

Rue des Trappistes Culvert Replacement and Road Reconstruction

PUBLIC ENGAGEMENT SUMMARY

October 2017

Background

The culvert at Rue des Trappistes and Westendorf Coulee needs to be replaced as it is at the end of its service life, and is partially collapsed in several locations. A preliminary design study was completed in 2016, and the project is now moving ahead with culvert construction and road renewal.

Engagement

The goal of the public engagement program was to inform residents of the upcoming disruptions to road access, to gain insight on how to mitigate those disruptions, and to increase understanding around the need for the project. Engagement methods to inform the public and gather input included a website, comment form, and information session.

Promotion

- Advertised in the Canstar Sou'wester on September 20, 2017 (see Appendix 3).
- Advertised in La Liberté on September 20, 2017 (see Appendix 4).
- Notice of event included in Public Engagement Newsletter on September 14, 2017.
- Three tweets and three Facebook posts were issued from City of Winnipeg accounts (see Appendix 1).
- 103 households impacted by the project were delivered notices (see Appendix 5).
- News release issued to local media outlets (see

Appendix 2).

- The area councillor also issued a notice of the event to residents via email.

What We Heard

In response to the website and information boards presented both online and in-person, we heard that 84% of survey respondents either agreed or strongly agreed that the information provided was helpful.

89% of respondents either agreed or strongly agreed that the purpose of the project was clear to them. See appendix 7 for full survey results.

Access to school routes could be interrupted by construction. The Seine River School Division's transportation supervisor was invited and attended the information session. The project team is currently looking at options to accommodate a school bus turn around at the east bank of the creek to minimize disruptions to local school bus transportation.

Next Steps

Construction on the culvert at the Westendorf Coulee will begin in November 2017. From November 2017 to March 2018, Rue des Trappistes will be closed at the culvert site. During road reconstruction, between May to July 2018, Rue des Trappistes will maintain westbound access only between Pembina Highway and Rue du Monastere.

Engagement Activities		
Date(s)	Technique	Description
Launched on Sept. 13, 2017	Website	Page included a timeline, map, project background and links to the information session boards. At last check-in it has been accessed 180 times.
Sept. 13 – Oct. 4, 2017	Online/Exit Survey	Fourteen surveys collected at information session and five completed online.
Sept. 27, 2017	Information Session	Held at the Fraternal Order of eagles No 3870, 3459 Pembina Hwy from 5:30 p.m. – 7:30 p.m. Roughly 30 people attended.

Winnipeggers invited to public information session on Rue des Trappistes culvert replacement and road reconstruction

Winnipeg, MB – Winnipeggers are invited to attend a public information session on the replacement of a culvert and road reconstruction on Rue des Trappistes on Wednesday, September 27, 2017.

The culvert at Rue des Trappistes and Westendorf Coulee needs to be replaced as it is at the end of its service life, and is partially collapsed in several locations. A preliminary design study was completed in 2016, and the project is now moving ahead with construction.

The project includes culvert replacement starting in November 2017, and road reconstruction from Pembina Highway to Rue du Monastere starting in spring 2018.

The public information session is intended to provide residents with the construction plan and schedule. Residents will have the opportunity to view the design concepts, ask questions and talk with project team members, and provide comments on the project.

Event details

Date: Wednesday, September 27, 2017

Time: 5:30 p.m. – 7:30 p.m.

Location: Fraternal Order of Eagles No 3870, [3459 Pembina Hwy.](#)

PUBLIC INFORMATION SESSION

Rue des Trappistes at Westendorf Coulee Culvert Replacement and Road Reconstruction

