---

Please be advised the above Thin Bituminous Overlay (TBO) is scheduled to begin this summer/fall.

**Construction start:** Week of September 2, 2022, weather permitting  
**Approximate Duration:** Approximately three (3) weeks, weather permitting

- Reduction to one lane for local access vehicular traffic

The work will include adjustment of catch basins and manholes, concrete pavement repairs, milling of existing asphalt overlay, replacement of missing and damaged curbs, renewal of curb ramps, localized sidewalk repairs, boulevard restoration, and asphalt overlay.

During construction, on-street parking will be prohibited, and one lane of local-access traffic will be maintained. In these situations, you will be notified at least 24 hours prior to the disruption of access.

Transit service will be maintained throughout construction, though temporary bus stop relocations or closures may be required at various times.

Garbage and recycling will continue to be picked up at regular locations and times. The contractor may relocate bins if required.
