Supplementary Information

1. In addition to obtaining the required building permits, the applicant must obtain approvals and Street Cut Permits from the Public Works Department for all remedial work and improvements that occur in the street right-of-way including underground, surface and overhead work. Drawings and specifications shall be submitted for approval through the Underground Structures Branch, ugsapproval@winnipeg.ca, identifying the scope and details of the work. Work in the right-of way shall not commence until approvals are received through the Underground Structures review and the required Street Permits are in place. Failure to obtain the necessary approval, permits or inspections will result in removal of the works by the applicant at their own cost.
2. Crossing permits are required when crossing a City right-of-way onto private property at a location other than at an existing driveway approach, such as mounting a curb and/or crossing a sidewalk. Crossing permits can be obtained by emailing pwd-uos-permits@winnipeg.ca.
3. Private Access By-law No. 49/2008 regulates the modification of rights-of-way to provide access to private real property in the City. An approval is required for the construction, modification, relocation or removal of a private access or walk. A private access permit is required prior to the construction of private accesses and walks.
4. The City of Winnipeg Standard Construction Specifications are available online at <https://www.winnipeg.ca/matmgt/Spec/Default.stm> and are applicable to all works within the City right-of-way.
5. A 'Use of Streets' permit will be required where any portion of a street (public right-of way) is encumbered, obstructed or occupied. See sections 4.06, 4.07, 4.08, 4.09 & 4.10 of the Streets By-law No 1481/77.