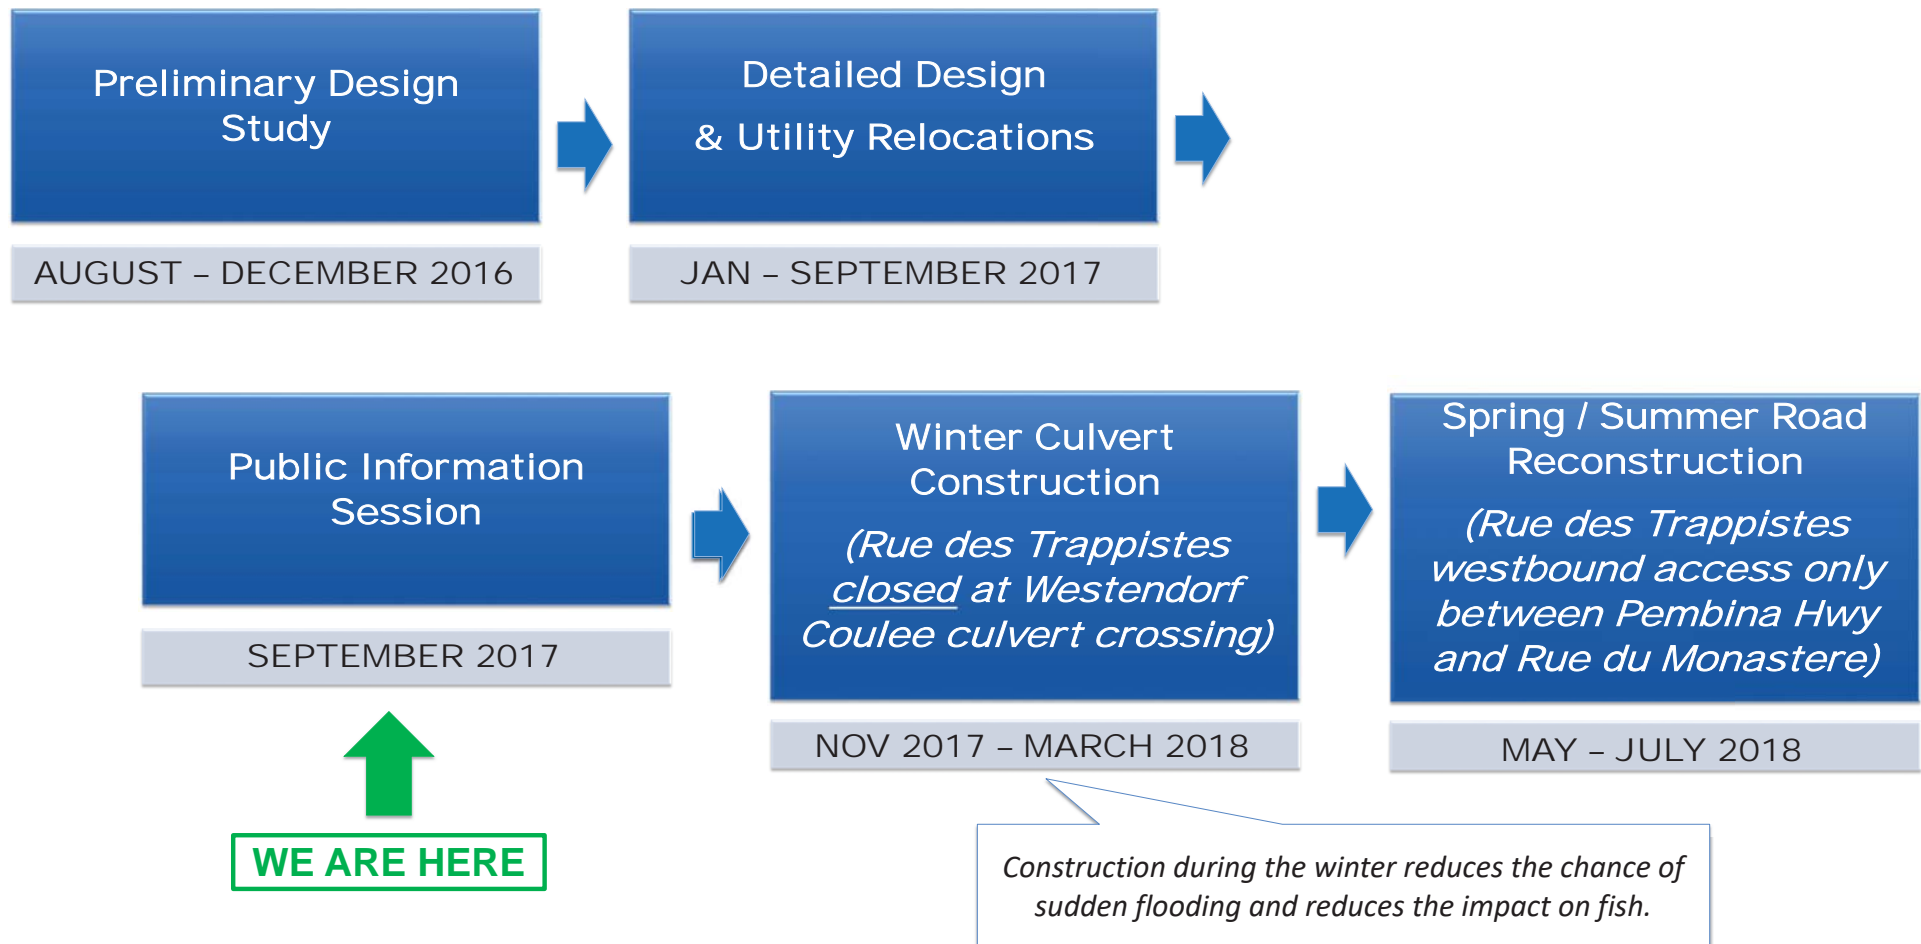

WELCOME

5:30 p.m. – 7:30 p.m.
September 27, 2017

PROJECT TIMELINE

Below is the approximate timeline for the project.

PURPOSE OF PROJECT

The purpose of this project is to reconstruct the roadway pavement on Rue des Trappistes, and replace the culvert crossing at Westendorf Coulee under Rue des Trappistes, to improve its strength, safety and functionality.

