## **CITY OF WINNIPEG CONSTRUCTION NOTICE**

**TO: Residents and Businesses on Taylor Avenue**  
**RE: 2020-2023 Corydon/Stafford/Taylor Pavement Renewals Program – Taylor Avenue**

Please be advised the reconstruction of Taylor Avenue between Harrow Street and Pembina Highway is anticipated to begin in May 2023. This work is being tendered with the Stafford Street roadway construction and should the successful Contractor have sufficient forces, some work could potentially be undertaken on Taylor Avenue in 2022. We are therefore providing this preliminary advance notice to advise of the planned work.

Construction Start: May 2023

Duration: To be complete by late September 2023

Traffic Implications: Traffic will be reduced to one lane in each direction between Harrow Street and Stafford Street and one lane in the eastbound direction between Stafford Street and Pembina Highway.

The work includes complete roadway and sidewalk reconstruction with associated drainage improvements, sewer repairs, new streetlighting, and replacing and improving traffic signals. The existing roadway and sidewalks will be removed, underlying material excavated, and new pavement structure and pavement constructed. A new sidewalk will be constructed along the south side of Taylor Avenue. Landscaping will be completed to tie existing properties into the new construction.

Throughout construction, traffic will be restricted to one lane in each direction between Harrow Street and Stafford Street and one lane eastbound between Stafford Street and Pembina Highway. Westbound Taylor Avenue will be closed to traffic between Stafford Street and Pembina Hwy. On street parking will be temporarily removed as required by the stage of construction. Garbage and recycling pickup will remain unchanged.

Pedestrian access to residences and businesses will be maintained throughout construction. Transit service will be maintained although some stops may be temporarily relocated or closed for short periods of time during construction.

The work will be completed in multiple stages which will require several traffic control configurations. Closure of side streets and approaches will be required at different times during construction; however, we will make every effort to minimize impacts to traffic and pedestrians. Closures of private approaches will be discussed with the affected business/resident prior to the closure taking place.

If you have accessibility concerns, special access requirements, or any other questions regarding this construction, please contact Derek Wiebe C.E.T. at (204) 292-6415 or by email at [Derek.Wiebe@Stantec.com](mailto:Derek.Wiebe@Stantec.com)

Sincerely,

**Kevin Rae, P. Eng.**
