# CITY OF WINNIPEG CONSTRUCTION NOTICE

**TO: RESIDENTS AND BUSINESSES**

**RE: 2022-2023 REGIONAL STREET PAVEMENT RECONSTRUCTION JUBILEE AVENUE**

---

Please be advised Jubilee Avenue between Pembina Highway and Cockburn Street is scheduled for reconstruction in Summer 2023. At the end of this construction season Jubilee will have been completely reconstructed with new concrete pavement, curbs, and sidewalks from Pembina Highway to Osborne Street.

**Construction starts: May 8, 2023**  
**Expected end: October 2023**

**Traffic implications during construction:**

- We will maintain one lane in each direction on Jubilee for the duration of construction
- Traffic may be reduced to a single direction for short periods of time to accommodate median lane paving
- Cockburn Street South will close from Jubilee to Churchill Drive

**Impact on trees:**

- We have designed the project to minimize the loss of trees and will – with few exceptions – remove only those already slated to come down due to disease or natural death
  - We will remove seven mid-size trees from the south boulevard between Pembina Highway and the Jubilee Overpass ramp to accommodate a mixed-use path
  - We will also remove some trees to accommodate a connection to active transportation infrastructure on Churchill Drive

**Elm Park bridge access:**

- Pedestrian access from Jubilee Avenue to Riverdale Street and the Elm Park footbridge will be maintained during construction
- A new permanent crosswalk at Jubilee will be added to accommodate safer crossings

**Additional information:**

- We will install temporary street light poles to maintain street lighting during construction
  - We will remove them when construction ends
- Emergency access will remain throughout construction
- Garbage and recycling collection will not be affected
  - You are asked to continue to place bins out on collection day, the contractor will relocate the garbage and recycling as needed.
  - Residents are asked to put their house numbers on their collection bins so that the crews can return them to the proper locations.