The roadway pavement and creek culvert are at the end of their service life:

- The existing creek culvert is severely rusted and partially collapsed, is too small for the potential creek flows, and its size must be increased.
- The culvert channel needs erosion protection.
- The roadway crossing over the culvert does not meet current roadside safety standards, and there is no sidewalk over the creek culvert crossing.
- The road is due for pavement reconstruction.

Sinkhole over culvert May 30, 2016

Road due for pavement rehabilitation

SITE LOCATION

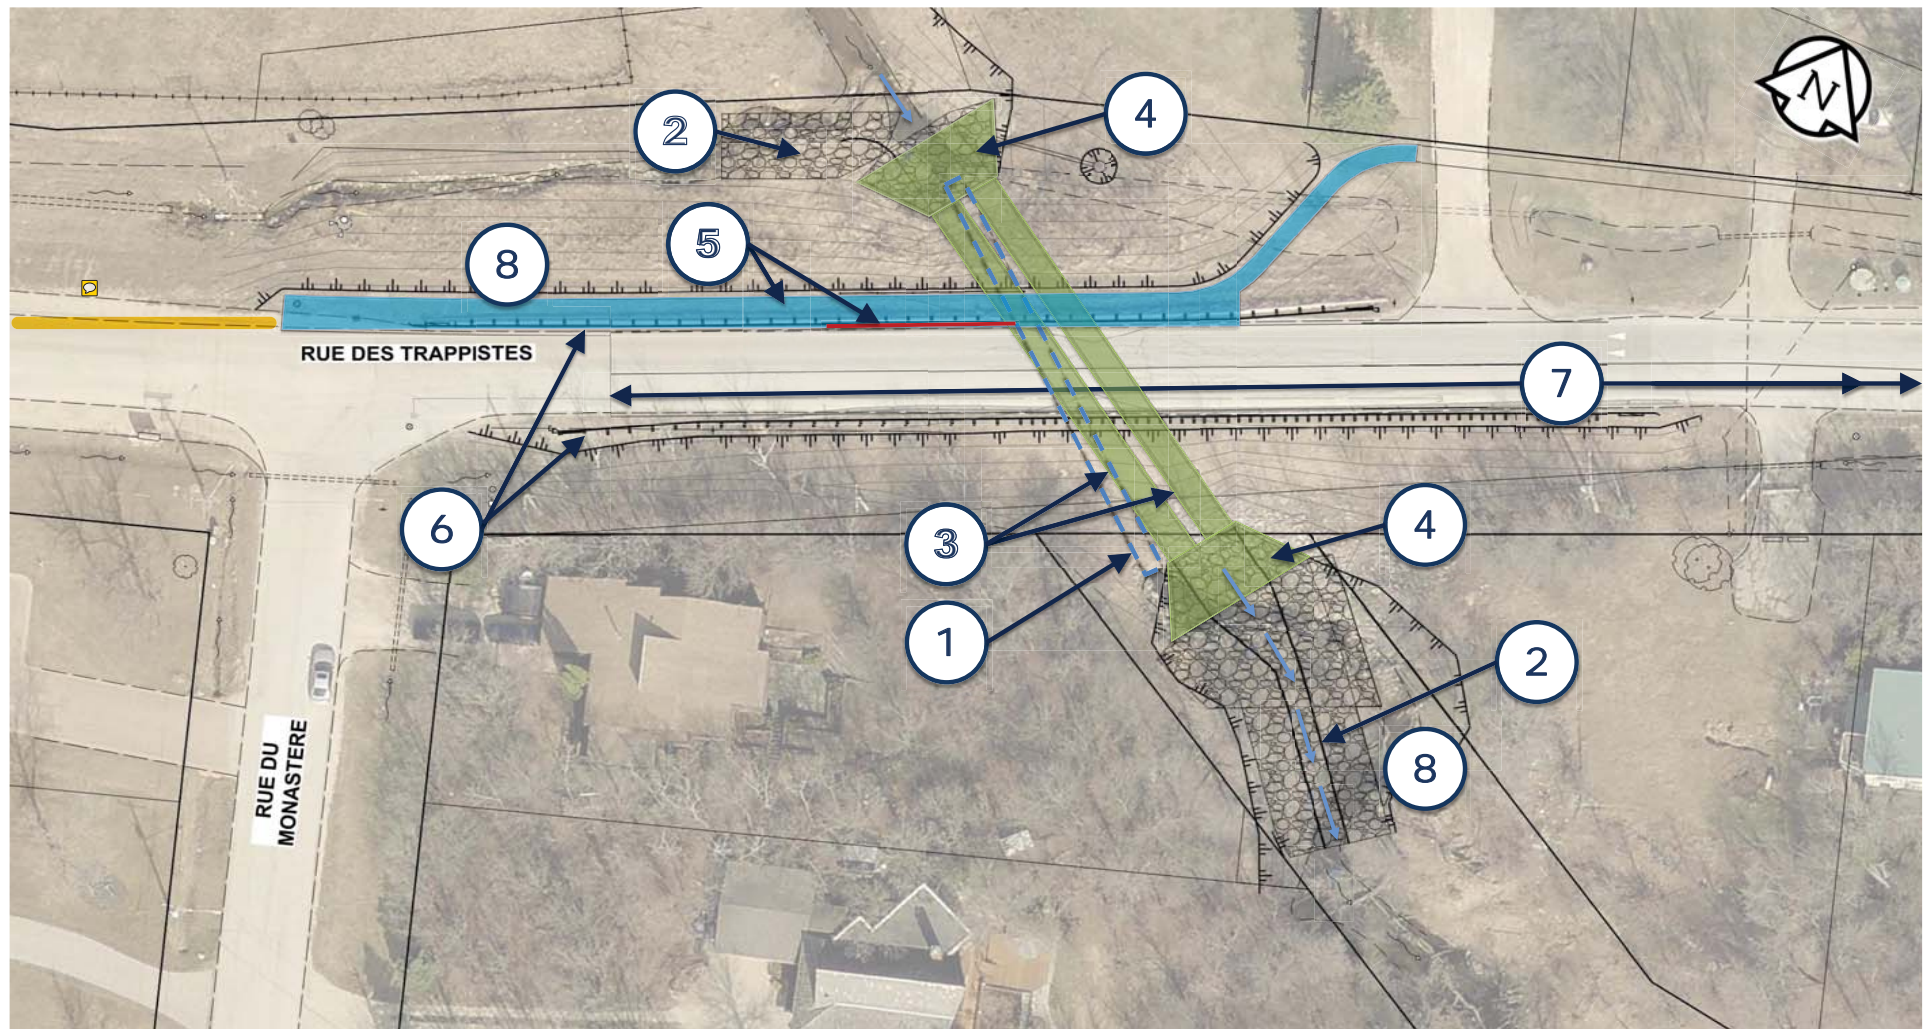

Proposed Culvert Crossing Construction

