Adopt-A-Park

**The City of Winnipeg
 Public Works Department
 Parks and Open Space Division**

What is Adopt-A-Park?

Adopt-A-Park is a volunteer program in which citizens of Winnipeg can assist in the enhancement and preservation of local parks and green spaces. Volunteers can provide a valuable service that is in addition to the regular park maintenance of the city's 937 park sites.

Why should I volunteer?

The Adopt-A-Park program is fun, simple and sociable. Enhancement of our green spaces encourages community pride, helps reduce vandalism, and the skills developed are a source of self esteem.

Who can get involved?

Volunteers are individuals, families, corporations, schools and organizations who share a common interest in keeping Winnipeg's parks and green spaces "GREEN". No special skills are required and how often you volunteer depends on how much time you can spare.

How do I become an Adopt-A-Park volunteer?

Contact your local Parks and Open Space Technician whose number can be found on the back of this pamphlet and they will assist you in choosing an activity and location that suits your interests. All volunteer involvement is coordinated to complement maintenance schedules of Park Services staff and to ensure joint efforts realize maximum results.

How do I qualify for an Adopt-A-Park Sign?

Signage identifying a park as an Adopt-A-Park site is available to volunteer groups/individuals who are willing to make a minimum two year commitment to the project. This not only recognizes the efforts of volunteers in the community, but also is exposure for the program itself.

What kinds of activities are involved?

Parks Services staff work within a regular park maintenance program that includes such activities as grass cutting, litter pick up, weeding of shrub beds, raking protective surfacing under play structures, spring/fall clean up, etc. Adopt-A-Park volunteers help to beautify parks by providing some or all of these services on a more frequent basis. We are also open to your suggestions.
