

North East Exchange District Engineering Study

OPEN HOUSE

The North East Exchange District is changing significantly. An area that was once primarily industrial is steadily evolving into a diverse neighbourhood of businesses, cultural venues, educational facilities and residences.

Since January 2014, the City of Winnipeg has been engaging stakeholders and the public to identify the types of infrastructure improvements needed and desired to complement future development and ensure the area is inviting and accessible for all.

The City will present the proposed infrastructure improvements and implementation plan at an upcoming open house. Please join us at this event to view the proposed improvements, provide your feedback and discuss your thoughts with project team members.