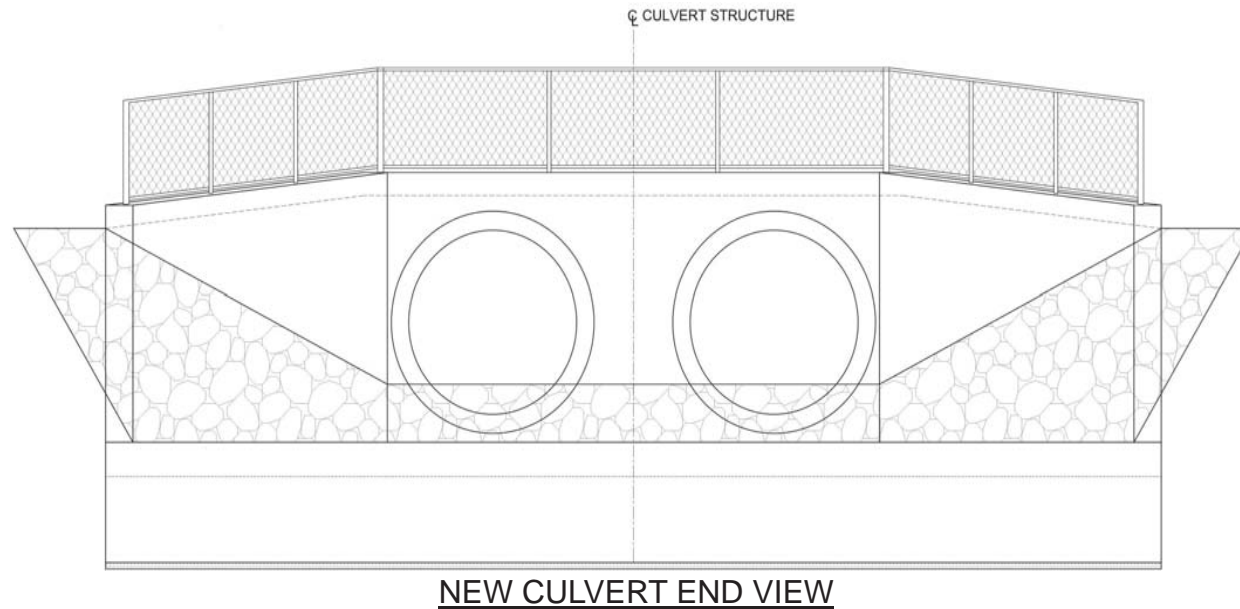

See the following board for construction locations:

- ① Demolish and remove existing metal creek culvert.
- ② Re-align downstream creek channel, place rock rip-rap in creek channel and in north ditch where required.
- ③ Install new precast concrete pipe creek culverts.
- ④ Construct new cast-in-place concrete headwalls.
- ⑤ Construct new sidewalk and safety fence over creek culvert crossing.
- ⑥ Construct new traffic barrier rail over creek culvert crossing.
- ⑦ Reconstruct Rue des Trappistes roadway pavement from Pembina Highway to Rue du Monastere.
- ⑧ Site restoration, seeding and tree planting.

