3/4" meter	\$13.05	

Explanation of Charges

Sewer and Water Charges

These charges are based on the amount of water you use as measured by the water meter.

Quarterly or Basic Charge

This charge, paid by all customers regardless of how much water is used, is based on meter size and the number of days in your billing period. It covers the cost of your water meter, customer service, billing, and postage. This charge is based on a 90-day billing period. If your billing period is more or less than 90 days, your quarterly charge will change slightly.
