PART 1 – GENERAL FITNESS ASSESSMENT

The goal of the General Fitness Assessment is to provide a simple, safe and standardized approach to assessing the major components of fitness in apparently healthy individuals and to interpret these assessments based on norms and percentiles for Canadians 15 to 69 years of age. The assessment is a strenuous fitness test that measures your capacity to perform essential physical tasks encountered in the field.

The General Fitness Assessment tests are completed one right after the other but there is no time limit. Applicants are to achieve a minimum score of “good” on each fitness assessment test to earn a pass for this section.

1. Aerobic Endurance

Aerobic fitness is measured during a progressive exercise test to near exhaustion on a treadmill. After a standardized 5-minute warm-up, you will walk at 3.5 mph and a 10% grade for eight (8) minutes. To pass the aerobic fitness standard, you must complete the eight (8) minute stage at 3.5 mph and 10% grade.

2. Rest and Orientation

After completing the treadmill test, you will be given a 60-minute rest period. The orientation to these tests will follow, consisting of a 'walk-through' session of each task. This portion will take approximately 30 minutes and familiarize you with testing procedures, providing a suitable warm-up for the following demanding tests.

The orientation and test practice are mandatory and you must complete them before proceeding with the test. You cannot skip sections to conserve energy.

3. *Change Hose Advance Test*

You will drag a charged (full of water) 38-mm (1.5-inch) hose a distance of 45 metres (125 feet). Three 15-metre (50-foot) lengths of hose are "snaked" behind the starting line. You hold the nozzle over your shoulder and advance to the finish line as quickly as possible. Running is not permitted. This test assesses lower body strength and power and must be completed safely in less than 31 seconds.

4. *High Volume Hose Pull Test*

Using a rope, you will pull a bundle of hose weighing approximately 56 kg (123 lb.) a distance of 15 metres (50 feet) over a smooth concrete floor three times. You must stand still during the test and pull the hose bundle towards you using a 16-mm (5/8-inch) rope. This test assesses upper body strength and power and must be completed safely in less than 103 seconds.

5. *Forcible Entry Simulation Test*

You will use a 3.6-kg (8-lb.) "dead blow" sledgehammer to move a forcible entry machine against 1,200 psi as rapidly as possible. This test assesses muscle strength, power and endurance, particularly in the upper body and must be completed safely in less than 45 seconds.

6. *Victim Drag Test*

You will drag a mannequin weighing 68.2 kg (150 lb.) a total distance of 30 metres, with the mannequin lying face-up on the floor. You will lift the mannequin and walk backwards for 15 metres, turn around a traffic cone and return to the start line as quickly as possible. This test assesses muscle strength and endurance and must be completed safely in less than 49 seconds.

7. *Ladder Climb Test*

You will climb a 7.3-metre (24-foot) ladder to the tenth rung and return to the floor as quickly as possible, repeating the task five (5) times. This test assesses muscle strength, endurance, and anaerobic capacity and must be completed safely in less than 109 seconds.

8. *Equipment Carry / Vehicle Extrication Test*

You will carry small (18-kg or 40-lb.) and large (36-kg or 80-lb.) vehicle extrication tools (the "Jaws of Life") a total distance of 30 metres (100 feet). In addition, you will lift and hold the 18-kg tool in specific positions that simulate the work required to remove a vehicle door. This test evaluates the strength and endurance required to lift, carry and use heavy tools in rescue situations. This test must be completed safely in less than 270 seconds.

The decision is based on your competencies, skills, and job fit demonstrated throughout the recruitment process.

If you are placed on an eligibility list, this means you have successfully advanced through the recruitment process and will be considered further for a future recruit class for this position.

NOTE: The Department's hiring needs are difficult to predict and fluctuate as a result of a number of factors (e.g. retirements, city growth, funding / resource availability, etc.) which can impact the number of yearly recruit classes for this position.

Prior to offering employment, the City of Winnipeg requires that new hires are reference checked to assess the candidate's suitability for the position. If and when the Department considers an applicant for a conditional offer of employment, at that time reference checks will be conducted. Selected candidates will be provided a conditional offer of employment, and will be scheduled to undergo and pass a medical examination administered by the City of Winnipeg's Occupational Health Branch which includes illegal drug use testing. A candidate must pass both the reference checks and the medical examination to successfully be hired into a recruit class.

Any outstanding documentation from the Checklist of Requirements – Section A and B will be required prior to an offer of employment.

Those who did not meet the requirements of Step 7 will be advised in writing that their conditional offer of employment is rescinded and of their eligibility to re-apply.