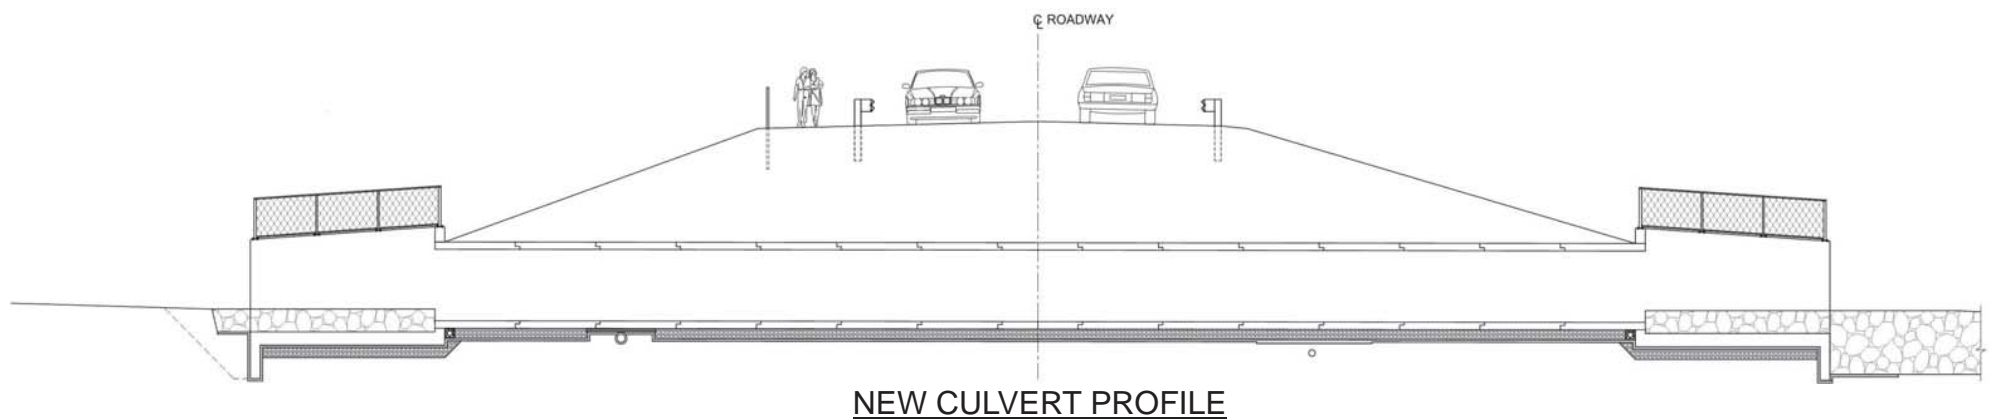

Proposed Culvert Crossing Construction

Proposed Culvert Crossing Construction

Example of an existing culvert in Winnipeg that is similarly shaped as the proposed culvert at Rue des Trappistes over Westendorf Coulee.

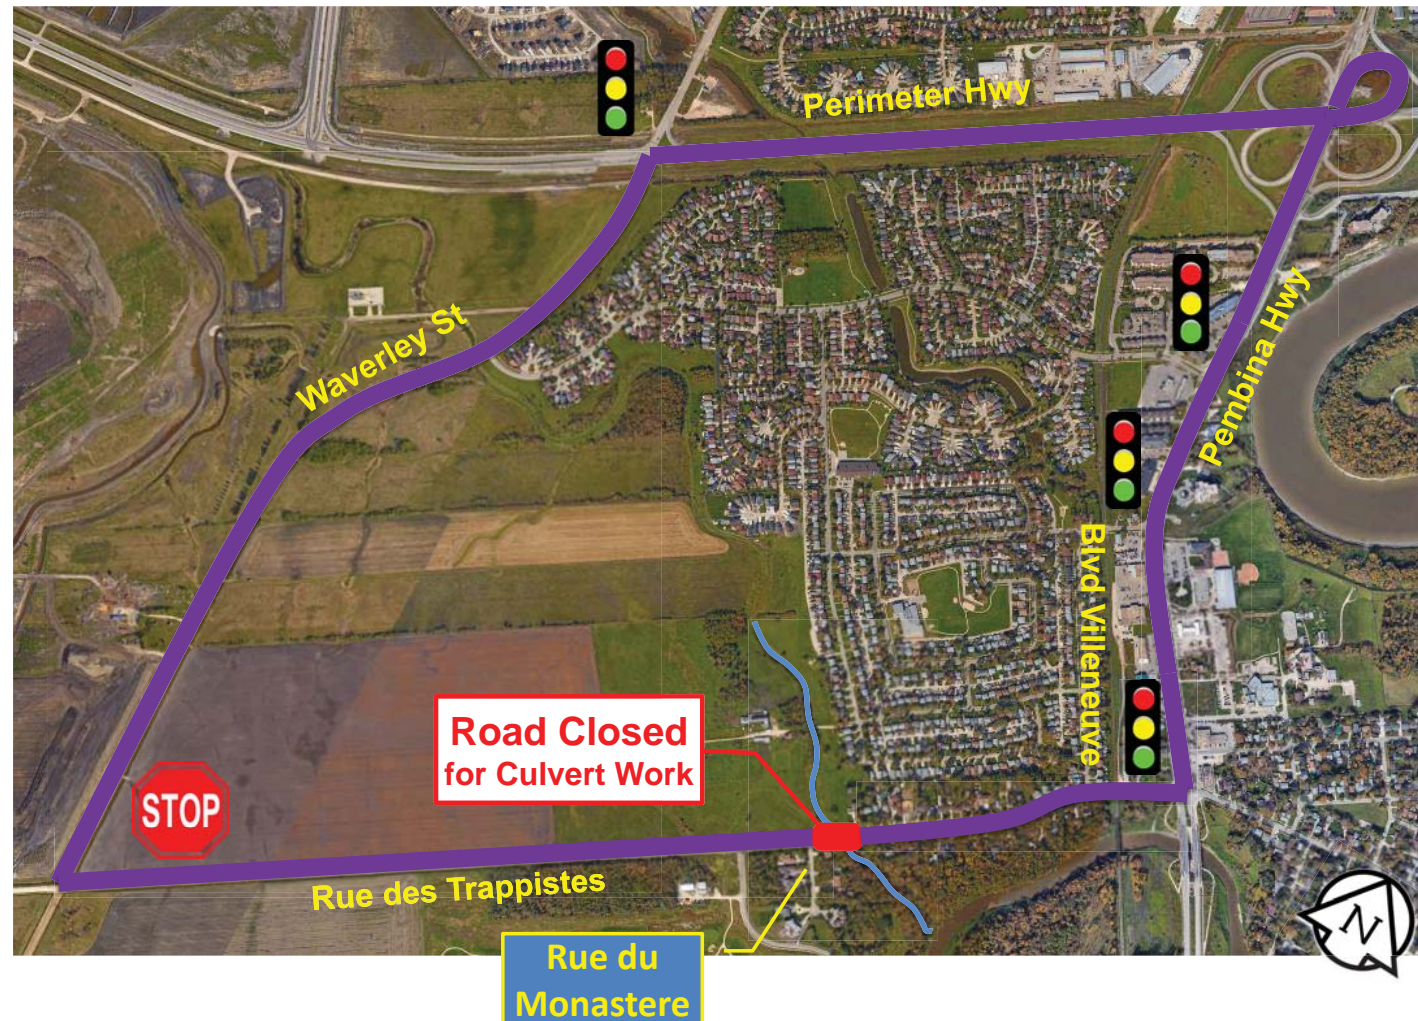

Traffic Management Stage 1: Winter Culvert Construction

Stage 1: Winter Culvert Works

- November 2017 – March 2018
- Culvert crossing will be closed to all traffic (vehicles and pedestrians) during construction.

LEGEND:

-  - ALTERNATE ROUTE
-  - ROAD CLOSED

Traffic Management Stage 2: Spring / Summer Road Reconstruction

Stage 2: Spring Road Works

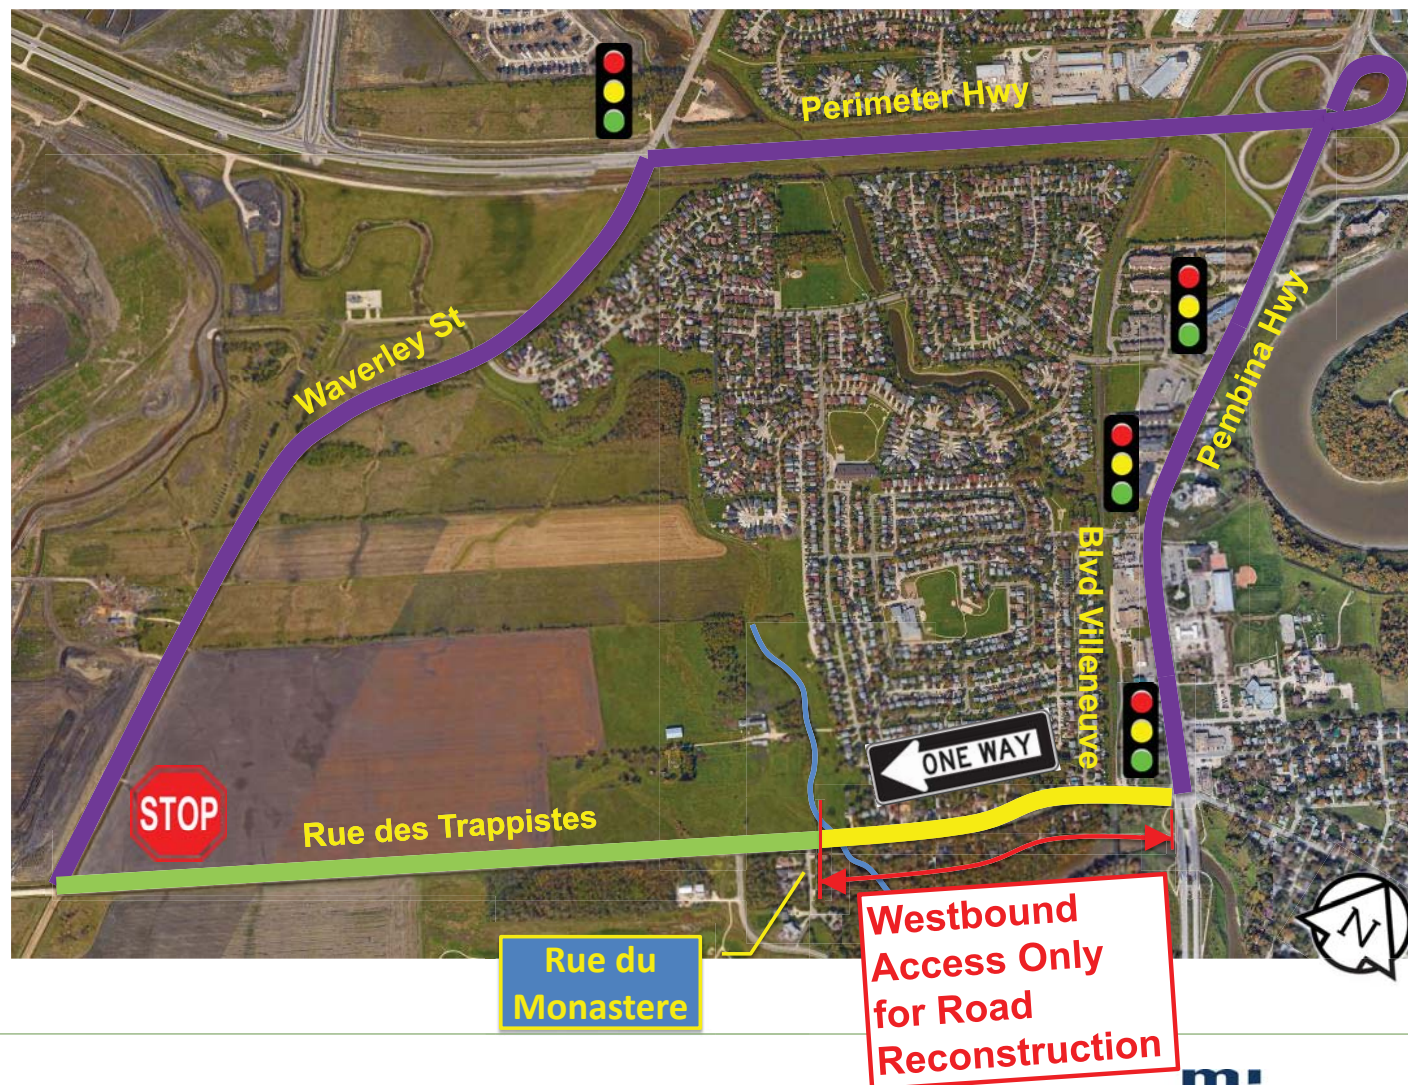

- May 2018 – July 2018
- Westbound access only for vehicles (one way) during road reconstruction from Pembina Highway to Rue du Monastere (partial closure).

Work generally consists of:

- Road reconstruction.
- Rehabilitate sidewalk.
- Tie-in private approaches to road / sidewalk.
- Site restoration and seeding.

LEGEND:

-  - ALTERNATE ROUTE
-  - WESTBOUND ACCESS
-  - 2-WAY TRAFFIC

PUBLIC INFORMATION SESSION

Rue des Trappistes at Westendorf Coulee Culvert Replacement and Road Reconstruction

THANK YOU FOR ATTENDING

Please take time to fill out the comment form provided and drop it in the box near the entrance.

