

# Saskatchewan Avenue Road Reconstruction and Sturgeon Creek Culvert Replacement Public Open House

Saskatchewan Avenue is a regional street in the City's Northwest quadrant crossing Sturgeon Creek over a box culvert. The box culvert has been found to be deficient to handle Sturgeon Creek flows during spring run-off and heavy rain event conditions. A preliminary design has been developed for replacement of the culvert with a high-level bridge and road reconstruction.

You are invited to attend an Open House to review and provide feedback on the preliminary design concept.

For more info, to view the design concept, or if you would like to provide feedback online, please visit:
