

Building Energy Disclosure Project:

An initiative of
Winnipeg's Climate
Action Plan

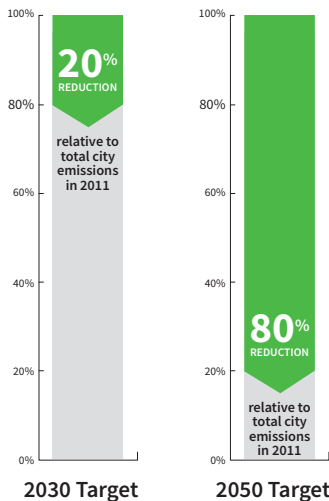

Join the Building Energy
Disclosure Project and unlock
the value of energy efficiency
performance and data
transparency of your building.

What is the Building Energy Disclosure Project?

The Building Energy Disclosure Project (BEDP) is an exciting initiative aimed at helping commercial and institutional building owners better understand the energy performance of their buildings while supporting reductions in energy consumption and GHG emissions.

The voluntary project assists organizations in identifying, developing and implementing energy efficiency improvements by providing participants with details on their buildings' energy usage.

Winnipeg's GHG emissions targets:

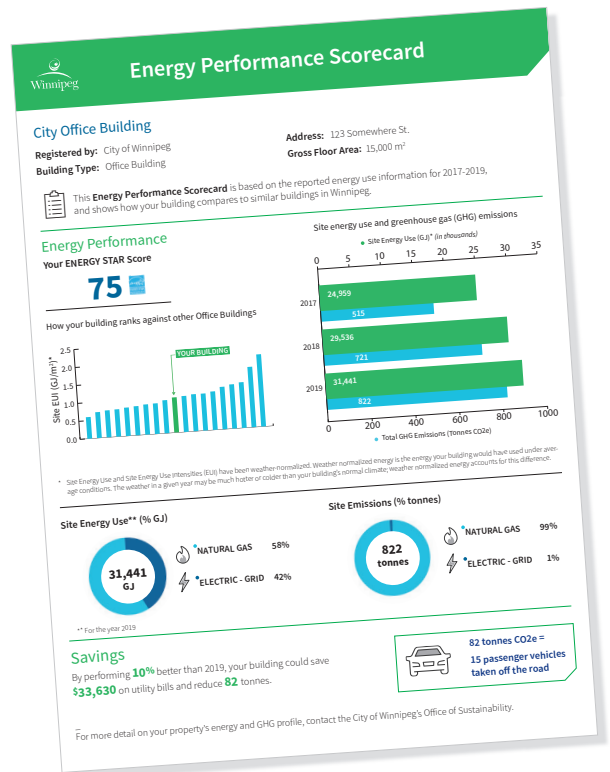

Who is eligible?

To participate, buildings must be:

- Located within the City of Winnipeg limits
- A minimum of 20,000 sq. ft.*
- A minimum of 70% occupancy
- Commercial or institutional buildings*
- Willing to share the full energy profile of your building through ENERGY STAR Portfolio Manager®

* See Project Guide for more detail

How does it work?

Participants will receive:

- An Energy Performance Scorecard highlighting their building's energy usage and GHG emissions and comparing participating building types and national averages
- Resources and information on available incentives for owners to improve their building's energy efficiency
- Access to free custom educational workshops on benchmarking and ways to reduce energy use
- Recognition in the final project report and project disclosure map

Registration and workshops are free of charge and any eligible building can participate!

You can't manage what you don't measure

Benchmarking is the first step in increasing your building's energy efficiency. Energy efficient buildings are environment friendly, provide better user comfort and are less expensive to operate!
