

NOTICE OF CONSTRUCTION

Taché Promenade

December, 2017

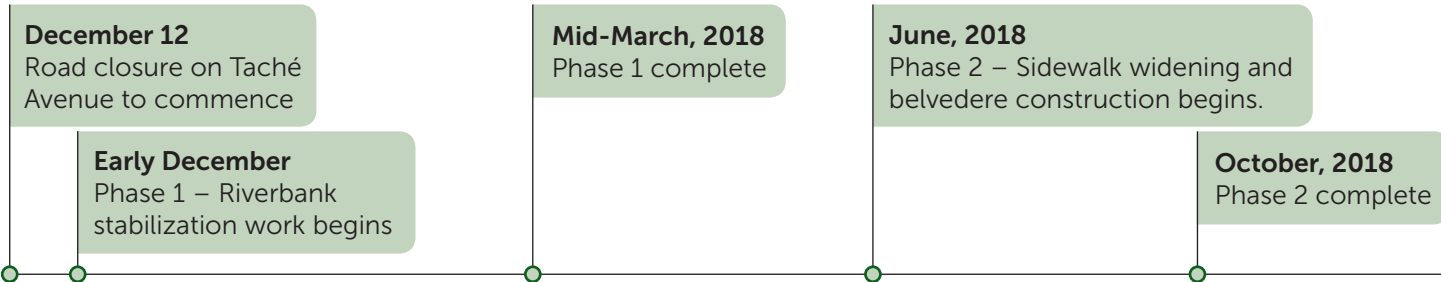

The first phase of construction on the Taché Promenade project is expected to begin in early December, 2017, and will be complete by mid-March, 2018. During this period, the southbound lane of Avenue Taché and the west sidewalk will be closed between approximately Provencher Blvd. and Rue Despins. Additional road closures are planned during the remaining construction works to be completed in the summer of 2018, including sidewalk widening, retaining wall installation, and construction of the belvedere pedestrian structure (tree top lookout).

Council approved funding for this project on September 27, 2017. Following a public information session on October 17, 2017, construction documents were finalized and a construction contract has been awarded to Maple Leaf Construction Ltd. to complete the proposed works.

Construction updates will be communicated to area residents and businesses as the project progresses.