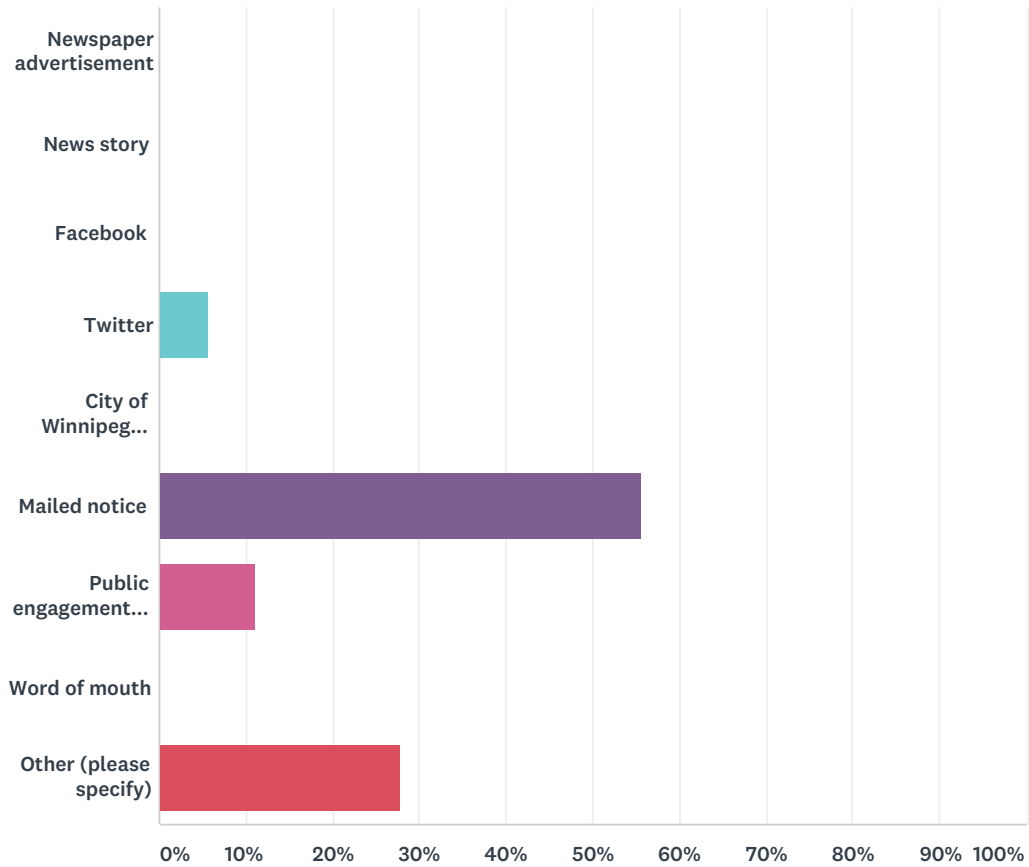

Comments can also be returned by mail or email to the address shown on the comment sheet.

The presentation boards and an online survey are available at the project webpage : winnipeg.ca/RueDesTrappistes

Answered: 14 Skipped: 5

#	RESPONSES	DATE
1	I have no issues - live in Fort Rich and golf at Southwood.	10/19/2017 2:15 PM
2	Very concerned about kid not having access to school!	10/19/2017 2:14 PM
3	Should go further west to road into trappistes and golf course	10/19/2017 2:13 PM
4	The did not seem to know about Waverly work? I do with that there was some logic explained of the area project over a three year term. Piece work seems to be the procedure. And that opens up to a great deal of not considering all factors. All projects do effect each other after all. P.s. everyone was nice and tried to be helpful.	10/19/2017 2:08 PM
5	Would prefer concrete road instead of blacktop. (Better way to finish a large project) and because of so much more golf course traffic	10/19/2017 2:05 PM
6	We need to work together all of us and stay informed of all information. The more residents informed regardless of rural or City we work together , we can get this done. Let's stay informed	10/19/2017 2:02 PM
7	Good to come by and walk thru larger display and speak to those aware of project like X. I'm here on behalf of the St. Norbert Arts Centre. It largely (the project) corresponds with our slow period - so I have a remaining concern that the more exposed west length still open of Rue des trappistes and Waverly to Perimeter is lowed during windy/snowy weather as timely as possible.	10/19/2017 2:00 PM
8	The roadway west of the culvert is also failing and will need work in the near future (sliding problem)	10/19/2017 1:56 PM
9	Re: speed bumps on Des Trappistes. Would City concider placing speed bumps btw Villeneuve + Pembina Highway? At least one Villeneuve + Tacks. * Note: buses traverse speed bumps at Walmart mall corner of Kenaston + McGillivray	10/19/2017 1:55 PM
10	I live in Ritchot on Waverly. This road is important to us for school bus and as an access to St. Norbert. Glad it will be upgraded! School bus detours will be an issue - glad to see Seine River SD transportation was here as well. The project will be an inconvenience, but is needed, so we will at get through it.	10/19/2017 1:51 PM
11	Good graphics consultant staff very helpful	10/19/2017 1:49 PM
12	Concerned about notification of water interruption. Concerned about increased erosion on west side of creek.	10/19/2017 1:48 PM
13	We were unable to attend the public information session as we were on vacation. Will the speed humps be put back in when Trappistes is repaved (we certainly hope so) and what format will they be, if so. Again, hopefully something more effective than what is in place now. Many thanks.	10/1/2017 11:49 AM
14	The why matters	9/21/2017 10:09 AM
