

Adult nuisance mosquito control program suspended

The adult nuisance mosquito fogging program is suspended as of today. All the scheduled insect management areas were completed last night. We will continue to review trap counts and resume fogging if necessary. If the program resumes, a public service announcement will be issued at least eight hours in advance.

Buffer zones

Buffer zones make it so we can't apply DeltaGard within 90 metres of a specific property.

You can apply for a buffer zone adjacent to your principal residence. Applications must include a letter and photo ID linking you to the address in question. They can be submitted:

- Via an [online service request](#)
- By fax to 311
- In writing to the Insect Control Branch at 3 Grey Street, Winnipeg MB R2L 1V2
- In-person at [1539 Waverley St.](#)

We require a minimum 72-hour turnaround time.

Do your part

We also encourage you to stop mosquitoes from multiplying on private properties. You can eliminate standing water by following our [#draindumpcover](#) protocol:

- Drain water from eavestroughing or unused containers
- Dump standing water from containers like wheelbarrows, bird baths, and kiddie pools when they aren't in use
- Cover rainwater collection containers and undrainables like larger pools and water tables

You can also fill low-lying areas where water pools and treat your properties with commercially available pesticides.

Register for notification

We provide an automated daily telephone and email notification system for insect control activities. [Register online](#) or by [contacting 311](#).
