026\)](#), amended July 18 2024, allows the City to sell surplus land at a price less than Market Value if the sale creates Affordable Housing.
- B2.6 On November 27, 2025 Council concurred with the [Housing Accelerator Fund – 2025 Status Report and Future Program Plans report](#), which included the following plan:
- The City will release an Expression of Interest (EOI) for release of 10 to 20 smaller City-owned properties to all developers for \$1. Focus for sales will be non-profit or Indigenous housing providers for the purpose of developing affordable rental or homeownership. The EOI will include key information for each site including zoning, lot dimensions, maximum or intended development potential (and required applications for approvals), and servicing considerations. The City will also provide support in streamlining approvals through the Concierge service.
- B2.7 Successful respondents to this Expression of Interest may be considered for Predevelopment Grants under the [Housing Accelerator Fund Grant Program By-Law \(64/2024\)](#). Details of the criteria for these grants can be found in Schedule A. Nothing in this document obligates the City to award a grant to successful respondents to this Expression of Interest.

For projects seeking provincial funding, this EOI also serves as the mechanism through which Manitoba Housing and Renewal Corporation will assess and make funding decisions.

- forms part of the City’s EOI evaluation or scoring;
- amends or supersedes any provision of the EOI; or

Consideration of projects under this Appendix does not establish a program, precedent, or ongoing funding mechanism, nor does it delegate approval authority beyond that provided under applicable legislation and policy.

Where a Respondent provides consent under Section B3.2(e) of this EOI, the City of Winnipeg may share EOI submissions with MHRC for the purpose of provincial review and funding consideration.

Any provincial funding, if approved, would be considered and committed through this EOI process based on:

Provincial funding commitments may be conditional upon the receipt and verification of this information. Requests for additional information by MHRC will not modify or delay the City’s EOI timelines, evaluation, or land disposition decisions.

Provincial Funding Scope and Assessment Considerations

Provincial funding commitments made through this EOI will be subject to available funding, and may be used to support affordable rental housing and/or affordable homeownership initiatives, including to advance delivery on City-owned lots identified in this EOI.

Provincial funding is intended to support affordability, feasibility, or delivery outcomes and is not intended to address unresolved financing gaps. Projects seeking provincial funding must demonstrate the ability to fully fund total project costs, including construction, financing, and long-term sustainability, independent of provincial participation.

In determining whether to commit provincial funding, MHRC may consider factors including:

- the amount of funding requested relative to the depth and duration of affordability proposed;
- speed of delivery, including readiness to secure permits and commence construction;
- long-term compliance with approved affordability requirements;
- efficiency of public investment relative to affordability and delivery outcomes; and
- overall project readiness and risk.

Respondents may describe the anticipated impact of MHRC funding on their proposal, including impacts on affordability levels, unit mix, delivery timelines, or long-term housing stability. For context only, Respondents may also reference broader housing impacts, including impacts on related or similar projects, provided this does not imply eligibility, priority, or consideration for provincial funding outside this EOI, including for projects not located on City-owned lots.

Any provincial funding approved through this EOI would be formalized through a funding agreement incorporating standard MHRC terms and conditions, including affordability, reporting, and compliance requirements.

Modern Methods of Construction

In assessing proposals, MHRC may prioritize projects that incorporate modern methods of construction, where such approaches demonstrably support:

- affordability outcomes;
- speed of delivery;
- cost certainty;
- replicability across sites; and
- reduced construction risk.

Modern methods of construction may include:

- modular or volumetric construction;
- panelized or prefabricated systems;
- off-site manufacturing; and
- standardized or repeatable design approaches.

Use of modern methods of construction is not mandatory, and proposals will not be deemed ineligible solely on the basis of construction methodology.

Limitations and Clarifications

Provincial funding is not required for a project to be successful under this EOI.

Respondents should not assume provincial funding unless and until a formal funding commitment is issued by MHRC.

The City's evaluation, selection, and land disposition decisions remain independent of provincial funding decisions.

Nothing in this Appendix commits MHRC or the Province of Manitoba to future funding rounds, guarantees funding beyond projects approved through this EOI, or establishes volume targets, timelines, or multi-year commitments.

All provincial funding commitments are limited to this EOI and remain subject to available funding, approvals, and execution of appropriate agreements.

Selection of a project by the City under this EOI does not obligate MHRC to provide provincial funding.

All enquiries related to this EOI must be directed to the City Contact identified in Section B6. MHRC will not engage directly with Respondents during the EOI process unless requested by the City following EOI review.

Site Information

Address:	529 Boyd Avenue	Lot Width (feet):	33.99 feet
Roll #:	14033120000	Lot Area (square feet):	3,097 sq. ft.
Zoning:	R2 – Residential Two-Family	Potential Development:	2 units
Existing Use:	Vacant Lot		

Preliminary Planning Comments

- Hydro requires a 4.5 metre easement in the rear
- Mature trees on site should be preserved, if possible.
- Three units may be considered through a Conditional Use application, subject to planning review.

It is important for you to be aware that any preliminary comments are intended to provide you with some assistance as you proceed with your application but do not represent the final position of the City of Winnipeg Urban Planning Division. They are not binding on the Division of the City of Winnipeg. When you submit a formal, complete application, in addition to being reviewed by other divisions within the Planning, Property and Development Department and other City of Winnipeg departments, it will be subject to a more thorough review by the Urban Planning Division. After such a review, it is possible that the Division may come to a different conclusion than it has after a cursory review.

Servicing Considerations

There is adequate water servicing to support the proposed land use.

The subject land is in a combined sewer area. According to Clause 8 of Environment Act Licence 3042, any development on the property cannot increase the flow into the combined sewer. Typically, increases in wastewater discharge can be offset by a reduction in land drainage discharge from the property.

The sum of the wastewater and land drainage runoff peak discharge from the proposed development into the combined sewer cannot exceed the allowable discharge rate:

- The allowable discharge rate will be the sum of the existing peak wastewater and peak land drainage discharge.
- The peak land drainage discharged from the site must be based on a “c”-value of 0.35, with a 5-year rainfall event applied.
- The existing and proposed peak wastewater discharge must be estimated using the Wastewater Flow Estimation guidelines found on the City of Winnipeg website (winnipeg.ca/waterandwaste/dept/wastewaterFlow.stm), unless otherwise approved.

8. Manitoba Hydro performing and observing the covenants and conditions on its part to be performed and observed shall and may hold and enjoy the rights, licences and easements hereby granted without hindrance, molestation or interruption on the part of the Grantor or of any person claiming by, through, under or in trust for, the Grantor.

10. Manitoba Hydro undertakes to leave, at no cost to the City, the easement area in a good condition after any work done in connection with any rights granted herein, by adequately compacting the excavated areas in order to avoid any future subsidence and will restore the surface of the easement area and any other area disturbed by the work to the condition it was in prior to the work being done.

Dear Sir:

RE: Lot 5, Block 10, Plan 1507 WLT0
in Lot 313, Roman Catholic Mission Property

Certificate of Title: 1166541

Registered Owner: Diana Rosalyn Thomlison

Encumbrances: Instrument Nos. 1586326 and 87-38569 are registered against
the above Certificate of Title.

This is to certify that I have made the necessary measurements to determine
the position of a one and one-half storey dwelling numbered 534 on the South
side of Doucet Street in the City of Winnipeg and find that the same above
ground level is contained entirely within the limits of the above described
land.

The shed appurtenant to the said dwelling is contained entirely within the
limits of the above described land, except for the Easterly wall thereof
which encroaches onto the adjacent property to the East a distance of 1.95
feet.

There are no encroachments above ground level onto the above described land
by buildings from adjoining properties.

Please note the position of the concrete pad and the fence on Doucet Street.

This survey was made on the 15th day of April, 1994.
